Dear Friends,

Ever since I experienced a miraculous healing upon my son's injured hand I have pondered the mechanisms behind spiritual healing and the states of consciousness required to achieve it. Jesus Christ was reported to have healed the severed ear cut off by Peter and to have projected healing force over distances by telepathic methods. The same power to materialize and dematerialize human proteins and cell structures is reputed to be done by healers in several different cultures, but at present the medical profession rejects this as fraud, although films of healings continue to be brought back by patients who are cured by hands which appear to cut into the flesh without implements and supposedly instantly heal it back. These miracle healers are reputed to use sleight of hand and animal tissue to deceive the gullible.

I visited the Philippines to see some of these healers at work but I never became convinced of the actual phenomena, although second-hand reports of successful spontaneous healing were given to me. What I saw could be duplicated easily by myself by sleight of hand and hypnosis. No healer would give me any of the pieces of tissue that I saw removed day after day. It is hoped that further research and actual chemical testing of those tissues in hospital laboratories by recognized scientists will one day establish once and for all what is genuine. This will enable us to discover the principles behind this incredible power of the human mind. I know instantaneous healing can be done because of my own son's hand. But that was done under crisis conditions and through intense prayer. I would find it difficult to reach that intensity again on a daily basis, yet because it happened I cannot deny that it can happen elsewhere—in Brazil, in Africa, in the Philippines, in your home, or right in your own body. It was to discover a method of detecting the truth or falsity of these energies that I invented the new science of *Supersensonics* which was known to the ancients.

It is to this end that I am gathering the materials, photographs, samples and independent testimony that, when published, will make RISHE one of the foremost centers of new age healing research in the world. For Christians this must be fundamental to establish the validity of the world's greatest healer beyond the level of mere belief. For other religions it must also prove the supremacy of mind over matter, the power of consciousness over the nucleic acids of every cell, the power of cosmic intelligence over our very existence and life.

All my life, since that miraculous healing, I have looked for this superforce to manifest itself in a scientific way. Most of my books show the structure of man's many dimensions of consciousness. But the transfer of this practical healing power and the harnessing of this superforce at the physical level has eluded mankind. In *Supersensonics* we have a direct intuitive access to it and in the future we hope to have convincing answers concerning the spiritual healing phenomenon. Until then we must be grateful for the etheric and radionic type of spiritual healing which our research team has now worked on for several years. Some aspects of this are described by Dr. Beasley in this book

Christopher Hills

Christopher Hills, Ph.D., D.Sc.
Director
University of the Trees

RISHE

The Research Institute for Supersensonic Healing Energies, RISHE, is a newly formed branch of the *University of the Trees* devoted to practical, applied research in subtle energy therapeutics. This is a generic term referring to a broad range of psychotronic, radiesthetic, radionic, homeopathic, psionic and related approaches dealing with the analysis and treatment of the human energy-field. The common thread that ties together all those who use a subtle energy approach to health maintenance—whether professional or lay—is a concern for what is occurring at one's subtle energy-field level and what implications this has for different aspects of physical, mental, emotional and spiritual health. RISHE, then, is devoted to the health of the whole person and is exploring new ways for detecting and eliminating energy-field imbalances at the deepest levels of our being. This research effort has been significantly strengthened by the use of several new and potentially revolutionary instruments which we have developed and are now offering for the first time to the general public for research purposes.

RISHE SERVICES

- Personal consultation using *Supersensonics*
- Staff training in Subtle-Body Analysis for health care organizations (In-service training by special arrangement).
- Joint research with medical and health care groups
- Subtle-Body Behavioral Research: Applying the broad range of *Supersensonic* healing techniques to the behavioral problems of particular institutions, e.g. prisons, mental hospitals, etc.
- Personalized Subtle-Body Analysis training for health care professionals
- Homeopathic Spa Bath applications
- Lectures ● Seminars ● Creative Conflict
- Aura balancing ● Dream analysis
- Shiatsu massage ● Luscher Color Test
- Publication of new research

SEMINAR AND LECTURE TOPICS

Healing with Magnets

Researchers have found that simple permanent magnetic fields can be used to help correct various kinds of physical and emotional disorders including some cases of pain. Magnetic fields properly applied can also accelerate the healing process of wounds and menopause, while magnetically energized drinks vitalize the internal organs.

Healing with Homeopathy, Bach Flower Remedies & Biochemical Cell Salts

Every plant, flower and mineral in Nature has its own unique vibration which can be used to help heal some battered part of our body or psyche. The Homeopathic and Ayurvedic systems of healing recognize well over 2,000 substances with healing properties when correctly applied according to their respective systems. The Bach Flower Remedies specialize in mental, emotional stress problems, and effect healing by first easing the emotional aspect of poor health. The 12 mineral cell salts are a natural part of human biochemistry and Medical Astrology has found that they are also related to the 12 zodiacal signs. Homeopathically energized cell salts of the correct potency have a deep-acting effect at all levels of our being: physical, mental, emotional, spiritual.

Distant Healing with Radionics and Radiesthesia

The healing vibration of a substance can be transmitted to an individual via the earth's magnetic field to any point on earth. Simple and powerful techniques developed over many years of research allow anyone to heal themselves through subtle-energy transmissions.

Healing with Gemstones

For centuries healing with crystals and gemstones has been practiced in the Orient. Gems were reduced to ashes and taken for illnesses or worn on the body in order to ward off evil influences. Current RISHÉ research uses gemstones to correct chakra disorders, and groups gems according to their crystalline structure. We find that there is a natural vibratory affinity between certain groups of gemstones and the various chakras.

Use of the Pendulum

Elementary use of the pendulum can detect magnetic and biomagnetic energies, amplify consciousness, and measure chakra energies. It can also be used in awareness exercises to develop the intuitive faculty, the frontal lobes and the brow chakra.

Radiesthesia in Healing

Radiesthesia, or the sensing of subtle radiations, can be applied in every human endeavor: science, business, medicine, etc. RISHÉ Director, Dr. Victor Beasley, focuses on the broad healing applications of the human supersensitive

faculty. Thus, once the basic pendulum techniques are understood, there is an intermediate stage of pendulum usage for self-healing through remedy selection in homeopathy, herbs, Bach flower remedies, cell salts, vitamins, etc. Developing our higher sense perception through pendulum usage enables us to use many different remedy and health maintenance systems without having to spend years of laborious research, intellectual cramming and storage of knowledge. But for those health care professionals who have invested time and money and so accumulated a wealth of knowledge through training and experience, developing the higher sense faculty with the pendulum deepens and enriches your professional abilities. There is no one, professional or lay, who cannot benefit from developing their natural intuitive faculty in order to help themselves or others maintain health.

Subtle-Body Analysis

The *Subtle-Body Spectrum Monitor* and the pendulum are used for advanced human energy-field analysis. The *Spectrum Monitor* was developed by Dr. Beasley in collaboration with Dr. Hills and combines ancient wisdom-healing techniques together with contemporary scientific and radiesthesia technology of magnetically amplified energy-fields. Only a hair sample or blood spot is required in order to "tune into" the various levels, mental, emotional, spiritual, etc., of the individual and determine where an energy blockage may exist.

Psychotronic Homeopathy

The *Supersensonic Homeopathic Energizer* was recently developed by Dr. Beasley in collaboration with Dr. Hills for reproducing the subtle-energy frequencies of the body's 12 cell salts in homeopathic potencies. The *Energizer* is a light-activated instrument which employs the scientific principles of geometric interference patterns in order to create a standing-wave energy-field which can be transferred into a host or carrier substance such as water. The resultant light-energy remedy can be taken orally, or transmitted over distance via the *Energizer*. The *Energizer* reproduces homeopathic potencies up to 37.3 M with any combination of 1 to 12 biochemical cell salts.

Homeopathic Spa Bath

The world's great natural spa baths and hot springs all contain combinations of minerals which enhance their relaxing, vitalizing and therapeutic effects. The *Homeopathic Energizer* will soon have a special *Spa Bath* accessory available which uses sound and a pulsed electric wave to convert your swimming pool, hot tub or bath into a refreshing homeopathic spa bath. Emotional tension and tired muscles are soothed when you dial in the homeopathic mineral cell salt combination of your choice. Magnesium Phosphate (high potency 10 M) is a frequently used homeopathic remedy for muscular tension, although Silicea or other natural combinations of minerals are also beneficial.

Subtle-Body Analysis and Ego Structure

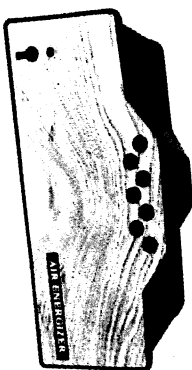

The *Subtle-Body Spectrum Monitor* identifies the location and intensity of ego blockages, our tears, drives, and self-images which limit our vitality and enjoyment of life. At *University of the Trees*, ego blockages are penetrated by a technique called Creative Conflict, developed by Dr. Hills and explained in his book *Exploring Inner Space*, co-authored by Dr. Deborah Rozman. There are also instances when it is beneficial to bring to an individual's awareness a health or behavioral pattern which has its basis in a karmic or past life situation. Subtle-body past life regression techniques are then used to lift to the attention of the conscious mind the negative habit pattern which has been lingering at the deeper levels of being.

Subtle-Body Stress Management

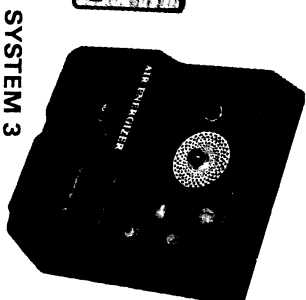

We all agree that a certain amount of positive stress or problem-solving challenge is necessary for personal growth. But excessive stress becomes a negative psychic drain and is registered by the body's biochemical stress reaction to prolonged tension. True stress management must begin with insight into the basic personality drives of the individual and not assume that all people have the same psychological motivations. In *Nuclear Evolution* Dr. Hills details the seven basic psychological drives and discusses how permutations on these seven levels of consciousness and chakra types accounts for each person having their uniquely structured psyche. The earlier work of the famed psychologist Carl Jung, and the contemporary investigations of the British psychiatrist Dr. Humphrey Osmond, formerly of Princeton, are closely related but do not appear to have the completeness of Dr. Hills' work on personality types. The *Subtle-Body Spectrum Monitor* identifies the individual's basic drives and pinpoints the specific area and the pattern in a person's being which is generating the negative stress problem. The *Spectrum Monitor* also reveals the extent to which subtle mental/emotional stress factors are distorting the health of the physical and etheric bodies and thus the unit becomes a psychosomatic early warning system.

Supersensonic Healing Techniques

Several self-healing techniques have been developed by Dr. Hills and are used by the RISHÉ research team. These systems involve the use of specially designed Supersensonic instruments which resonate with the human energy-body. The initial research reveals that there are a number of invisible factors operating which deserve far more attention from the healing professions. This research centers around such instruments as the powerful *Extractor Sink* which removes distorting pollutants from the energy-body and the chakras, while the *Positive Green* and *Pi-Ray* pendulums can either remove distorting subtle-energy frequencies from or energize the subtle energy-body, according to each individual need. The *Magnetron* and the *Pi-Ray Coffer* are alternative methods of researching the effects of distant healing. Several other techniques and research instruments are used for other specialized healing functions.

SYSTEM 4

SYSTEM 3

AIR IONIZATION

Researchers at leading universities have shown that positive ions cause irritability, tiredness and if too much in excess, nausea, migraine and eye disorders. An abundance of negative ions, however, promotes vitality. Negative ions will also help clean your room of dust and smoke because they quickly attach themselves to these positively charged particles and make them sink to the earth.

What people are saying . . .

"I was first introduced to Negative Ion Generators two years ago. Since that time I have been interested in, but not steadily involved with, Negative Ion Generators. I had the opportunity to experience 5 other companies' products, and only one came close to creating the same effect on my body as yours."

—G.B., Framingham, MA

"Thank you for your latest shipment of 20 Air Energizers. People call in and bless us saying, 'The smells of animals have left our home.' I have found in my own experience that my mind functions more clearly and my inherent restlessness in performing a task disappears. In my office with the ion generator on I am able to stay with a task for hours."

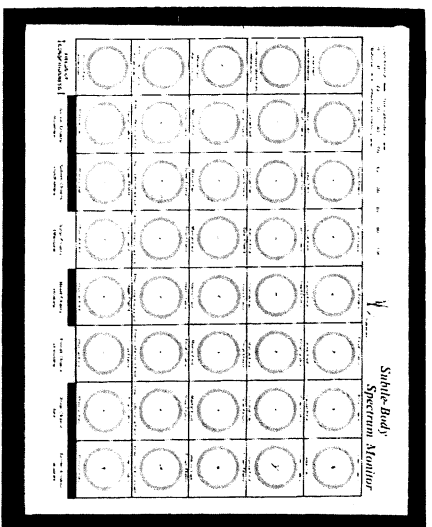

—E.J., Concord, CA

Your Choice of Two Top Quality Units

System Three: Rugged and durable with a heavy duty transformer. Solid state. \$139.00

System Four: Handsomely designed desk model complements any room. Solid state. \$159.00.

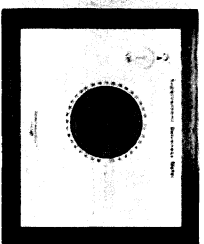

★ Shipping and handling: See order form.

SUBTLE-BODY SPECTRUM MONITOR

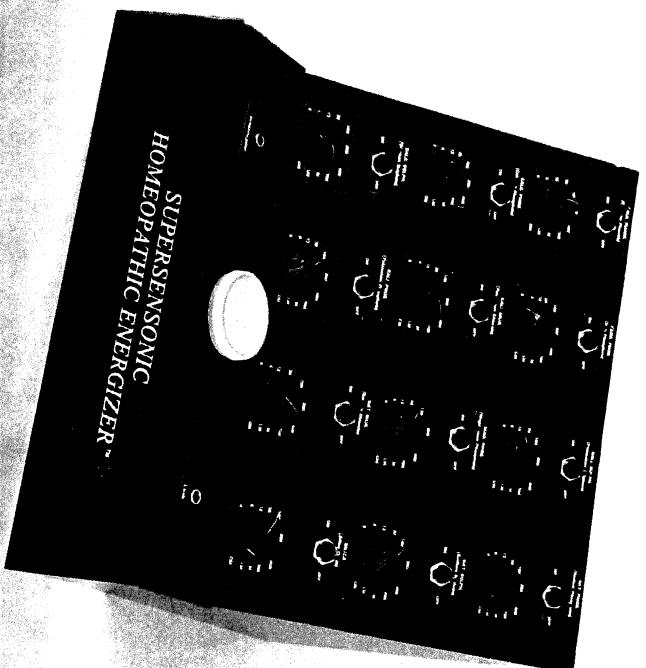

This is a newly invented supersensonic health research tool for identifying the location and intensity of subtle energy field imbalances. It maps the different fields of human consciousness from the physical, through the etheric, into the mental-emotional, all the way to the spiritual frequencies. With it and the Hills' Positive Green Pendulum, you can easily isolate energy imbalances within the seven major chakra centers and the overall complex human energy-field matrix. The SUBTLE-BODY SPECTRUM MONITOR includes the W.O.R.P. Factor for detecting subtle energy toxins or pollutants. These subtle pollutants can be acquired through genetic inheritance or retained as the residual effects of an illness potential as a "constitutional predisposition to illness", or "subclinical toxicity". The W.O.R.P. Factor takes into account all such latent subclinical toxins—whether inherited or acquired—which have the potential for triggering physical or mental ill health.

The SUBTLE-BODY SPECTRUM MONITOR is based upon a radio-magnetically amplified, geometric ratio grid pattern devised by Drs. Christopher Hills and Victor Beasley of the RISHE research team. \$145.00★.

AWARENESS METER

Find out where you stand on the evolutionary scale toward 360 degree or total awareness. Determine the awareness of others, alive now or long ago. Test your partner, friends, teacher, etc. Use with the MERKHET pendulum \$40.00★.

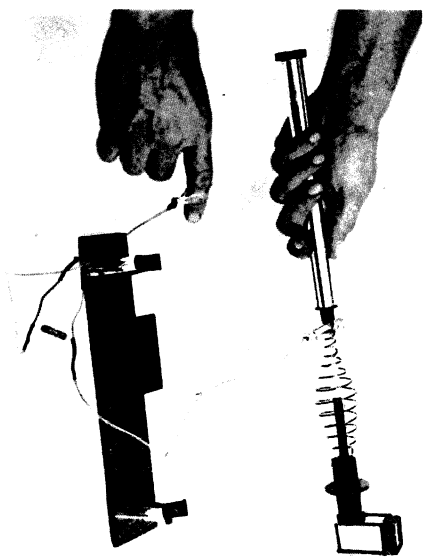

MARK I Prototype

SUPERSENSONIC HOMEOPATHIC ENERGIZER

In homeopathic remedies no physical trace of an element or compound is present, only the frequency of its energy-field vibrating at a particular potency or strength. Yet these remedies have pronounced, clinically proven beneficial effects.

Traditional methods of preparing homeopathic remedies use tedious mortar and pestle, succussion, shaking and trituration processes that take a lot of time and energy and risk a high possibility of contamination. In contrast, the SUPERSENSONIC HOMEOPATHIC ENERGIZER has the advantages of speed (a few minutes per batch) and versatility in preparation, high quality control and precise remedy potency. It incorporates an entirely new method for energizing a homeopathic remedy with an energy-field frequency formed by critically drawn geometric ratios amplified by a permanent magnetic field. This amplified field frequency is transmitted into a neutral or unmedicated milk sugar placebo tablet for oral administration. This unit produces the twelve basic Schuessler biochemical cell salts singly or in any combination ranging in potency from 3X to over 30m. Research has shown remedies produced by this method to be superior in effect to those produced by traditional methods and especially effective in treating energy-field imbalances at the biophysical, mental and emotional levels. Invented by Drs. Hills and Beasley, \$800.00★.

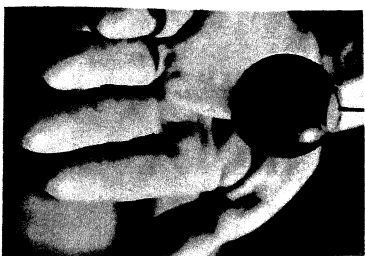

PSYCHOTRONIC EXTRACTOR SINK

After detecting the locations and intensities of these energy-field imbalances, the next step is to remove them with the PSYCHOTRONIC EXTRACTOR SINK. It acts like an energy "vacuum cleaner"

to suck out those negative energy conditions which, if allowed to remain, can undermine the health of the physical body. In addition, due to the ever increasing number and quantities of toxins being released into the environment daily, accumulating in the food chain, and polluting our air and water, almost all of us have some build-up of toxicity in our bodies. Until the toxic energy conditions associated with the deposits are cleared it is difficult for the natural cleansing and elimination systems of the body to excrete these unnatural poisons. The PSYCHOTRONIC EXTRACTOR SINK is a fast-acting, reliable, safe technique for stimulating the body's natural elimination systems to get rid of these poisons.

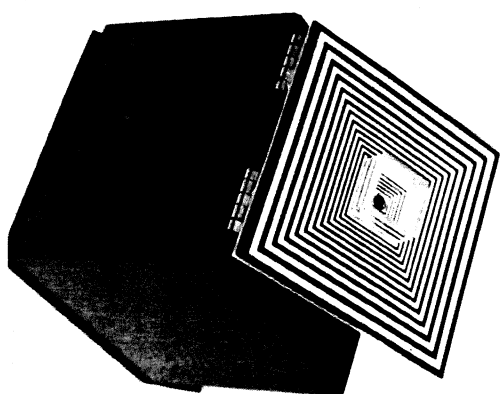

It utilizes the energy of the Pi-Ray described in the book *Supersensonics*. A special radiesthetic charge in an array of four radiomagnetically stimulated minerals triggers the operator's response to the Pi-Ray. The whole process of using our own nervous system is amplified electronically by the addition of a nine volt transistorized circuit, one end of which is attached to the treated person's finger, the other being attached to the copper coil which acts to extract the negative energy condition through the light transmitting rod.

Invented by Dr. Christopher Hills, author of *Supersensonics*, \$250.00★.

HILLS POSITIVE GREEN PENDULUM

This pendulum is tuned to life energy. Use it to find blocks in the subtle energy circuits, free those blocks and charge your body field with positive life energy. This is one of our most popular and widely used general purpose pendulums for enhancing health, checking the vitality of foods, and answering questions of the heart center. \$15.00 □.

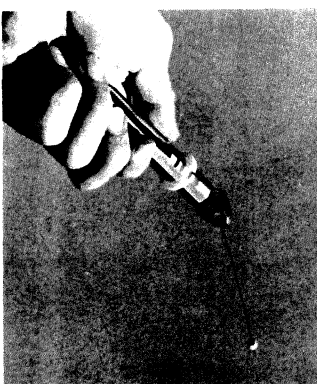

PI-RAY COFFER

The PI-RAY COFFER is a psychotronic generator. It broadcasts mental images into the Universal Intelligence from which they later manifest as realities if your motive is pure and your need is in tune with the Cosmic Purpose. Often we cannot keep our mind fixed on the clear image of what we need with enough conviction, intensity and concentration to make it happen. The PI-RAY COFFER helps you focus and release your thought energy with one-pointedness. It

has helped bring about many remarkable, even magical effects for those with physical, mental, emotional and spiritual needs. Our most versatile instrument. \$79.00 □.

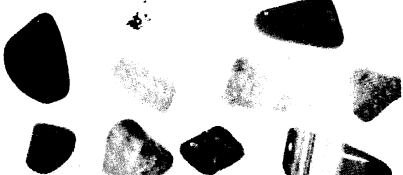

HILLS AURA SENSOR

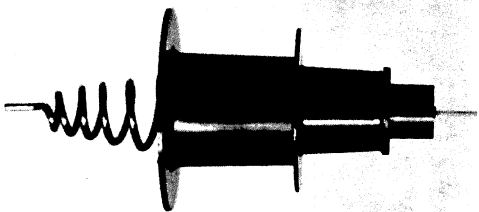

Used for aura balancing, a technique for detecting and correcting energy field imbalances in the chakras, and for freeing energy blocks in the acupuncture meridians. Can also be used to *inject* specific vibrational remedies—such as the energy of an herb, vitamin, cell salt, gemstone, etc. Comes equipped with a receptacle for placing a remedy in the hollow handle and a special radiomagnetic amplifier cap which steps up the vibration of the remedy and sends it down the sensor waveguide into the area where it is needed. \$25.00★.

HEALING GEMSTONES

Certain precious and semi-precious gems have crystalline structures that readily absorb and radiate powerful energies. The ruby laser, for instance, can burn a hole through solid steel. Many people are now rediscovering the health enhancing properties of some crystals, especially quartz. We offer a special assortment of 16 polished gemstones for experimental purposes. Each stone is about one-quarter inch in diameter. The set includes: rose, citrine, golden tigereye, green, amethyst and rutilated quartz, bloodstone, moonstone, Brazilian and Turinella agates, carnelian, imperial jasper, jade, mother of pearl, rhodonite and lapis lazuli. Price for the set: \$25.00 □. Individual stones: \$5.00★.

PI-RAY SUPERSENSOR

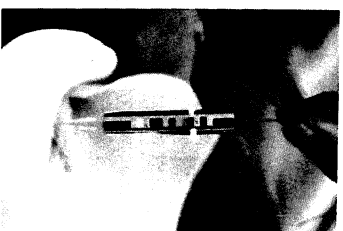

Our most powerful pendulum emits the Pi-Ray, the ray of life and death. This instrument helps you discharge toxic, even chronic, vibrations from your mind, emotions and energy body. It also revitalizes your physical body by charging you with the life force itself. Substitute new patterns of health for old images stored not only in your mind, but also in the memory bank of your cells, muscles and organs. \$65.00 □. Read about the Pi-Ray and its amazing power in *Secrets of the Life Force*. \$5.95 ★.

SPECTRUM MIRROR PENDULUM

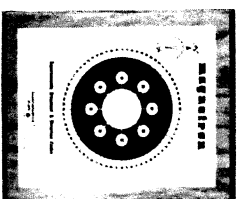

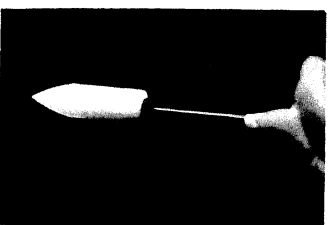

Used with the HILLS POSITIVE GREEN for aura balancing, a technique for detecting and clearing the energy centers of noxious influences and negative conditions which can cause disease, sometimes before physical symptoms become evident. The spectral band allows for tuning to the color vibrations of each of the seven energy centers or chakras. \$18.00 □.

An excellent introduction to the rainbow of life and aura balancing is given in *You Are A Rainbow*. \$2.95 ★.

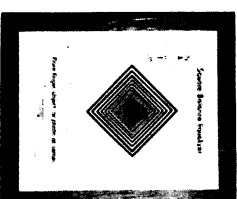

MERKHET PENDULUM

Contains mercury in its hollow cavity. Mercury is found to resonate with thought waves, which are just as real as electromagnetic waves. With this pendulum you can tune into the universal mind field and find answers to questions about your previous incarnations, tune in to cosmic intelligence, what others are thinking and what relationships are good for you. For developing the intuition. \$16.00 □.

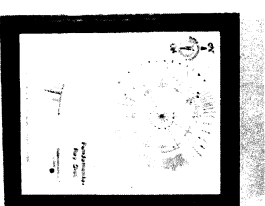

THE MAGNETRON

Supersensonic answer to the radionics set. Brings the magnetic field of the earth, which connects everyone and everything on the planet, into the service of your divining needs. Use it to send or receive vibrations to or from anyone whose witness (photo, hair sample, etc.) you place at the center. Portable, pretuned, simple and powerful; compare with bulky, complicated radionic sets at ten times the price. For accuracy use with the HILLS POSITIVE GREEN pendulum. \$35.00 ★.

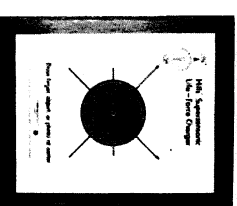

SQUARE BALANCE EQUALIZER

Some of us have difficulty balancing ourselves and our daily lives and are constantly regretting some of the choices we make. The SQUARE BALANCE is designed to correct physical and psychic imbalances and help us make better choices from a clear, centered place beyond the dualities and vicissitudes of life. \$28.00 ★.

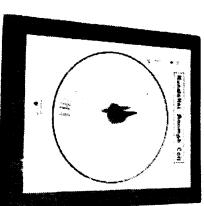

TURENNE FUNDAMENTAL RAY DISC

Amplifies any sample placed at its center, so you can analyze its chemical composition through pendulum response to your questions. For example, use it to determine which of the forty-four elements in your body are in excess or deficient. For best results, use with the TURENNE MAGNET-FITTED or HILLS POSITIVE GREEN pendulum. \$29.00 ★.

LIFE-FORCE CHARGER

Charges with life force anything or anyone who comes in contact with its center. Replaces the energy which long sessions of divining tend to deplete. Can also be used to broadcast life force directly and continuously to anyone whose witness you place at the center. \$28.00 ★.

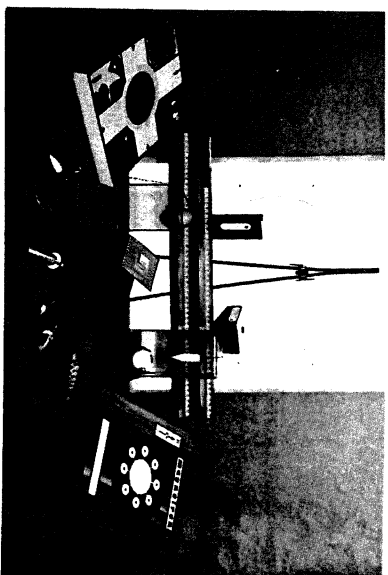

KUNDALINI ROOMPH COIL

Helps you raise the kundalini energy in a controlled way without burning your etheric vehicle or blowing your mind. Use with the MERKHET pendulum. \$83.00 ★.

THE PROFESSIONAL ASSORTMENT

SAVE MORE THAN \$50.00 when you purchase the complete set.

Set includes:

SUPRESENSONICS: "The most comprehensive account of dowsing theory as well as a brilliant account of the Universe to date."—East-West Journal. By Dr. Hills. \$15.00★.

ELECTRIFIED PENDULUM: Tune your car without all that equipment. Find a faulty wire that is shorting. Armed with a special element, it has a constant flow of electrical forces running through it. \$35.00□.

PI-RAY COFFER: Our most versatile instrument. See page 11. \$79.00□.

THE HEFIGAR: One of our most potent amplifiers. See page 16. \$35.00□

MAGNETRON: Is a broadcast healer and finder. Use it for sending healing vibrations to yourself or others. You can also locate people. \$35.00★

HILLS POSITIVE GREEN: This potent pendulum is tuned to life force. We often use it for demonstrations since almost everyone can feel the energy it radiates. See page 10. \$15.00□.

SPECTRUM MIRROR: A highly sensitive spectrum pendulum. See page 12. \$18.00□.

AURA SENSOR: Can be used for aura balancing, injecting vibrations. See page 11. \$25.00★.

THE MERKHET: Mercury filled pendulum for reading thoughts. See page 12. \$16.00□.

RIGHT-HAND SPIRITUAL: Detects the opposite energy to the Left Hand Spiral. Use it to check the upward flow of energies through your psychic centers or chakras. \$20.00□.

14

ADVANCED ASSORTMENT

If you are serious about divining this set offers a wide range of uses with only a few tools. The set includes:

ALIVE TO THE UNIVERSE: A leading handbook on divining, step-by-step instructions, by Robert Massy, Ph.D. \$9.95★.

SERVIRANX GRID for balancing the positive and negative forces within you. \$2.50□.

HILLS POSITIVE GREEN pendulum (see page 10) \$15.00□.

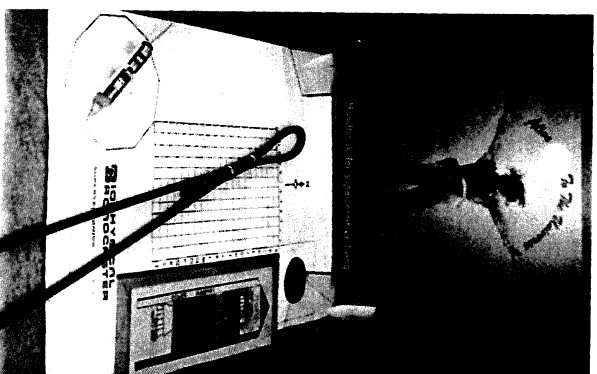

MERKHET (see page 12) \$16.00□

EGYPTIAN ANKH (see page 16) \$8.00★.

COLOR MAGNET to charge your aura with the color you need and transmit color energies. \$1.25★.

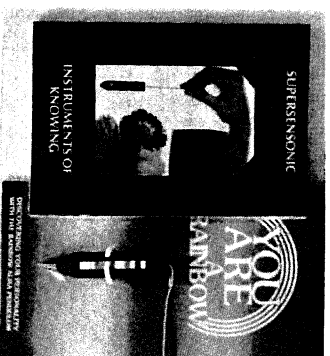

SPECTRUM MIRROR pendulum (see page 12) \$18.00□.

Total for the set.....\$64.75
You save \$5.95 by buying the set.

BEGINNER'S KIT

The AURA pendulum is one of the best pendulums if you are new to divining. Use it to ask questions about your personal life, and be able to read auras without having to see them. If you want to know what an aura is, what the different colors mean or how to use a pendulum, then you turn to **YOU ARE A RAINBOW**. This book also includes a section on aura balancing which you will need to properly use the Spectrum Mirror or Hills Aura Sensor. (Available separately for \$2.95★.) Beginners Kit.....\$8.95★.

HEFIGAR

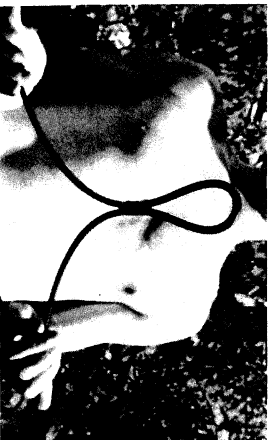

"Excite" the hydrogen in the water molecules and cells of your body. Water is a conductor. When it is in an excited state it conducts more readily. Thus the HEFIGAR makes you a better conductor of the subtle nervous signals on which the phenomenon of divining depends.

It is a super amplifier, making it easier to divine and making you a more positive diviner. \$35.00 □.

MAGNETS

Powerful giant magnets 3 1/2" in diameter are available for research for \$5.00★.

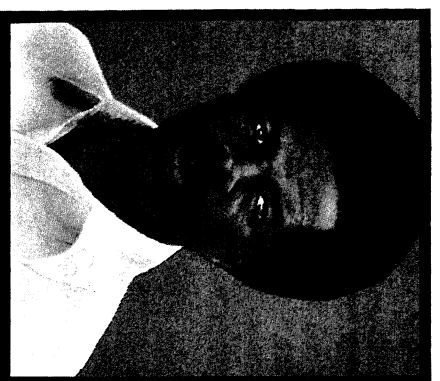

EGYPTIAN ANKH DIVINING ROD

To align their pyramids and temples, find water in the desert, locate missing persons or objects and transmit life force, the Egyptians used a rod which they called ANKH, or key of life. We produce a modernized version of this divining rod which serves the same purposes. Made from a dielectric polymer, it focuses the human body's positive/negative polarities into a beam of concentrated awareness. \$8.00★.

SUBTLE-BODY HEALING

This book will explain how our physical body is integrated with and controlled by higher frequency energy fields of consciousness. It explores such questions as: How can energy field disorders affect health? How can they be detected and corrected? How can we free ourselves from negative energy patterns and expand our awareness? Includes detailed instructions on the use of the SUBTLE-BODY SPECTRUM MONITOR, HOMEOPATHIC ENERGIZER, PSYCHOTRONIC EXTRACTOR SINK and AURA SENSOR. Write for further details.

Victor R. Beasley, Ph.D.
Director, RISHE

After receiving a B.A. in Anthropology from the University of Maryland, Victor held positions as Director of Country Programs for the American Inst. for Free Labor Development (subsidiary AFL/CIO) in the Dominican Republic and set up regional offices as Caribbean Director in Guyana, South America and Barbados, West Indies. Other events during this period included the publication of his first book, *Essence*, a collection of thoughts and aphorisms, in Guyana, 1973, and his selection as an eastern regional finalist for the President's White House Fellows Program in that same year. Concurrent

with his administrative duties Victor embarked upon an independent academic research project for the Ph.D. in Radiational Paraphysics through Union Graduate School, Yellow Springs, Ohio. His dissertation *Behavioral Dimensions of Electro-Vibratory Phenomena* was published by University of the Trees Press in 1975, and is now in its third edition (July 1979) under the new title *Your Electro-Vibratory Body*. In 1976 Victor retired from a successful career in international labor in favor of full-time research into alternative methods of healing, an investigation which for a short time led him to study natural medicine in London at the British School of Naturopathy and Osteopathy. But his previous four-year Ph.D. research findings on radiesthesia and the human energy-field had left an unresolved urge to probe deeper into this new field, and the Osteopathic tradition made no allowances for this. As a result, Victor chose to return to his native America, after eight years of living and working abroad, with the hope of sharing some of what he had learned about healing in his travels. But there persisted the niggling questions: Is there enough openness within the medical community towards Supersensonic methods of healing without eliciting an attack from those health care professionals who could benefit so much from energy-field healing technology? And how would the American public, generally, respond to effective but unconventional healing methods which might not always have the endorsement of a medical doctor—simply because the doctor, though well-meaning, may be unaware or unskilled in subtle energy techniques? To date these questions remain unanswered, as it has only been a few short months since Victor joined with Dr. Hills and the staff of University of the Trees. The result of this partnership is the creation of RISHE, a research institute for subtle energy healing, an act of faith in the future of the healing arts, a profound hope that research into subtle-body healing is an idea whose time has finally come.

ORDER FORM

P.O.Box 644 R, Boulder Creek, California 95006

PHIL ALLEN, M.A. Co-author *Energy, Matter & Form*, controlling prana, and chakra energy balance through consciousness, special color breathing techniques and sonic pulses. Research director for Supersensonic instrumentation.

ARLENE BEHL, B.S. Medical technician, laboratory analyst, synthesizing the growth of human consciousness with Supersensonics and medical technology.

MICHAEL HAMMER, M.A. Use of sound and voice to balance chakra energies and create deep psychological states. Kirlian photography, herbology—identifying medicinal properties of wild herbs through divination.

NORAH HILLES, B.A. (LONDON) DIP. ED. (LONDON) Use of the full spectrum Luscher Color Test (73 colors) to reveal deep-rooted causes of emotional stress and anxiety with particular references to relationships and family problems.

BRIAN KABAKER, Homeopathic mineral spa bath technician, *Subtle-Body Spectrum Monitor* analysis, aura balancing.

ROBERT MASSY, PH.D. Physicist lecturer, author of *Alive to the Universe* and *Hill's Theory of Consciousness*. Aura sensing and aura balancing with Supersensors. Seeing auras, use of divining rod, map dowsing, geological dowsing, ego structure and growth of consciousness.

NANCY LONDON, B.A. Shiatsu, reflexology, bio-energetic massage, herbs, diet as related to bio-chemistry and levels of consciousness.

PAMELA OSBORN, B.A. Clearing stress and anxiety through Creative Conflict. Levels of consciousness in relation to color and aura balancing. *Subtle-Body Spectrum Monitor* analysis.

ANN RAY, Ph.D. Author of *Journey Into light*. Personal consultation through analysis of your own dreams; interpreting and resolving internal stress patterns through dream analysis.

ROGER SMITH, Co-author *Energy, Matter, & Form*. Introductory divining and radiesthesia. Group consciousness research; clearing individual blockages through the Creative Conflict group dynamic.

Dr. Beasley and the RISHE Research Staff are available for lectures, seminars and contract services to organizations anywhere in the US, in Canada, and by special arrangement to other countries. Lectures need at least three weeks notice. Travel and overnight expenses must be covered and a donation towards the continuance of their work is expected. The suggested minimum is \$150.00 Please contact the persons whose services you require to discuss your requirements and the financial level at which your group can contribute.

Special week-end seminars are often held at the Boulder Creek campus. Send your name and address if you wish to be placed on our seminar mailing list.

I am interested in organizing a ☐ lecture ☐ workshop ☐ seminar, lasting _____ hours/_____ days, for _____ (name of lecturer).

We anticipate an attendance/registration of _____ people.

I would like to arrange for the following RISHE research services: ☐ personal counselling; ☐ organizing a staff training program; ☐ joint health care research; ☐ subtle-body behavioral research; ☐ personalized training; ☐ homeopathic spa bath applications; ☐ other _____
