## About Dowsing

*“It is exclusively by adopting a disinterested attitude and through long years of practice that one can reach the highest level of dowsing and the art of the pendulum with its almost unlimited possibilities.*

*Daily practice makes possible this kind of quantum leaps. Radiesthesia means the spirit setting off for triumphing over the matter.“*

\*

**P. Leo Cunibert Mohlberg (1878 – 1963)**

Often, the term of radiesthesia is only used for describing the search for water and mineral resources by means of a divining rod or a pendulum. However, this definition is incomplete. The term is more extensive and implies registering and measuring the whole range of radiations, emanating not only from minerals, but also from plants, animals and human beings. Radiesthesia is an age-old empirical science which is often smiled at due to ignorance.

## *Physical Radiesthesia*

Physical radiesthesia as a subdiscipline of geomancy deals with radiesthetic examination of gross material objects that surround us in nature or in our everyday life, such as minerals, metals, plants or bodies of animate beings. Furthermore, it acts on the assumption that vibrations are at the bottom of all physical objects that are not visible, such as water veins, warpings of the soil, cavities as well as various grid systems, and that these vibrations can be interpreted.

Examples of fields of application are:

Testing of useful flowers and herbs;

Determining the digestibility and quality of food, drinks, and medicines;

Influences of buildings, colours, and scents;

Detecting natural resources and water;

Discovering and neutralizing geopathic influences;

Detecting defects in electric and electronic devices;

## *Mental Radiesthesie*

Mental radiesthesia summarizes all those predominantly spiritual methods that are used for examining subtle phenomena such as energy bodies (auras) or remote effects. Experienced and neutral dowsers exclusively applying mental techniques in their work often achieve impressive results, that – for the time being – cannot be explained scientifically, in contrast to physical radiesthesia.

Examples of fields of application are:

Queries and transmissions of vibrations, also at a distance;

Seeking for missing persons and lost objects;

Testing the compatibleness of persons willing to live or work together;

Vibrations of a text or a music.

## *Medical Radiesthesia*

Whoever commands medical radiesthesia, is able to detect within minutes or even seconds the profound cause of a disease (that remains concealed from many medical diagnostic devices) and to define the corresponding remedy.

In 1922, Albert Abrams, M.D. was one of the first American scientists to publish a book describing the application of radiesthesia for the diagnosis and therapy of diseases. Hereby, medical radiesthesia was established as a science.

The French surgeon and winner of the Nobel prize Alexis Carell understood more than fifty years ago how vitally important radiesthesia would become in a world in constant change. At that time, he worked in New York under the aegis of the world-famous Rockefeller Foundation.

He clearly indicated his scientific position as follows: “With each patient, the physician must detect his individual traits, his resistance to the pathogenic germ, his algesthesia, the condition of all functions of his organism, as well as his past and his future. He must not have any prejudices and must be ready to also apply non-orthodox methods. He thus must know that radiesthesia merits attention.”

## *History of Radiesthesia*

The use of pendulums and dowsers is as old as humanity itself, as is the knowledge about radiation from the earth. Water has always been found by means of the rod. The same is true of ore deposits in antiquity and the Middle Ages or of medicinal springs in modern times.

In biblical times, the dowser was known as bar, as so-called singlehanded rod. For this reason, the Greeks called the art of dowsing rhabdomancy (rhabdos = the rod, and mantie = to see). Rhabdomancy, the use of dowsers and pendulums, can be traced back to a time long before the birth of Christ, namely to the times of the Egyptian pharaohs and Chinese imperial dynasties. In the Bible, the prophets Ezekiel and Hosea report that their people ask counsel at their stock and staff. The Romans called the rod “virgula divinatoria“, which means as much as “divining rod”. During the Middle Ages, its name was “wunseili gerta“. Later on, Goethe talked about the “magical sprig“.

Around 1900, Abbé A. Bouly (1865-1958) coined the hybrid term of “radiesthesia”, used officially from 1930 on. In his fundamental work “Comment j’opère”, Abbé A. Mermet (1866-1937, see picture) promoted the pendulum in 1935 to “the new science“, and in 1933, Emile Christophe called remote radiesthesia “teleradiesthesia”.

Whoever paints radiesthesia or the use of a pendulum with occult colours, does not know the first thing about radiesthesia. Even though the functioning of this activity is a closed book for all non-informed, it does function, and in some European countries, radiesthesia is a profession for which public examinations are taken.

Radiesthesia has a thousand-year-old tradition and a bright future. These days, thousands of physicians, geologists, chemists, animal and plant breeders, and electronic engineers apply the method of radiesthesia in their daily routine, in order to succeed in their profession.

## *Radiesthetic Colours*

The main radiation of a matter or an animate being is in syntony with a particular radiesthetic colour. This peculiarity applies to all dead and living matter, but also to organs and diseases. Each body emits a radiesthetic colour characterizing it. This colour can be called congruent or individual colour. However, it is rarely in accordance with the visible colour. A green deciduous tree will not emit a green individual colour, just as the brown liver does not emit a brown colour.

Each human being has its own individual colour, corresponding to its birth character and called fundamental colour or birth colour. Over the years, the colour may change (actual colour), and as soon as the person falls ill, the colour becomes interesting for medical radiesthesia. This can be tested in the hologram Bio-status (see annex).

The radiesthetic colours of the spectrum according to Léon Chauméry and André de Bélizal are divided into:

12 colours of the electric phase – of the vertically oscillating  
electric field

12 colours of the magnetic phase – of the horizontally oscillating magnetic  
field

24 colours of the electromagnetic phase

The term “magnetic” was chosen because this radiation may be stopped by magnetic bodies such as iron; “electric” was chosen because this radiation is shielded by isolators such as Bakelite.

Earlier researches have shown that the 12 colours of the magnetic phase are anabolic and thus beneficial for life and health (apart from negative green), whereas the 12 colours of the electric phase are catabolic and thus detrimental to health. More recent research results demonstrate that electric colours also have their therapeutic qualification and must not a priori be called detrimental.

In their summary of the radiesthetic colours in the book “Radiesthésie et Santé”, Alain et Claudie Bouchet describe the

### **Colours of the electric phase:**

**Yellow, Orange, Red, Infrared: inflammatory condition, increasing from harmless to grave.**

**Black, Negative green: serious disease (cancer, AIDS, atherosclerosis...)**  
**In geobiology, areas emitting these colours are either affected by electric smog or situated above geopathogenic zones making recovery impossible.**

Persons living in areas with a radiation between yellow and black lose their psychic balance and become either aggressive or depressive.

**White is a carrier wave and can be found in case of lung diseases.**

**Blue, Indigo, Purple, Ultraviolet are less aggressive colours. Persons with these colours are invigorated and often in a condition of recovery before changing into the magnetic phase.**

**Negative green is the electroshock, often the preliminary stage to an even worse state of health. But in case of exhaustion, one can be recharged in one or two minutes.**

When choosing colours for dressing or furnishing an apartment, one should never select electric colours. The artificial colours on display in the shops, often do not emit, radiesthetically speaking, the visible colours. So, a

yellow shirt may for instance emit an electric red thus making its wearer aggressive.

### **Colours of the magnetic phase:**

**Yellow and Orange:** to be found on intellectuals as their birth colour, promotes reflexion and activity.

**Red and Infrared:** strongly stimulatory, therefore not suited for bedrooms (except in special establishments), to be found on the “big men of action” as their birth colour.

**Black:** colour of the magnetizers, in opposition to cancer.

**Negative green:** shortest known and very permeating colour composed of at least six different vibrations. De Bélizal differentiated between an electric negative green causing illness and death by cell disintegration, and a magnetic mummifying negative green that could be used in case of tumours.

**Green+:** good energy in balancing places, also positive for plants.

**White:** perfect carrier wave, often to be found as the birth colour of therapists. These persons absorb everything in their surroundings and must strive to stay as neutral as possible.

**Ultraviolet, Indigo, Purple:** spiritual, mystic colours; as a birth colour, it signifies to absolutely try and find spiritual development. Persons with Ultraviolet often have the gift of mediality. Purple is the colour preferentially chosen for a place of meditation.

**Blue:** colour of calmness and repose, of the bedroom. As a birth colour it is the colour of orators, teachers, of deliberate, centred persons. Ancient theatres and medieval churches often had blue areas from where voices carried far.

In the electro-magnetic phase, to be considered as the coupling of electric and magnetic fields, we find 24 colours on the universal pendulum, 8 of

which correspond to the visible light. We have here the 12 colours as described in the magnetic and electric phase respectively, and in addition 12 other colours or regulation points between white and black within the Negative Green Spectrum, identified by Greek letters.

In the radiesthetic literature, we can always at some time find small or bigger differences when evaluating the colours. This does not only astonish and unnerve beginners, but also encourages the adversaries of radiesthesia in their criticism. Therefore, each radiesthesist can and should for him-/herself explore and experience with the pendulum the connections considered interesting. As is well-known, quantum physics teach us that the result of an interaction depends on the observer.

## *New Radiesthetic Colours*

While working with the Prometheus set, Polish radiesthesists did not only find completely new colours in the “Radiesthetic Studio of subtle Energies”, but also extended the meaning of colours already known. Rose, gold, silver, platinum, diamond and ultra-white are thus newly discovered radiesthetic colours of a new nature (see annex).

For a long time, colours situated at the electric meridian were considered disadvantageous or even dangerous. Trustingly following the indications given by the Isis pendulum, various experiments with plants did not result in a confirmation of any negative effect of this kind of radiation, as a deterioration of vitality could never be ascertained. On the contrary, positive effects could be observed. But if the user does not want to work with these vibrations, he may make an arrangement with the Isis pendulum and abstain from doing so.

While up to now, only the monochrome colours of the universal pendulum were known to us, the creation of the Prometheus and Merkaba pendulum sets led to the discovery of harmonious colours which may be considered as the combination of two neighbouring vibrations. The vector of a harmonious colour lies in the middle between two monochrome colours as their sum, the intersection product (the quotient of the vibrations) being situated in higher octaves and in dimensions invisible for us. Thereby, we convey new vibrations to the chakras and genes, thus opening the portals of the morontiel forces (these are the forces that assist the development from dense matter to spiritual lightness).

**Negative green (Gr-), sometimes also called grey, is a mysterious colour between white and black; according to new findings, it was up to now wrongly called a dangerous vibration. Quite the contrary, it is indispensable on the pendulum and definitely useful. It represents the element fire (positive green by contrast being the element water) and can be used for neutralizing staphylococcus and pathogenic cells.**

In the Merkaba set, it represents the Kundalini vector for integrating the fire into the chakras.

The colour Infrared (IR), for a long time considered as disadvantageous and harmful, can be a very important vibration. It challenges our subconscious to store the emitted vibrations in specific DNA layers. This means that it activates the regions enabling us to access higher dimensions. It is assumed that it makes itself felt as the synchronization of the two brain hemispheres or the capturing of the Kundalini energy.

Infrared is the basic area that exists at birth and evolves during the spiritual growth by stages via all colours to ultra-white.

The shamans of all cultures considered this vibration as very important, in order to “thereby see in the dark”. This means that it helps to find access to our subconscious whose name indicates that unfortunately, we cannot “see” the experiences slumbering there. Often, we take subconscious actions or feel subconscious fears that may enormously constrain and inhibit us in life. By means of infrared, we gain access to the deep and often buried experiences and feelings that we can bring to light and at the same time heal painful experiences and take advantage of other important experiences in everyday life.

The colour ultraviolet (UV) is a colour of cleansing with strong effects – the feelings may be violent. At the energy balancing, often physical discomfort may occur, as the body must harmonize itself.

The small Isis/Osiris pendulum makes an intensive use of the ultraviolet cleansing energy. The small as well as the big Isis/Osiris pendulum (carried in the trouser pocket) protect their bearer even against chemtrails.

The colour gamut between UW and IR indicates a disharmony. Amenti, named after the Egyptian god who guards the entry to the underworld, is to

be found between infrared and black. This is the vector that connects us with our subconscious containing all experiences of our earlier incarnations.

**C14 is mirrored ultra-white. Vibhuti, the beneficial ashes of the Hindus from the sacrificial fire Agnihotra correspond to C14. This vector is a fundamental designer of the organic world.**

**Intermediate entity (IE - between IR and Red) is to be found on all meridians (even if for lack of space it is not marked on the pendulum on all meridians). These are entities of initial energy or energy catalysts, thus angel entities that activate energy in humans. In case of external occupation, IE is often indicated. This means that when testing IE on a person before a treatment, it should always be asked whether this person has had a treatment by a therapist working energetically. If this was not the case, one can assume that essences are effective there that possibly do not belong to that person and are not beneficial for his/her state of health. In this case, the appropriate orders should be given so as to relieve the person from these intermediate entities, to eliminate the occupation. This can for instance easily be done with the small Isis/Osiris pendulum which works in ultraviolet and has a strong purifying action.**

Thereafter, it may be carried in the trouser pocket as a protection against new adherences. After the task, one often tests these persons by means of the Prometheus Set or any other energetic activity for IE, these persons being assisted in their healing process by the energies of “invisible” entities and cosmic helpers or natural beings.

**Rose (Ro – between red and orange) has more than one denotation. It is the vibration of the divine cosmic energy and manifestation of universal love; it harmonizes the heart chakra, neutralizes its dysfunction, balances body, spirit and soul, and fosters love, compassion and healing.**

**Gold (Au - between orange and yellow) is the vibration for our relation with the higher masters, it strengthens our stability and self-assurance, acts as an antidepressant by dissolving negative thought-images, brings about harmony and order, and facilitates life decisions.**

As soon as the three radiations of the subconscious, the consciousness and the higher consciousness find together in gold, these three states of consciousness melt together. Access to the knowledge of the akashic record becomes possible.

**Trinity covers the colours in the trapezium around positive green, symbolized by the three nadis (channels conducting energy), namely Sushumna (the ethereal channel connecting the spiritual essence with the grounding), Ida (the lunar, female pole = Yin, that introduces prana through the left nostril into the body), and Pingala (the solar, male pole = Yang, that introduces life energy into the body through the right nostril). They control the activation of Kundalini, the divine serpent power leading to the null-polarity.**

**Silver (Ag – between blue and indigo) is the vibration of creativeness, promotes acceptance of our experiences and decisions, permits the execution of our plans and enhances the intuitive insight into other dimensions.**

Silver balances our emotional life, has a strong link to the moon and on a physical level, it acts like a natural antibiotic (colloidal silver).

**Third Eye covers the colours in the trapezium around purple. They activate the paranormal capacities of the third eye and enable our understanding the universal truth and ideals, as well as the signification of our incarnation. We gain insight into the cosmic reality and develop the ability to observe auras.**

**Diamond between purple and ultraviolet, is the vibration which transforms the dynamic of chakras from a rotation into a pulsation and changes its colours. In the final stage of this evolution we reach the state of null-polarity as a result of the thought adjusting, freeing us from the obligation of further incarnations.**

**Platinum (Pt - between UV and white) serves for harmonizing the brain, the soul and the intellect. Platinum is the creative frequency. By means of this frequency it is easily possible to demonstrate healing on all levels, thus becoming the creator of one's reality. The houses of good therapists or healing places often vibrate on the platinum frequency, as the angels of Elohim act through this frequency.**

The big Isis/Osiris pendulum (in brass or gold) has the energy of platinum as its basic ray and may well be used for healing and for executing mental assignments. In case a practice has the frequency of platinum as the basic ray, this is an indication of many entities acting there in a "healing" way. This is certainly caused by the fact that daily healing acts with people and regular energy sessions take place where special healing angels and entities are called in.

**Ultra-white (UW) is the divine meridian corresponding to  $10^{144}$  Hz, the white body of light colour, the highest vibration concentrating all visible and invisible colours of the low colour octaves. The sap of the Noni tree for instance vibrates on ultra-white.**

On the universal pendulum we find this vibration at the equator near the Greek letter  $\epsilon$ , next to white in the direction of negative green, on both meridians likewise.

In order to eliminate illness or pain, a treatment with the colour ultra-white is necessary.

The Hathor pendulum with the big head operates on the ultra-white meridian and treats the different mental assignments even quicker than the Isis/Osiris pendulums, especially pain lending itself to being suppressed

very quickly with the appropriate mental order. Old shocks and traumata as well as psychic injuries can also be quickly and successfully treated with Hathor in the energy field. Generally speaking, it is suitable for all physical, mental and psychic problems.

## *Shape Waves and Symbols*

Although the definition of the shape waves only goes back one century, they have existed at any time in the human history of our planet and have left their traces. We know about the perception of invisible vibrations through all civilizations and generations.

When the characters were invented some 5000 years ago, it became possible to impart a certain energy to a text. The Chinese ideograms, the Egyptian hieroglyphics and later the Hebrew alphabet and the Nordic runes are all based on the same symbolism and on their capacity to emanate specific shape waves.

Ancient Egypt of the Pharaohs still amazes us because of its knowledge of natural forces. Be it cult objects, hieroglyphics of buildings, depending on the desired purpose the beneficial or harmful vibrations were kept in mind. Without any doubt, the ancient Egyptians were masters in energetically handling forms in any domain. This knowledge, passed on by a long tradition, can be found again in the construction of the medieval cathedrals. The master builders knew the divine section that had already been applied when constructing the pyramid of Khufu (or Cheops) and also the harmonious forms.

The shape waves are independent of kind and colour of the radiating element. They are mini-vibrations emanating from the blueprint of the form and taking shape in the objects of the physical matter, especially in geometrical shapes. As soon as a shape emits a vibration, everything situated in the axis of the emission is subject to it, be it humans, animals, plants, inanimate matter. Therefore, it is vital to know the favourites and consequences for every kind.

For remote work, we should keep in mind that the waves created by shapes always keep their same intensity, no matter how big the distance between the shape and the scene of the analysis. Another important point concerning

the shape waves is the fact that they do not radiate evenly all around, but along axes provided by the shape whereat we can divide into four groups:

Shapes radiating centrally in an angle between two legs;

Closed shapes radiating from inside their structure, e.g. sphere, circle, pentagram;

Open shapes;

Combined shapes, such as the Hebrew alphabet or powerful symbols.

Undisputedly, the circle is the most balanced geometrical shape. It is the basis for all regular polygons, and its radiation intensity surpasses all other plane shapes. It plays a central role in the energetic domain when producing various talismans, as it constitutes an effective protection, and for remote work.

The shape waves emanating from the platonic bodies tetrahedron, hexahedron (cube), octahedron, dodecahedron and icosahedron hold a power that can be used by the radiesthesists for remote treatment of animate beings.

But how do these shapes act upon the organic molecular structures of animate beings? In fact, the shape waves of these bodies can due to resonance modify an imbalance in the structure of animate beings and thus restore their normal condition.

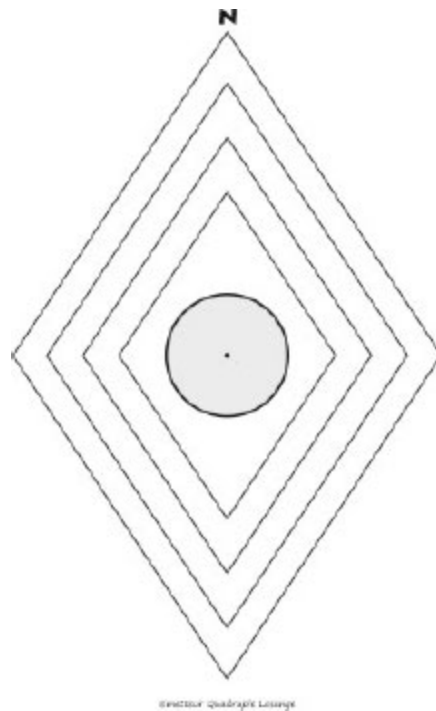

Four of the best known signs that emit shape waves are the cross, the Seal of Solomon (Star of David), the swastika (Sanskrit: “talisman”), and the Bagua (the eight trigrams = the oracle symbols of the I Ching).

The Egyptian pendulums from the manufactory Baj in Poland are shapes emitting radiation, whose shape waves are the carriers of the radiesthetic colours described in the present brochure.

## *Active Graphics*

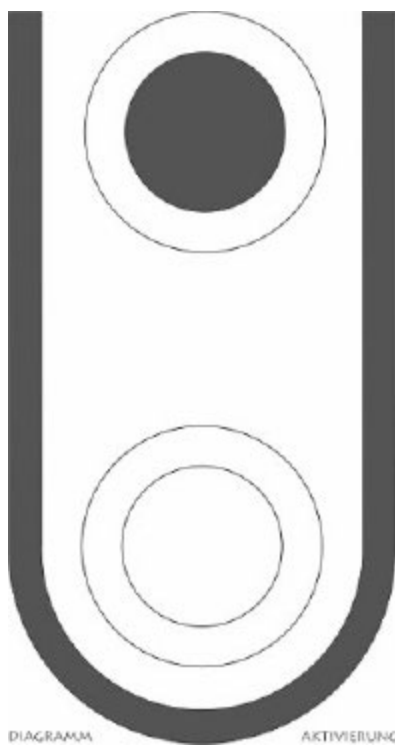

In the 1950s, a series of so-called “radionic graphics” were developed in the Frenchspeaking countries and used for experiments. According to the principle of the shape waves, these graphics emit radiations that can be used for therapeutic purposes, together with a pendulum, as was described by W. Herrinckx in his work “Initiation à la radiesthésie médicale” (Editions Servranx).

One of the best-known graphics is the one with four interleaved rhombuses that are to be aligned with the magnetic North, with a central sun for receiving the witnesses. The photo of the person to be treated is put on the central circle. On this a note with a description of the desired action is laid and on top a power symbol is put. Every suitable sign can be such a symbol, e.g. numbers, planets, colours, runes, stones, the name of a medicament. Nothing is easier than to compile a list of virtual remedies, be it

homoeopathic medicines, phytotherapeutic remedies or dietary supplements. The name of the chosen remedy is written on a small card whose effect is intensified by some therapists who put it for some minutes in a decagon before the application. After having done all this, an Egyptian pendulum can also be put above the witnesses, the radiation of which serves as a carrier wave for the energies represented by the witnesses, together with the combining active graphic of the rhombuses.

Since homeopathic medicines are subject to the vibrations of their environment, their effectiveness can diminish over time. In order to “refresh” such agents, the dynamiser R.P.T. was created. The agent is placed into the lower inner circle for 15 minutes, whereby it is totally reactivated. This sounds improbable, but can be verified radiesthetically.

The graphics are shown in reduced size and do not have the effectiveness of the originals offered on [www.servranx.com](http://www.servranx.com).

According to the British magus Murry Hope (see “La magie des energies” by Roger de Lafforest), the three runic letters kauna, sowilo and ansuz have turned out to be especially favourable in matters pertaining to health. They can serve as power symbols:

## *Radiesthesia and Quantum Physics*

The quantum theory has a very good explanation for the phenomenon of radiesthesia, whose essence is described in the book “Perfect Health” of the well-known Ayurveda physician Deepak Chopra. Hereafter some lines from it:

"The quantum defines itself as the smallest unit of light, electric or other energy probably existing. (The word “quantum” is deduced from the Latin word for “how much”.) The quantum reality determines our real conceptions. It lacks all solid matter. The atom was considered as the smallest particle of matter within the creation. The word “atom” is Greek and means “indivisible“. Nevertheless, the atom consists of even smaller particles that revolve around a big empty space with the speed of light. This space is so empty that it competes with the emptiness of the space between the galaxies; the distance between two electrons is proportionately greater than what separates the earth from the sun. If we concentrate our attention on these particles of matter that are smaller than the atom, we can see that they are not material at all, but rather pure energy vibrations that are perceived as manifestation of the solid matter. This discovery of matter being a wave vibration converted into another form, led to the quantum revolution of Einstein and his colleagues at the beginning of the last century. Instead of dealing with solid particles that move like billiard balls on the table, the physicists were concerned with ghastly vibrations looking at one moment like real and in the next one abstract.

The inevitable consequence of the quantum revolution was a modification of the world views. Quantum physics proved that the endless diversity of objects that we can see all around us – stars, systems of stars, mountains, trees, butterflies and amoebas – is interconnected by the eternal, limitless quantum fields acting like an invisible wrapping. The solid edges of each object – chair or table – are an illusion imposed on us by the narrowness of our visual sense. If we had eyes adjusted to the quantum world, those edges

would become blurry and would finally completely disappear merging with the endless quantum fields.

The outcome of the discovery of nature's quantum level were several practical applications; we owe it the X-rays, the transistors, the superconductors, laser – things that one could not imagine before science went into the depth of the creation process. Nowadays, it is believed that there exists a unique so-called unifying field – it is the ultimate reality upon which the totality of nature is based. Just as with a tree where the sprigs become twigs, these become branches out of which develops the trunk, the whole diversity of nature manifests itself in this unique all-embracing field. And as we are part of nature too, we must also be part of this unifying field. It is always in and around us.

Radiesthesia represents certain spiritual techniques and mental skills to attune the consciousness to the perception of the electromagnetic quantum radiations of a given object or an animate being. Thus, the radiesthesist can carry out a qualitative investigation of these objects. In order to exactly define the real energy that transmits the information in this “quantum media ocean”, the radiesthesist needs additional auxiliary means for the reception of the wave. For that purpose, he/she mostly uses objects transmitting energy, such as a photograph, a hair, a finger nail, personal belongings or the name.

Not everybody succeeds in quickly acquiring this skill. Often, years go by before satisfying results can be achieved – just as is the case with a good musician or athlete. The personal characteristics also play an important role for a radiesthetic analysis. Arthur Brisbane said: “Often, the right jewellery, the right gem or another object one carries on him/her, could prolong one's life considerably or lead to a successful career or a good private life. The successes and failures in life depend on the kind of mighty planetary and universal quantum streams with which we will be linked. And in this respect, our jewellery and clothing are powerful intermediaries for

implementing this connection. Now we know how we can obtain these services.“

## *Evidence for the Effect of Energy Work*

From William Bengston, “Bengston Energy Healing”

Although the principles at the bottom of energy healing are widely repudiated by Western academic medicine, they could be confirmed in various specific fields by experiments.

Some examples:

Proof of bioenergetic fields around living organisms (Rahn, Burr, Popp);

Use of conscious intention for influencing these fields, and amplification of effects through emotions (Jahn, Blasband, McTaggart);

Existence of information fields influencing the behaviour of entire species, including humans (Hardy, Sheldrake);

Proof that a clear intention in the brain of a sender can influence the brain of the recipient (Schwartz, Hameroff, Penrose);

Evidence that a conscious intention can induce physical effects, independent of time and distance (Backster, Miller).

## *The Essence of Quantum Physics*

Interesting ideas from the book “Die Essenz der Quantenphysik” by Bernhard Kutzler:

The physical world of matter is characterized by separateness, polarity, space & time, the ego and thinking.

The quantum world is characterized by relatedness, a matrix that connects everything with everything – and silence. In the physical world’s view, this matrix “replaces“ space, time and plurality that is expressed by the many individuals.

The silence results from the motionlessness. Without space and time there is no motion.

Nothingness does not have anything identifying. There are no words for nothingness.

These characterizations demonstrate how one can come as near as possible to the quantum world:

*Be in the Here & Now. In the Here & Now, there is neither space nor time, there is no thinking and no ego.*

*Be value-free. Without valuation, there is no right/wrong, no good/bad, no polarity. To be value-free means to accept everything as it is. To love means to accept what is.*

*Be in the silence.*

*Be conscious of the relatedness with everything.*

That’s what many mystic practices are about. The word “mystic” comes from the Greek myein = to close eyes and lips. One closes the eyes and the mouth to eliminate external interference. Our world distracts us

permanently in order to make us feel and think. Not to cede to this temptation any longer is one of the central challenges of personhood.

By means of which fishing rod and which bait can one fish in nothingness? If fishing rod and bait are meant to reach into the ocean of nothingness, they must not be material. As a consequence, only the non-material, i.e. spiritual components of man come into consideration.

In our judgement, man also is divided into a material and a non-material portion. These parts may be called body and mind - or (physical) body and consciousness. Various models exist for further fragmentations, namely

*emotional, mental and spiritual body*

*super-, sub-, un- and waking consciousness*

*higher, medium and lower self*

*soul and spirit*

Let us use the first fragmentation: The emotional body is responsible for feeling, the mental body for thinking. The equivalents or rather corresponding locations on a physical level are the brain as the centre of mental activity and the heart as centre of feeling.

Heart and brain are the two energetic centres of our body. Both produce electric currents that can be represented in ECG and EEG. Both also produce magnetic fields. The method for measuring the magnetic activity of the brain is MEG (magnetoencephalography). Electric and magnetic activities together result in so-called electromagnetic fields.

At the Heart-Math-Institute it has been found out that the electric field of the heart is about 60 times stronger than the electric field of the brain. The magnetic field of the heart is even 5000 times stronger than the magnetic field of the brain. Therefore, the electromagnetic field of a person has its centre in the heart and reaches up to several meters into space. This field has been given many names, the best-known certainly being Aura. Each person has an individual electromagnetic field carrying energy and information.

The centre of the field is the heart, seat of the feelings. If someone feels ill, poor or lonesome, it is to be read in his/her aura. If he/she feels healthy, rich and loved, this is to be found in his/her aura. The electromagnetic field of a person attracts exactly what is to be found in the field, i.e. what the person feels. Therefore, our feeling is the bait with which we fish in nothingness!

Since we always feel, we also always fish, meaning that we create without interruption. That is exactly why it is said: "The exterior is a mirror of the interior", or in the hermetic phrasing: "above as below, inside like outside."

Someone with chaos inside creates chaos outside. Someone with sadness inside creates sadness outside. Someone with joy inside creates joy outside. Someone with love inside creates love outside. And so on.

Whoever is not satisfied with his/her life situation, can find here an easy method for modifying it:

Realize that you have created the situation yourself.

Realize that you can modify the situation yourself.

Feel as if you had already what you want. That means: Choose a feeling consciously.

Choosing is a matter of intellect. Feeling is a matter of the heart. By choosing the “target feeling“, one can create a link between present and future. In other words: One eliminates the separation between present and future, between HAVE and WANT. By means of this trick, one arrives in the quantum world, where there is, as is well-known, no separateness.

The real creativity of man is the conscious choosing of a feeling, also called focus. In fact, we are determined by our development and environment, but we have a freewill and thus always a choice!

The success in creating from scratch comes from the conscious cooperation between heart and intellect. This sounds easy, but necessitates the control over intellect and feelings. This is a matter of pure exercise, and many meditative and mystic practices target exactly this.

We talked about the information contained in the electromagnetic field of a person. How much energy contains his/her field? In other words: How strong is his/her energy field? The strength comes from the intensity with which one feels. In general parlance, this is called passion, enthusiasm, the inner fire. Enthusiasm stems from the joy felt. And that is exactly why it is so important to live one's life with joy. In order to achieve this, there is a simple instruction: “Do something every day that really gives you pleasure”. This increases the sense of well-being and fortifies the electromagnetic field. And this is a key to a fulfilling life.

The electromagnetic field attracts what one feels. The better one feels, the stronger is the field and the greater the force of attraction of the field, and

the more successful one can use quantum healing.

## *Space of Variations and Stream of Variations*

From the book “Transsurfing 5” by Vadim Zeland

The space of variations is an information structure. This infinite information field contains any variations you like of all possible events. It can be said that everything that was, is and will be is contained in the space of variations. The space of variations serves as a template, as a system of coordinates for the movement of matter in space and time. Past and future are stored there statically as on a film, and the effect of time is only to be seen in the movement of the individual picture in which the present is highlighted.

The world exists simultaneously in two forms of physic reality: the form of physic reality that we can touch with our hands, and the form of the metaphysic space of variations lying beyond the sensory perception but nevertheless objectively existing. In principle, access to this information field is possible. Intuitive cognition and clairvoyance have their origin there. The intellect is not capable of creating something fundamentally new. It can only build a new house out of old stones. The brain does not store the information itself but something like addresses of data in the space of variations. The intellect obtains all scientific discoveries and masterpieces of art from the space of variations by means of the soul.

Dreams are no illusions in a traditional meaning. The intellect does not imagine dreams – it really sees them. What we can see in reality, are manifested variations. In our dreams, we are able to see nonmanifested sectors, meaning pieces with virtual scripts and stage settings. Dreams show us possible events from past or future. A dream is a trip through the space of variations.

All information is stored matrix-like in the space of variations. The structure of the information corresponds to interlocking chains. Causal connections provoke a stream of variations. The agitated intellect is permanently nudged by energo-informative structures and makes the solving of all problems its business, trying at the same time to keep the situation under control. The deliberate decisions of the intellect are in the majority of cases senseless washouts. Most problems, especially the small ones, take care of themselves if one does not struggle against the stream of variations. The main reason why one should not actively resist the current is the danger of either doing damage or wasting a lot of energy. The current takes the line of least resistance and includes therefore the most effective and reasonable solutions. Resistance against the current on the contrary leads to many new problems. The powerful intellect is senseless if a solution exists already in the space of variations. If we don't get involved in a trip into the dark and leave the stream of variations alone, the solution will come by itself, and in an optimal way in fact. The optimal character is already installed in the structure of the information field. Everything is possible in the space of variations, but in all probability the least energy expensive variations will manifest themselves. Nature does not waste energy.

*“Quantum physics does not only tell us that reality is a big spiritual overall scheme, but also that the world and the future are full of possibilities.*

*Therein lies much encouragement.*

*We live in an even bigger world than we commonly assume. And we can shape the world!“*

\*

***Hans-Peter Dürr***

## *The Seven Cosmic Laws of Life*

**Hermes Trismegistos (the amalgamation of the Greek god Hermes and the Egyptian god Thot) had once written them on emerald tablets and passed them on to humanity. These laws are effective in the entire universe and on all levels of reality. They are eternal and unalterable.**

*Unconditional love is above all these laws of life.*

### **1. The principle of mind**

All is mind. Infinite creative spirit is the source of life. The creation is mental. Mind dominates matter.

All that is mental and mentally created is subject to constant change by mental growth. There is no standstill, but only constant movement. Everything mentally created has a free will.

### **2. The principle of cause and effect = Karma**

Every cause has its effect – every effect has its cause. Every action creates a certain energy returning with the same intensity to its point of departure / to the creator.

Every thought, every feeling, every action is a cause having its effect. Therefore, there is no sin, no guilt, no chance and no luck, but only cause and effect possibly separated by many centuries and existences.

### **3. The principle of correspondence**

As above, so below – as below, so above. As inside, so outside – as outside, so inside. As large-scale, so small-scale. For everything that exists in the world, there is a correspondence on every level of the existence.

### **4. The principle of resonance and attraction**

Like attracts like and is enforced by the like. Unlikes repel each other. Your personal behaviour defines your personal circumstances and all your living conditions.

### **5. The principle of harmony or balance**

The flow of life is harmony. Everything strives after harmony, after balance. The stronger determines the weaker and approximates it. By giving what we are looking for, we let abundance enter our life. By giving harmony, joy and love, we accomplish luck, success and plentifulness in our life. Whoever does not live plentifulness, is denied it.

### **6. The principle of rhythm or vibration**

Everything flows in and out again. Everything has its tides. All things rise and fall. Everything is vibration. Nothing rests – everything moves. All that is rigid must break.

## **7. The principle of polarity**

Everything has poles. Everything has its pair of opposites. The opposites are the same. Like and unlike are the same. The truth of God is at the same time male and female and also the same. In the unconditional love there is no polarity. To live in unconditional love means to live in non-polarity.

## *The Principles of Conscious Creation*

Maxims from the book “The Divine Matrix” by Gregg Braden

The divine matrix is the primary source and the vessel of the universe, the connection between all things and the mirror of our creations. In our world, everything is connected with everything.

The access to the elemental force of the universe is possible if we consider ourselves as a part of the world and not as something separate. What has once been united stays forever united, whether it is physically near or not.

The very fact of focussing our consciousness is a creative act. Awareness is creative! We dispose of all the power necessary for bringing about all modifications that we desire! That to which we give our best attention becomes the reality of our world.

Feelings are the language that the divine matrix understands. If we feel as if our goals had been reached, our prayer is already answered. Not every feeling can make contact with the divine matrix. Only feelings that are free from judgements and ego can become creatively effective. The divine matrix reflects the relations that we create by our convictions.

We must become in our earthly life that what we want to experience in the outer world. We are not bound to the laws of physics known today. Our closest relations are the mirror of our true convictions.

In a hologram every part reflects the whole thing. The universally related hologram of consciousness promises us that our good wishes and prayers have already arrived at their destination at the moment of their expression. In the hologram of consciousness every little change all over the world is reflected.

The root of our “negative” experiences can amount to three fears: abandonment, feelings of inferiority and insufficient confidence.

*“An intelligent energy field keeps our universe together.*

*Our bodies and our world are materialized by this field.*

\*

*Emotions are the language that communicates with this field and which draws the quantum possibility into our world.”*

\*

***Gregg Braden***

## *Vibration Medicine*

Ideas from the book “Dowsing: The Ultimate Guide for the 21st Century“  
by Elizabeth Brown

The real crux of attaining and maintaining optimal health is understanding that the body in its primary state is an intelligent and self-organizing field – not physical matter. And this mind-field has an innate wisdom and unlimited healing capabilities.

It is how we treat ourselves – how we ‘program’ this field – that results in our well-being or in the manifestation of physical symptoms of ill-health. It is a choice we have, day by day, minute by minute. And all chronic metabolic imbalances and diseases result from the way we treat, or maltreat, our bodies – physically, mentally, emotionally and spiritually. A profound shift happens in our health and well-being once we realize that it is our responsibility to support this inner intelligence rather than interfere with or override such powerful innate wisdom. We ignore this doctor within at our peril.

The most efficient treatments restore the coherence or the balance of the body on the level of its original state and tackle energetic patterns with a vibration medicine. Methods of treatment such as acupuncture, homoeopathy, bioenergetics, Qigong, Shiatsu, craniosacral therapy and radiesthesia function according to this vitally important principle.

It is clear that we have to participate actively in this process if we want to enjoy optimal health with all its advantages. One cannot delegate this to a third party.

The simple, crass and disillusioning fact is that finally there is only one person that feels responsible for our health, namely we ourselves.

Sometimes though, this responsibility can be overwhelming. And confusing. The attempt to recognize the yet frail voice of the doctor within may be all but futile if the voice of the media and of those who control them, bawls on full blast; the voice of the pharmaceutical companies with their selfish commercial interests; the voice of the governments whose impartiality is blurred by the lobbying of the pharmaceutical firms, by the tobacco and the mobile communications industry and a series of further companies; and last but not least the voice of some unenlightened and not informed so-called health experts. Every week we are bombarded with contradictory new studies concerning remedies supposed to work wonders, foodstuffs healing everything, food additives that one must have. We are flooded by statistical analyses, by scientific results of research, nutritional recommendations, assertions by experts, by the eternal health myths, and above all by warnings, warning, warnings. Three months later, new studies by new groups contradict these assertions and offer yet new panaceas, universal remedies. And so we jump from one bandwagon onto the next hunting for good health.

My work only confirms that one must not believe everything that one reads. No wonder that the public is confused, frustrated and disillusioned by official advices finding it downright impossible to recognize truth behind the hidden motives of those who seemingly worry so much about our health.

But this is not necessarily true anymore! We can find the truth about our health in ourselves. And now we dispose of a method for gaining access to this truth and to all information that we need. We have a tool with which we can precisely define what is eventually beneficial for our body, at the same time taking into account all individual needs required by our style of life, as well as all predispositions and all conditioning by the environment.

This allows us to again assume control over and responsibility for our health.

## *Regeneration of the Body*

*“My physical body is able to regenerate and rejuvenate itself.*

*Health, vitality, beauty as well as inner and outer harmony*

*are my birth right.”*

These statements are written in the book „Erneuere Deine Zellen“ by Lumira – Ludmilla Weidner. To begin with, she recommends a daily exercise program divided into five fields:

Physical activities

Beauty care

Mental training

Meditations and bodily journeys

Nutrition

For rejuvenating the body, we also need a program that activates the following phases:

The overcoming of the old system of convictions telling us that we become old, ill and that we die;

The development of a new system of convictions;

The self-empowerment as driving force;

The conscious and active reversal of the cell structure and the holistic regeneration of the body;

An individual nutrition schedule and the purification of the body;

The program of aging is stored in us as of our birth and is seemingly confirmed by the reality around us. However, if we recognize our true nature, we can transform everything and create ourselves anew.

It depends on us to develop a new system of convictions. To do so, we must be open and convinced with the utmost certainty that rejuvenation is possible. Every change starts in the mind! Self-empowerment is more than a belief, it is the decision of the soul for the divine power of creation that is to be found in ourselves. Whole-body regeneration can only function if we opt for ourselves and for what vibrates in unison with our soul.

An individual nutrition schedule is necessary that is in accord with body, mind, soul and the whole universe. And one must also avoid harmful substances and keep the body clean.

Whole-body regeneration means a caring return of the body to the natural state of inner and outer harmony. In the process, all sabotaging forces must be accepted without reserve and transformed. For that purpose we use the whole available potential of our creative power. We must break away from the views, convictions and behaviour patterns that we have adopted from the “collective field of consciousness“, and must have the courage to create our “field of the future” as we imagine it.

As auxiliary tools, we dispose of the pendulums from the manufactory Baj – to be found in the shop [www.baj-pendel.de](http://www.baj-pendel.de) – and the orders described in this book.

The “New Radiesthesia“ transports the healing vibration directly into the energy field by use of the pendulum and mental adjustment to the desired goal.

*Let us make use of the power of the pendulum and the power of our  
mind!*

*“I myself must be sun:*

*I must with my rays paint the colourless ocean of the entire divinity.”*

\*

*Angelus Silesius*

## **Baj Pendulums and Pendulum Sets**

## *The Wooden Pendulums with Natural Remedies*

These extra big pendulums are meant for treating various health disorders and contain the vibration of suitable natural remedies. These extra big pendulums are meant for treating various health disorders and contain the vibration of suitable natural remedies:

Allergy skin and respiratory system respectively

Amino acids

Australian Bush Flower Essences

Bach flowers

Bowel cleanse

Cholesterol and uric acid

Diabetes

Enzymes

Eyes

Fibromyalgia

God's Pharmacy by Maria Treben

Heart

Hypertension

Immune system

Kidney and bladder

Liver and gall bladder

Lyme borreliosis

Menopause

Nerves tranquillity

Rheumatism

Sacred gifts (myrrh, gold, incense)

Sleep

Slenderness

Varicose veins

Vitamins and mineral nutrients

Water from 7 holy sources

16 mistletoes

*The Wooden Pendulums with Medicinal Herbs and Trace Elements respectively*

These drop-shaped wooden pendulums contain a certain medicinal herb or mineral each, that are used in naturopathic treatments.

### *The Wooden Pendulum PP - Prophylaxis*

This spherical pendulum made from acacia wood is well suited for use in prophylaxis and convalescence for fortifying and regenerating the organism.

## *The Wooden Pendulum Cu Baj I*

This pendulum with its powerful charge of pyramid and copper energy is meant for purifying and treating all infections, inflammations, poisonings, viruses and cancer cells in muscle tissue and blood. In the course of the treatment, it also purifies the therapist and his/her energy channels, thus preventing a negative charge process.

Application: Treatment of renal calculi or deposits in the kidneys or the gall bladder, of arteriosclerosis, pathogen blood pressure and blood pressure fluctuations. Two kinds of movement are possible with this pendulum, namely rotating or radiating. It rotates when releasing healing energy at a certain spot, and radiates if blood vessels are concerned.

It is important to mentally concentrate on one disease only. The pendulum can stop in between. One should always inquire whether the treatment is concluded, and continue if not. This pendulum is not suitable for treating bone problems or rheumatism.

This pendulum should be used at the end of every treatment session, in order to recharge the kidney chi of the client. For the therapist, a closing

treatment with the Cu Baj I is even more important in order to recharge his/her kidney chi, purify the energy channels and detach him/her from the energy of the client. Due to the energetic work, many therapists suffer from a copper deficiency influencing the kidney chi and over time causing decolouration of the hair.

## *The Wooden Pendulum Baj II*

This pendulum contains an integrated accumulator for sending and receiving radiesthetic vibrations. It is used for all kinds of radiesthetic work, especially for searching with a witness for a missing person. In this case, it is charged with the vibration of a witness of the person in question (photograph, hair, clothing, medicine, etc.). Then we start searching in corresponding plans as if the witness was contained in the pendulum.

But it is also possible to gather the vibration of a medicine and to afterwards dispense it directly or by teleradiesthesia to a person. The stored information is active until the pendulum is neutralized again.

## *PSI – The Wooden ORME Pendulum*

The PSI pendulum is a classical wooden pendulum whose interior contains a battery with ORME powder. From a scientific point of view, the substance ORME – created by its inventor David Hudson according to alchemical principles and called “White Powder of Gold” – consists of “orbitally rearranged monoatomic elements” in purified atomic form. These elements lose their metallic characteristics and turn into a superconductor when in an organic body.

The Swiss Alpha-Learning Institute confirms that the two brain hemispheres are synchronized by ORME. Concentration is supported, stress is reduced, autism and Attention Deficit Hyperactivity Disorder (ADS, ADHS) are moderated. In addition, ORME helps to clean thoughts and emotions, to relieve psychic disorders and to strengthen pure intentions. It delays ageing of the organism, repairs DNA defects, fortifies the flow of life energy and increases mental well-being.

In order to optimally apply the ORME vibration, the client should be brought into a relaxed Alpha condition. Treatment is possible in two ways:

In a sitting position: The client sits on a chair, his/her face looks North, the legs are not crossed, the feet are on the floor. The therapist stands behind the client and works above the crown chakra of the client with the pendulum rotating clockwise.

In a reclining position: If for some reason the treatment in a sitting position above the crown chakra is not possible, it is done with the client lying on his/her back, above the solar plexus. The client's feet point northwards.

The PSI pendulum isn't a receiver and can therefore not be contaminated by interfering radiation. Thus, there is no necessity to dejam it. In order not to endanger its content, one must not hit a hard surface with it.

## *Sets of Pendulums including Various Wooden Pendulums*

These sets of pendulums include a series of wooden pendulums all belonging to a logic umbrella term:

12 Medicinal plants from the Amazonas

12 Ayurveda medicinal herbs

12 + 12 Schüssler salts

Medicine chest with 10 pendulums and Isis / Osiris pendulum

made of wood

Universal pendulum set with 49 pendulums (see figure)

15 REMEDIA hormones

Nature medicine with 6 or 18 pendulums

All you need for Health (vitamin C, OPC, Schindele's minerals)

Lyme disease set (3 pendulums)

Anti parasites set (3 pendulums)

## *The Isis/Osiris Pendulum*

According to designated use, the Isis/Osiris pendulum is available in different versions:

Isis/Osiris made of brass, with 3 Osiris and 3 Isis elements

Isis/Osiris macro made of brass with 3 Osiris and 3 Isis elements

Isis/Osiris big made of brass with 7 Isis and 2 Osiris elements (figure to the right)

Isis/Osiris 4H4 made of brass with 4 Isis and 4 Osiris elements

Isis/Osiris made of beech-wood or sandalwood with 7 Isis and 2 Osiris elements, one of which is removable and equipped with a chamber for incorporating an agent

Isis / Osiris made of beech-wood or sandalwood with 12 Isis and 2 Osiris elements without chamber (radiates in the range platinum to diamond)

All brazen pendulums are also available in a gilded version.

The Isis/Osiris pendulum is one of the most powerful and most important pendulums from the Baj manufacture. The unity of the creative principle and the combination of male and female energies are fully reflected in this pendulum. It symbolizes the Egyptian cross of life. The Isis/Osiris pendulum contains the full spectrum of radiesthetic colours, the dominating colour being a different one depending on the version. In the wooden version the pendulum radiates in white, in brass the small one radiates in ultraviolet, the big one in platinum. The 4H4 pendulum covers the gamut between magnetic violet and ultra-white.

The big brazen Isis/Osiris pendulum and the gilded one are the most important instruments for the therapist working with pendulums, and therefore they are the favourites among all healing pendulums. The battery of 8 Isis elements reinforces the effect of the pendulum for remote treatments. The pendulum is of multipurpose use:

It purifies foodstuffs and makes them well-tolerated

It can charge water with the corresponding encodings or prayers

It serves for testing herbs and medicines

It purifies the body from all negative energies

It serves for remote healing and remote treatment

It may be used for screening from harmful frequencies, i.e. coming from the TV (tip points towards the TV set)

It dissolves pain, absorbs pain; it emits healing energy and energizes

Its possibilities are unlimited, and it works together with the intuition and mental force of its owner

It is ready for use anytime and does not need any recharge

It is radiation-resistant and self-cleaning due to its own permanent emission of radiation.

The pendulum is widely used in practical therapeutic radiesthesia, because it reacts outstandingly to commands. Experimented radiesthesists can use it for mentally transmitting any radiations and colours into the aura and chakras of the clients. Furthermore, it is possible to gather the vibration of a certain remedy with the pendulum and to then transmit it to the beneficiary. The pendulum will swing clockwise until the body is saturated with the missing vibration. It emits just the energy needed by the body in order to be able to maintain its equilibrium and the homeostasis.

We can also give a mental order to the pendulum: "Remove the cause of this ailment or this pain from the energy field of the client." The pendulum starts first counter-clockwise to withdraw the negative energies and then refills in a clockwise movement the energy field of the beneficiary with positive, healing energies.

My experiences in practice when treating all kinds of pains and inflammations with this pendulum were excellent. One should integrate it as a mental assistant in one's practical work, because it supports and intensifies the healing task and also spares one's own resources, if nothing else.

The brazen pendulum can always be carried in one's trouser pocket. It protects and constantly supplies us with healing energy.

In addition, we can with this pendulum open, harmonize and purify all chakras. To begin with, we can find out in which condition the chakras are. We hold the pendulum within the energy field of the client over the different chakras and observe in which direction the pendulum swings. Meanwhile, experience has shown that the clockwise movement of the pendulum indicates an open, psychodynamic chakra, meaning that the feelings and psychological experiences operated by this chakra and flowing through it are balanced and fully effective in the life of this person.

If on the contrary the pendulum moves counter-clockwise, the chakra is psycho-dynamically closed and one can assume that there is a problem in the corresponding area. Therefore, if one diagnoses a psycho-dynamically closed chakra with the Isis/Osiris pendulum, one gives it mentally the order to open up the chakra in question, by holding the clockwise moving pendulum above the corresponding chakras. Afterwards, one balances the chakras with the corresponding radiesthetic colour. This can either be done with the colour pendulum that we shall discuss later in more detail, or with the Isis/Osiris pendulum itself.

The Isis/Osiris 4H4 pendulum (figure to the right) with the 4 Osiris and the 4 Isis elements serves for increasing the vibration; it has downright harmonizing effects and can be used for drawing off symptoms on a physical, emotional and mental level. It radiates on the magnetic phase in the range between diamond and platin.

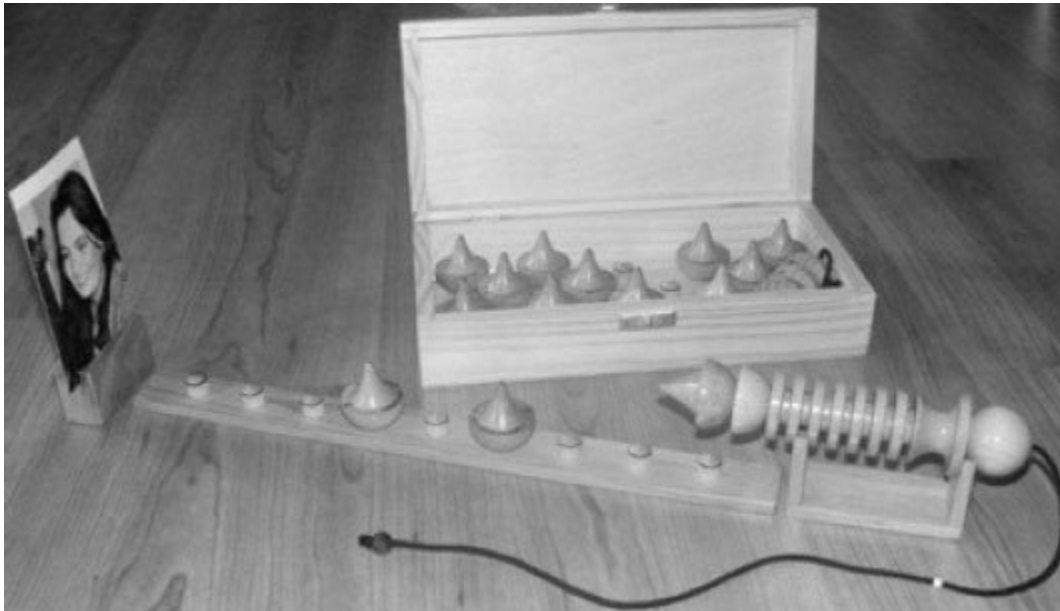

The Isis/Osiris pendulum with its 3 Osiris and 3 Isis elements (figure to the left) arranged in reverse order, available in 2 sizes, works very much with ultraviolet, purifying energy. But with this pendulum, one practically never observes any negative physical reaction, because due to its shape emission it is self-cleaning and absorbs and neutralizes negative reactions like a sponge. It may also be used for protection, i.e. being carried in the trouser pocket against chemtrails. The small version can also be ordered as a gilded amulet, which radiates on the angel frequencies Ariel, Raphael and Zadkiel (see the 22 angel pendulum).

The great advantage offered by the wooden Isis/Osiris pendulum is the possibility to use it like an orgone emitter by applying suitable remedies or mental orders for remote treatment with a photograph of the client. By doing so, it is possible to penetrate instantaneously and without any loss of energy or quality into the cell nucleus of the beneficiary. The pendulum is self-cleaning and works on the white ray of light. As the heads can be exchanged, it is possible to use any substances, as medicines, vitamins, minerals, herbs. With this pendulum, one can also use all exchangeable tips of the Baj manufacture, such as Schüssler salts, herbs from the Amazonas, Ayurveda herbs etc. This pendulum is also available as an addition to a medicine chest pendulum set.

Apart from the vibration of the introduced charge, the pendulum emits the entire spectrum of radiesthetic colours in order to thereby restore the energetic balance. This stimulates the energetic centres.

For remote treatments, there is a rack each for the pendulum, the photograph and for up to 9 pendulum tips with various agents.

The preparations administered by means of vibrations have absolutely no side-effects. This is a secure therapeutic method, because the organism only absorbs as much preparation as it needs. Even persons normally showing allergic reactions to certain substances, can without any problem tolerate the substances administered this way.

## *The Colour Pendulum (pendulum for chakras, simplified universal pendulum)*

The colour pendulum was developed for a simplified work with the vibrations of the different colours. It replaces the universal pendulum in its basic functions and consists of a wooden ball containing a radiesthetic charge. On the cord, there are the basic radiesthetic colours grey (negative green), black, infrared, red, orange, yellow, green, blue, indigo, purple, ultraviolet and white, as knots. Holding the different colour knots between thumb and forefinger, we can for instance check above the solar plexus whether the colours are needed in the body. Furthermore, we can check whether the different chakras work harmoniously.

Please work with the colour pendulum on the front and the back of the person to be treated, from the feet (grey) to the knees (black), the thigh (infrared), the root chakra (red), the sacrum chakra (orange), solar plexus (yellow), heart chakra (green), throat chakra (turquoise), Third Eye (indigo), crown chakra (purple), above the head (ultraviolet) and the aura protection around the body (white).

Hold the pendulum near the body above the particular chakra. If we work on ourselves, we hold it in front of our solar plexus and ask for the condition of the specific chakra. One holds the cord directly at the specific colour knot and mentally asks: “How is the energetic condition of this colour or this chakra?” Doing so, one pays attention to the rotational direction of the pendulum:

If the pendulum starts moving clockwise, this means that body/organ/chakra, all need this energy. One lets it rotate until the movement is balanced. Afterwards, we fix the colour vibration above the specific chakra or solar plexus, by laying our hands on it and we imagine how the colour is stored in the body!

If the pendulum moves counter-clockwise or not at all, this means an obstruction or malfunction of the chakra. In this case, we use the big brazen Isis/Osiris pendulum or the 9-part Osiris pendulum for giving the order to open up the chakra, to purify and harmonize it. Afterwards, we check with the colour pendulum whether the colour in question is still needed.

If the pendulum moves from for- to backwards (or diagonally or right/left), this means that the existing energetic condition is in order.

**Use of the colour and WML pendulum chart for a self- or remote treatment (see annex):**

Put the photograph (or the name and date of birth) of the person onto the ZIN/URU symbol of the pendulum chart. Lay your forefinger on the specific chakra on the chart and check the condition by means of the colour pendulum. Now, work with the colour pendulum directly over the pendulum chart when you adjust the colour vibrations for the client. If the colour pendulum stops, the corresponding chakra is blocked and has to be opened by means of the Isis/Osiris pendulum. To do so, give the mental order: “Please purify, open and harmonize this chakra”. Refill then the chakras with the colour pendulum. Treat front and back, here too! In addition, it is possible with the brazen Osiris pendulum to transform the rotation of a chakra into a pulsation.

## *The WML Pendulum (Lymph Pendulum)*

The pendulum for lymphatic massage was developed very carefully on the basis of the corresponding wavelength of geometrical shapes and their vibration. The form of the pendulum, additionally reinforced by the radiesthetic accumulator inside, provokes a special energy that allows the emergence of so-called shock waves. Due to the specific shape of the pendulum, the vibration of healing substances is transmitted directly into the body cells by ionization.

Theoretical and practical research of many years at the Centre for Radiesthesia and Psychotronic in Zabrze, led to the development of this special pendulum that provokes the flow properties of all body fluids, especially the lymph.

The lymphatic system (lat. systema lymphaticum – lymph = body water) is part of the immune system that protects humans and vertebrates against pathogens, foreign particles and pathologically modified body components. It consists of the lymphatic organs and the system of lymphatic vessels. The system of lymphatic vessels does not only assume the function of a defence system, but is also important for the transport of fluids and is closely related to the blood circuit. Work with the pendulum supports the lymphatic system and prevents congestions of the lymph capillaries, the lymph vessels and the lymph nodes.

The use of the WML pendulum can be prophylactic or therapeutic for the elimination of congestions and oedema, in case of inflammations and pathological modifications of the lymph nodes; it improves the lymph flow after infectious viral and tumorous illnesses, thus reducing the time of convalescence. It is further used against dryness of the mucosa, inflammation of the paranasal sinuses, modifications of the skin due to lymphostasis, and generally for supplying the muscle tissue with liquid.

For the extremities, the application is done longitudinally, centrally clockwise in star-shaped movements on the body, and in linear movements following the course of the meridians. The WML pendulum is used as a basic treatment before every treatment with the colour pendulum in order to purify, open and prepare the aura for the following energies, and to make the meridians flow completely after delivering them from all congestions. On the physical level, the consequence is a much better lymph transport. The colour pendulum chart may also be used for self- and remote treatment with the WML pendulum.

## *The Isis Pendulum*

The Isis pendulum belongs to the family of the Egyptian pendulums and owes the special shape its inherent radiation intensity (shape emitter). According to its characteristics, this pendulum is named after Isis, the wife of Osiris and mother of Horus, well-known from the Egyptian mythology. Isis is the goddess of the night sky connecting the hearts. Just like any other geometrical shape, the shape seen in profile and representing the “key of life” (Ankh) also has its own vibration that is emitted in case of the Isis pendulum concentratively via its tip. As for the wave length, this vibration corresponds to that of white light. This is a very positive energy, as all vital processes within the human organism pass off in this colour. It is reinforced by the accumulator consisting of superposed disks.

The Isis pendulum comes in brass in 3 sizes from micro to macro with 4 up to 8 disks, in a middle sized beechen and sandalwood version with 4 disks, in a macro beechen version, and lately also in a beechen version with 8 disks.

The Isis pendulum can be used for diagnosis on the client and for treatment as a medical pendulum, but also in teleradiesthesia.

The radiesthesist can treat the client with the Isis pendulum and recharge his organism with the white colour. The advantage of working with medical pendulums is the fact that all pendulums stop treatment by themselves. Therefore, there is no overdoing.

In teleradiesthesia, the search for water veins and other negative radiations is predominantly done with the Isis pendulum.

The Isis pendulum is characterized by a variety of possible applications: As a receptor for examining foodstuffs, herbs, medicines, for defining the dosage and efficiency of therapeutics and therapies, for establishing diagnoses, for examining objects (also using photographs), etc.

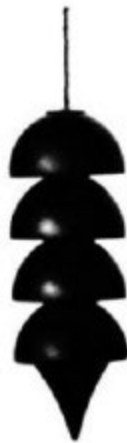

As a sender – by mental entry, one can emit and reinforce any wanted frequency with the Isis pendulum. Due to this characteristic, it can be used especially in the colour therapy (chromo therapy), because after mental entry, a whole bundle of frequencies is emitted at the same time, reaching as far as the sum of all colours which corresponds to the white light. In this connection it is advantageous that it is not necessary (but possible) to define in detail the colour vibrations necessary for healing, as the energy field of the diseased organism makes the choice.

By simply holding it in his/her hand, the treating person can purify him/herself from the absorbed disturbing energies of the client. When holding the pendulum above the hand, the solar plexus or a diseased organ, the transmission process is indicated by the duration of the circling. Further possible applications depend on how keen the user is to experiment.

The Isis pendulum is radiation-resistant and self-purifying due to the constant emission of its own radiation. It is ready for action at any time and does not need any recharge.

## *The Osiris Pendulum*

The Osiris pendulum is named after the Egyptian god of the nether world and of reincarnation, but also of fertility and vegetation. Osiris, the god from the Nile, represents good, and every Egyptian was convinced that he/she would be united with Osiris after death.

Due to the geometrical shape of the four hemispheres, a special vibration is emitted. In this process, the hemispheres joined in series act like accumulators and reinforce the own negative green radiation of the Osiris pendulum.

This pendulum is manufactured and offered in a normal wooden version, lacquered in black, with 4 hemispheres, and in an especially strong version with 9 hemispheres. A further version with 4 elements made of light wood was developed by Josef Baj in such a way that it works continually on the white radiation spectrum. The number of hemispheres may be varied according to requirements and the contents of the hollow tip may be

exchanged. This pendulum may be used for scientific purposes, in biotherapy and for teleradiesthesia.

The Osiris pendulum is of inestimable value for experienced radiesthesists when treating clients suffering from cancer or any other tumours or who are afflicted by viruses, fungi or bacteria. By means of a mental command, one can by working with this pendulum above the picture of the diseased person send him/her as much of this specific energy as he/she actually needs.

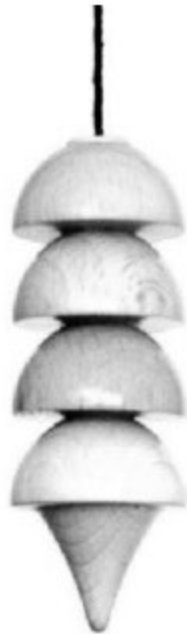

The Osiris pendulum rotates as long as the organism can benefit from the radiation for healing or palliation. The treatment may be repeated after a remission.

After the energy transmission with the Osiris pendulum, it is recommended to undertake an after-treatment with the white energy of the Isis pendulum as compensation and for rebuilding the self-healing power of the person. Whenever a negative green pendulum like the Osiris pendulum moves counter-clockwise, one can assume that the person in question has too much of this negative green energy in his/her aura and body, due to geopathic strain. In such a case it is always necessary to check the place of location/habitat of the person in question and to neutralize it with the appropriate means.

Because of its high self-radiation, this pendulum must only be used by responsible therapists! The pendulum should best be kept disassembled in a metal case.

## *The Osiris Macro Pendulum*

The Osiris Macro Pendulum in the original old Egyptian shape with the tip made of rock crystal and 4 hemispheres as accumulators operates with a strong self-radiation on the white light-ray, contrary to the traditional Osiris pendulum and the Karnak pendulum that both radiate negative green. Despite its relatively important size of 180 mm length, it is surprisingly mobile and shows fast reactions.

The Osiris Macro Pendulum can be used for the transmission of all radiesthetic colours, but also of medicines, vitamins and medicinal herbs, due to its special characteristics. But its special field of application is the treatment of pain, tumours, viruses, bacteria and inflammations. With this pendulum, one can energize water and strengthen the human biofield.

The pendulum can be used directly above the organ concerned or above plans and with a witness. Its radiation may be used as carrier wave onto which a healing thought or a selected remedy is modulated and transmitted locally or over a distance.

The Osiris Macro Pendulum can be programmed in a way that it emits the necessary energy in order to counteract a specific disease. In this case, one holds the sphere located at the end of the cord and gives the command: “Send as much energy as is needed for eliminating/healing ...” Another possibility is a long-term programming of the pendulum by making a light knot in the cord and mentally stipulating: “Send energetic radiation for eliminating/healing...” As soon as the case is closed, one unties the knot.

## *The Brazen Osiris Pendulum*

This filigree Osiris pendulum made of brass consists of 9 elements 4 of which can be unscrewed separately. Like all shape emitters, it is to be used together with a mental order. When completely assembled, the Osiris pendulum emits the highvibration frequency diamond that has many transformative characteristics. With this pendulum, chakras may be opened and functionally optimized, because the diamond vibration transforms them from a rotation into a pulsation. It strengthens the energetic bodies and promotes the special abilities of all senses. Another existing variety of the brazen Osiris pendulum only has 5 elements.

If the pendulum is used with 5, 6, 7 or 8 parts, it vibrates on negative green frequencies of variable intensity that can well be used for treating various diseases. When working as a therapist, one should not fear the negative green radiation. It can in a wonderful way be integrated into the healing task and often is the only vibration that really operates for specific symptoms (viruses, fungi, bacteria, cysts, skin alterations, etc.).

## *The Karnak Pendulum*

The Karnak pendulum belongs to the pendulums that were found in the Valley of the Kings in Egypt. The fact that it is an exact copy of the original is decisive for its excellent characteristics. Its enormous sensibility makes it an indispensable tool for every radiesthesist. It is especially suitable for looking for water, minerals and metal. The corpus of the pendulum is hollow so that radiesthetic samples may be put there if desired. The pendulum then reacts to concordant vibration patterns. For the radiesthetic work with plans and sketches there is no better pendulum.

The same is true when the pendulum operates as sender of radiesthetic vibrations. By using the extremely short and rapid carrier wave (negative green), the experienced therapist can transmit messages or vibrations over short or long distances. The negative green vibration may be applied in the biotherapy and teleradiesthesia, just like with the Osiris pendulum.

In case of inflammations, viral or bacterial diseases, lipoma or tumours, the Karnak pendulum is a precious treatment tool. One works above the solar plexus or over the affected organ. But it can also be used with a photograph in remote treatment.

The Karnak pendulum should only be used by experienced therapists. Negative green is a quickly disintegrating vibration. When assembled, Karnak continuously emits this frequency and indeed in all directions, not only by the tip. This can cause damages in case of inadvertence. The Karnak pendulum must therefore be disassembled after use. Due to its self-radiation, the Karnak pendulum need not be cleaned.

The Karnak pendulum is also offered in a beechen macro and a beechen super-macro version, each of these either radiating negative green or operating on the white light-ray.

Another version is the shamanic Karnak pendulum made of aluminium (figure to the left) – a very light pendulum covering the entire radiesthetic area “Third Eye“ (see Merkaba hologram), that reaches from indigo to ultraviolet. It has a very strong purifying and healing energy and may be used for any healing order. With this pendulum, one executes after every treatment (after the universal pendulums) a soul recovery and integration, the appropriate command being: “Please reintegrate all separated soul parts completely in the body of this person!” Many people confirm thereafter that they feel themselves complete again. Nothing is missing any more.

## *The Atlantis Pendulum (Protecting Amulet)*

Around 1860, the French Egyptologist Marquis d'Agrain found a ring with mysterious symbols in the tomb of a priest in the Valley of the Kings in Egypt. A relative of the Marquis, Arnold de Bélizal, father of André de Bélizal, one of the creators of the universal pendulum, examined the ring and discovered that around the engraved symbols, a certain positive energy is emitted. De Bélizal realized that the ring dated back to the period of Atlantis, the heirs of which were the ancient Egyptians. The American archaeologist Howard Carter wore a silver copy of this ring when working at the excavation of Tutankhamun's tomb. Most of the involved persons died within a few years of the excavations of various diseases, after accidents or suicide. When asked why he had survived, Carter answered that he only knew of a powerful amulet about him. Only years after his death, his diary revealed that this concerned the Atlantis ring.

The transposition of the Atlantis ring's symbols onto a three-dimensional object led to the development of the Atlantis pendulum. Extensive tests and

measurements confirmed the suitability of the pendulum for radiesthetic tasks.

The Atlantis pendulum operates like the Isis pendulum on the white ray and reacts to mental commands, thereby becoming a secure tool even in the hands of inexperienced radiesthesists. In practice we have made the experience that as an amulet the Atlantis pendulum permanently changes its radiation, adjusting it to the bearer. It is then impossible to define a definite basic radiation of the pendulum, because it changes repeatedly during the day, according to the needs of the bearer. It offers its bearer protection against unexpected events and mental attacks by alien energies. According to my tests, the Atlantis amulet increases the bio-vitality by up to 200%. It is quite possible that the pendulum causes so-called “initial worsenings” and brings out old issues that were swept under the carpet and must now finally be healed and transformed. It moderates the so-called “body of light symptoms” and helps to develop our body of light. It promotes spirituality and the connection with the “Higher Self”. It also promotes the desire for a healthy way of living, and detrimental substances (like nicotine and other substances causing addiction) lose their appeal for the bearer of the amulet. The body arrives better and better at its healthy vibration and begins to have a mind to things that are good for it (healthy food, healthy way of living).

Worn as an amulet by day, the pendulum should be cleaned under running water after sunset and during the night lie near the bed, away from electric smog, “in a quiet and dark place”.

Due to its little weight and the pointed tip, the Atlantis pendulum is suited for radiesthetic work on plans and maps, when for instance looking for

missing persons, displaced objects, soil resources, archaeological finds etc. Thereby, the pendulum is self-cleaning and doesn't need any interference suppression. Take the pendulum in your hand before the radiesthetic task in order to obtain a positive influence of your deliberate mental orders over the reaction of the pendulum, due to this interference with your aura. In case the pendulum lies on a desk or in a drawer of the desk, the owner can by means of a mental order build up a protective zone around him/herself. When travelling, it is also possible to have it lying under the driver's seat or under the hotel bed and thus build up a protecting area against unexpected events.

The pendulum is offered in a gold-plated or a silver-plated version, it is 42 mm long and is delivered with a leather tape in a leather case.

## *The Hathor Pendulum*

Hathor, the goddess of love and joy, is often represented as a woman or a cow with horns and solar disc. As wife of Horus she was seen as protecting the land on the Nile, the foreigners and all female beings. She is the oldest of the Egyptian goddesses, was already venerated around 2700 B.C. and later ceded some of her symbols and functions to the younger Isis. Her symbolic animal is the cow in which shape she is often represented, sometimes with the head of a lioness, as according to a myth, she originated from the goddess Sakhmet. The most frequent images show her as a young woman with horns between which the solar disc is shown. She was considered as parturient of the universe and mother and daughter of the sun. In the Greek mythology Aphrodite was Hathor's equivalent.

The Hathor pendulum is the combination of the Isis, Osiris and Karnak pendulums was developed by me at the beginning of the year 2011 after a spiritual inspiration. It operates on two very high-vibrating frequencies (“ultra-white” and “rose”) that were only explored recently by Polish radiesthesists at the occasion of the development of the Prometheus pendulum set. These new frequencies serve an intensive spiritual

development and the extension of our spiritual skills, but also the development of love and compassion!

The Hathor pendulum is delivered in a leather case with two exchangeable spheres, the small sphere corresponding to the “rose” ray of light, the big sphere to the divine “ultra-white”, crystalline energy. It also operates (as does the Isis/Osiris pendulum) following a mental order, i.e. “Give me now the frequency necessary for developing my spiritual skills!” or “Give me now the frequency necessary for freeing myself from old fears and low vibrations!” or “Give me now the frequency necessary for developing my ability for affection!” or “Give me now the frequency necessary for transforming my ego!”. There are no limits to mental orders!

Hathor is like Isis, Osiris and Karnak a shape emitter and can be used for remote treatment! It permanently emits its own vibration!

### **Healing ceremony with the Hathor Pendulum**

First, build up around you a CONE OF LIGHT or a PILLAR OF LIGHT with the big sphere on the Hathor pendulum, by saying: “I now beg for the pillar of light of protection and cleaning and for the connection to the divine light!”

(Gate to the divine light level, causing that everything that leaves me over the foot chakras goes towards the LIGHT where it can continue to GROW and to DEVELOP.).

You work with the pendulum in the upper middle of your chest near the heart chakra. Doing so, this chakra is activated and dilates a little.

FATHER-MOTHER-GOD = THE TRUE GOD – THE TRUE GODDESS  
as well as our CHRIST-awareness are to be found there, in your HEART!

*The HEART chakra has the ability to feel vibrations; it is true that all chakras are able to do so, but the HEART can differentiate much more subtly; it may even after some exercise most delicately feel the QUALITIES accompanying the vibrations of an energy. Therefore, it is also able to discern TRUTH from untruth.*

While concentrating on your HEART chakra, say in your mind:

*"I am in resonance with UNCONDITIONAL LOVE"*

(This little holy formula was given us by CHRIST)

Or say the healing formula:

*"I reconcile myself, God may act within me."*

Work with both spheres of the Hathor pendulum (and introduce these formulas in your vibrations), but especially with the small one that operates on the rose ray of light of the all-encompassing unconditional love! This ceremony gives us the connection to the source only thanks to which healing can take place on all levels! Especially in case of grave illnesses and tedious processes I recommend this healing ceremony.

From „The Ancient Secret of the Flower of Life” by Drunvalo Melchizedek:

The Hathors were the principal or primary mentors within the school of mysteries “Horus’ Left Eye”. Although they did not come from the earth, they were always on the spot in ancient times to support us in deploying our conscience. They loved us very much and they continue to do so. When our conscience conformed better and better to the third dimension, we were at some point not able to see them anymore and did not respond to their doctrines any more. It is only now as we grow, that we begin again to see them and communicate with them.

Hathors are part of a race of entities of the fourth dimension and descend from Venus. On the three-dimensional level of Venus one cannot see them, but if one enters the vibrations of Venus on the fourth dimension, especially the higher overtones, one can find there an incredibly rich culture. They are the most intelligent awareness in this solar system and act as nerve centre of all that lives under our sun. Whoever comes from an outlying solar system has to register on Venus before being able to proceed.

The Hathors are entities affected by immense love. Their love happens on the level of the Christ awareness. They use vowels for communication and for executing tasks in their environment. They have amazing ears. There is almost nothing dark around them. They are nothing but light – pure caring entities. The Hathors have a lot in common with the dolphins. Dolphins use echo sounding almost for all their activities, whereas the Hathors use their voice for almost anything. We create devices for lighting or heating our homes, whereas the Hathors simply use the sound of their voice.

Not many sculptures of Hathors have survived in Egypt, because the Romans took them for evil geniuses and vandalized them in an incredible lust for destruction. One sculpture comes from Memphis and stands on top of a 12 meter high column – unfortunately, nowadays the column is almost hidden in the earth, the temple having only been discovered in 1985.

The Hathors are about 3 to 4.90 meters tall. They have already for a very long time been helping humans on earth and that almost always through their love and their incredible knowledge in the field of sound. In Egypt there exists an initiation during which the sound of Ankh is produced – this is one of the initiations of the Great Pyramid. In the process, the Hathors produce permanent sounds for half an hour or an hour without ever stopping in between. This process is used above all for healing the body or for rebalancing actions in nature. It is as if we had to sing “OM” and must breathe at the same time. The Hathors have learned to produce a sound without pausing, by inhaling through the nose into their lungs and then exhaling through the mouth – and that on and on without interruption. The initiation around the sound of Ankh only was one thing among many they did for us to see to a balance. The Hathors have already resided on earth since thousands of years in order to assist humanity.

The process of simultaneously inhaling and exhaling and at the same time producing a continuous sound without pausing is still known today. When Aborigines play didgeridoo, they also apply this kind of circular breathing. They are able to produce a continuous sound for an hour by controlling the airstream into and out of their body.

## *The Energy Spiral (goddess vortex)*

This pendulum has the capacity to eliminate negative energies from within the aura and the body, regardless of their origin. The order addressed to the energy field of the client reads: “Transform all negative loops out of the aura of this person / this animal now.” The valid manifestation is: “Enhance the corresponding areas in the aura now with your light, so that rejuvenation, regeneration and recovery take place.” Depending on the kind of order, the pendulum will successfully execute either clockwise or counterclockwise.

This energy spiral is the ultimate technology of the powers of light. It is a rainbow loop encompassing not only the colours of the rainbow, but light of any kind. Its basic ray is gold. An angelic entity transforming all darkness in pure light by means of an eightdimensional celestial door. It is a vortex of the PRESENCE OF THE ONE AND ONLY, absorbing all anomalies of duality and creating a morphogenetic field of oneness. This network of light will finally transform all darkness on the astral and ethereal levels and eliminate all negative entities. The vortex energy passing through our bodies and fastening itself on our physical level, dissolves the negative matrix. Heaviness and strain can give way and be transformed into love and lightness.

Please do not only work on your personal negative loops in the aura, but especially on the negative loops in the aura of our mother Earth, our collective aura. Here too, we live in a matrix that does not have the best intentions towards mother Earth and its inhabitants, and it is time for all of us to strive for a safe matrix around mother Earth so that the lightsome inhabitants of this planet will some day be able to live together in peace. All that is not light has to be transformed and healed.

*“I beg for healing of the matrix of mother Earth and healing of the collective matrix of all inhabitants of the Earth, so that light, love, peace and liberty may be brought back to our planet earth. Please heal the matrix of our entire solar system and transform all that is dark into divine light. Thank you! So be it!”*

Afterwards, beg for durable establishment of this energy within the energy field of mother Earth!

## *The Mer-Isis Pendulum*

The Mer-Isis pendulum is based on the principles of the sacred geometry. It combines three Isis disks with the powerful form of the lower half of the Mermet pendulum in which the energy of the radiesthetic vibrations rose, white and gold is collected and yielded from there into the energy field of the client.

The pendulum may be programmed by means of mental orders; counterclockwise it is one of the most powerful healing pendulums for pains, blockades, traumas and problems of the musculoskeletal system; clockwise it is used to strengthen the immune system and the self-healing capacities. Sometimes, the pendulum seems to dance when it operates elliptically or starlike. Longitudinally, it may also be used against blockades along the spine.

The Mer-Isis pendulum is available in three sizes from 23 mm (7 g) to 44 mm (88 g) length; it is made of brass.

## *The Medicine Wheel Pendulum*

The “Mother Earth” or “Medicine Wheel” pendulum is a pendulum to be filled in form of an acorn, that operates intensely with the natural energies according to the Indian medicine wheel. It links the human being anew to mother Earth and nature. Acorns symbolize life, fertility and immortality.

The pendulum operates on the basic ray Black/ Silver; on the chromatic circle, these vibrations are to be found almost exactly opposite to each other. Black represents the earth, silver (that also lies in the earth) represents the link to the moon (to the soul, the feelings, the female, intuitive, receiving aspect). It again accommodates us to the pulse beat of mother Earth, to the roots and to the natural entities, the plants, trees and crystals growing inside mother Earth. The pendulum is important for humans and animals having problems with strong increases of energy and not being able anymore to ground themselves in the right way. It also helps when treating plants and may additionally be filled with medicinal herbs and/ or globules. You may also fill it with your own blood or saliva (on a piece of pulp) and enter this information by swinging. Hereby, the body receives important impulses and information for healing and self-regulation.

In an Indian Medicine Wheel, 36 stones are arranged in an inner and an outer circle, interconnected by spokes. Each stone in these circles has a very special meaning. The four cardinal points, the height of the sky and the depth of the earth are the cornerstones to which the medicine wheel is orientated. Such a ritually arranged circle bundles, canalizes and harmonizes energies. The forces bundling here endeavour to harmonize everything that lies within their range with the cosmos. The outer circle of the medicine wheel can be considered as life's journey or course of the year. Four paths lead into the inner circle, and by treading them, we learn how to integrate special qualities and experiences into our life. In the inner circle, we find mother Earth, father Sun and grandmother Moon, the three most important celestial bodies influencing our life. The four elements, namely earth, fire, water and air are also to be found here. In the middle of the wheel there is the creator's stone that maintains the wheel of life in motion. In a deeper sense, the wheel encompasses the three levels of creation (upper, middle and lower world) and thus stands for the relatedness of all life.

The medicinal wheel can mentally be filled into this pendulum and whatever is needed, will be integrated into the human being, the animal, the earth or the plant.

A possible order to the pendulum could be: "Convey the power of the medicinal wheel to me now and integrate all elements in my mind, my soul and my body." When ordering this, one acts above the picture of the medicinal wheel.

This brass pendulum operates with either a mental order or an appropriate filling. It weighs 40 g and is not sensitive to wind.

## *The Eye of Ra Pendulum*

As a creator god Ra reigned on earth among the people and gods. During his reign, he experienced a human destiny and became old and weak, which is why people rebelled against him. In order to punish her, Ra went up into the sky and took a piece of the sun with him to place her as a deadly weapon in the form of an eye on her forehead. According to this myth, Pharaohs, as a symbol of protection, later bore an uraeus snake in the form of a cobra on their head as a symbol of Ra eye.

The most important part of the pendulum (length 102 mm, weight 36 g) is the central part in the form of a sphere with its metallic interior which generates a continuously radiating reactor wave. The upper, black hemisphere serves as a protective shield and neutralizer for the hand and the body of the therapist against harmful effects of the radiation. The two lower hemispheres serve as amplifiers and conduct the generated green-minus radiation into the pendulum tip, which acts as a radiating antenna. For storage, the pendulum is disassembled. Green-minus has a strong drying and mummifying effect as well as an antibacterial effect, and can thus be used to extend the shelf life of food. In the medical field, the radiation can help to remove warts and flat moles. The radiation also has a deterrent effect on insects and other troublesome vermin.

*Note by Brigitta: By connecting and meditating with the oscillation of the pendulum, I came to the conclusion that this particular vibration can also be used to eliminate alien parasites such as Morgellons (fibrous skin growths). Subsequently, the ORME pendulum can be applied very well.*

The pendulum should be used with appropriate restraint and no longer than 30 minutes per day. If, however, the tip is used in stationary areas with vermin (see picture), the duration of the application is not limited in time. However, this area should not be accessible to other living creatures such as pets. If a human or animal still has received too much of a green-minus radiation, a treatment with a pendulum, which radiates the colour green-plus, can be treated as an antidote: "Transfer to xxx as much of this vibration as necessary to restore the normal state of the body."

## *The Pendulum Set Eye of Horus*

The set eye of Horus allows dowsers to see into the spiritual world "on the other side".

The ubiquitous electro smog drowns and suppresses the ability of the human subconscious to sense perceptions outside the physical world. The noise and hustle and bustle of our civilization are not conducive to the sense of subtle energies that are associated with dowsers and absurd perceptions researchers. These influences also hamper experienced dowsers at work. Although by deepening the mind in an alpha state the connection is facilitated, it may be difficult for the novice to reach this.

On the basis of references from ancient Egyptian mythology an activator of the subconscious was developed, which interferes with the world of micro-vibration.

The eye of Horus, two white spheres with a built-in amplifier, stored in a wooden box, transmits energy by means of appropriate polarity to

strengthen the subconscious mind of the receiver.

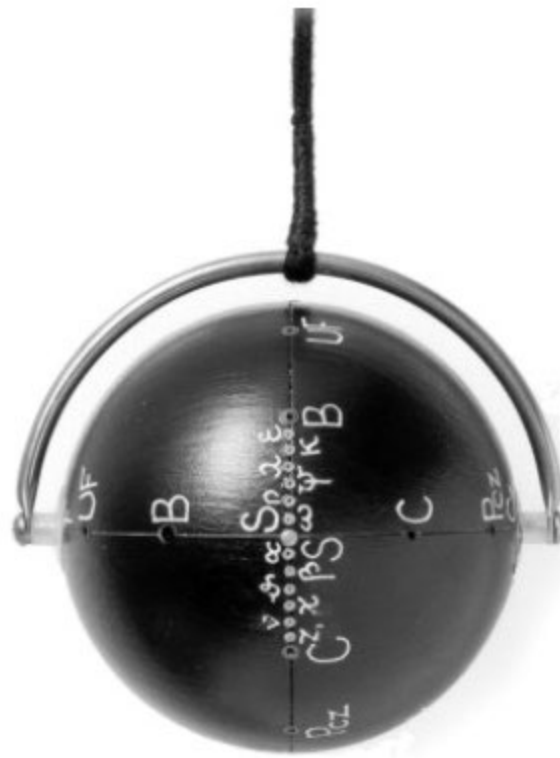

According to Egyptian mythology, Geb is the god of the earth and Nut is the goddess of heaven. Their descendants are the two sons Osiris and Seth, and the two daughters Isis and Nephthys. In the battle for the throne Seth kills Osiris, who is, however, revived by the gods and bears witness to the goddess Isis the son Horus. Horus had a special way of seeing: his left eye, the moon eye, had the ability to see what was hidden and inaccessible to the ordinary senses, his right eye, the sun's eye, saw the material world in all its complexity, beginning with the smallest particles of matter.

Application: A comfortable, sitting position should be used in a quiet room with dampened light. We hold the ball with the silver ring in the left hand, the one with the gold ring in the right hand, with the coloured markers facing upwards, on the thighs. We close our eyes, soothe the breath and cleanse the mind of unnecessary thoughts. Now, we visualize how the subconscious mind expands in all directions, into the heart of matter and the universe. After 10 to 15 minutes we slowly leave the state of meditation and realize that our subconscious mind has become much richer in knowledge and the radiesthetic work easier. Depending on the predisposition and the need, the application can be repeated several times, with no danger to the body.

The diameter of the spheres is 7 cm.

## *The French Universal Pendulum*

The universal pendulum (UP) was developed in the early 1930s in France by Léon Chauméry, André de Bélizal, and P.A. Morel based on Egyptian models. It is well known in various Eastern European countries, and many radiesthesists in Poland, Russia, but also in Great Britain, France and Switzerland use it. The UP is in principle fundamentally different from the various forms of single-hand and two-hand dowsers used by many radiesthesists as indicators on the human biosystem, and that without any specific attunement technique. Contrary to these indicators, the UP is also called radionics instrument.

The black spherical pendulum with a 5 cm diameter and a weight of about 50 g (UP 5.4), or 6 cm and a weight of 75 g (UP 6.6) consists of specially treated wood. The sphere contains a magnetic accumulator which

constitutes the axis and is connected with a hemispherical copper bow. The magnetic battery consisting of 4 (UP 5.4) or 6 (UP 6.6) series-connected Osiris hemispheres has the function of reinforcing the vibration characteristics of the universal pendulum.

The pendant cord with three knobs is fastened to the revolvable bow. It can slide along the entire hemisphere of the bow so that completely variable adjustments are possible. The UP features marker points with short terms of the radiesthetic colour frequencies on the equator of the spherical pendulum and also on two perpendicular meridians the scales of which cover 400° each.

For the operation of the UP no mental instruction is needed, as it automatically and selectively measures and emits vibration energy, due to its various adjustment possibilities. The UP 5.4 is above all used for measuring (receiver function) the vibration frequency needed (colour), whereas the UP 6.6 with its much stronger emission rather serves for transmitting (as a sender) the necessary (measured) vibration energy. The bow and the mounting of the cord on the bow are adjusted to the corresponding frequency marker; in addition, the appropriate knobs on the cord are used.

The universal pendulum is the only pendulum to be used without mental alignment of the therapist and either with electromagnetic vibration (EM) or on the levels of electrical (E) and of magnetic (M) vibration.

Work with the universal pendulum leads to an enhancement of sensitivity and a better understanding of energetic correlations in the field of subtle matter. When working with the universal pendulum, the therapist does not suffer any loss of energy. This is one of the great advantages of this pendulum. Due to its vibration, the universal pendulum must be stored in an appropriate distance to other pendulums, in order to avoid false measurements (about 5m for the UP 6.6).

Work with the universal pendulums is only meant for experienced radiesthesists. After having used the pendulum, its bow must imperatively be reset to the position positive green on the electromagnetic equator!

## **Application of the radiesthetic colours on the UP in accordance with the 5 elements of the TCM**

This section concerning the connections of the universal pendulum with the Traditional Chinese Medicine (TCM) has been fertilized by the book “Manuel de Pendule Universel” by Mika Widmanska.

The five elements represent phases of transformation of processes or action qualities. Therefore, these are not elements in terms of components, but aspects of a dynamic process that is felt as cyclical and represented clockwise in a pentamerous circle. To imagine organic processes as cyclical, does not mean a permanent, monotonous repetition, but implies an evolution: Each cycle of the cyclical process modifies the starting position for the following cycle.

In the Nutrition cycle (clockwise), the elements feed each other, one element gives birth to the other element; their relationship is that of mother and child:

Wood makes fire burn,

Ash enriches the soil with nutrient matters,

Earth produces metal,

Metals animate water,

Water nourishes wood.

In the Degradation cycle, (counter-clockwise) each element develops due to the degradation of its predecessor. This corresponds to the relationship grandmother – grandchild; the child’s mother weakens the grandmother:

Fire consumes wood,

Wood absorbs water,

Water corrodes metal,

Metal pulls minerals out of the earth,

Earth smothers fire.

The relation in the Control cycle is a pentagram in a circle, which is generated by the fact that each element acts on its successor's successor. Controlling interventions cannot take place arbitrarily without disturbing the process. Therefore, the inherent universal laws must also be taken into account in case of an external process control:

Water extinguishes fire,

Fire melts metals,

Metal splits wood,

Wood withdraws nutrient matters from the soil,

Earth pollutes water.

Yin and Yang as a fundamental concept in the TCM make possible to understand the interactions within the macrocosm, the universe, but also in the case of every living being, the microcosm.

Yang as the male principle represents activity, subtle energy, heat. Assigned to Yang are the hollow organs (Fu) – gallbladder, stomach, small and large intestine, bladder and triple heater. In addition the upper body half, the body's back, the sun, the sky and many more.

Yin as the female principle represents rest, substance, cold. Assigned to Yin are the organs rich in substance (Zang) – liver, heart, spleen, lungs and kidneys, but also the pericardium (heart sac). In addition the lower body half, the front side of the body, the moon, the earth and many more.

Yin and Yang need each other, condition each other, create each other. In case of a Yang deficiency developing out of a Qi deficiency, our hands and feet are cold, we find frequent colds, the longing for hot beverages, exhaustion, loose stool and other specific symptoms depending on the organ concerned.

Abundance of Yang is characterized by violent pain, colics, but also by erythema, red eyes, high fever, heavy thirst, longing for cold applications, constipation.

In case of a Yin deficiency, the cooling, calming Yin-effect is lacking; we find night sweat, hot flashes and other specific symptoms depending on the organ concerned.

Abundance of Yin tends to depressions, overweight, strong longing for coffee, head pressure and susceptibility for colds.

In the TCM, the base of the physiological functions is a harmonious interrelation between the Yin and the Yang organs. Of central importance in this context is the theory of a relation between the interior and the exterior. According to this theory, the internal organs belong to Yin and the external organs belong to Yang. Meanwhile, the knowledge of the intestine being the interface between interior and exterior and at the same time being the outermost organ as far as a contact with foreign agents is concerned, has become accepted in the Western naturopathy.

Let us now consider in which way we can influence each of the 5 elements within the Nutrition cycle with the radiesthetic colours and their analogy to a Yin/Yang Organ:

Wood = liver/gallbladder = Green Fire = heart/small intestine = Red

With the colour Green we activate the circulation and purify the blood from toxins and cholesterol. Green is the colour of the heart chakra.

Fire = heart/small intestine = Red Earth = spleen/stomach = Yellow

With the colour Red we strengthen the spleen energy and support the haematosynthesis out of food. Fatigue is a weakness of the spleen, Red reinforces the vitality; it is the colour of the root chakra.

Earth = spleen/stomach = Yellow Metal = lung/large intestine = White

With the colour Yellow we balance the lung energy. Yellow can balance an excess of mucus due to humidity, and also balance an imbalance in case of dryness. As the colour of the solar plexus chakra, it supports us in case of melancholia and grief or helps to integrate the cause of pain.

Metal = lung/large intestine = White Water = kidney/bladder = Black

With the colour White we can strengthen and normalize the kidney energy. Thereby, we also support all that is connected with the bone structure, because White is the colour of the rear throat chakra, which is connected with the parathyroid that is responsible for the calcium metabolism.

Water = kidney/bladder = Black Wood liver/gallbladder = Green

With the colour Black we reinforce the living energy. In the TCM, liver and kidneys are located in the Yin aspect, meaning due to the body fluid that the kidney provides, the liver can produce blood. The other colours of the

universal pendulum can also be used in the TCM for balancing the body functions.

***Infrared – for treating exterior body layers***

Pathogenic factors originating in our environment, can invade our body through the skin surface. These factors can be of climatic or epidemic origin. Rapid measures for supporting the body's immune defence are of decisive importance. In doing so, the UP offers us this very useful colour.

***Negative green – for treating the immune system***

The colours positive green and negative green are vibrations of the same nature, but of different polarity. Positive green is the vibration of the loving heart, negative green the destructive force of the offended heart. Nevertheless, negative green can also be useful as a weapon against internal or external attacks. The body's defence is taken over by the immune system that disposes of an important organ under the breast bone, namely the thymus gland and its production of T-cells.

As soon as body cells degenerate pathologically, they change their polarity. This can either happen by exterior or by interior influences and lead to grave illness such as cancer. In the TCM, emotional blockades are the sole cause for pathogenic modifications that attack and poison the body.

Negative green, corresponding to the rear heart chakra, can help to focus the awareness on the cause of the illness and to recognize it, which is a first step towards healing. This shortest and penetrating vibration on the UP can purify, open up and eliminate blockades.

***Ultraviolet and Indigo – for treating the brain and the spinal cord***

The brain, in the TCM the place where the spirit is located, is an extraordinary organ and as such fulfils psychic and neuro-sensorial functions. The spinal cord participates in the development of the brain and of the skeleton, but also in the haematosi. With the colour Ultraviolet we can support the development of the body tissue, and with the colour Indigo, we can support its regeneration. Ultraviolet serves for expanding our mind; Indigo strengthens the psychic activities on all levels. If our heart and our mind work together, we can reach a conscious understanding of our existence.

### ***Blue – for toning the Yin energy***

The colour Blue, symbolizing water, is complementary to the colour Orange corresponding to energy. This corresponds to Yin and Yang. The first calms, the latter activates. The physical correspondences are the sympathetic and the parasympathetic nerves. Blue relieves pressure, calms, moistens.

### ***Orange – for fortifying the heart and spleen energies***

The colour Orange is the vibration between Red and Yellow and is as an active energy assigned to Yang. Orange is the colour of the rising sun, when the day's activities start. In this spirit, we can assign Orange to the heart, as this vibration stimulates the lifegiving movement. And every life begins in the uterus at the level of the sacrum chakra to which the colour Orange corresponds. In the TCM heart and uterus are connected by a special energetic channel. Therefore, Orange can also, if needed, fortify the heart energy and rectify a lack of oxygen in the blood. The spleen is also called sun chakra and is also associated with Orange.

**“Everything is relative“. According to this principle of the TCM, many other applications of the UP's colours are possible and make sense, as far as they result from a test process, because our world and our existence must not be limited by rigid views.**

The universal pendulum is a very good example of the concept of duality, namely Yin (the earth, the matter as visible energy) and Yang (the sky, the subtle energy), namely

Concerning the visible (the colours from Red to Purple) and the invisible (Infrared to Ultraviolet)

Concerning the front of the body (corresponding to the visible colours) and the back of the body (corresponding to the invisible colours)

Concerning matter (shape) and energy (vibration)

Furthermore, we observe the correspondence of the colours situated at the magnetic meridian of the UP with the meridians Ren Mai (Yin – conception vessel) and Du Mai (Yang – governor vessel).

The meridian Dai Mai (Girdle vessel) divides the body into the upper (Yang) and the lower (Yin) half. It supports all other meridians and controls the energy flow between the two body halves. With the UP we can by means of the colours detect possible imbalances of the meridians and regulate the body's energy flow.

The electric meridian of the UP generates an electric field and corresponds to our male side. The male brain expresses itself through intentions, fixed ideas, directions and challenges. It lacks feelings and confidence in the intuition.

The magnetic meridian of the UP generates a magnetic field and corresponds to the female aspect. The female brain is connected with intuition, confidence and the distinction of the whole. It lacks intentions, direction and fighting spirit.

The electromagnetic meridian (Equator) of the UP generates a powerful electromagnetic field as the sum of the two other fields. If both exist in equal parts, harmony, joy, creativity and health manifest themselves.

*The most incomprehensible thing about the world is that it is at all comprehensible.*

\*

*Albert Einstein*

## *Universal Pendulum 22 Angels*

*Created in 2012 by Brigitta Schmidt & manufactured by Baj*

“When the year 2012 slowly drew to a close – on a foggy November day, it could have been the 13th, the mental world came forward with the order for a new universal pendulum that should ring in the year 2013. The massive increase in energy asked for a new light tool that could work directly with the celestial forces themselves, meaning the angel energies. It was done very quickly, and every angel chose its own place on the sphere. But that was not all! Places were occupied that were not allocated on the traditional universal pendulums. And before I could say knife, 22 angel forces took their seats on the hologram.

The hologram pertaining to this pendulum was also quickly created with the suitable symbols, corresponding planets, signs of the zodiac and precious stones, and the new light tool was done and is now produced in the Baj manufacture. The hologram by itself has an infinite and wonderful power and can be used for energizing photographs, objects, charm-stones, water etc., as soon as you place the object in the middle of the hologram on the Star of David.

Inside the universal pendulum we should install a battery of radiesthetic forces in terms of 13 Osiris hemispheres. Having done this, I noticed that as well the number 13 as the number of angel forces, namely 22, result in a checksum of 4, this number reflecting paradise, consummation.

A wonderful light tool was born, so that we may even nearer and more intensely integrate the angels and their cosmic forces into our healing task. I received the message that this tool may be used without any hesitation by any person feeling appealed. There must be no fear that one could harm anybody.

This pendulum assembles the energies of the archangels and the divine energies on the surface of a powerful golden universal pendulum with a diameter of 7 centimetres, provided with 13 Osiris hemispheres functioning as energy amplifier.“

The use is extremely simple: Above the Hologram 22 Angels (see annex) we can establish the individually needed forces and qualities respectively and make them available for the spiritual evolution.

This is done by means of an Isis pendulum that we let vibrate above the hexagram in order to ascertain in a first step which one of the 3 available colour knots on the cord of the pendulum (body, mind, soul) is adequate and

in a second step the quality of the archangel required. For an application over a distance (teleradiesthesia) we lay the witness (photograph, name and date of birth) on the central hexagram before beginning to work on the hologram.

In order to establish the appropriate angel at the two points of intersection of the pendulum's movement with the circle, we check at which intersection point the Isis pendulum moves clockwise. We then adjust the appropriate angel on the corresponding colourcoded pendulum meridian, by twisting the bow on the sphere and slide the cord on the bow until the suitable short term is reached. And finally we still have to test the necessary rotating direction of the pendulum.

We work above the reclining person to be treated by standing at the person's side and by letting the pendulum rotate at the knot defined above the solar plexus of the person – or in case of teleradiesthesia above the photograph or the paper with the person's name and birth date. As soon as the pendulum stops, meaning that it swings neutrally back and forth, we once more test on the hologram whether further angel frequency is needed. After work, we imperatively reset the bow and the cord to the position Raphael (Ra+) at the equator.

A last clue for treatment with the angel pendulum, coming from my practice: Directly after the basic treatment for the chakra balancing I work with the angel pendulum on the client.

I always only test one angel for the spirit (on the red meridian), one angel for the soul (on the green meridian) and one angel for the body (on the blue equator). And that always in this order – which is logical because we must first treat the spirit, then the soul and then the body. The treatment with the

angel pendulum is in most cases completed after a few minutes, and afterwards there is practically no other frequency needed (Prometheus, Merkaba, etc. become superfluous).

Thus, my work is finished more quickly if I work with the three angels that I always test. Checking afterwards on the hologram the Bio-status, I can see that I brought all clients to ultra-white (highest energy) with a vitality of up to 200%. Thus, body, spirit and soul of the client get so much power that the entire system can perfectly regulate itself.

By the way, the Seraphim energy with the ultra-white light is not missing on the pendulum 22 angels. This frequency is emitted by the archangel Metatron who works with the Seraphim energy.

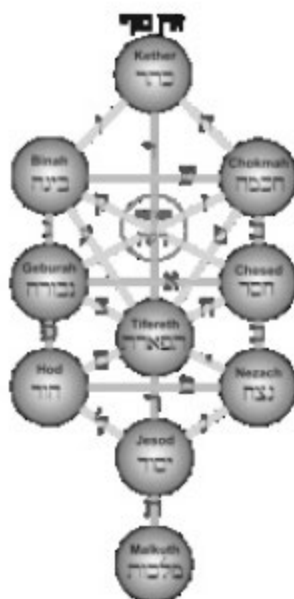

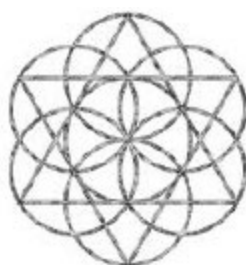

For the descriptions of the energies on this universal pendulum only short terms were deliberately chosen, because these are energies that can only be expressed inadequately in human language. Everything that has ever been written on this subject is only a ridiculous fraction of the actual meaning of these energies. The written statements are simply what human beings are able to express in words. But if one tries to feel deep in one's own inside, one feels that these powers are so mighty that unfortunately, this cannot be expressed in words.

*“For he shall give his angels charge over thee, to keep thee in all thy ways. They shall bear thee up in their hands, lest thou dash thy foot against a stone.” (Ps 91, 11+12)*

### **The explanation of the hexagram in the middle of the hologram**

Depending on purpose and use of the hexagram, the interpretation of this symbol also varies. The hexagram is for instance interpreted as symbolic representation of the connection between men and God. Man has received his life from God (triangle pointing downward) and he will return to God (triangle pointing upward). Furthermore, the six triangles stand for the six

days of creation. The great hexagon in the middle stands for the seventh day (day of rest). Already in very ancient times, it served as protection against all dark forces and was in the past unfortunately too often used abusively.

## Archangels

The word “archangel” means “master of the messenger“. These supreme messengers are entities of light who have their home in the 10 Sephiroth of the cabbalistic Tree of Life. As personification of the spiritual forces they are equipped with certain functions that they execute in the divine and in the physical world. Nine archangels of the Kabbalah – Metatron, Raziel, Zaphkiel, Zadkiel, Kamael, Michael, Raphael, Ariel and Gabriel – have

eight servant angels each. The archangel Sandalphon is the master of the souls on earth.

In the Holy Scriptures like the Koran, the Bible and the Tanakh, the three archangels Michael, Raphael and Gabriel are especially mentioned. All other archangels were only known to the initiated mystics and the scholars of various esoteric schools.

### **Archangel Andon**

The archangel Andon cooperates with the angels Elohim in redeeming the souls and brings them to light. It is the archangel of the soul's ascension and appears above all to dying persons whose soul is retrieved. It is the archangel of transition and of interdimensional travels. Being himself gentleness and peace, he is a powerful protection against dark forces. He is the only archangel with black wings. At the end of the angel descriptions, under the heading Rituals, there is a clearing prayer that you can pray additionally while working with the Andon energy. This qualifies for permanently detaching occupations by alien energies.

### **Archangel Anael**

Terrestrial and cosmic fires are subject to the command of the archangel Anael. His energy is able to completely unsettle deadlocked structures and to burn the scoriaceous remains of the past in an all-consuming fire. He wants to help solving collective traumas that have piled up in our consciousness in order to free us from the cycle of fear and violence. He delivers the karma in the root chakra, in the second chakra and also in the solar plexus.

His qualities are courage, progress, energy, admission of fury and aggressions so that inner peace may return, transformation of base drives, resolute action, baptism of fire, delivery from collective traumas, sexuality, destruction for a new start.

## **Archangel Ariel**

The name of the Archangel Ariel means “God’s lioness”. Her energy has very powerful effects and she governs over demons. As the archangel of the new age she is connected with technology and all decisions that are to be taken from the heart in loving acceptance.

Her qualities are powerful assistance against demoniac entities, support of intuition in case of decisions taken in loving acceptance, assistance in technological matters.

## **Archangel Bariel**

The energy of the archangel Bariel is the vision and creation of a new and perfect world where animals and all other animate beings are respected and esteemed as beings having a soul, because they are part of the divine creation. The archangel Bariel represents the principle of infinite plenitude, having its source in love and gratitude to the entire life. The archangel Bariel connects our spirit with the light flame of Lord Maitreya who realizes in us the master awareness of infinite goodness and the caring compassion for all beings.

His qualities are responsibility, grounding, enjoyment, fulfilment, connection with the plant and animal kingdom, protection of the physical body, experiencing the earth with all senses, growth, respect for the entire life, dissipating the feeling of separateness.

## **Christ Awareness**

”Christ Awareness“ means that not only are all beings connected as individuals, but even more: Everything is part of me and I am part of everything that exists. Every human being, every animate being, the entire nature, every angel, even God himself is me. A total modification of thinking and a real understanding of the cosmic laws is possible as soon as we have interiorized this knowledge, because there still exists a WE. Duals are balanced, male and female conjoin again and become ONE. Christ

awareness is the energy of the new world in which we shall create driven by love.

### **Archangel Chamuel**

The name Chamuel means “He who sees God”. The energy of Chamuel is cheerful, gentle, caring and at the same time powerful. Some perceive it like an affectionate embrace. It raises the vibration as if one was carried by angel wings.

His qualities are harmony, lightness, buoyancy, creativity, inspiration, beauty, relations, partnership, compassion, assistance for finding what we are looking for.

### **Cherubim – Plenitude of cognition**

The Cherubim are the “Guardians of the Garden Eden“. They guard the way to the “tree of life” with flaming, blazing swords. They prevent people that are not yet ready and mature, from attaining paradise, unity. In the Bible, they are called “Custodians of the Divine“ and of the „holy places“. Their statues stand on the ark of the covenant, protect it and constitute the space where Moses can meet God. Ezekiel describes them in his visions as beings with four wings and four faces – a face of a bull, one of a lion, one of an eagle and one of a human, thus representing the symbols of the four elements. When the Cherubim move, their wings swoosh with a roar, and when they stop, it thunders.

If we adapt ourselves to their energies, they are at first strange, they appear in a fullness that cannot be grasped. They are very near to the divine and have therefore the capacity of transmitting the direct vibration of the divine. Thus, they are an important intersection between the divine impulses and the beings of materialization.

### **Elohim**

The term El stands for the one God, whereas Elohim is a plural form and should be translated as meaning “gods”. They appear at the beginning of the Genesis, because they created heaven and earth. In my opinion, this concerns God in his plurality: the creative energy itself with its unlimited possibilities. Therefore, I abstain from further explications and limitations, because this would only inadequately describe this infinite power. The same is true of all other angel energies in this short description.

### **Archangel Gabriel**

The name of the archangel Gabriel means “ambassador of God”. Beside the archangel Michael she is the best-known archangel and is mentioned not only in the Bible as bearer of messages. To Mary, she announces the birth of Jesus. Her energy is bringing hope, it is joyful, luminous and illuminative.

Her qualities are lust for life, hope, resurrection. Clear messages, expectations, desires, modifications, freedom, provision for our children.

### **Archangel Haniel**

Although one gets the impression of a very powerful and encouraging force, Haniel’s energy is nevertheless gentle. Her name means “Glory of God“ and she is the guardian of the heart chakra. Her energy is like all-encompassing love, gentleness and comprehension. She combines high awareness with earthly power, she centres and at the same time relieves pressure.

Her qualities are knowledge, recognizing and living the own power, integrating awareness in everyday life, looking through illusions, joy, power, self-assurance, sublimeness, imperturbability.

### **Archangel Jophiel**

Her name means “Beauty of God”. The archangel Jophiel works together with the angels of wisdom. Her energy is gentle and connective, one feels motherly and warmly surrounded. She brings relaxation in situations where one is stressed.

Her qualities are integration, access to a higher existence, clarity, self-realization, confidence in the creation, distinctiveness, wisdom, constancy, divine love, feng shui.

### **Archangel Kamael**

The name Kamael means “God’s Rigorous“. The archangel Kamael is the personification of God’s consistency and rigour. He is the guardian of the threshold if someone crosses a forbidden border, guardian of the road, of human relations and of the solar plexus chakra. He carries a sword like Michael, that cuts off what is dead. Together with the angels Seraphim, he is executor of ordeals. One could understand Kamael as martial aspects of the divine, as he impersonates divine justice.

He is the guardian of salvation and liberation. The flock of angels Seraphim are his direct subordinates and show themselves as fiery serpents.

### **Archangel and Priest Melchizedek**

In the New Testament, Melchizedek is also called “King of Righteousness and of Peace“ and considered as priest of the “Supreme God”. Jesus is integrated in the line and order of Melchizedek who simultaneously was priest and king, thereby combining spiritual and material tasks. It is said that he had neither parents nor genealogy and that he neither knew the beginning of the days nor the end of life. His energy is force- and powerful and at the same time full of love and peace. He seems not to know any borders, all is possible, everything can be created. Whereas Metatron represents these energies in the spiritual field, this is true of Melchizedek in

the material field. He works together with archangel Metatron and the force of Christ.

His qualities are healing of the earth, he is spiritual teacher for the development of force and power in love, healing of the body together with the archangel Raphael, development of environmentfriendly technologies, healing of father issues, strengthening of creative power.

### **Archangel Metatron**

Metatron is a special archangel and his name does not end like that of the others with “el”. Therefore, in various systems he is not counted as an archangel. Often, he is called “Prince of angels” or “King of the angels”. He emits the highest vibration of all archangels, is guardian of the threshold between the shapes and non-shapes and within the archangels’ hierarchy, he is nearest to the origin. It is said of Metatron that he formerly was the prophet Enoch. His energy is very light, gentle, clarifying, it is pure all-encompassing love. His power equals that of the archangel Michael but at the same time his energy is of a totally different nature. We can experience healing through it that exceeds by far the physical factors but takes place in our soul. He makes old and new medical knowledge accessible, animates substances with healing power and information. At the same time, he imparts cosmic knowledge to humanity through esoteric sciences, in order to thereby open for us the doors to our hidden truths.

His qualities are the giving of all-encompassing divine love, the combination of divine and human elements, promotion of total awareness and of the link with our own divineness, gaining access to spiritual sciences, experiencing healing in the depth of one’s being.

### **Archangel Michael**

His name means “He who is like God”. He is one of the best-known and most often acknowledged archangels and is described as warrior against the

dark powers and also as protection – and he is often represented with the blue sword and flames. The archangel Michael makes humanity aware that we can only be like God if we are part of the divine entity, and that exterior conflicts are nothing but our own unsolved inner conflicts that we can solve with the aid of his energy. Carrying into effect his energy is the headstone to true love and true inner peace. This energy is clear, powerful, clarifying, hitting the mark, and at the same time protecting, enveloping and fortifying.

His qualities are clarity, purity, solution, protection, power, justice, confrontation with the cosmic-divine laws, structure, delivery, willpower, courage, truth, confidence in the divine unity, finding and realizing true peace.

### **Archangel Nathanael**

The archangel Nathanael represents a very advanced stage of development. He stands directly before the throne of God and is one of the archangels that can see God's visage. Therefore, he is able to transmit celestial visions that are received by those destined for it due to their inner light. There are many persons who despite their faith hold the manifestations and life in the material world in higher regard and feel safer in it if the existence of subtle matter entities and spiritual laws are banned into heaven. They feel a deep fear to be in reality confronted with true spirituality. They fear the death of their ego and the reincarnation as spiritual entity, as master of the light.

The archangel Nathanael represents God's almightiness. This almightiness also exists on the terrestrial level and in ourselves, if we join the divine power.

His qualities are spiritual gifts, contact with angels and masters, visions, faith, wonders, spontaneous healing, cosmic enlightenment, surrender to a spiritual guidance.

## **Archangel Raphael**

Raphael's name means "Divine healer". His energy is soft, enveloping, healing, nourishing, purifying, renewing, and concurrently gentle and powerful. In symbolic representations, Raphael carries a vial with balm, because his energy is like balm for body, spirit and soul.

His qualities are healing and becoming whole on all levels for humans and animals, fortification, renewing, transformation of the past, acknowledging the connection between illness, consciousness and soul.

## **Archangel Raziel**

Raziel's name means "God's secrets". His energy provokes the deepest fall of the ego and the highest rise of the soul, as soon as the "Big Bang" takes place in heart and consciousness. The archangel Raziel is one aspect of the Lord Maitreya awareness and establishes a connection with this high master of light. He draws his power from the heart of the sun and conducts divine love onto the terrestrial level. The effect of archangel Raziel's energy concerns as well the eighth chakra outside the physical body as also the solar plexus and the root chakra. The sun represents the male aspect of creation, warming and fertilizing with its fire and with its elemental force. The archangel Raziel supports spiritual teachings such as Tantra that purposefully apply the sexual energies for processes of development, thus bringing forth a greater self-awareness. It is his concern that we may recognize ourselves in God and God in us, because in fact we are not separated from God.

His qualities are charisma, lust for life, energy, suppressed fury, secret knowledge of the universe, mystery, the male aspect of creation, power, ego-projections, purification, detoxication, rising like a phoenix.

## **Archangel Sandalphon**

The archangel Sandalphon, formerly known as the prophet Elijah, connects the fragile, gentle side of the soul with the courage and power of the male side. His energy is of indescribable depth and delicateness, it evokes romantic feelings in us and leads us in spheres where our deepest longings are reflected. He enables us to reach for the stars, as soon as we open up for his energy. With his energy he supports all kinds of birth processes, whether they are spiritual or physical, but especially the birth of the goddess in us and her cosmic fusion with her male complement. His energy is pure and true love and has an immense power for realizing or modifying things and for bringing something about.

His qualities are the search for the twin soul, the encounter with the inner child of light, realizing dreams, admitting feelings and fetching them from the hidden, opening up for terrestrial and celestial love, healing a wounded heart, forgiving on all levels.

### **Mother of Archangels Sophia**

Formerly, the female energy was the predominant power on earth. The pre-Christian era, called matriarchy, was supplanted by the patriarchy. Sophia reveals to us the knowledge of the dark side of the goddess (the dark moon) who out of passion leaves her foreseen path and generates destructive energies that she directs against the male and her own creation. She destroys in order to create anew, just like so many women who gain a new awareness out of their humiliations and experiences. At present, male beings profit from the regained female elementary power, too. They have the possibility of reconciling themselves with their inner female part.

Her qualities are sensuality, the female mystery, conception, birth as an act of creation, jealousy, the overcoming of matriarchy, the sinking into the material world, abuse, wisdom, the dimension beyond time and space, overcoming envy and competition.

### **Archangel Uriel**

In Judaism, Uriel is one of the oldest angels in the immediate vicinity of God. He is considered as regent of the world of stars, as guardian over their laws. Uriel is the most terrestrial and most dense of the archangels who has the strongest connections with the earth. On the link between the divine and the terrestrial, he is the bridge head to matter. His energy is very powerful, fortifying, stabilizing, providing structure, organizing but nevertheless calm. It helps to gather momentum and to focus our force on the goal. His name means “God’s light”.

His qualities are constructiveness, creativity, peace, harmony, accord between God’s plan and material structure, manifestation, bringing divine vibration into matter.

### **Archangel Zadkiel**

The name of archangel Zadkiel means “God’s justice”. Zadkiel’s energy is integrating, harmonizing, balancing, it connects heaven and earth, at the same time expanding. We expand in all directions just like plants grow. His energy has relaxing effects and relieves from limitations, bonds, imperfections.

His qualities are perfection, wisdom, knowledge, attachment to the energy of the divine, healing of our memories, delivery, freedom, perfect purification and development, expansion of consciousness, bliss, quietness.

*”We are in fact a kind of angels not having wings anymore;*

*But we remember that we once had some,*

*And if we believe that we will get them back,*

*Then we will be changed by hope.“*

\*

***Albino Luciani (John Paul I.)***

## **Rituals**

### **Clearing with Archangel Andon**

You can apply this clearing whenever you feel that someplace, earth-bound soul or personality parts of deceased persons are present, whether this happens with people, buildings, graveyards, landscapes etc. At the beginning, ask your guardian angel and all archangels to protect and assist you with this work through all dimensions. Conduct the clearing with an open loving heart as a service for the souls. Then, say or think the following text that you may vary with your own words:

*"I call archangel Andon, the Elohim, the Cherubim and the Serafim, but also the guardian angels of the soul parts and alien energies that are connected with e.g. our lot of land and our house and all humans and animals living there, or with the name of the persons or the places, for assistance, protection, help, and encouragement.*

*I beg all entities and beings to listen: You have died, and your earthen bodies have been buried. You now exist in your spiritual body of subtle matter and it is time for you to go home to your original homeland, into the light, to God. God already awaits you with great love. God does not judge you, God does not punish, there are no purgatory, no hell, no Last Judgement. God is only light and love. All life comes from God and returns to God. There, you live in an angel-like body in eternal bliss.*

*In the name of Jesus Christ I call on you to now go with the angels, Take all your energies with you and thank the persons and places to which you have clung up to now.*

*I beg you, angels, accompany these entities home into the light and take care that they won't get lost again.*

*Dear, gracious Father-Mother-God, bring all participating souls and entities with all their levels of existence into the divine harmony, free them from all restraints, inducements and dependencies. Make divine light and your infinite love flow through them, so that your divine order be restored in all spheres and on all levels.*

*I beg you, archangel Michael, cut with your sword and flames through all still possibly existing energetic connections, and I beg you, archangel Raphael, purify, close, heal and fortify the aura of the persons and places concerned.*

*I beg the hierarchies of light, please forever protect them with your light against new occupations or alien influences. Thank you!"*

If this clearing is done for a person – for you or for the client – it can happen that the person “feels empty“. This is especially the case if the occupation in question has already been effective for a long while. Then, soul parts – yours or the person's in question – were eventually almost certainly split off. In this case it is good and important to call back these soul parts by means of the shamanic Karnak pendulum and to reintegrate them.

Some further thoughts from the book “The Physics of Angels: Exploring the Realm of Angels Where Science and Spirit Meet“ – a dialogue between

Rupert Sheldrake, biologist, and Matthew Fox, theologian, on the subject of Angels and Cosmos.

*“The entire physical world is managed by God through the angels. The angels are part of the universe because they do not form a world of its own, But just like the physical creatures belong to the state of the one universe. This results from the relation of one creature to the other because the interrelationship Of things is the welfare of the universe. Because no part is perfect that was separated from the lot.”*

\*

### ***Thomas Aquinas***

*Rupert Sheldrake: Thomas Aquinas here conveys to us a vision of a universe led by intelligence and awareness – a totally different picture from the inanimate and unconscious world as it is presented by the mechanistic natural science.*

*Matthew Fox: And he emphasizes the omnipresence of the angels – angels are everywhere wherever providence may have a say. This means that angels may act in minor individual situations, as this is described in the tradition of the archangels, or also within the frame of peoples, continents, planets, solar systems and galaxies.*

*Rupert Sheldrake: In this context our modern understanding of the evolutionary cosmos would mean that the entire process of evolution is dominated by the angels. This exceeds by large the conceptions of Aquinas' times, namely that God created everything at the beginning together with the angels and that afterwards, the angels simply governed what existed.*

We now encounter a conception of the creative process that ranges over the entire history of the universe and is still continuing. Nowadays, the expanse of the cosmos is perceived as much bigger, containing billions of galaxies and uncountable stars. The statement that the whole welfare of the universe depends on the interrelationship of things and that no part is complete that is separated from the whole, hugely extends the range of influence, activity, and power of the angels.

*Matthew Fox: And that confers an entirely new relevance to this wonderful statement concerning the interdependency within the entire universe, because angels do not only exist for themselves, occupied with daily routine or immersed in beatitude, but they are part of a larger community. There is a whole world, a cosmos, a collective of which they are an important part. This cosmology helps us to explain why angels were ridiculed during the machine age, when the principle of interrelationship was not honoured any more. In a universe relying on the interdependency of all things there is a real place for angels. And the awareness among the angels does not only cover consciousness and knowledge, but also love. If the angels are everywhere, willpower and loving presence also are everywhere.*

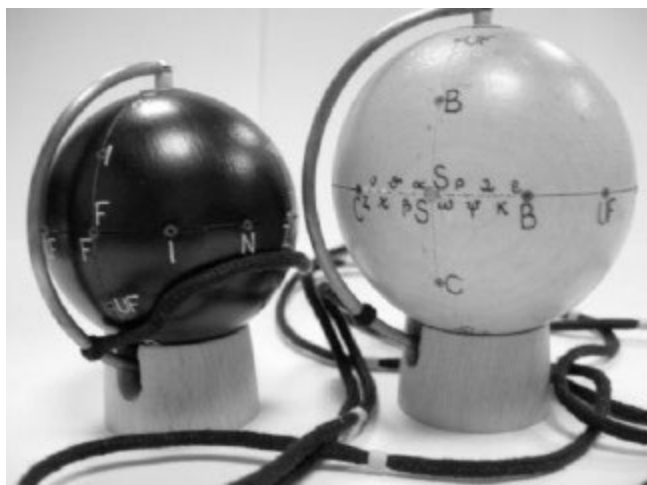

*"The original fire out of which angels burn and live, that is God himself. This fire is every glory out of which the mystery of mysteries comes forth. The angels surround God in their glowing fire, for they are living light. They do not have wings like birds but are still hovering flames in the power of God. God is the original living source, who sent out the waves. When he spoke the words, "Let it be", there existed illuminating beings. Their nature is a glowing burning. They burn from God, who is the root of the fire. In love of God this fire burns inextinguishably."*

\*

***Hildegard von Bingen***

## *The Prometheus Pendulum Set*

With this set of two universal pendulums (UP) developed by Polish radiesthesists in the “Radiesthetic Studio of Subtle Energy”, radiesthetic examinations of the most various vibrations can be made. The set enables the selective detection of as well radiesthetic vibration within many octaves (frequency range) as cosmic energy.

The radiesthetic vibration generated by the Prometheus pendulums is characterized by high stability and precisely regulated field intensity. The completion of the set with the radiesthetic hologram Baj- Prometheus and the accessory pendulum Isis allows the precise planning and monitoring of the examinations and treatments to be undertaken.

Components of the set:

UP Gaia (Universal Pendulum 6.7 Gaia) – black

UP Helios (Universal Pendulum 7.7 Helios) – Natural wood

Isis Pendulum – Natural wood

Hologram and instruction sheet

Wooden case for the Prometheus set

The Baj-Prometheus Hologram is a radiesthetic diagram on which one can determine by means of the Isis pendulum the precise settings on the UP Gaia and the UP Helios in order to execute the radiesthetic examinations. The denomination “hologram” comes from the possibility of a three-dimensional view of the pendulums represented on the diagram.

### **Checklist for a treatment with the Prometheus set**

It makes sense to start working on ourselves in order to reach an ascent on the chakra ladder, which can be tested by means of the hologram Baj-Prometheus.

With the hologram Bio-status the birth ray, the basic ray (actual colour of the client) and its development in the course of treatments should also always be tested. Then it should serve for checking the geopathic stress of the place of residence and the vitality of the client. The knowledge gained from checking the holograms should always be kept secret and not be evaluated; generally, we should not communicate negative test results to the client lest we trigger his negative reactions.

We ask the Higher Self whether work with the client makes sense and whether it is secure for ourselves (in case of karmic stress). The three questions that we ask on the hologram in order to select the suitable pendulum are:

*Am I allowed to treat this person?*

*Is the treatment optimal for the person?*

*Is the treatment optimal for myself?*

Questions must always be asked without ambiguity so as to get the right answer. The compassion for the client is essential. We must always be aware that we are only the channel for the divine energy. In addition, we can also ask which pendulum is necessary for a treatment at the moment. If for once it should not be the Prometheus (or Merkaba) set, we choose the (simpler) treatment with the tested pendulum.

If we are allowed to work with the Prometheus set on ourselves or another person, we take the hologram Baj-Prometheus and smooth the paper three times out with our hand in order to neutralize it. We let the Isis pendulum rotate five times over the Luna Symbol or tap with it 3 times against the wooden box in order to discharge it.

We take either a good photograph or a paper with first and family name and birth date of the person on who we want to work, and put it on the pyramid ZIN-URU (down in the middle). An autotreatment above one's own photograph is also possible. If the client is present, we lay our left hand into his/her right one and give an order, e.g.: "Please show me the vibrations the person is needing now in order to heal the actual ailments (or to balance all chakras)!"

Now, we hold the Isis pendulum above the ZIN-URU pyramid, set it in motion and ask with which pendulum we should start the treatment. We then proceed with the Isis pendulum into the indicated circle of Gaia or Helios and ask on which meridian we should work first (EL, MG, or EL-MG).

**EL corresponds to the spiritual principle and operates on the red meridian.**

**MG corresponds to the psychic principle and operates on the green meridian.**

**EL-MG corresponds to the physical principle and operates on the blue meridian.**

Subsequently, we ask which frequency (radiesthetic colour) is needed now. We set Isis in a forward-backward motion and wait until the twist of the movement axis around the centre of the circle is at rest. To define the suitable frequency at the two points of intersection with the circle, we examine at which one Isis turns clockwise. We then set this colour on the corresponding meridian, by readjusting the bow on the sphere and by sliding the cord on the bow. It sometimes happens that Isis tests between two colours. In this case, we also have to accordingly set the cord on the bow between these colours.

Last we have to know at which node we should take hold of the cord. There are 3 areas with 3 nodes each. We can therefore work in the lower, the middle or the upper third. We hold Isis over the small hologram down to the left and can see there a 1 for the first third, a 2 for the second third, and a 3 for the third third. We then test in which area we must work.

In the determined area, we take analogous to the colour of the meridian the red node for EL, the green node for MG and the blue node for EL-MG.

We work above the photograph or the name and birth date or we lay the person to be treated on a soft mat on the floor. Since we often have to work with a very long cord, this is more advantageous than on a couch. We stand at the side and let the appropriate pendulum always rotate clockwise above the body of the person. In principle, the pendulums work clockwise until a balanced movement is reached. Thereby, an eventual negative energy is also drawn out of the client. The following command may make sense:

*“Give now as much vibration to the person as he/she needs today.”*

If the pendulum swings for too long, we ask the Higher Self for an abbreviation. As soon as the pendulum is done, meaning that it swings neutrally forward and backward, we test again according to the same method, whether another frequency is needed or whether the other pendulum is perhaps needed for a polarity balance. The balance of the polarization is the key to health and happiness. We repeat the process until the Isis pendulum does no longer indicate any frequency or pendulum; it will then make a vertical movement on the pyramid.

At the end of the treatment the energy has to be sealed (with an anchor word like “Enter” or “Amen” or an appropriate gesture), and the archangel Michael should be invoked to free us from fears and energies of the client.

And finally, we imperatively reset the pendulums to the neutral setting Positive Green (Gr+) and store them in a protective box in order to avoid radiation damage.

At the occasion of an energy balance, often physical ailments occur because the body must rebalance itself (diarrhoea means purification). The colour UV (colour of the purification) acts very powerfully, the feelings may manifest themselves very violently.

During the treatment, clients should always be asked what they feel at the moment. Cold hands and feet are possible due to a change in the body's polarization.

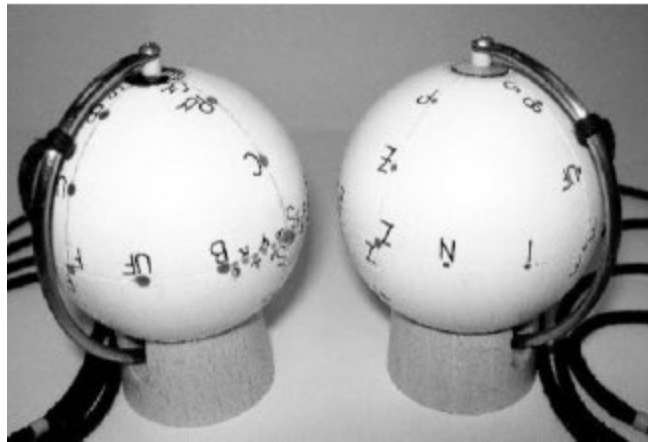

On the hologram Bio-status the value of vitality should be measured before and after the treatment for comparison. In difficult cases, it makes sense to examine the place of living of the client so as to avoid that geopathic stress or electromagnetic pollution continues its negative influence on the client.

In such a case, we first don't work on the client and his illness, but on the condition of his place of living.

The secret of healing is the balance of polarity (homoeostasis), and the precondition for healing is a healthy place of living! Healing can occur by creating new realities. This is the principle of quantum healing.

## *The Merkaba Pendulum Set*

This set of pendulums is affected by lunar forces. The pendulums have appropriate names: Luna S (with black poles) stands for the female Yin energy and Luna W (with white poles) for the male Yang energy. Every element introduces its particularities: Peace, love, confidence, beauty, harmony and truth on the one hand, on the other hand unity, compassion, agape, wisdom, truth and humility. Thus, they create the harmonious symbol Tao.

In this context, we have to mention the “age-old secret of the flower of life“ which Drunvalo Melchizedek wrote about: “All this serves for changing our awareness, for discovering the new and for extending perception. It is the announcement of the new awareness. Just like Homo erectus developed into Homo sapiens and gained consciousness, we as humanity tread the path to a new age. We create our own universe, influence and change it. This we should undertake with a high degree of awareness and responsibility, as every single being is part of the entire macrocosm.“

Harmonizing our body, spirit and soul, constructing our light body = Merkaba, is our opportunity to re-establish the balance for ourselves, the earth and the universe. We activate the abandoned DNA layers and clean

them from disturbances that may act not only on the development, but also on behaviour, reactions and interactions, if we believe Rupert Sheldrake. Overcoming one's own convictions and blockades, mental purification makes transmutation possible – from the lower to the higher, from the valueless to the valuable, from the bad to the good – in ourselves and our environment. Transmutation is a weapon of masters.

(Figure: Merkaba vision of Ezekiel)

## Treatment with the Merkaba set

A treatment with the Merkaba set is always only to be undertaken after the treatment with the Prometheus set is completed. When testing, we use the hologram just like we did when testing on the Prometheus hologram. We simply ask for a treatment with Prometheus and whether actually other frequencies are still important for our client on the Merkaba hologram. We

test them with the Isis pendulum and then transmit them with the appropriate Merkaba sphere.

In this context, it is only necessary to note that the right Merkaba hologram (for the white Merkaba pendulum) is represented mirrorinverted. In contrast, the markings on the pendulums are the same on all universal pendulums!

With all universal pendulums, the mental command is important:

*“I ask for the complete homoeostasis for this person!”*

(Or other special orders and requests)

The therapy with the pendulum sets Prometheus and Merkaba is a non-invasive method. It acts holistically and in the long term; it can be used directly or as remote treatment, it acts smoothing on all three levels and may be applied in addition to all other forms of therapy.

**Prometheus results in balance on all three levels and in attaining higher dimensions.**

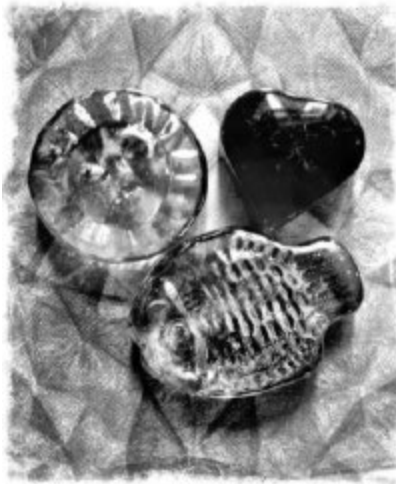

**Merkaba constructs the light body; the human aura rejuvenates and one attains understanding of the twelve dimensions of cosmic awareness.**

Harmony of spirit and matter brings about a miracle, namely the reestablishment of health, inner peace, success and sound human relations.

As with all pendulums, it is very important to only use them for positive purposes, to follow altruism and not to pursue selfish objectives.

## *Glass Cell Talismans*

A glass lens lends itself outstandingly for durably executing pendulum orders by transient for oneself or for clients and to then lay it daily as programmed talisman on problematic spots. These glass cells underwent radionics programming and vibrate on the radiesthetic colour ultraviolet to assist processes of purification and healing. The glass cells may also easily be carried in the trouser pockets of children or ill persons as a support.

Their size is of 3 to 4 cm, the desired shape may be selected in the shop, [www.baj-pendel.de](http://www.baj-pendel.de). As a protection and for cleaning, the glass lens is programmed as follows:

Deliver from poisons and optimize the excretion

Deliver from harmful viruses, bacteria, parasites and fungi

Deliver from human, animal or vegetable vermin

Purify the atoms, the molecules and cells

Dissolve control connections with humans and objects

Establish a connection with the past and heal old injuries

Dissolve all hidden adhesions and influences

Purify and solve accumulated energies and emotions

Dissolve energy congestions, Isauri and DOR

Purify and free the spirit

Dejam the energy field and eliminate alien energies

Discharge all negative cell memories, disharmonious cell programs, cell stress, conflicts and health disturbances

Discharge electric smog and geopathic stress

Balance Yin and Yang

Balance fire – water – earth – air

Charge with Orgone energy, Chi and Prana

Charge with white light

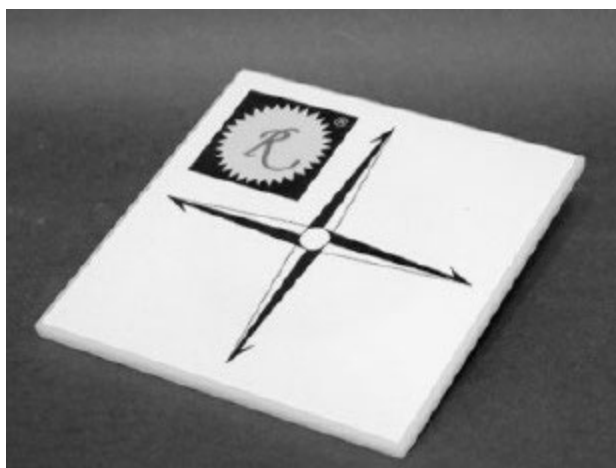

Charge with light red orange – yellow – green – blue – purple

Charge with unconditional love and divine order in all cells

Charge with “I am one with my creator”

## *Radiesthetic Neutralizer*

With a Radiesthetic Neutralizer TM-025R, degrading radiation at the place of living can be neutralized within a radius of 25 meters, whether it is of geopathic origin or electric smog. Due to its unimportant size, the neutralizer GM-010R (effective within a radius of 10 meters) can well be taken along when travelling. The device was tested by professional radiesthesists with clearly positive results.

Meanwhile, the neutralizer is recommended by many doctors, nonmedical practitioners and geo-biologists. The good results obtained can easily be evaluated on the hologram Bio-status. There is hardly a case where this small and inexpensive device did not durably protect. Even if some dowzers claim that these things cannot be neutralized, our own experiences prove the contrary!

To protect the body, the Personal Protector PP-010R is used in a flexible check card form. There is also another new device neutralizing within a radius of 40 meters, and a small pad to be put into or glued onto the battery

case of the mobile or DECT phone or the notebook. The neutralizer is maintenance-free and acts unlimited.

In the meantime, users report on the successful application of the neutralizer in the car in order to reduce electromagnetic smog for the passengers and to also reduce the fuel consumption.

## *Testing Remedies Beneficial for One's Health*

**Source: W. Herrinckx – “Initiation à la radiesthésie médicale”  
(Publishing company Servranx)**

Whether food, a dietary supplement or a natural remedy is beneficial or harmful for a person, and at what time and in what quantity the taking is optimal, can easily be found out by means of the Diagram Choice of food or medication (see annex). To this end, the corresponding means is placed onto the symbol of the lower semi-circle and the witness for the client is placed into the centre of the upper circle. To begin with, one enquires above the semi-circle how the means takes effect in this precise case. If the effect is good or even optimal, one enquires gradually above the upper circle as to the duration, the dose rate and the daily frequency of the taking and possibly also at what time the taking is most beneficial.

This diagram can also be used for detecting of all kinds of intolerances. To try and desensitize with the pendulums may be worthwhile. Which kind of pendulum is suitable can be found out using the selection board “Egyptian and Special Pendulums” in the annex.

## *The Pendulum Charts and Holograms*

In the Annex you find some pendulum charts that serve either by means of an Isis pendulum for choosing the right pendulum or are suitable for remote treatment, and also those holograms that are necessary for defining the Bio-status and the settings on the universal pendulums.

## **Working with dowsing tools**

## *Exercises in Preparation for Dowsing*

This is the most important preliminary practice in order to obtain good dowsing results. Brigitta recommends not to do the testing with the pendulum, but with your body and the forward/backward method! She demonstrates this method at the very beginning of her dowsing seminars, as it is the most important exercise if you want to be in contact with your Higher Self. You can enquire everything via your Higher Self and are at the same time entirely self-dependent without shifting the responsibility on to someone else. Since Brigitta does in principle not trust anybody except her Higher Self (which is connected to the all-encompassing truth), this makes her completely independent of the hints and opinions of others who answer mostly with their ego even if they mean her well!

Stand easily with your legs hip-width apart and your arms dangling loosely (you may also place your hands onto the solar plexus). You will now discover that your body can swing forward and backward (or even sideways). However, we are always balanced in the middle.

If we stand easily and are well balanced, we give the mental order to be connected to our Higher Self. Then we mentally ask the question: “Am I connected to my Higher Self?” or: “Am I able to test?” or: “Am I able to dowse?” Your body gives you the answer at once: YES if it swings forward, NO if it swings backward.

If you get a YES, you are connected and can ask further questions that the body can answer with yes/no. So you can test everything and obtain the best dowsing results, because this only works if you are connected to your Higher Self.

If you get a NO, you have to do various exercises in order to synchronize yourself with your Higher Self. First, you tap lightly with your fingers on your skull cap in order to shut down your computer (brain) and restart it. This has to be done sometimes lest it will not function any more. Then you rhythmically tap on your thymus gland (this is to be found where you would rub some bronchia ointment in if you have a cough). While doing so, you

can mentally say the sentence: “I love and respect myself just as I am!”  
Then, you put forth one hand in front of your head, paint a reclining eight (lemniscate) into the air and follow the hands’ movements without moving the head. Then you repeat this with your other hand. This should resynchronize your brain hemispheres!

Now, you stand again easily and repeat the questions mentioned in 2. Now, your body should answer with a clear YES. With most persons, this works straightaway and they can then test all questions that can be answered with Yes/No. Furthermore, the dowsing results are significantly better.

In case you want to test a product (homeopathic preparations, herbs, tablets etc.), you hold the product in front of your solar plexus. Your body will mostly answer quickly with a yes (optimal) or no (not optimal). But you can also simply think of the herb or the object to be tested – this works as well.

If this does not work or if you feel unsure (inability to make decisions), repeat this exercise daily. As soon as you master this exercise, you will never again have to ask other people, but only your own Higher Self (your soul – God within you). This turns you into a self-determined being that does not look for or need any master or teacher outside but is able to decide everything alone and has complete freedom of action. Test every advice coming from others, be it teachers, doctors and therapists, according to this method and do not accept anything before having questioned your soul in this way.

If you want to support this exercise, I recommend to work with the ORME PSI pendulum. This energy always supports our being in Alpha condition and connected to our Higher Self. You can more easily reach your centre and evolve from judgement; your ego will be more and more pushed into the background.

## *The Right Length of the Cord and Mental Alignment*

On the cord, there is a small, sliding plastic tube serving for marking your personal pendulum length.

Now grasp the pendulum near the lowest end of the cord and make sure that the remaining cord lies entirely in your closed fist – the cord must not hang out! Also when working later on with the pendulum, the end of the cord must always be completely hidden in the closed fist.

If the pendulum starts oscillating with a neutral back and forth swinging and asks mentally: “Is this the length of cord right for me?”, repeat the question while gradually moving your hand upwards on the cord until the pendulum passes on to a circular movement after its start. You have then reached the suitable length of cord. Place the plastic tube at this position and adjust the length of cord of yet other pendulums likewise to this length.

Before any treatment, hold a pendulum always for a short while in your free hand. A brazen or wooden pendulum does not need any preparatory treatment, but a wooden pendulum with filling should be reactivated by softly hitting its tip an odd number of times against a table or any other object.

The most important element for every dowsing, regardless of the kind of pendulum you work with, is the mental order together with the mental alignment! The observer influences the result! A lot of people are not yet aware of this fact, and therefore, it must be repeated time and again. This is the reason why small minds only get small results and the broadminded get the big ones when dowsing!

Note: You are the creator of your universe!

## *The Reactions of the Pendulum*

Whoever wants to execute enquiries resulting in „yes“ or „no“, needs an appropriate agreement with the pendulum. In most cases, “yes” is indicated by clockwise movement of the pendulum, “no” by counterclockwise motion. But every kind of deviation is possible. When working with orders, various reactions are possible after starting the pendulum.

Clockwise rotation: the energy needed is released into the energy field of the client,

Counterclockwise rotation: perturbing energy is removed from the energy field of the client.

Rotating movement of the pendulum with additional elliptical motion as a variant.

If the pendulum moves for too long a period, it is possible to ask for an abbreviation of the application.

If the pendulum, after having been started, persists in a balanced movement – back and forth, sideways or diagonally – there is no resonance with the order, either because the matter is already settled, the mental order is not coherent or the pendulum is not needed.

A standstill of the pendulum always indicates a blockade of the client.

## *Work with the Hologram Bio-Status*

After the preparatory exercise, the checking of the bio-status of the person to be treated has to follow, be it a client (present or distant) or oneself.

To begin with, we neutralize the pendulum chart mentally by wiping thrice over the sheet. For the following tests, it would be ideal to use the wooden Isis pendulum with 8 discs or the brazen Isis Micro pendulum.

We swing the pendulum above the centre of the right circle (in case of remote enquiries with the witness on the ZIN/URU pyramid) and ask:

*“How is the actual total vitality of XY?”*

The movement of the pendulum starts to become rotating and finally de-spins at some value. A vitality under 100% needs intensive treatment, a vitality above 100% possibly only a punctual treatment; my experience shows that only a value above 125% is optimal for the challenges of our modern times. Since values over 125% are not indicated on the circle anymore, you need to extrapolate them mentally. When first measuring a client, it is indicated to also measure the vitality of all 7 bodies of the aura, in order to detect weak points. Later on, it is sufficient to enquire into the total vitality and the vitality of the most weak of the 7 bodies.

Before starting the work with a pendulum on a client, we have to execute another very important testing operation. It concerns the energetic contamination of the living and working quarter. If a location is polluted by geopathy, electric smog or construction biology, the energy of a person to be found there, will decrease very quickly after a treatment by pendulum. We work with the pendulum as before and ask at the lower semi-circle the following questions in turn:

*“What is the actual pollution of XY at the location Z through geopathy / electric smog / construction biology?”*

According to experience, it is possible in almost all cases by using a neutralizer (see description) to normalize a medium (ca. 5 G) to strong pollution (up to 10 G) caused by geopathy and/ or electric smog (to 0,5 G) within a few days. As for pollution through construction biology, it is in most cases necessary to remove harmful material from the client's environment (asbestos, varnishes, wall paint, floor covering, furniture made of chipboard).

You can also use this hologram for measuring karmic interferences in locations (apartment, house, farm). Locations, just as cells can store memories of deeds in the past that must be released so that the inhabitants of these locations can have a harmonious stay there. If you find such a strain, you work with the appropriate pendulums to free the energies of the place from negative strain. As some energies are very persistent and tend to come back, some reconditioning is sometimes necessary after a certain time if a strain is measured.

It is only after having eliminated all pollutions that we can do a constructive dowsing operation on the client.

With the left circle on the pendulum board, we can find out the radiesthetic colour of persons, animals, plants and places in order to learn more about their hidden quality.

## *Teleradiesthesia*

Teleradiesthesia means working at a distance by means of maps, plans, drawings, photographs and witnesses, in order to detect watercourses, metals, caves etc. Likewise, it is possible with the help of plans and drawings to detect radiations that can as stray radiation be injurious to people's health.

**Abbé Mermet was the first to experiment with teleradiesthesia thereby becoming internationally known. Teleradiesthesia is a mix of physical, mental, and spiritual radiesthesia, depending on what is meant to be detected. But it can also be used for therapeutic purposes. If the person to be treated is too far away for getting daily treatments with a pendulum, these are also possible over the distance by means of a photograph. The method of teleradiesthesia is also suitable for the treatment of animals.**

In quantum physics, the simultaneous interaction at a distance is called entanglement that transmits information instantaneously, i.e. immediately and thus quicker than with light velocity. In our case this information concerns healing and can reach any spot within the universe. Preferably, one works in this case with the wooden Isis/Osiris pendulum above a photograph of the person to be treated, possibly with the command: "Heal the cause of XY's pain now".

During this treatment, the pendulum swings at first counterclockwise – eliminating negative vibrations, pain, tumour cells and ill patterns – and then after a short balanced movement it oscillates clockwise and replenishes the energy field of the person with healing vibrations.

Between treatments with the pendulum, it is also possible to permanently irradiate the photograph of the person by directing the wooden Isis/Osiris

pendulum like an orgone projector on the photograph. To this end, there are special devices for pendulum and photograph as well as rails for joining various exchangeable heads up in circuit.

The effect of the big Isis/Osiris pendulum is felt immediately. Some feel a comforting prickling all over their body, as well as an agreeable relaxation taking hold. Pain loses in intensity and disappears totally after a while.

Whoever disposes of great mental strength, can work without a photograph by imagining the person to be treated and asking his/her energy body to be present. After doing so, one works as if in presence of the person in question. Afterwards, one may thank the person and send his/her invigorated energy body back. With some practice, you stand a better and better chance of succeeding.

## *My Recommendations for Dowsing*

Choose your words with caution when giving the pendulum an order. It would be best to make a list beforehand stating your physical ailments, but also containing things of everyday life that you would like to heal. That can be a broken relationship, troubles with your boss or quarrels with the neighbours or with other members of your family. But it can also be the aging process that you want to delay a little, or the cause of your overweight that you would like to eliminate.

All challenges in life, every person that we meet, every illness, every accident, every joyful experience has to do with ourselves. Due to the law of synchronism, we ourselves attract everything in life in order to learn, to grow and to heal.

The healing pendulums can help us with our daily work on ourselves and with the development of our soul and support the process of growth. Thus, the pendulums are go-betweens between us and the divine world, auxiliary means for better coming into contact with our Higher Self. As such we should see and treat them. In the end, only man can heal him-/herself and must follow alone the path towards knowledge and development.

Thankfully, we always have visible and invisible allies at our side to who we can at all times trustingly appeal. But if we do nothing, nothing happens. Thus, we must take action, we must feel the wish and give the command that things in our life can develop or change.

It is always our faith, our attitude and our own mental power that make us move mountains and succeed in having a tumour disappear within some days.

But if we now assume that we are sensational and brilliant healers who can achieve anything with the pendulums, we are mistaken, because everything always depends on the person, the client, our counterpart. It is him/her who decides whether he/she wants to be healed, not us!

It is the person's faith and his/her confidence in us as therapists, doctors, healers or simply assisting persons, that help him/her in the end – provided he/she wants to be healed at all.

This means that the treated person alone decides whether he/she wants to get better or not. This is a process taking place inside him/her. Of course, we now think that certainly there is nobody who wants to die from cancer and that every person wants to be in good health. But unfortunately, this is not the case; there is an inner mechanism in us that stays unconscious for most of the time, and so it happens that sometimes, our inner self may even have arranged this before physically entering this incarnation.

There exists the law of cause and effect (Karma) sometimes simply hindering healings. If this happens, it is important for the soul of this person to make this specific experience. If a person's time is up, the best healer cannot delay the process.

We should bear all this in mind when starting our work in order to help other people on their way. We should become humble and let things happen. We should be thankful if we are allowed to work together with the spiritual world in such a great way, and we should always respect the wish and will of the other.

We cannot and must not want to change anybody existing in this world. Everybody, simply everybody has a free will that has to be respected. We must never manipulate other people!

If we now start working with the pendulums, we should always ask whether we are allowed to treat the person in question. We must have his/her consent and also the approval from the spiritual world. This means that before every treatment, we ask if we are allowed to treat this person, animal, plant or situation. If our pendulum gives us a clockwise movement, we may start. This rule is always to be observed, even when working at a distance with a photograph.

Often, persons intensively working with other people via photographs, give me the feedback that they are totally tired and exhausted afterwards. That must by no means happen. And one should never treat others when being tired or ill.

It is of the greatest importance to recharge one's batteries by means of an intensive prayer or some kind of ritual before starting, and to ask for the assistance of the spiritual world. After work, we should always take breaks, rest, and pray for new energy and power.

It is important to capitalize on the power of the pendulum and of the spiritual world and not to spend one's own energy. By doing so, the work with pendulums gives us power so that we can by self-therapy recharge with new energy via the solar plexus.

Before starting the treatment with the healing pendulums, I can tune myself or the person to be treated with preparatory basic affirmations by means of the pendulum. This helps to become completely open for the subsequent treatment:

- I now absorb all information that is given and transmitted to me, completely and unfiltered.
- All stored information is and stays permanently stable and retrievable.
- I open up for all processes of insight and consciousness that are beneficial for my own healing.
- I am ready and able to confront my inner truths and to acknowledge them.

One has to repeat the different points until the pendulum each time shows a balanced movement! However, there are people with who all points are balanced right from the start.

It is very advantageous if the treated person recites the information loudly. When animals are treated, this can be done by the treating person.

Treatment with a pendulum is most effective if these four points are all balanced before the proper treatment. This is especially true for people who are very difficult to treat, because their subconscious is not able to allow healing.

And now some leads for orders that we can give our pendulum. When treating ourselves, we always sit in an upright position without crossing our legs, and we place the pendulum over our solar plexus. As a support, we place our free hand some centimetres under the tip of the pendulum. With this method, it is best to use the Isis/Osiris pendulum, as it has an extremely strong self-radiation that can be felt at once.

Please let your creativity run wild when choosing orders to be given to your pendulum. I get much feedback from people working with this method and telling me that they have for instance treated the cause of their heartburn which process has turned out as a positive twist of fate in completely other fields.

Very often, we don't know why we suffer from heartburn, headache or menses cramps. But if we treat the cause, the headache disappears and the elicitor with it. That is the difference between this kind of treatment and conventional medicine where mostly only the symptoms are fought and pains eased without getting down to the roots of the problem.

Just as we treat ourselves with the pendulum, we can of course also treat other people. This is best done when the person to be treated reclines relaxed on a couch.

Please mind that this person does not cross his/her legs. The arms repose beside the body. We work above the solar plexus or directly over the diseased organ, and we always give a mental order. We work until the pendulum makes a balanced oscillating movement. We let it work as long as it turns. Often, the pendulum moves first counter-clockwise, in order to eliminate negative energies from the person's field of energy.

Please see that the pendulum can afterwards bring the positive, healing oscillations into the energy field by a clockwise movement! This is very important! The same applies to a remote treatment over a photograph.

Why are there so many different wooden pendulums, and why does one not only have one wooden Isis/Osiris pendulum and simply exchanges the contents of the pendulum head? To begin with, most people don't have all active ingredients at their disposal. Furthermore, it is better to have a pendulum head for each separate process, as each remedy in the pendulum head leaves energetic traces after the exchange. I know someone who for this reason has meanwhile more than 100 pendulum heads – one for each remedy. But if one does not want to exchange pendulum heads, one should acquire the necessary wooden pendulums with remedies integrated in their heads.

Here follows a list of effective orders that you can give daily or at least regularly to your Isis/Osiris pendulum.

Please experiment therewith for some time daily. Please take the necessary time and pay attention to how long the pendulum swings at the different subject-matters. Especially with the two first subjects it is possible that it

swings for some minutes. As many disturbances are connected herewith, it may happen that some other commands that you have also given, do not cause any signal in order not to stress the body too much, or that there is a blockade on the subject that must first be dissolved.

*Heal all disturbances caused by poisons and heavy metals!*

*Heal all disturbances that were caused by inoculations in early childhood!*

*Divert all poisons and heavy metals from my body and regenerate all cells!*

*Regulate all hormones and regenerate my hormonal system!!!*

*Heal all disturbances caused by parasites, fungi and bacteria.*

*Eliminate all parasites, fungi, viruses and bacteria causing disease!*

*Cleanse spirit, body and soul of all external occupations, pollution and adherences from the present and all former incarnations!*

*Heal spirit, body and soul of all ancient wounds, shocks and traumas!*

*Heal all incompatibilities, allergies and autoimmune diseases, and regenerate the immune system!*

*Heal all disturbances caused by electric smog, geopathic contamination, as well as by harmful radiation and radioactivity.*

*Protect my body from free radicals and repair damages to cells and DNA!*

*Adjust all cells of my body to my divine matrix!*

You may of course change the wording of the commands according to your personal liking or supplement them. Some might not want to give the order like a dry command, but want to begin with a request, while others wants to thank at the beginning for the order to be completed, and at the end of the order for having been completed. This is always your individual

communication with the pendulum that should come from your heart and be consistent.

In case of chronic problems, whether they concern our health or other persons in our environment or the circumstances in which we live, the following sentence can be introduced by dowsing into the energy field:

*“I am thankful that my problem with ... has been detected, solved, deleted, healed and transformed. On all levels of my being, up to the beginning of all times. Now.”*

What is important is always the durable fixing by using the flat hand above the solar plexus or the witness.

*“I am now asking for durable fixing!”*

Incidentally, this is true for all mental orders that we enter by dowsing!

What is the difference between the Egyptian shape emitter (Isis/Osiris pendulum etc.) and the universal pendulums (Prometheus etc.)?

I personally use the universal pendulum rather for a long-term therapy as a basis for transforming the energies, in order to hereby permanently stabilize the energy field. It can never replace the concrete, rapid help for acute problems by means of a mental order with a shape emitter! Furthermore, before every treatment, I also use the WML (pendulum for lymphatic massage) and the chakras' pendulum.

## *88 Pendulum Orders for Harmonizing Body and Body of Light in the New Age*

Between the 20th and the 21st December 2012, I received 88 orders from the spiritual world, helping to even better arrive in the new energy and to harmonize the physical symptoms that manifested themselves more often during the last months. These symptoms are part of the process of change and make themselves increasingly felt as sleep disorder, cardiac problems, digestion troubles, muscle and joint pains, respiratory infections, etc.

Here, we get hold of a list of 88 orders with which we can optimize our physical system and our new body of light system. It might also help to carry the Atlantis amulet, although this might aggravate certain physical symptoms, because it brings dark things to light. This is welcome though in order to be able to work more intensely on these symptoms. For this task, the Hathor pendulum with its light white energy is particularly well suited. In case you only work with the Isis/Osiris pendulum, this is of course also possible, but may take longer for some tasks. Here, you find a good overview which system of organs needs more of your assistance, as the pendulum works for a longer time at these issues. For these orders it is also possible that the pendulum turns clockwise or counterclockwise, depending on what is needed. Have complete faith in your high self that the right will always happen.

In these orders, do not concentrate on troubles or diseases, but on the optimal function of all processes in your body, whether they are gross or subtle! These orders function on all levels, over time and space, through all incarnations, whether they are past or to come, and should encompass and optimize our whole being. I wish you much success with this instruction and perfection in body, mind and soul.

*Optimize the ph-value of all cells*

*Optimize the function of the mitochondria*

*Optimize the oxygen supply of all cells*

*Optimize cell metabolism and cell function*

*Optimize the immune system*

*Optimize the detoxicating function*

*Optimize the electrolyte metabolism*

*Optimize the physical repair system*

*Optimize the ATP production*

*Optimize the wound healing*

*Optimize the hormone production and the hormone system*

*Optimize the functions of the brain*

*Optimize the functions of the limbic system*

*Optimize the functions of the thyroid and the parathyroid*

*Optimize the functions of the thymus gland*

*Optimize all blood values and the haematosi*

*Optimize the circulatory system*

*Optimize the regulation of the blood circulation*

*Optimize the arterial system*

*Optimize the venous system*

*Optimize the portal vein system*

*Optimize the nutrient uptake*

*Optimize the lymph system*

*Optimize the gland system*

*Optimize the central nervous system*

*Optimize the peripheral nervous system*

*Optimize the vegetative nervous system*

*Optimize the somatic nervous system*

*Optimize the enteric nervous system*

*Optimize the functions of all senses*

*Optimize the sense of vision and the eyesight*

*Optimize the function of the eyes*

*Optimize the sense of taste*

*Optimize the hearing ability and the function of the ears*

*Optimize the olfactory sense and the function of the nose and the paranasal sinuses*

*Optimize the respiratory system*

*Optimize the bronchial system*

*Optimize the lung function*

*Optimize the heart function*

*Optimize the functions of the heart ventricles and cardiac valves*

*Optimize blood pressure and rhythm of the heart*

*Optimize the function of the oesophagus*

*Optimize the secretory system*

*Optimize the function of the stomach*

*Optimize the function of the gall bladder*

*Optimize the function of the liver*

*Optimize the digestive system*

*Optimize the function of the pancreas*

*Optimize all metabolic processes*

*Optimize the function of the duodenum*

*Optimize the function of the small intestine*

*Optimize the function of the large intestine*

*Optimize the functions of the spleen*

*Optimize the renal function*

*Optimize the functions of the adrenal glands*

*Optimize the functions of the bladder*

*Optimize the functions of the urinary tract collection system*

*Optimize the functions of the genitals*

*Optimize the functions of the skeletal system*

*Optimize the functions of the bone marrow*

*Optimize the functions of the spine and the spinal cord*

*Optimize the functions of the musculoskeletal system*

*Optimize the function of all joints (it is also possible to treat selected joints only)*

*Optimize the muscular system*

*Optimize the connective tissue and the septum*

*Optimize the epithelium*

*Optimize the function of all mucous membranes*

*Optimize the entire dermal system*

*Optimize the rejuvenation system*

*Optimize the renewal of damaged cells*

*Optimize the function of all chakras*

*Optimize the function of the meridian system*

*Optimize the function of the aura*

*Optimize the function of all subtle matter passages*

*Optimize the body of light process*

*Optimize the DNS function*

*Activate the 12-strand DNA*

*Integrate all physical soul parts*

*Integrate all subtle matter soul parts*

*Transform all parts of alien souls*

*Transform all adhesions and adherences*

*Transform all third-party thoughts and maledictions*

*Optimize the communication with my High Self*

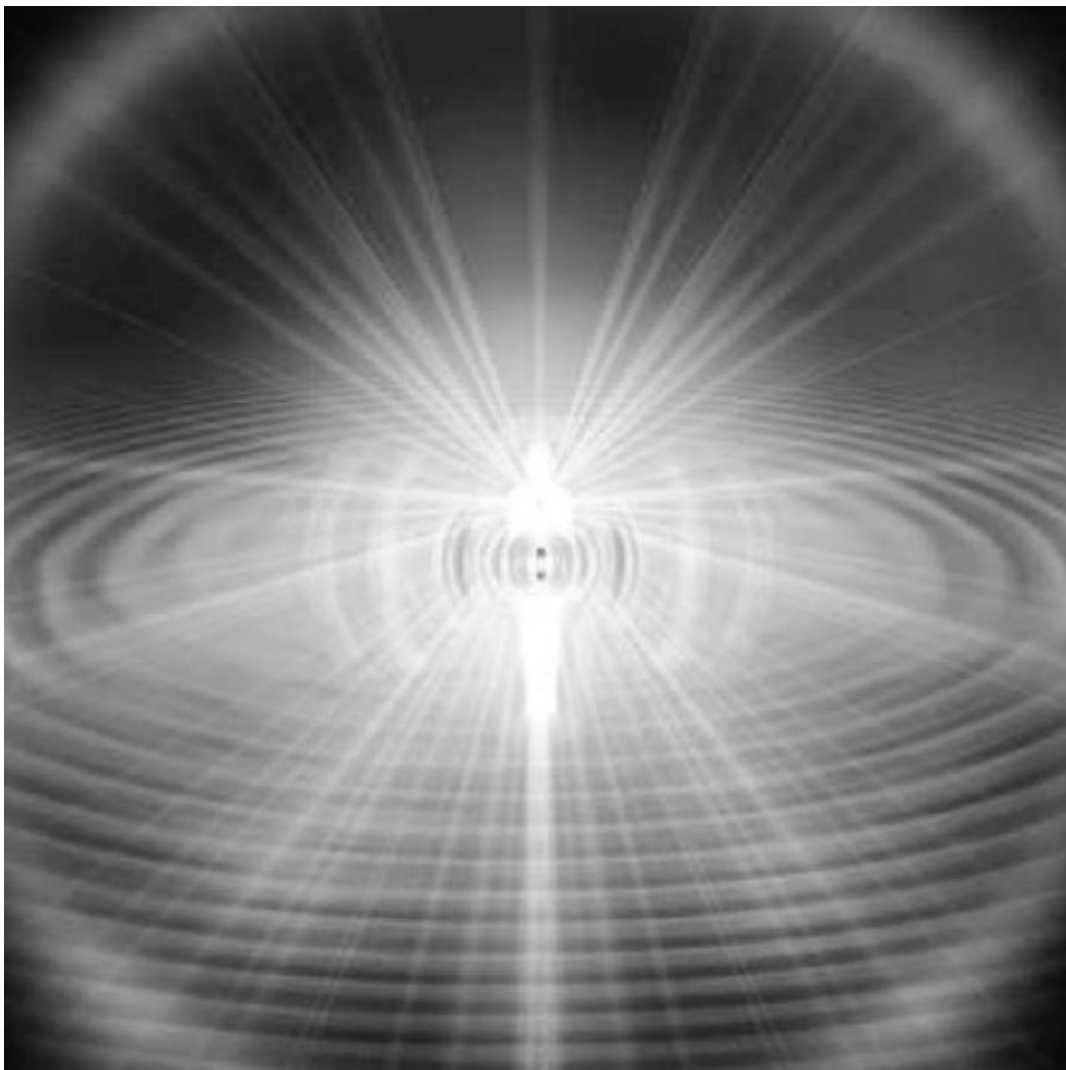

*Optimize the communication with the world of animals and plants*

*Optimize the communication with the spiritual world*

*Erase all programming and patterns from time and space*

*Optimize the collective understanding*

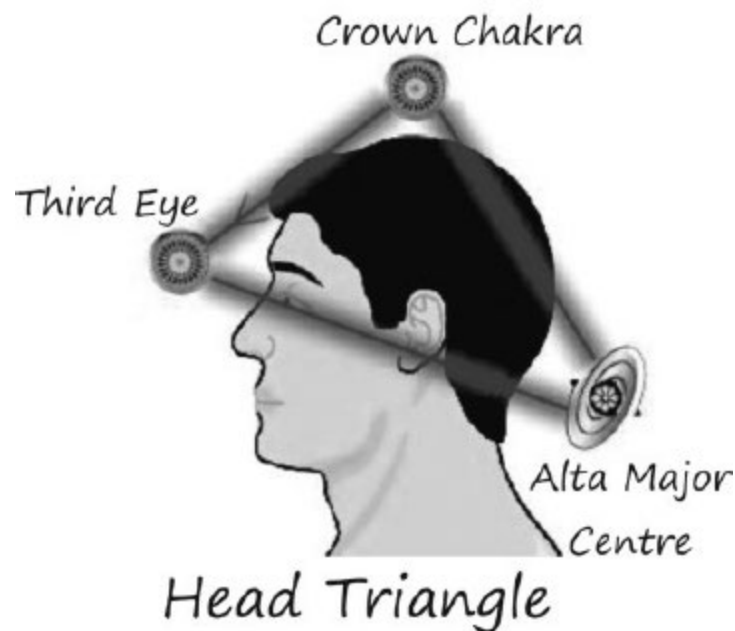

*Optimize love and attentiveness*

*For remote treatment, a photograph of the person to be treated may be put  
on the picture to the left.*

## *Delete Painful Memories from the Cell Memory*

The theosophist Alice Bailey designates the transition between cranium (lowermost point of the head) and the cervical atlas (highest point of the spine) by the name of „Alta Major-centre“. At that point is located the connection between the brain and the nerve cord of the medulla as symbol of the inseparable connection of body and mind.

The “mental world” made it plain to me through the problems with my spine that destructive cell memories are at the root of every problem. Every symptom, be it pain, blockades, fears, depressions or manifest organic problems, may be traced back to an injured cell memory. This old injury manifests itself physically, spiritually or mentally as morbid vibration pattern. We can heal this morbid vibration pattern by deleting the destructive cell memory and transmitting a harmonious vibration pattern with the pendulum. As soon as this is completed, the stress answer of our body is eliminated and manifest diseases pass into the healing mode.

Often one does not know why one has a certain problem or special ailments, and what they want to tell us. Even if we know where the problem comes from, we rarely have a method for liberating ourselves from the painful event that is stored in the cell memory. Now, the “mental world” has disclosed a wonderful possibility for durably deleting from the cell memory these injuries and stored emotions that can originate from our present or past life or can have been passed on by our ancestors, and to program the cells to “divine order” and “unconditional love”.

We place the free palm on the “Alta Major-centre“ and apply a soft upward pressure as if we wanted to support our head; the client lays his/her head heavily in or against our hand. This gesture helps us to enter the basic sense of trust and to let loose. With our other hand, we move the pendulum in front of our solar plexus or that of the client with the following order:

*“I beg for all known and unknown negative images, unhealthy doctrines, destructive cell memories and physical disturbances to be detected, unlocked and healed by the pendulum, with the help of the light, the life and the love of God that pervade me.*

*I pray that the effective force of this healing might be heightened hundredfold and more. Thank you, amen!”*

According to the laws of physics, an exactly similar, but opposite vibration is needed in order to neutralize a vibration, morbid with regard to our case. So, we bring a vibration into the energy field with the pendulum together with our mental adjustment, that neutralizes our morbid vibrations, deletes the destructive cell memory, and is needed for healing the cells. Before starting, make a test, with which pendulum you should work – I use the Hathor pendulum! By holding our hand at the back of the head, we activate a strong healing centre, thus reducing the stress and enabling a better absorbing of the vibrations. As soon as the movement of the pendulum is

balanced, we put it away and lay our now free hand on the third eye, thus permanently embedding the healing energy and at the same time once again tracing the energy – how it feels and operates. We or rather the client repeatedly breathe deeply in and out in order to eliminate the residues of the cell stress, to feel how the spine straightens up and blockades escape. Afterwards, images or feelings often surface that are age-old and were submerged. Now they may be released and will not be able to cause stress for the body in the future.

Try to repeat this exercise daily until no negative images surface any more and until the pendulum makes balanced movements following the orders. After deleting the old programs, a reprogramming of the cells has promptly to take place. Therefore, a transient oscillation with the following positive programs should take place (holding the hand just as when deleting):

*I am one with my creator*

*I am all embracing conciliation*

*I am all embracing basic sense of trust*

*I am all embracing love*

*I am all embracing joy*

*I am all embracing calm and equilibrium*

*I am all embracing patience*

*I am all embracing friendliness*

*I am all embracing integrity*

*I am all embracing wholeness*

*I am all embracing health*

## *Deleting Genetic Information from the Cell Memory*

In addition to the actual orders that you can give with the Isis / Osiris pendulum, it is important to delete information from the cell memory time and again. Much information that can provoke various physical, mental and psychic troubles, is located in our cell memory and was passed on to us by our ancestors. This information concerns ailments and impairments of our ancestors such as plague, cholera, syphilis, pox, cancer, gonorrhoea, diphtheria, tetanus, measles, mumps, rubella, papilloma virus, mycosis, mononucleosis, herpes, tuberculosis, mange, allergies, food intolerances, undernourishment, war traumas, hunger, feelings of abandonment, feelings of guilt, sorrow, fury, angst, schizophrenia, addiction to alcohol, other addictions, DNA defects, genetic defects, radioactivity, toxicopathies, oxygen deficiencies, old age and death, disablements, violent death etc.

We place the free palm on the “Alta Major-centre“ and apply a soft upward pressure as if we wanted to support our head; the client lays his/her head heavily in or against our hand. This gesture helps us to enter the basic sense of trust and to let loose. With our other hand, we move the pendulum in front of our solar plexus or that of the client with the following order: “Delete the information xxx from my cell memory now.” The pendulum moves very intensively counter-clockwise and when this movement is done with, its movement becomes well-balanced. If this information is not stored in your cell memory, the movement of the pendulum is at once well-balanced. As soon as the task is finished, put the pendulum down, place your left hand on your neck (Alta Major centre) and the right hand on the Third Eye (middle of your forehead), ask for durable fixing of the deletion and stay as long on this spot as it feels good for you. You feel a beneficial perfusion of your entire body and can feel how the pathological patterns situated in the cell memory dissolve. Thereafter, take up one issue after the other and delete them all from the cell memory.

Consider which ailments and impairments your ancestors may have passed on to you and delete them from your cell memory. Your well-being will improve considerably as soon as you release all that is not needed. Your cell memory is emptied, the cell stress dissolves. Body, brain and soul can recover and regenerate.

At the end of the deletion process, you can enter the following order into the energy field by dowsing: “Transmit now the information love and divine order to all my cells.” Thereby, actual ailments that would possibly be difficult to heal by the normal orders can also heal.

### *Working on External Occupations*

To the question “Can I remove external souls and occupations with a shape emitting radiation and a mental order?” Brigitta answers:

“I have often tried this with shape emitting radiations, and this succeeded at times for the short term, but in case of occupations, it is always indicated to also work with the universal angel pendulum and the archangels Andon and Ariel. When using the pendulum of the 22 angels, you will find a clearing with archangel Andon. On a bodily level in case of carcinosis, I often test IE (Intermediate Entity = occupations) which I can successfully eliminate with the setting Andon (on the blue equator). If the occupations are of a mental or psychic order, we work on the corresponding meridian and the setting Andon and Ariel on the cord.”

## *Orders for the Slenderness Pendulum*

For those who want to reduce weight with the slenderness pendulum from the set of Natural Remedies, there are the appropriate affirmations:

*Activate the fat burning center in the brain*

*Optimize weight regulation*

*Optimize insulin metabolism*

*Optimize fat metabolism*

*Optimize carbohydrate metabolism*

*Optimize hormone metabolism*

*Optimize leptin release(saturation hormone)*

*Optimize adenopectin secretion(accelerates fat loss)*

*Optimize the degradation of incompatible substances*

*Optimize the reduction of storage fat and fat deposits*

*Reduce the memory fetch cells*

*Tighten the tissue and remove cellulite*

*Remove water*

*Activate the center for saturation*

*Activate the center for satisfaction*

*Delete all memories from the cell memory that have to do with need, poverty and hunger(use the special handling as described in the section above)*

*Delete the FTO adipositas gene*

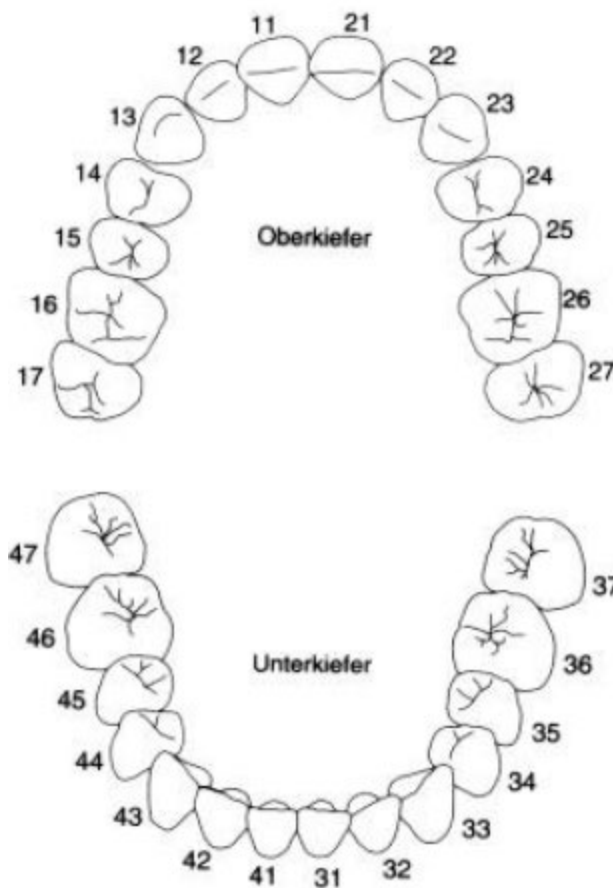

*I am permanently protected, emotionally strengthened and saturated,  
slim, healthy and in harmony with my soul, mind and body*

*Transfer the information of love and divine order into all my cells*

## *Working on the Dental Field*

We owe this idea of the regeneration of the teeth and the dental surrounding area to the Seminarhaus Schloss Badow. As always, the reaction of the pendulum makes it possible to see very clearly whether there is a problem.

At the beginning the Pendulum blockages can be solved with the Mer-Isis, the negative energy fields can be removed with the energy spiral, and the approved fields can then be filled with positive and healing energy with the ORME pendulum. This can be done on every single tooth.

With the CU-Baj I Pendulum we can now carry out various orders:

*Remove all inflammations*

*Remove all pathogenic viruses, bacteria, germs and fungi*

*Optimize the blood flow to the gums (pendulum turns in a starshape mode)*

Then the chakra of each tooth can be optimized. With the Isis-Osiris pendulum please edit front and back; owners of an Osiris diamond save some work, because this pendulum optimizes both sides at the same time.

Afterwards, these healing orders come:

*Regenerate the tooth substance of the damaged teeth*

*Regenerate the nerves and the cell tissue*

*Regenerate the substance of damaged jaw bones*

*Fit the cells of gums, teeth, jawbone and nerves to their divine matrix*

## *My Checklist for Optimally Treating Clients by Means of the Pendulums*

I work with best results exclusively following this procedure, with whatever problems the person seeking help comes to me, whether it is a psychic trauma or a physical problem! In my practice, I don't work with orders, but raise the client to an optimal energy level and introduce perfect divine order into his/her cells so that his/her body may regenerate itself afterwards. Many chronic afflictions ameliorate at once and psychic traumas are like swept away as well; and that although the persons have for weeks brooded over certain issues, suffered from sleeplessness and had to chew through events time and again. After the treatment, a perfect order is established in body, soul and mind, and the clients often feel "whole" again for the first time, as most of them express! Even days and weeks after the treatment the body repairs itself and its functions are again optimally adjusted.

This process of treatment takes about half an hour and is executed by me for every client, irrespective of the ailments brought along. Sometimes, it is necessary to treat again after approximately four weeks. Afterwards, the treated person should execute him-/herself his/her individual orders with an Isis/Osiris or Hathor pendulum, assisting this process perhaps with various herb pendulums. It is important that every person assumes his/her individual responsibility and becomes aware of the fact that he/she is creator of his/her own reality. I don't heal, but bring for some time order into the client's cells. Sometimes, clients come once a month to enjoy such a treatment!

Afterwards, the client should be self-dependent and able to work on the small and big issues of his/her life with the help of mental orders and a shape emitter. Of course, at the same time, he/she should reorganize his/her life so that body, soul and mind are doing better (this concerns sports, nutrition, partnership, profession, leisure time, living environment, etc.). In

case a person wants to stay durably in a bad vibration or a negative state, this is his/her responsibility, but often hinders healing!

This therapy can also with the same success be executed over a distance, even in case of chronic problems! In this case, one works with a photograph or the name and date of birth of the person concerned over the appropriate holograms in the seminar folder. This is also my way of proceeding when I want to treat myself. I write my name and my birth date on a piece of paper and put it on the hologram above which I work. The complete process of treatment is well shown on our DVD that can be ordered in the shop: “Quantum healing with the pendulum”.

*Before every treatment, always test whether you may treat this person, whether the treatment is optimal for the person concerned and also for the therapist him/herself! (To be found on the first hologram in the annex)*

*Test also whether it is appropriate for the client to apply beforehand the exercise: Deletion from the cell memory (see previous section)!*

*Checking out the existing energies on the Bio-status hologram, in case of a pollution with geopathy or electric smog, indicating the neutralizer because otherwise, the client will after the treatment again find him/herself in stressful situations, which makes healing impossible or very difficult to achieve.*

*We then continue with the Energy Spiral (see description), in order to first eliminate all negative torsion fields from the aura of the client and to cleanse the energy channels. In the process we can see that the legs are the most contaminated body parts for most of the clients.*

*Subsequently, we execute preparatory work with the PSI pendulum (see description). The ORME energy brings the client at once into an Alpha state, so that the following treatments will become more effective. Furthermore, ORME opens a third chakra above the head that up to now could not be tested for any client.*

*Cleaning of the aura and the energy channels (meridians) by means of the Lymph pendulum WML (see description of this pendulum) in longitudinal direction and with swinging movements above the client. At different spots (e.g. belly), the WML can also work clockwise or even in star-shaped movements in order to dissolve more important blockades (as for instance kidney stones). Here too, we attend to both front and back of the client. Most blockades are situated in the legs. The WML indicates blockades by showing bouncing movements due to the stagnations in the energy field. The treatment is only finished when the pendulum swings completely freely through the energy field of the client.*

*Before positioning the radiesthetic colours by means of the colour or chakra pendulum into the respective chakra, we work with the 9-part brazen Osiris pendulum to optimize every chakra. This not only brings the chakras from a rotation into a pulsation, but at the same time opens up chakras with malfunctions or blockades.*

*In doing so, I also optimize the side chakras, like the hands, elbows, shoulders and ears. We start at the chakras of feet, knees and thighs, then proceed to root, navel, solar plexus, heart, throat, Third Eye, crown up to the two chakras above the crown, always giving the command “Optimize this chakra”! It is important to durably fix the inserted colour with the hand in the client’s energy field. The treatment of the side chakras and the optimization with the 9-part Osiris pendulum is not shown on the pendulum DVD, but has meanwhile become my method of treatment and is self-explanatory if one has once watched such a treatment in a seminar or on the DVD!*

*After the treatment with a colour pendulum, threefold draining of the energy with one’s flat hand from the feet up and over the head, as if one wanted to smooth the aura.*

*Working with a Universal pendulum (Prometheus Set, Merkaba Set or 22-Angels pendulum), in order to balance in the energy field the individual energies tested on the corresponding hologram, that are needed for healing. Here, one works completely individually, because every person needs other energies – work is always done on the physical, spiritual and mental levels. When working with the 22-Angels pendulum, the*

*appropriate radiesthetic colours or frequencies are also brought into the energy field. In doing so, always pay attention to the durable embedding of energy!*

*Attention: It is not sufficient to beg for the suitable energy with a shape emitter, as this cannot transmit the special frequencies! Here, one has to work with the fitting universal pendulum and manually set the tested frequencies (see corresponding description of the pendulum or pendulum set respectively)! In addition, I place a charged glass cell on the solar plexus, in order to load it with the individual energies so that it may be carried in the trouser pocket after the treatment!*

*Note: The frequencies Ariel and Andon on the 22-angels pendulum are extremely well suited for loosening external occupations – process always very complicated up to now.*

*Soul retrieval of the dissociated soul parts with the shamanic Karnak pendulum (see description of this pendulum) and the order:*

*“Reintegrate now all dissociated soul parts completely within the body of this person!”*

*Working with different medicinal herbs pendulums, homoeopathic frequencies (if needed), matrix cards by Werner Neuner or other energy cards (Innerwise, Ingmar etc.), if they are needed by the client. In addition, working with the Mer-Isis pendulum (see description of this pendulum) when there are blockages and disturbances in the musculoskeletal system as well as working with the Eye of RA pendulum (see description of this pendulum) to eliminate all available implants and alien parasites as well as existing cancer cells, parasites, viruses, bacteria and fungi.*

*Checking on the hologram Bio-status (see annex) how successful the treatment was. It is optimal if “infinite“ is the result of the energies’ testing, meaning that the pendulum only rotates clockwise without any deflection. In the optimal case, the radiesthetic colour is ultra-white after the treatment so that the system has the corresponding power for regeneration and healing*

*Restocking the kidney chi of the treated person and restocking one's own kidney chi with the Cu Baj I pendulum (see description of this pendulum), cleaning of the energy channels and – not to forget – separating the energies of treating and treated persons!*

## *Ho'oponopono with the Pendulum*

Ho'oponopono is an old healing ceremony of the kahunas. They knew that only forgiveness, thankfulness and love can heal and that we have to take 100% of responsibility for everything in life, because we have ourselves created everything in this or in previous lives.

If in your life there are people with whom you don't get on, or if you suffer from an illness (or better, from symptoms), if you have the feeling that everything plots against you and that nothing works, this being at work or privately, then you should at first understand that a subconscious part in you is responsible for these situations, people or symptoms, because you yourself (or a part of you) have created it following the principle of resonance! It is your reality that you create in every second of your life (more often than not unconsciously)! This is also true if you have a critically ill person in your family. Recognize that you are 100% responsible and heal this person by healing yourself and by harmonizing and correcting your own life. This has nothing to do with assignment of guilt. The notion of guilt should be something to be completely deleted from our life, and we should only assume the absolute responsibility for our life. Evaluations and judgements of others or of ourselves inevitably lead to suffering and should therefore be abandoned.

There is an interesting story concerning one Hew Len, M.D. who in the 1890s was transferred to a closed department of a hospital on Hawaii, where the most dangerous criminals and mentally disordered persons were detained. As this was an awful place to be, many psychologists could work there only for a few months. During his work, Dr. Len did not meet any of the patients, he only attended to their files in an office. He consciously assumed the information concerning every patient and considered the negative manifestations as a part of himself. He assumed 100% responsibility for the state of illness being in his own consciousness and that could only be healed there. Several months later, patients that had to be secured in their beds before, could walk freely around. Others that had got heavy prescription medicines, did not need any medication any more. The employees started liking their work, and there were no more absences. Due

to the releases that were now possible, there were at last more people employed than necessary. Now, the department has been closed down. Answering the question what Dr. Len had done with himself to achieve this success, he always answered: “I was simply healing the part of me that created these ailments”.

On the Internet, there are large quantities of instructions for Ho’oponopono mostly consisting of four simple sentences. One of these is: “I’m feeling bad about it“, and this wording should not be used as it implies „bad feelings“ that we certainly don’t want to draw into our life. Here is a modified wording, using six sentences and the pendulum in addition to each sentence. As we know, the vibration of the pendulum brings the healing sentences very quickly into the energy field, in every cell, into the ether and everywhere via our cosmic interconnectedness within the quantum field.

Link up with your “Higher Self”, your “Christ awareness” and visualize your problem, your symptom, the suffering person, the ailment or the issue that brings you out of your centre, and say the following sentences in your thoughts:

*I assume 100% of the responsibility!*

*I resonate with unconditional love*

*I beg for healing of the cause!*

*I excuse myself!*

*Please forgive me! I forgive you!*

*I thank you, so be it!*

*I am reconciled, God may work in me!*

Make these exercises for all issues, persons, ailments etc. that you can think of. The pendulum moves either clockwise (+) or counterclockwise (-). Our entire universe only consists of plus and minus energies that strive for equilibrium. In addition, there is the zero energy level or the absolute awareness, the absolute middle, unconditional love. The only way to overcome polarity is to balance plus and minus. This is only possible via the zero energy level (when the pendulum's movement is balanced). Thus, we always work until the pendulum does not turn around anymore but moves in a balanced way!

**How can we reach this unconditional love (the zero energy level)?**

***By 100% responsibility, forgiveness, thankfulness.***

Be aware of the fact that all disturbances, all complicated situations, people and issues with which you resonate in your life, are only meant to be healed by you. It is your dark side, your own fear that want to be healed.

## *Suspension of the Duality Paradigm*

In a first step, we execute a self-clearing with the pendulum in order to break all agreements that exist between us and all kind of entities that do not have our maximum wellbeing in mind. Then we invalidate all those arrangements that deal with seeing reality under polarized conditions. When breaking an agreement, we always make sure that we gain back our energy that has been lost by the procedure. Then, we confirm our intention to overcome the authoritative influence exercised by all corrupt entities, without being implicated into fruitless polarity struggles. Give the following mental orders to the pendulum:

*Invalidate now all agreements that deal with seeing reality under polarized conditions!*

*Now, give me back all energy that has been removed by these agreements!*

*Now, invalidate all links of authoritative influence exercised by corrupt entities, that do not serve my maximum wellbeing!*

As a short daily exercise I recommend to break all agreements leading to experiences of suffering, limitation, health problems, disadvantageous relationships, financial problems, troubles in family life, and also leading to suffering in your life and removing energy. The number of agreements that we have unconsciously contracted in this wrong reality is really astounding. If you look at the subtle and also at the obvious agreements pointing to the invisible bar of your prison, you will understand that you can never cancel enough agreements.

The mental order for the pendulum reads:

*“Break all agreements that have led to the experience of (insert topic here) now.”*

Attach yourself by mental order durably to the infinite source of divine order, by entering the following sentence into the pendulum:

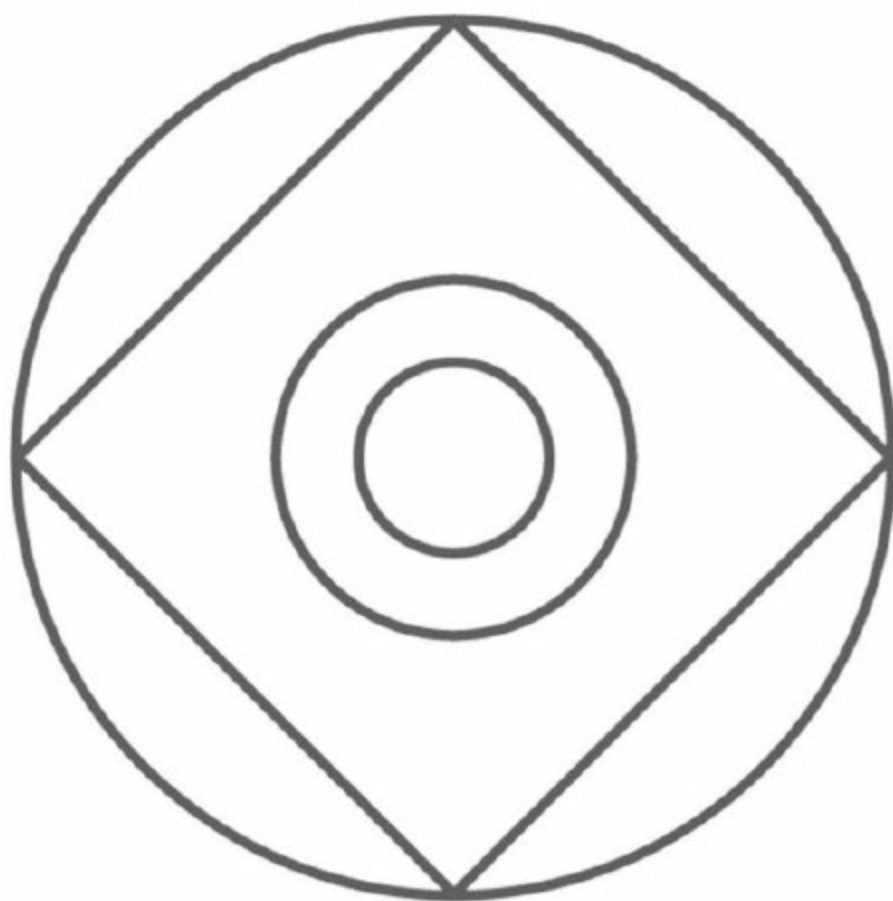

*“I ask for durable divine order in my entire mind/body/soul system. Once and for all!”*

Make always sure that when working with the pendulums, you are connected with your own “Higher Self”. A final important order is:

*“Now, heal all troubles that were caused by feelings of guilt and by thoughts of the ego!”*

## *Production of Energized Water*

You can at any time produce your own medicine by using a glass of water or neutral globules and your Isis/Osiris or Hathor pendulum. Take a glass of still water (i.e. reverse osmosis water) and your pendulum.

Connect to your “Higher Self” and enter the following order into the water with your pendulum:

*“Please give me now exactly the remedy that I need at the moment for optimizing my body/mind/soul system.”*

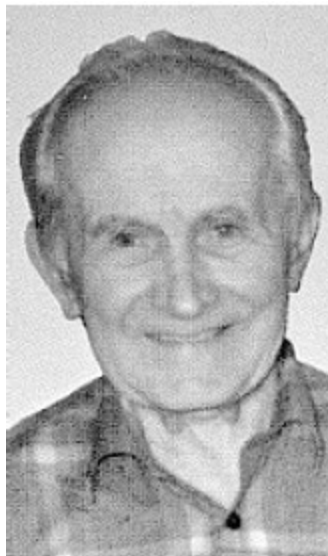

Afterwards, let the pendulum swing until a balanced movement is achieved. Then, drink the water completely up at once. You can prepare this remedy once or several times every day. It will always absolutely and exactly correspond to your momentary condition. Every day, this medicine will be more effective.

This symbol is that of the Christ conscience. You may use it for charging water or for directly entering into the energy field by the pendulum; you can also print it and keep it on you for protection.

## *Józef Baj*

**Józef Baj (1915 - 2006) was not only a designing engineer of great importance and manufacturer of excellent pendulum tools, but also a wonderful man and teacher. During more than 20 years of common work he left his knowledge to a group of dedicated colleagues and friends, so that his legacy might continue.**

If one asks what makes his pendulums so very extraordinary, various answers are given. Some people will tell you that his pendulums have a soul, others call them “tools of angels”, most people answer that they are tools that are especially precise and delicately chiselled. Whatever the answer is, the person who has used these pendulums once will never again want to work with other tools. These pendulums command admiration and are used all over the world – for seeking water and minerals, lost objects and missing persons, but above all for those seeking healing.

His objects were always improved and surprised even the most experienced and demanding radiesthesists because of their originality and precision.

After having started working on simple pendulums, he later specialized in universal models.

He created his own version of the universal pendulum, manufactured in two sizes that very quickly gained the worldwide reputation of being the best pendulum of its kind, being used above all in diagnosis and chromotherapy. In the hand of an experienced radiesthesisist, it can become a powerful tool providing an insight into the incredibly multifaceted world of vibrations. Even beginners are able to work with a simplified version of the universal pendulum.

Soon, new designs followed based on his research concerning old Egyptian artefacts from Pharaonic times: Isis, on the basis of the cross of life, Osiris and Karnak, a wonderful copy of the original found in the Valley of the Kings.

Whoever knew Józef Baj, estimates his work and his tools all the more. Józef Baj was an incredibly warm, modest and honest person. A unique design, much love for details, high sensibility and liability make his pendulums so extraordinary. The therapeutic pendulums from his workshop have certainly written a new chapter in medical radiesthesia and have found their permanent place in the practices of countless therapists around the world. Nowadays, his workshop for pendulums in Warsaw is successfully continued in his tradition by his long-time assistant Barbara Lesniewska.

## *Brigitta Schmidt*

Born 1963 in Frankfurt on the Main, zodiacal sign Taurus, ascendant Scorpio.

Qualified pharmacist with a focus on phytotherapy

Acknowledged healer within the umbrella organization “Geistiges Heilen”

Training as a nonmedical practitioner at the Institut für Bioenergetik in Groß-Gerau and at the school for nonmedical practitioners Dr. Jung in Kronberg

Graduated Ayurveda massage therapist and developer of the Prana Veda therapist massage

Training in medical radiesthesia and developer of healing

pendulums according to the method of Józef Baj. Teacher for practice-related work with Egyptian pendulums and pendulums specially coded for healing.

Own practice in Weilburg an der Lahn, Germany since 2005

### **Philosophy of life:**

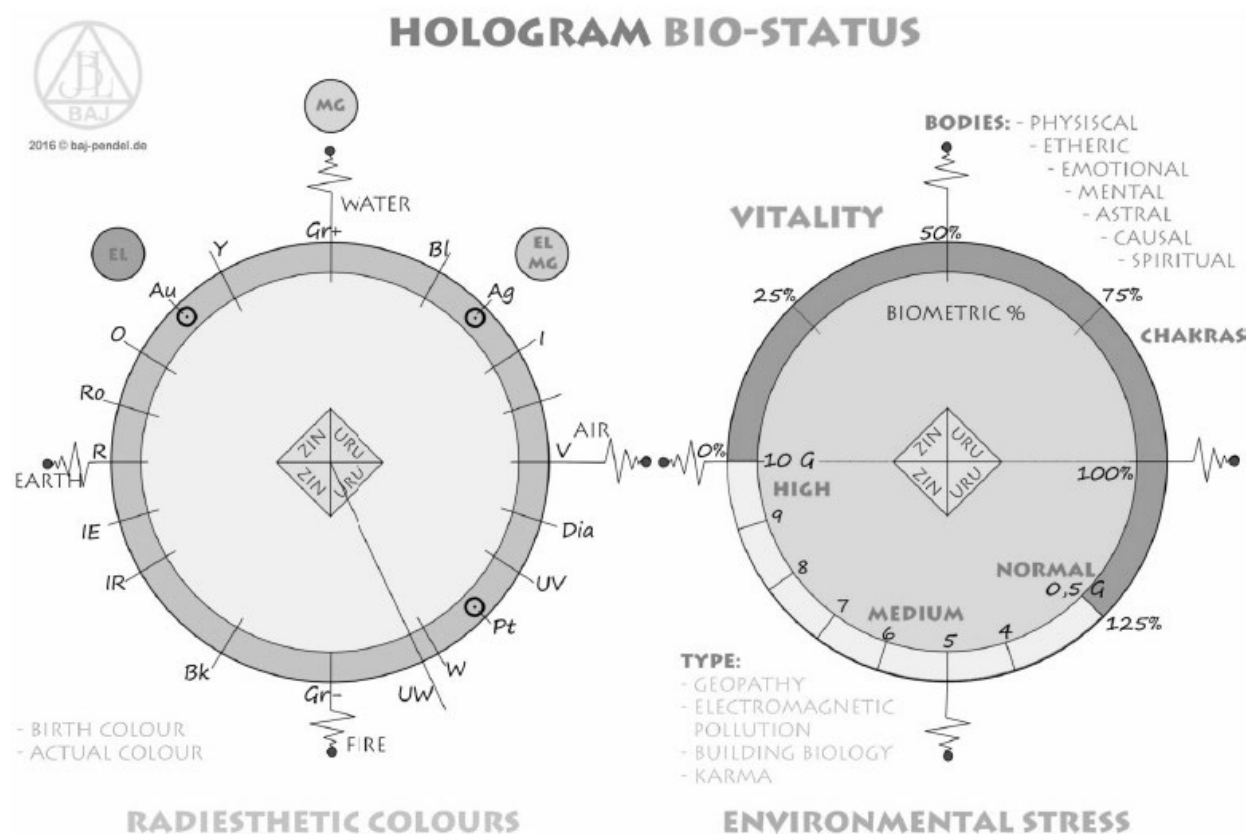

*“Whoever hears the soul’s music, masters the melody of life!”*

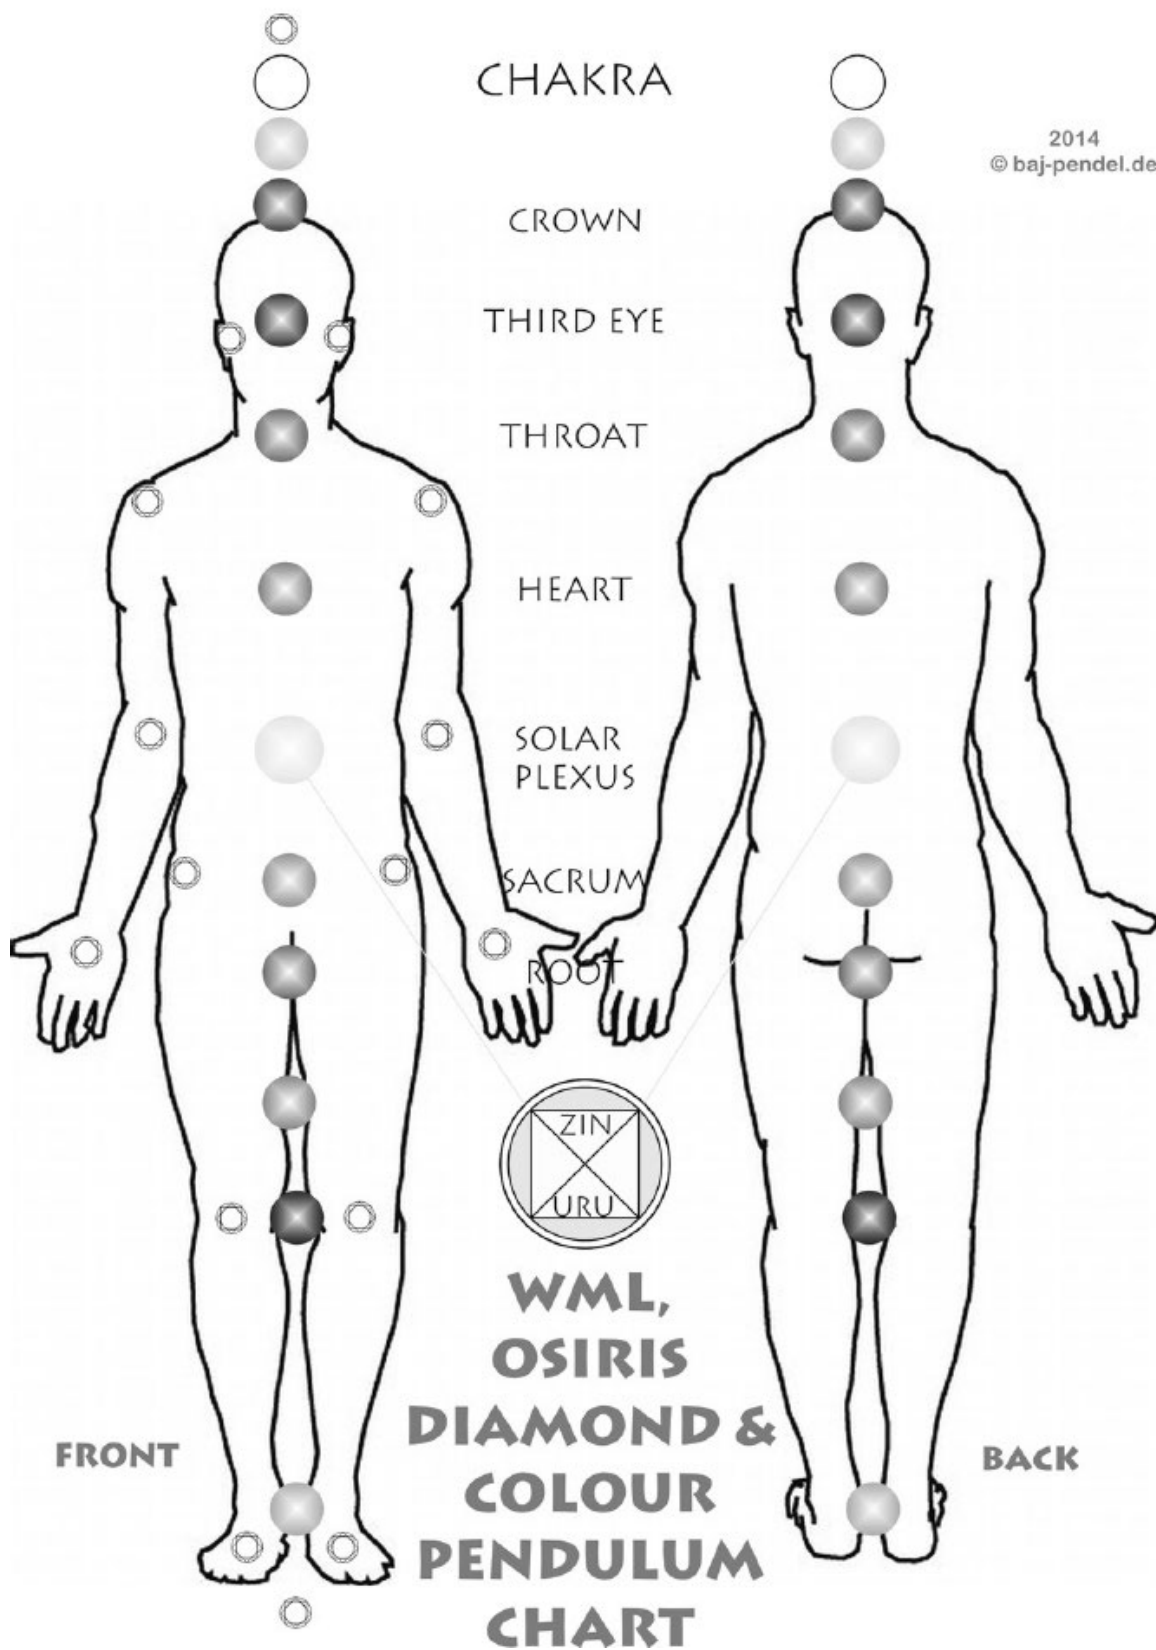

# **DOWSING MAP EGYPTIAN & UNIVERSAL PENDULUMS**

We need to get a positive answer of the pendulum on each of the three questions before starting a treatment.

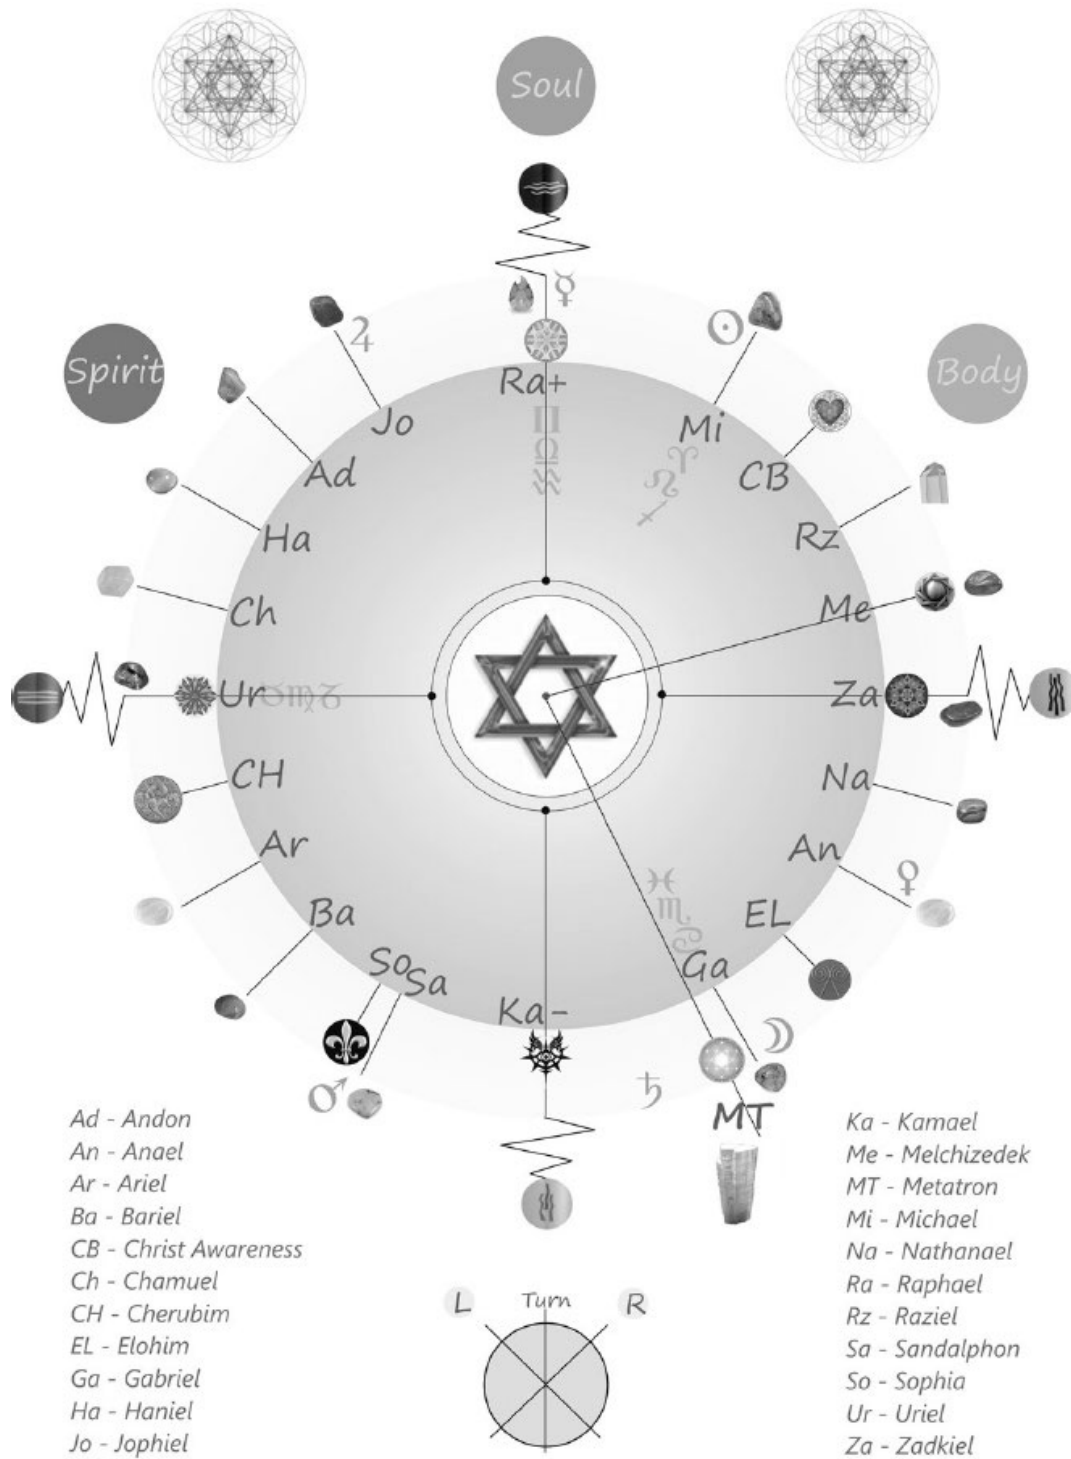

# HOLOGRAM 22 ANGELS

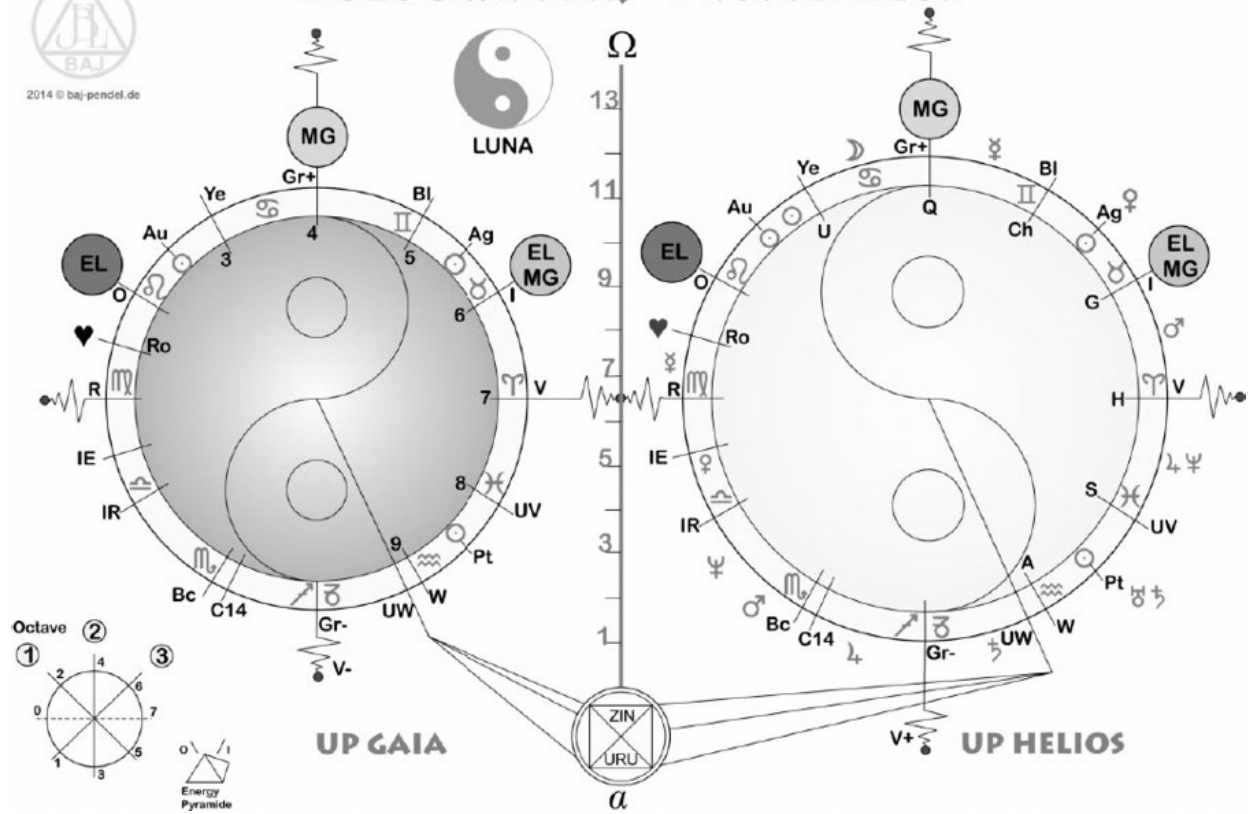

2012 © created by Appolonia & manufactured by Baj Poland

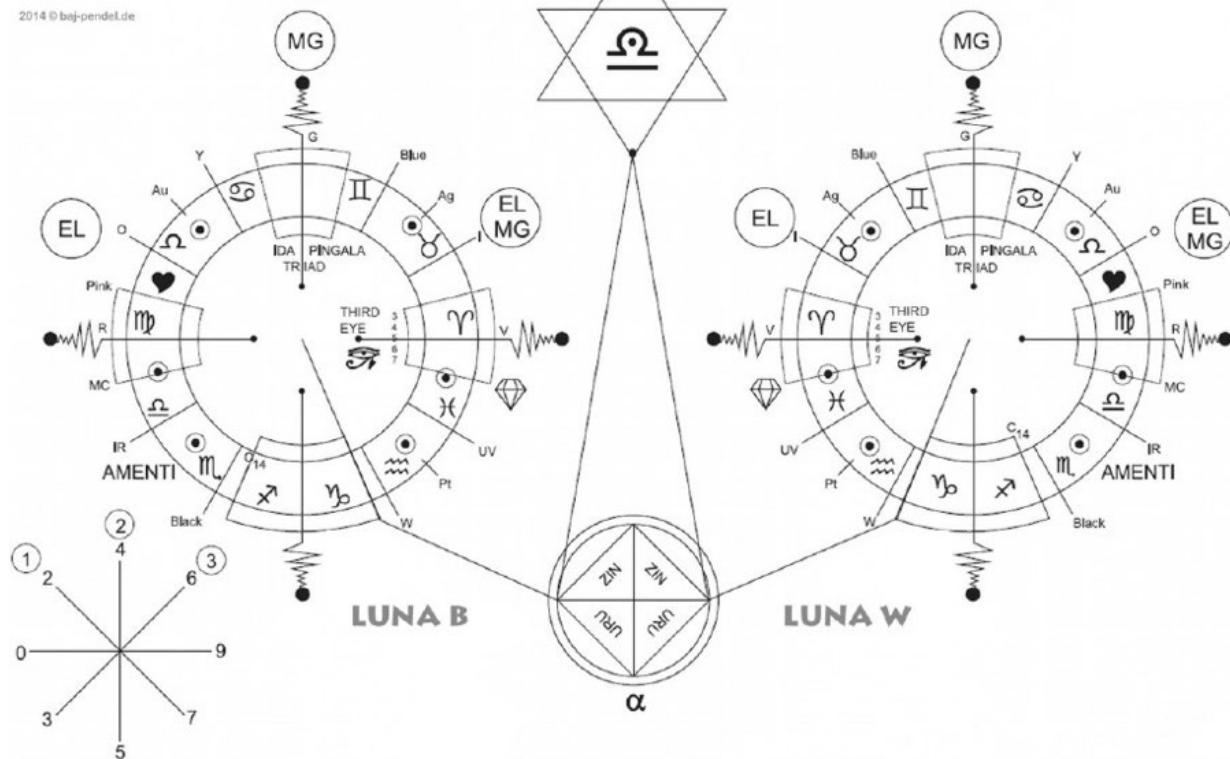

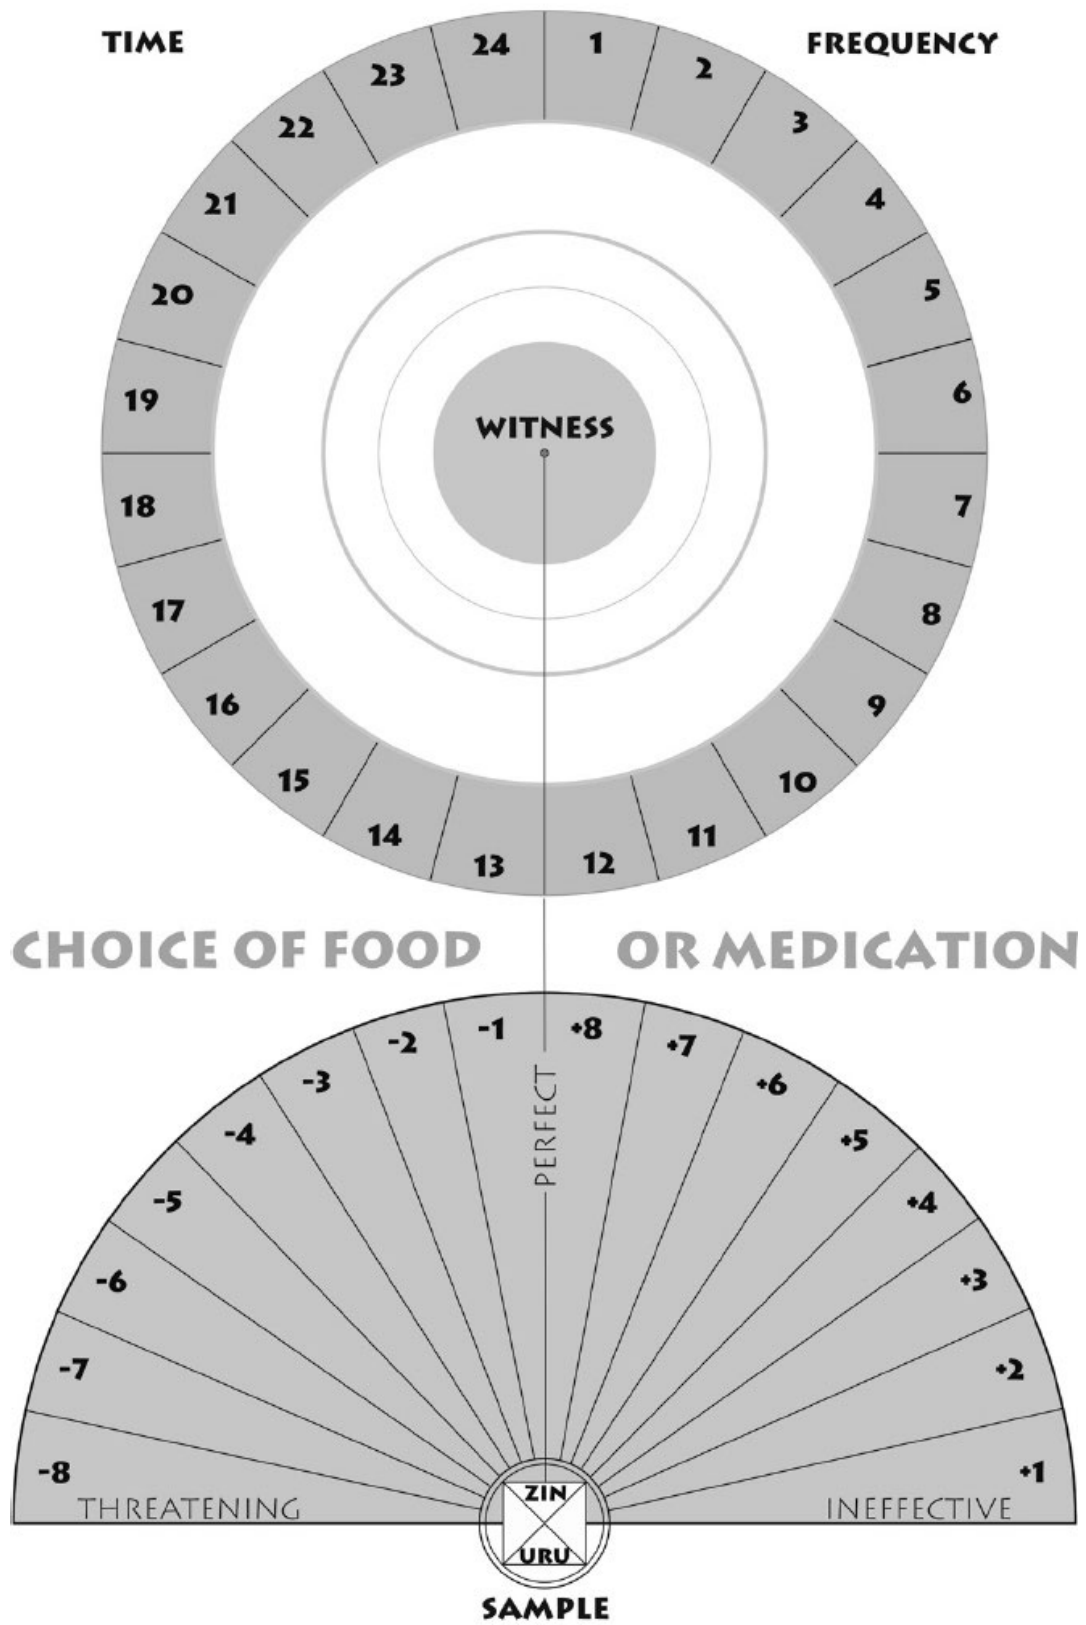

2014 © baj-pendel.de

## HOLOGRAM BAJ - PROMETHEUS

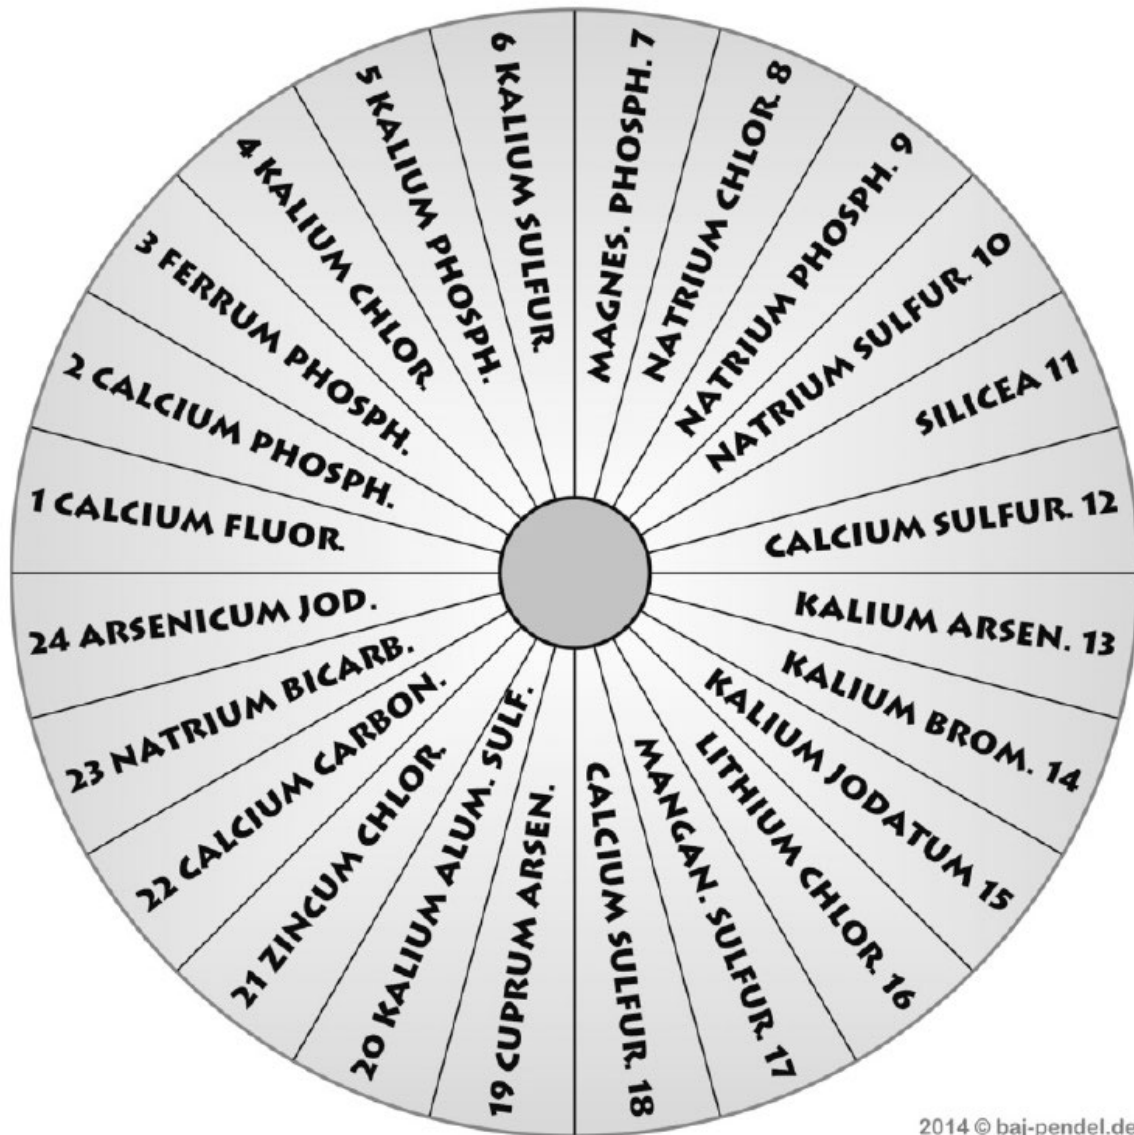

This map is to select the right pendulum of natural remedies manufactured by Baj.

## **DOWSING MAP NATURAL REMEDIES**

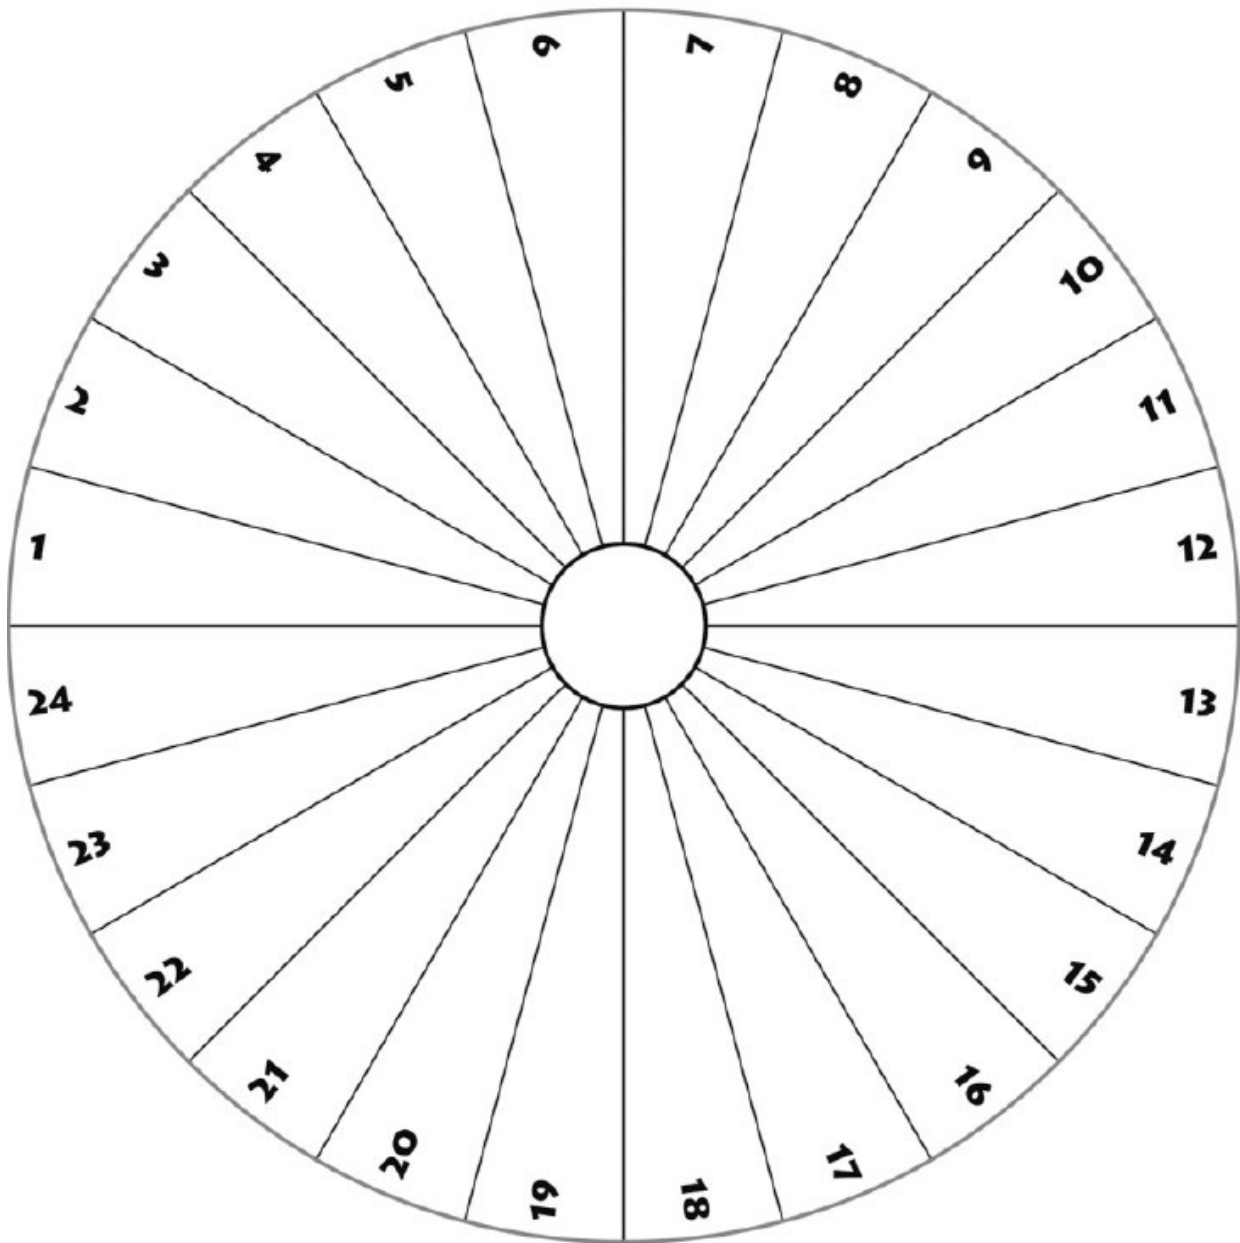

# DOWSING MAP SCHÜSSLER SALTS

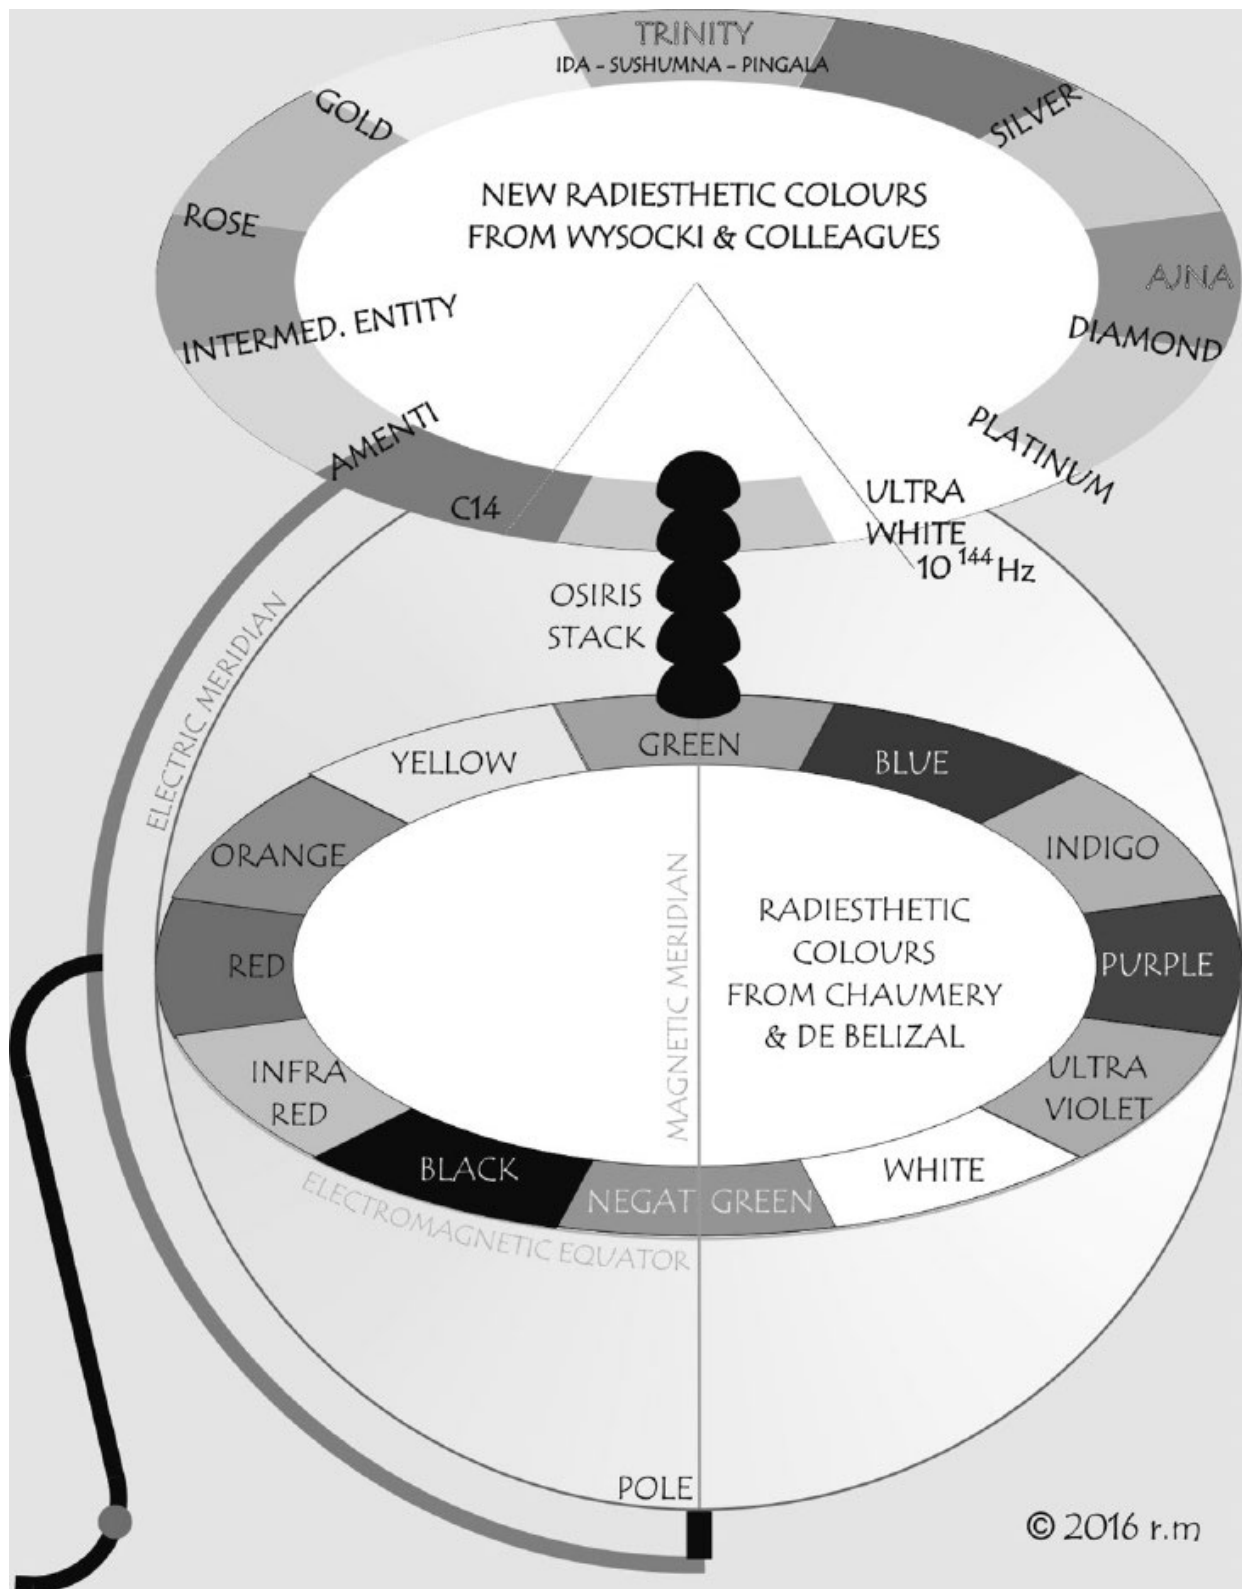

This map is to select the appropriate Schüssler salts pendulum from the set manufactured by Baj.

Have a look at [www.baj-pendel.de](http://www.baj-pendel.de) for additional Baj pendulum sets and charts.

# **DOWSING MAP FOR INDIVIDUAL USE**

Feel free to draw your own dowsing map for other Baj pendulum sets or your own requirements.

**This is the perspective cut through an universal pendulum to show the arrangement of colours on the sphere.**

*All pendulums and dowsing materials*
