

Mystic Symbol

(by Antonio Rodrigues in 'Gráficos em Radiestesia')

This chart was created by Vasariah, published in "Tratado de Alta Magia", in the item 'Pantáculos de Suporte'. The name assigned by Vasariah is: The Mystical Name of Jesus, however the expression written in Hebrew means: "the name of Jesus in the Heavens", much richer and meaningful expression, since it speaks of the moment of ascension, of the encounter of the Son with the Father.

It is a powerful mystical pentacle used to expel the most vibrations of the astral. Protects against nocturnal visitors. As support is used in cases where it is necessary to participate in the changes in the forces that are frequently evolving in the universe. It is used in the practices of spiritual development, to display for two or three minutes.

When used vertically, Yod will stay up and when horizontally, to the north. In case and use with witness, this should stay on the center letter. The Mystic Symbol can be used as an "object of decoration", that is, placed in a frame and affixed to a wall. Its influence is downright beneficial, protecting against negative entities from any sphere.
