

HO'OPONOPONO chart

(I'm sorry, please forgive me, I love you, thank you)

The HO'OPONOPONO chart, developed by the ITRAD Institute, based on the technique of the Australian dowser H.O. Busby, can be used to energize water, which can then be used for feeding or watering plants, energizing fruits and food in general. A potted plant placed on this graph shows improved growth. Also, to heal the water of the planet, to harmonize the human being, to exercise the virtue of forgiveness.

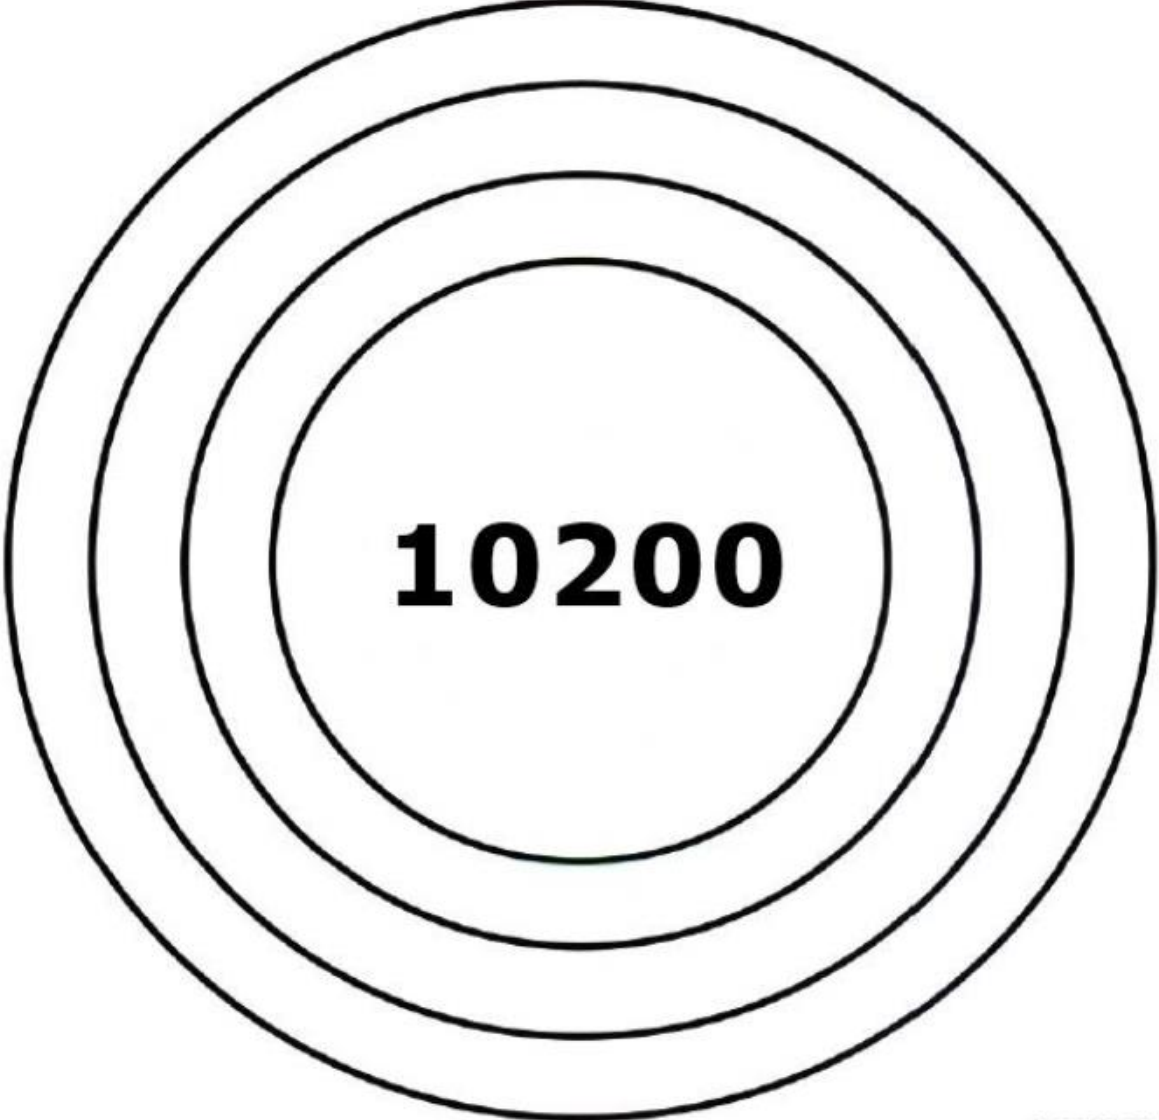

We believe these are just a few suggestions among the many possible to apply this chart. Rotate a pendulum voluntarily clockwise over the glass with water until the pendulum movement completely stops, indicating full load.

A witness can be used in the center of the chart for action at a distance (photo of a person, photo of a place to be harmonized, etc.)

Dimensions of the chart: 16 x 16 cm (or larger, proportionally)

Happy Easter!!
