CHARTS OF PROFESSOR HUGO

Desimpregnador	240
----------------	-----

"The shape is the envelope of the pulse"

(Older aphorism tantric)

To search other than the hidromineral field, the pendulum will required supporting graphics radiestésicos.

The first graphics radiestésicos emerged just before the War. Semicircles were mostly divided into a number of houses. Served mainly to tune colors, numbers, and certain applications in medicine or astrology, being that most of these graphs fell disuse.

Most graphics in use derives from the work-Chaumery Bélizal and Morel, and yet the Belgian brothers Servranx, which for two decades published a booklet about fifteen leaves, EXDOCIN (Experiences - Documentation and instructions on new science interesting Dowsters, monthly, except January, February, July and August) . Some of these works were reprinted by his heirs, who now exploit this source of consultation required (sold in Belgium and France). In the seventies, Jean de La Foye, to introduce Kabbalistic dowsing, injected a new source of subsidies enabling new approaches to the subject.

A graph for analysis acts as a separator vibrational patterns, emanating from the testimony and informed the pendulum of the mind of the operator. Although it operates by simple mental dowsing, i.e. without the use of testimonials, the chart always act as a facilitator excellent job dowsing.

In practice the use of circles or semicircles divided into 100 or 360 units as well as rules for a rough assessment, even though this figure represents an abstract concept.

All bodies and phenomena of nature emit vibrations that are characteristic to them.

Everything, absolutely everything around us vibrates. We live immersed in a world of vibrations, from the most violent and explicit, such sounds if propagating through the vibration of air through the entire spectrum of radio waves and ending with the subtler vibrations, unexplained by physics, but present in our universe.

These vibrations are modulated characteristics of the elements that compose them, their properties, the families to which they belong, at the time of his training, his strength, measures and dimensions of your energy and energy it are similar, etc.

The graphics have radiestésicos for analysis, first of all, a simplifying purpose. Instead of using natural or artificial testimonies, we use a chart that will allow us to find all the elements that concern us. As advantage, a graph whose testimony may include phenomena, natural or artificial, it would be very difficult to obtain. Also, you can leave a graph for analysis, empty sectors for placement of elements not yet known or a sector with the word "Other", with that we know if some other element (energy, color, substance, etc.) Is sought the answer or part of it. When it has a large number of elements can divide them into two or more graphics. In this case, should be included in each of them, besides the sector "Other", a section with the word "No": When the pendulum indicate the sector "Other", moved to the following chart from the same series, if the answer is "No", closes the research for this series.

The energy patterns of bodies and phenomena will be better tuned if the chart is specific.

To create a graph separator vibrations, a certain number of factors must be considered:

- the dimensions of the figure, the choice of the most appropriate manner, the number of divisions, the eventual orientation of the chart over, the standard numeric or alphabetic

adopt possibilities of amplification, etc..

- graph should be symmetrical in form, printed in black ink on white background, be of sufficient size to view exactly what is printed (letters, numbers, words or symbols) and which division appointed by the pendulum.

A graph timber (serigraphed) is more potent than was done on paper, also depending on the weight.

A graph of small size has reduced its capacity for action by dimension.

The smaller for a graphic radiesthetic is: which can be inscribed within a square of 15 x 15 cm. Its size is ideal: enroll in a square area of 30 x 30 cm.

For reference, we can cite the labyrinth Chartres used in France issue for research and has a dimension ranging from 80 cm to 1 meter in diameter.

Graphics in dimensions smaller than the ones mentioned above have no objective finality in dowsing.

Piecharts divided into degrees should be oriented axis north-south, with the zero point north. Graphics semicircular be oriented the same way, getting the straight part aligned east-west. Rules such as Biometer Bovis should be positioned on the north-south axis. The zero Ruler north. In the case of model regulatory Biometer to Long the black square should be aligned to the south, leaving the dowser facing west.

You can subtract a graph of the magnetic orientation him terrestrial imposing Field Shape Artificial discovered by Jean de La Foye. To print the North form a graphic simply put, along its longitudinal axis, a black circle on one side and a white circle on the other. The black circle determines the shape and the northern white, southern Form. My advice, however, all dowser jealous of perfect execution and controlled emissions dowsing align always your graphics to the north (Northern Form - 3550), with this will result in a more stable issue. The alignment chart of subtracts environmental influences normal variants arising from architectural and telluric.

In its multiple uses graphs allow:

a) Choose a body or phenomenon among a host of others: colors, vitamins, hormones, simple bodies, etc..

b) Assess the order, classification, degree, force or something phenomenon: percent, pH, voltage, temperature, pressure (arterial and others) blood or soil resistivity, etc..

c) Relate an element to a more general phenomenon: the subtle bodies, fundamental rays, chakras, astrological influences, seven rays of Nature (esoteric concept), etc..

Certain graphs can also be emitting subtle influences, such as EIFS, intentions, core radii of medicines, colors, stones, magnets, solenoids, light and different energies.

If this is your first time reading a book of dowsing, now might be asking: but how a simple design can deliver something in the distance?

Associated with many different cultures, there is the practice of carrying themselves with designs that are believed to bring beneficial influences to the carrier, in

form of pendants rings, medals, such the seal of Solomon, the cross, the Ying Yang Mandalas, etc.. Likewise, it is also common to take his own residence the same type of objects in the form of boards, panels. We realize that is present in the collective unconscious of the strong belief that such practices can be beneficial. Or a man who unconsciously recognizes them as positive. We also know that the theory of dowsing witness-ray or beam-union tells us that two bodies of the same nature or a body and its iconic representation or lexical maintain among themselves a union energy, which can be detected, analyzed and transmitted at a distance through in some carrier wave.

Perhaps it is imperceptible to most people, but nature has a way of organizing geometric absolutely. We can see this in fixed proportions of DNA spiral, in the complex symmetrical design of twelve edges formed by the composition of carbon, hydrogen, nitrogen and magnesium, responsible for plant photosynthesis, the pentagonal shape of some flowers and the arrangement of seeds in logarithmic corolla. Amazed, we realize the fantastic symphony of harmony own life in the present structures crystal, the relationship between the unit and the golden section, the proportions of animals and plants.

The graphics in dowsing, geometric arrangements more or less complex, make a mimicry of nature and thus comes into line with current energy potential in the state and metamorphosing them into dynamic energy.

In philosophy geometric circle represents unity unmanifest and the square, the unit serene about to manifest, or the plan spiritual and the physical. Perhaps all other geometric arrangements that could conceive may represent the multiplicity of latent energies around us.

Each set of forms, letters, and your measurements and proportions combined radiestésicos generate tools (graphs) whose intrinsic characteristics make them applicable for different purposes, Therefore we propose for the first time by grouping families of graphs:

a) graphs for analysis

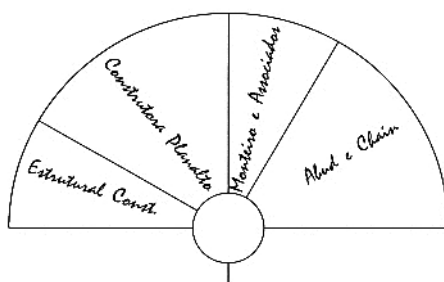

b) Charts for dynamic, recovery or dowsing materialization

c) Graphics for rebalancing environmental and energy compensation

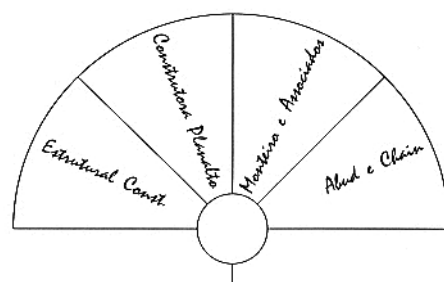

d) deleterious issues Graphics

e) Graphs with magic and application protection

As we said earlier, a dowsing chart should mirror the best possible reality that tries to represent. Suppose someone whom five different proposals were made to work, and on which the person in question has no opinion. It can resolve the impasse by drawing a semicircular chart divided into 5 equal parts. Using a pendulum over the same tried which tender is the most interesting and finally have an answer dowsing. But if the graph were poorly designed and divisions stay each larger than the other, the highest privileged would therefore represent a higher energy quantum.

Desenho de gráfico incorreto.

Desenho de gráfico correto.

We also have cases of different graphics whose design contains within it contradictions energy. Two known cases:

The Ansata Cross - the cross design energy of testimony, the set of 4 batteries dowsing radiestesicamente amplifies and ends in a decagon whose function materializes, enhance, focus energies, not expand them project them, send them. The correct final figure should be a solar circle.

The Desimpregnador - typically used for cleaning crystals. Consisting of 4 concentric circles and a decagon, geometrical figures known to concentrate in dowsing, materialize, protect and, finally, a series of arrows aimed at expanding, designing out. The poor chart today focuses not know or distracting. Have you ever used any of them and it worked? Who produced its share was unconscious psychic energy, and this I feel really tired, and is not dowsing is psychotronic.

The graphics for application in dowsing can be made of any material: cloth, plastic, wood, stone, metal, and the most important factors are the size, mass and color contrast. Small graphics 2 x 2 cm to paste into cell phone or in the form of transparent adhesive 6 x 6 cm, which invaded our urban landscape only have contributed to the maintenance of the second oldest profession, the "moneychangers from the temple." Graphs firmly bonded to plywood bases have a higher power than those printed on thin sheets of paper. The two higher-contrast neutral colors are black and white, so you invent?

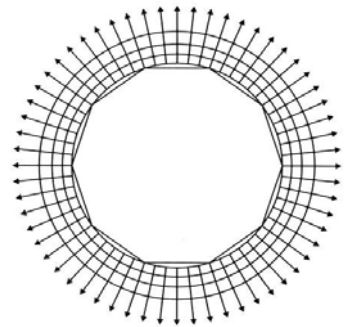

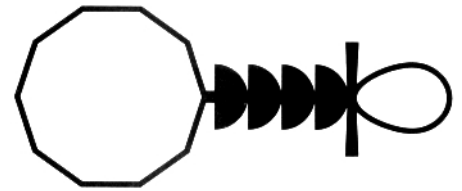

Graphics in phenolite or fiberglass, copper, originated in 1988 as an option at the time for making instruments more durable replace the fragile papers painfully drawn. The following decade saw with some surprise qualities are assigned "special" to such graphs.

The parents of the "creature"? Neuci da Cunha Gonçalves, Antônio Rodrigues Mauricio and Damico, electronics technician and also a bone of "imbroglio".

The photos in this book have a merely illustrative, its purpose is to help the reader visualize a possible way to use.

The graphics applications differ from case to case, thus resulting in different assemblies of the present.

All graphs in this book can be copied indefinitely on condition that the copy is of good quality. When the graph paper you're using to get old, soiled paper and deformed throw it away and make a new copy from the book. Copies may be made for personal or collective, no commercial. The copyright of the charts by Antônio Rodrigues are owned by the Factory Lyrics Editora Ltda. and have a record of authorship in National Library. Any copies for commercial purposes only with written permission of the publisher.

Biometer

The biometric ruler was created by French physicist Antoine Bovis collaboration with the engineer Simoneton. It was used as a scale for measuring the Angstrom (The) Or unit of measurement of wavelength. 1 The = Tenth millionth of a millimeter.

In the first dimension Biometer, the physical level ranges from 0 to 10,000 units. Measuring the intensity of the spot, the vibration having an effect on the physical element of the human being. The use of Biometer allows a more accurate measure of the subtle vibrations of the world around us. They can be used any kind of testimony: biological (lock of hair, drop of blood or saliva on filter paper, fingernails, etc.), Photos, maps, manuscripts, printed words, products, etc.. It is considered vital as great as 6,500 units Bovis.

When a place has a higher vibration (say 8,000 units) he brings a contribution of vital energy. This is in neutral zones and free currents telluric and various contaminations. Have a place that vibrates produce below 6,000 a root canal on any living being that there remains.

A study by Simoneton established that each and every disease pathogen concrete develop in a way specific vibration (the Koch's bacillus responsible for tuberculosis in 5,500 Bovis units, cancer in vibration near 4000, etc.). That is to say, if a site has a vibrational rate prospected around 4,000 units Bovis, we are probably against a zone cancer.

In dowsing is absolutely necessary to use the Biometer. Do not just find a yes or no answer, it is necessary to quantify. For example, someone got sick: measuring its index of vitality can judge the severity of the disease. When a treatment is applied to that person again is by measuring the vitality that know their position to assess improvement or not. The food we ingest can and should be measured in Biometer. It is surprising to see that fresh fruits and vegetables grown and naturally have high vibrations

HOW TO USE

Place the ruler on the desk This model does not require spatial orientation. Deposit to examine the witness on the indicated area. Choose the scale on which will work. Place the pendulum

over the graph swinging transversely at any point the scale. The pendulum will steer to one side or the other of the scale. Slowly move the arm in the sense that the pendulum has swung to the point where the pendulum present an angle transverse to scale. In the case of working with values from 0 to 10, 0 to 100, etc. Use scales at the bottom of ruler for example to assess percentage of a particular thing, use the scale of 0 to 100.

If using a testimony patient left, it is possible balance the vibration of this by choosing the appropriate remedy by placing it in space right on the ruler. The balance is perfect in 50 of the ruler.

(Between 8,000 and 9,000 The). Immediately after harvest, the index will decrease as time passes (up to 3,000 or 4,000 The)

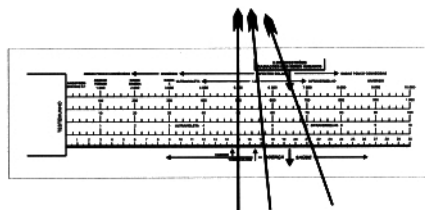

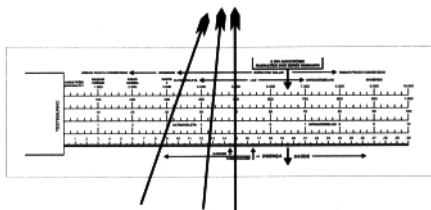

Refined foods - white flour, white rice, sugar, etc.. arrive

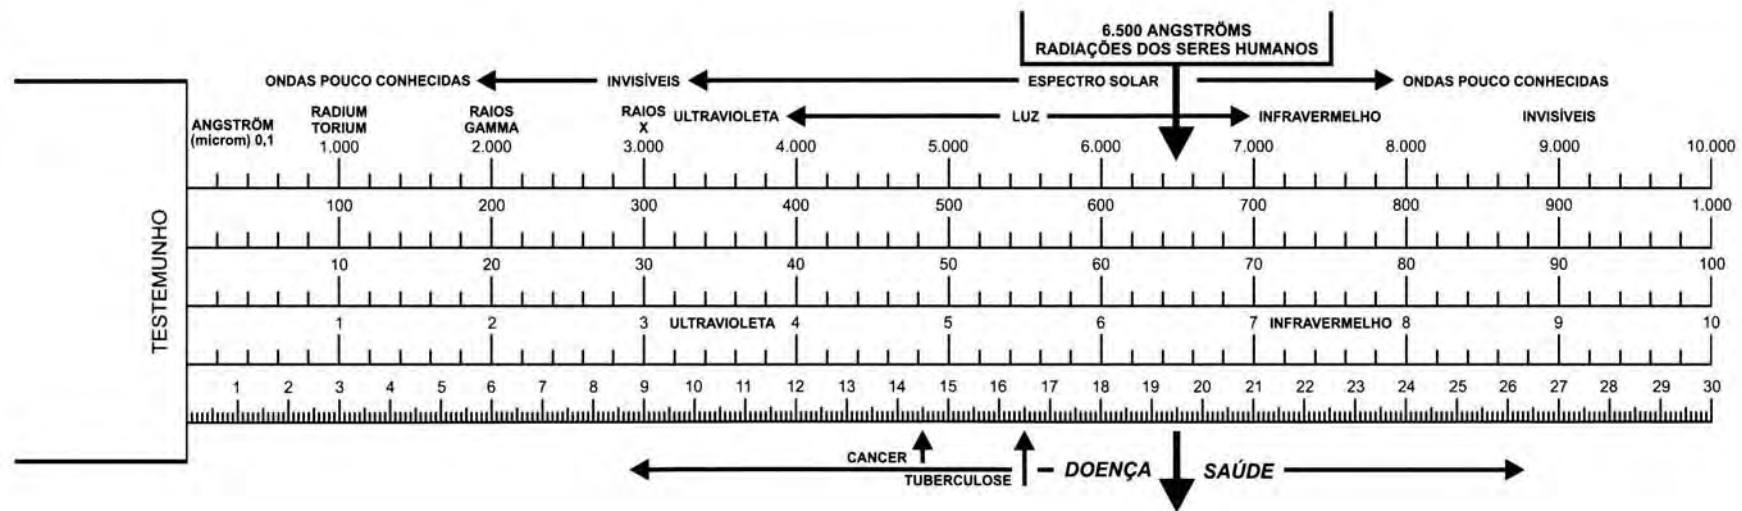

issuing below 2000 The.

Also in Geobiology biometric rule helps us understand the dimension of the phenomena studied and to assess the outcome of interventions processed. We have seen with melancholia over the years practice, many local people measurand to come to the conclusion that they are "Positive" or "negative" as too subjective to represent reality environmental energy.

This model Biometer is the result of a series of changes introduced successively over time, and much like the model manufactured in Belgium by the heirs of Servranx. The latest changes António Rodrigues have one more aesthetic.

Graph Dimension: 11 x 33 cm

Enel Biometer

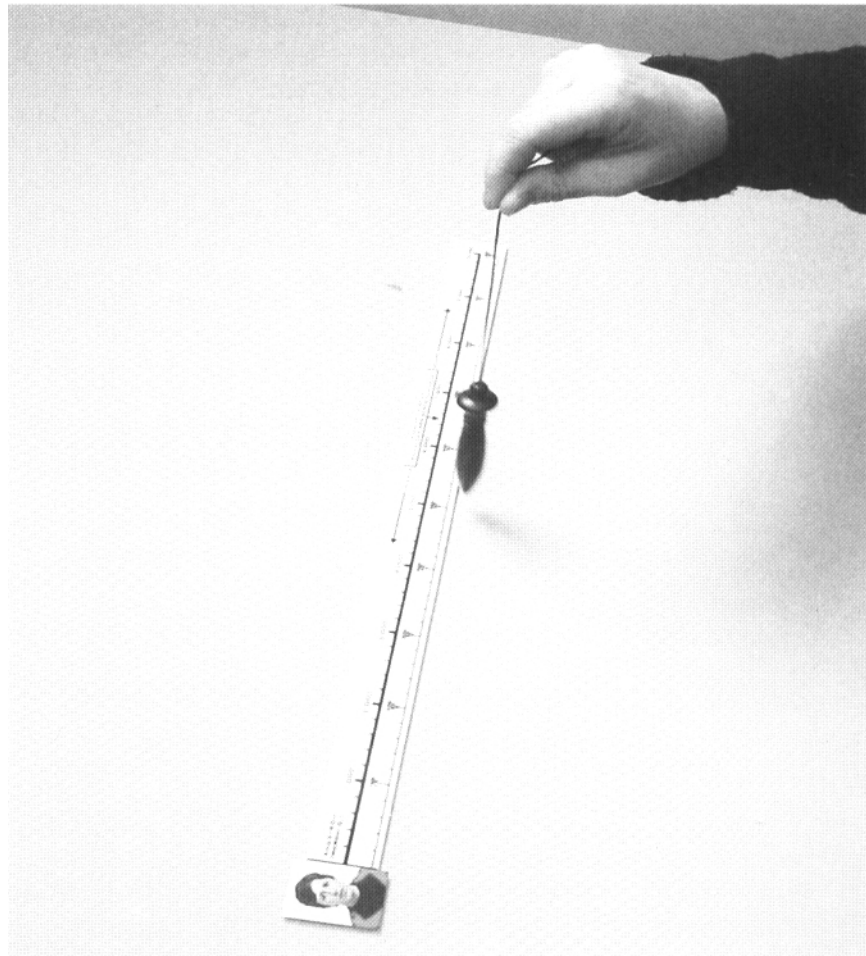

The biometric ruler was created by French physicist Antoine Bovis. Was used as a scale for measuring the Angstrom or unit of measurement of wavelength. $\text{\AA} = \text{one ten-millionth of a millimeter}$

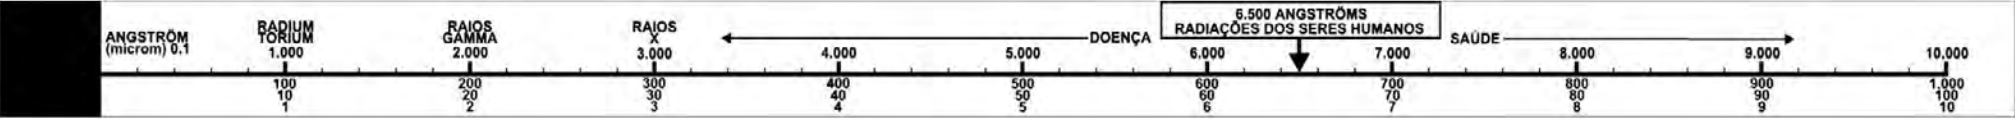

This new version of the rule is the biometric search result dowser António Rodrigues. Ea model with a design rule of "cleaner" and whose proportion maximizes the possibility of capture of various wavelengths. All dowsers have developed their classic rules of measurement. Thus were produced the most varied designs with all kinds of accessories, proportions, dimensions and materials. Our case study is based on Enel, resulting in something very like a school ruler, ie an instrument to measure once more a kind of return to the origin of things.

HOW TO USE

Use preferably a good Egyptian pendulum to work with this biometer. Place the ruler on the desk, guiding the tip Black ruler to the south. Deposit to examine the witness on the black area. Choose the scale on which will work. Put on the pendulum Graphic swinging transversely at any point of the scale. The pendulum will move towards one side or the other of the scale. Slowly move the arm in the sense that the pendulum has swung to the point where the pendulum present an angle transverse to scale. In the case of working with values from 0 to 10, 0 to 100, etc. Use scales at the bottom of the ruler. For example, to evaluate the percentage of something, use a scale of 0 to 100.

Graph Dimension: 3 x 50 cm

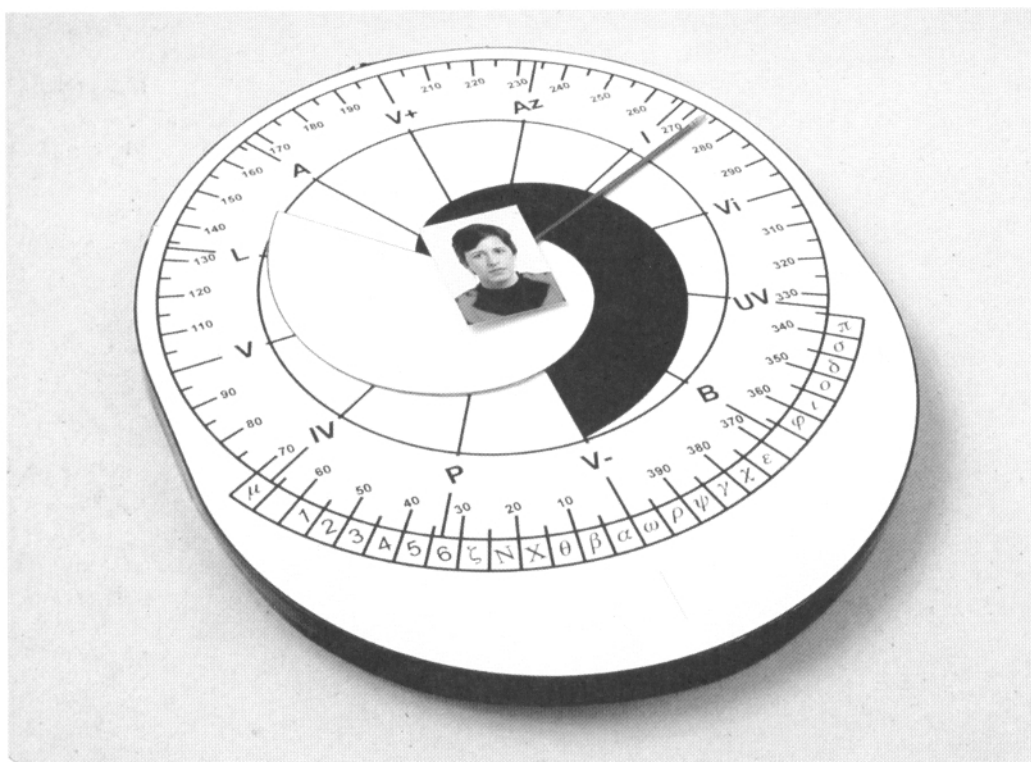

Escargot-selector

The Escargot-selector can be considered as an extension of the equator Universal Pendulum. Staggered by 400 degrees, allows, with a virtual impactor cone, the wave-detecting any imbalance from a witness, and detection of the wave-broker. This device was made by Bélizal and Morel. It consists of one base wood, embedded in which is a form of shell Indian (escargot) zinc, a compass, a second shell shaped, copper, this mobile call dial, a needle search secured on a shaft on which is placed either a metal disc, sometimes a chrome sphere, according to the research object. This needle is used to explore the circumference divided into 400 degrees and thus materialize the vibration detected by the pendulum. Are still needed a pendulum and a neutral virtual cone pendulum.

Based on the study of Indian shell, this device is a ruler of sophisticated analysis, which also allows the issuance distance. The Escargot-selector can be used as a device for issuing a distance where necessary an apparatus of low power. Place the testimony of the patient along with the design of the body to treat the extension of the line of the chosen color. In the center of the device puts out a radiant emitter active sand type or another. Like some other devices, the Escargot has the disadvantage of sending the entire spectrum of color-vibrations around it, and can interfere with other instruments on site.

USING

Search on the back of the patient's hand with a virtual cone pendulum, set to "biometrics", astral-wave or wave-critical of it. Once found the color, escargot pointing to the same mobile. Search based on the wave apparatus, the needle point escargot thereon.

Place on the center of the graphic testimony of the patient in question. Undertake the research organ-related problem the patient. The needle on the dial on the rate base, the Cone Pendulum Virtual astral color in the patient or, if you prefer, a pendulum neutral type cylindrical pendulum depolarized. The operation will be done by tuning to mental every organ studied, and the pendulum will respond with turning clockwise in moment of harmony.

EficiênciaDeficiência

Vibration base270 grads

Vibration rins215 grads

$$\frac{215 \times 100}{270} = 79,6\% \quad 23,4\%$$

If the index corresponding to each organ exceeds the vibratory rate of the base indicate an overactive organ. Search immediately related causes.

When used as emitter, with the needle search which the wave proper. Upon tuning the pendulum has used its spin reversed by changing polarity.

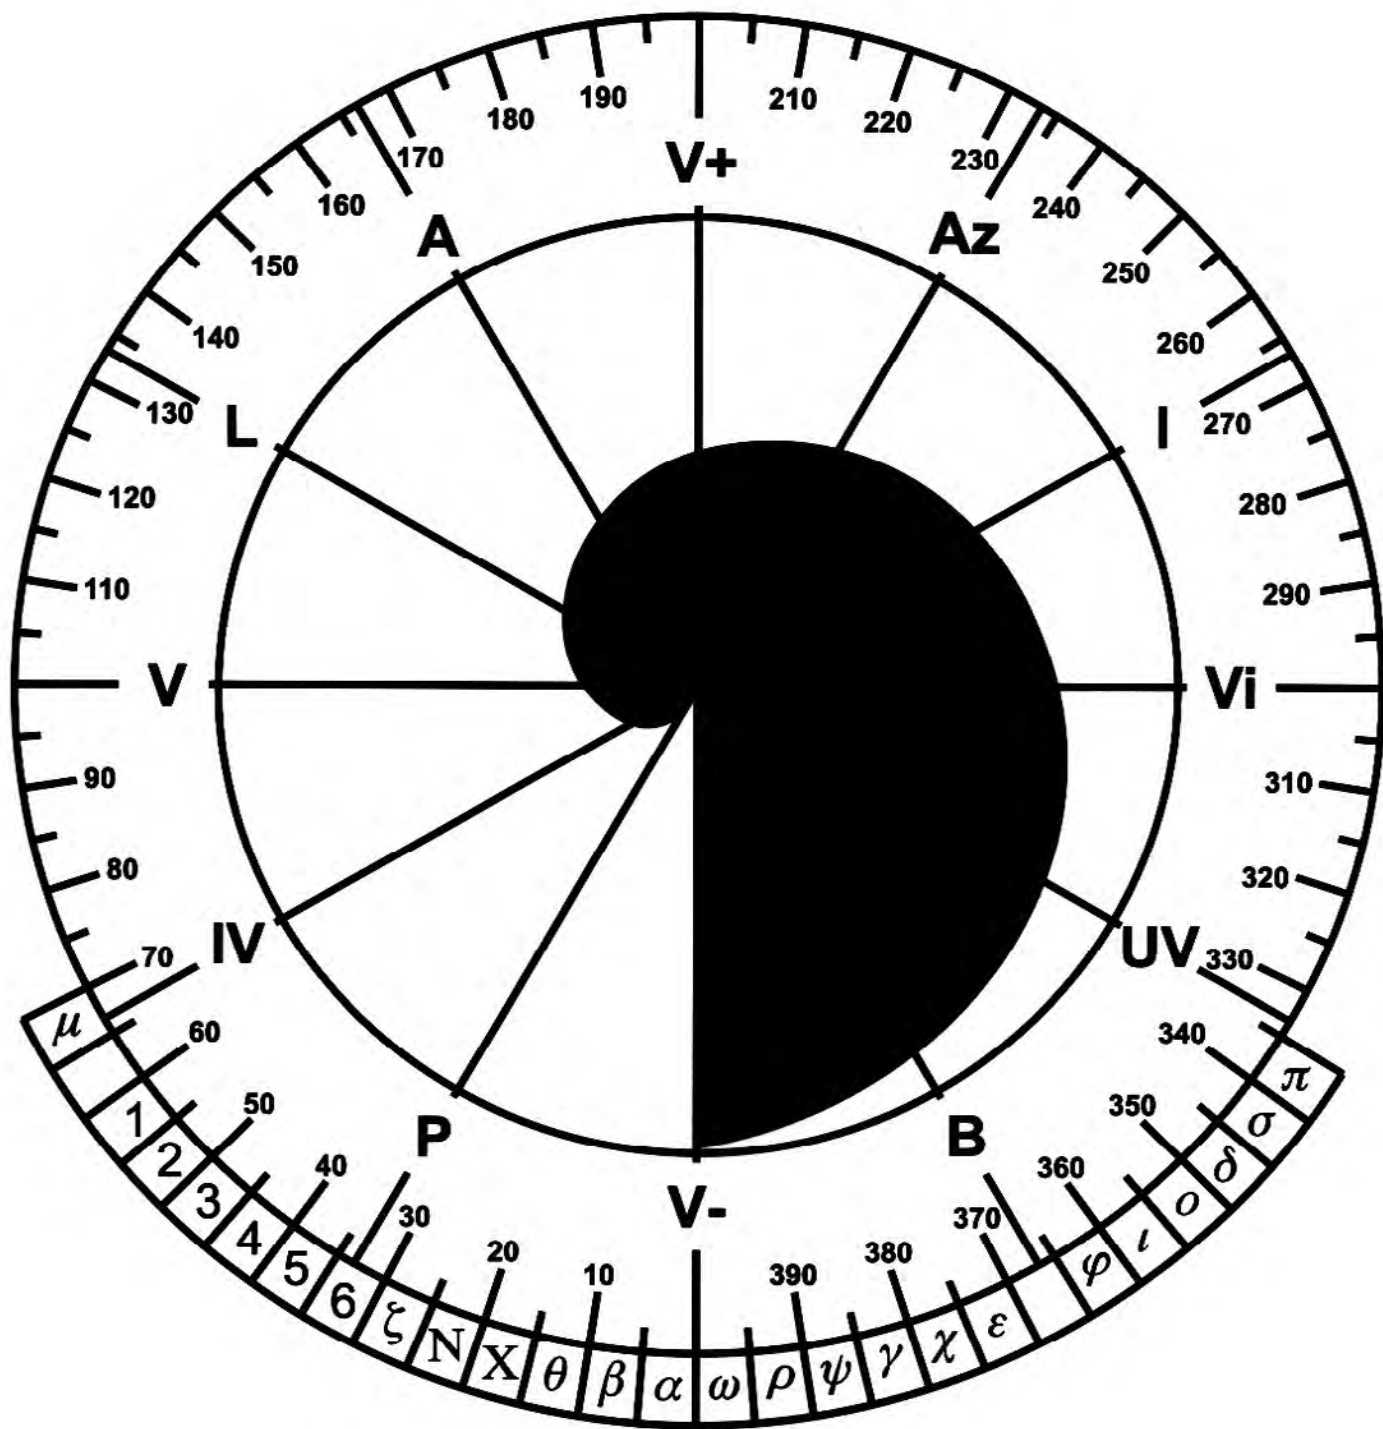

Be wary of a "similar" national made of cardboard, on which make up the organs and systems in mobile disk. As can be seen in the attached table, each of which emits a specific frequency therefore fixed. Another psychotronic device with consequent wear for the practitioner.

The Escargot-selector is a sensitive and sophisticated rule analysis. Bélizal used it also for climate analysis and detection in the area now called Geobiology.

If you want to build a similar device, copy and paste on a escargot white cardstock form attached, do the same with the graph, make a hole in the thin central intersection, which is the axis of a needle cover made from a wire thick skinned, is also the axis of escargot white.

Overall diameter of the circle: 20 cm

If you want to mount the dial-Escargot, cut this way keeping it in proportion the circle.

Psychometric c Bélizal

Authored by Andrew of Bélizal, published in book *Micro-physical Vibratory the* Psychometric chart should be used by all those who have engaged in the selection of personnel.

It allows you to test the physical stamina of a person, their moral qualities and intelligence. Can be used for biometric measurements, test drugs, time to take them, etc..

The Original Graphic Bélizal was shaped like a wooden plank with the numbering printed in black and small hard bottom right was in silver on the center of the graph through a thin wire. 0 graphic print-out can be used the same way, requiring no modifications, but the most finicky will introduce them with benefits.

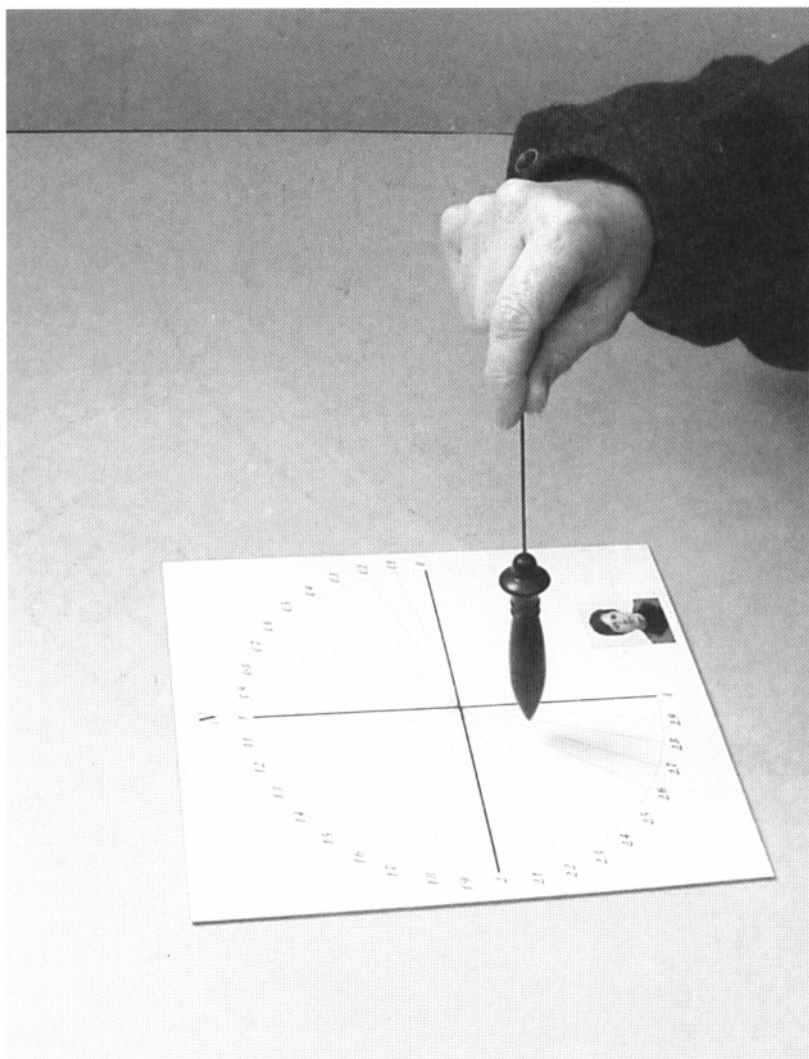

Her 2700 representing the ternary unit are divided into ranges of 90°, each array constituting one micron.

Each micron is divided into tenths.

0 to 1 micron up tests the value of a physical person. 1

to 3 microns if tests the psychic value.

The appliance must be obligatorily aligned north-south. After placing the witness on the silver disc, load the detector with a Egyptian voluntarily pendulum pivoting on the disc momentarily.

Put testimony about examining the record, hold the pendulum swing over the center of the graph, while mentaliza interrogation of the physical aspect of the analysis. Slowly take a pendulum swing angle to the right.

A laborer bound to a constant exercise should present 0.6 to 0.8 microns. An activity office need 0 to 0.6 microns, and a street vendor, on average 0.8 to 0.9 microns.

For research Psychical the pendulum will oscillate between left 1 and 2.5 microns, which is generally the maximum attained. In fact, to spend 2.5 microns, it is necessary to have a high moral and spiritual without fail.

But the testimony of someone killed with a certain aura of holiness, as it is considered by the Church, mark 3 microns, index insurance that Spirit joined the Unit and his return to the Source.

However, if a psychic test the pendulum swing right between 1 and The microns, this tells us very clearly that the moral qualities of the individual being tested are more than suspected and that he is not worthy of trust.

Workers under surveillance may have indices 1.3 to 1.4 microns and 1.5 to 1.6 microns for normal trading activities, while for people in a box and activities of trust is required a minimum 1.7 to 1.8 microns.

In the graph Psychometric intelligence is measured on a scale ranging from 0.8 to 1.9 microns.

For a handyman somewhere between 0.8 and 1 micron is enough. Persons intermediate functions, 1.2 to 1.4 microns. For sale and trade activities between 1.3 and 1.5 microns Technicians with higher education, between 1.5 and 1.7 microns. Officers and administrators, 1.5 to 1.8 microns.

Artistic activities and great sensitivity is required a value between 1.9 and 2.1 microns.

At each level lower values indicate more adaptable and perhaps people cordatas the opposite side, of the highest, is those related more difficult to steer and "condition".

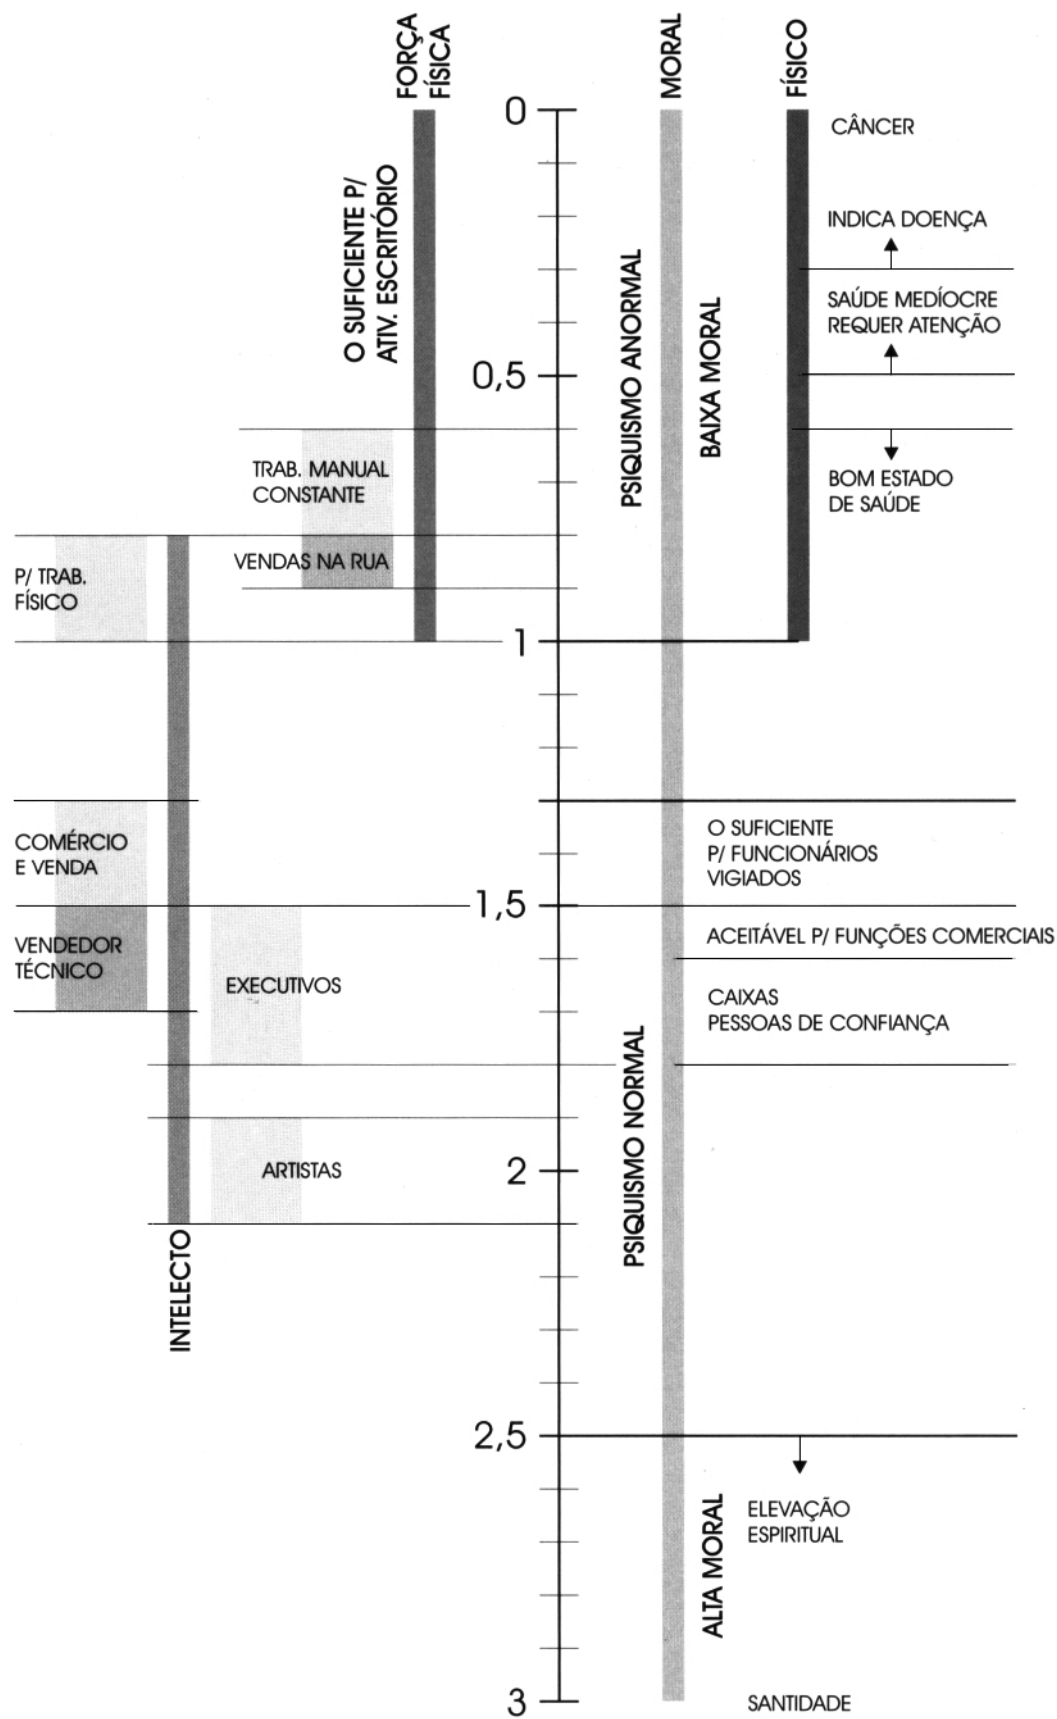

In biometrics, a good health vai 0.6 to 0.9 micron, 1.00 micron rarely.

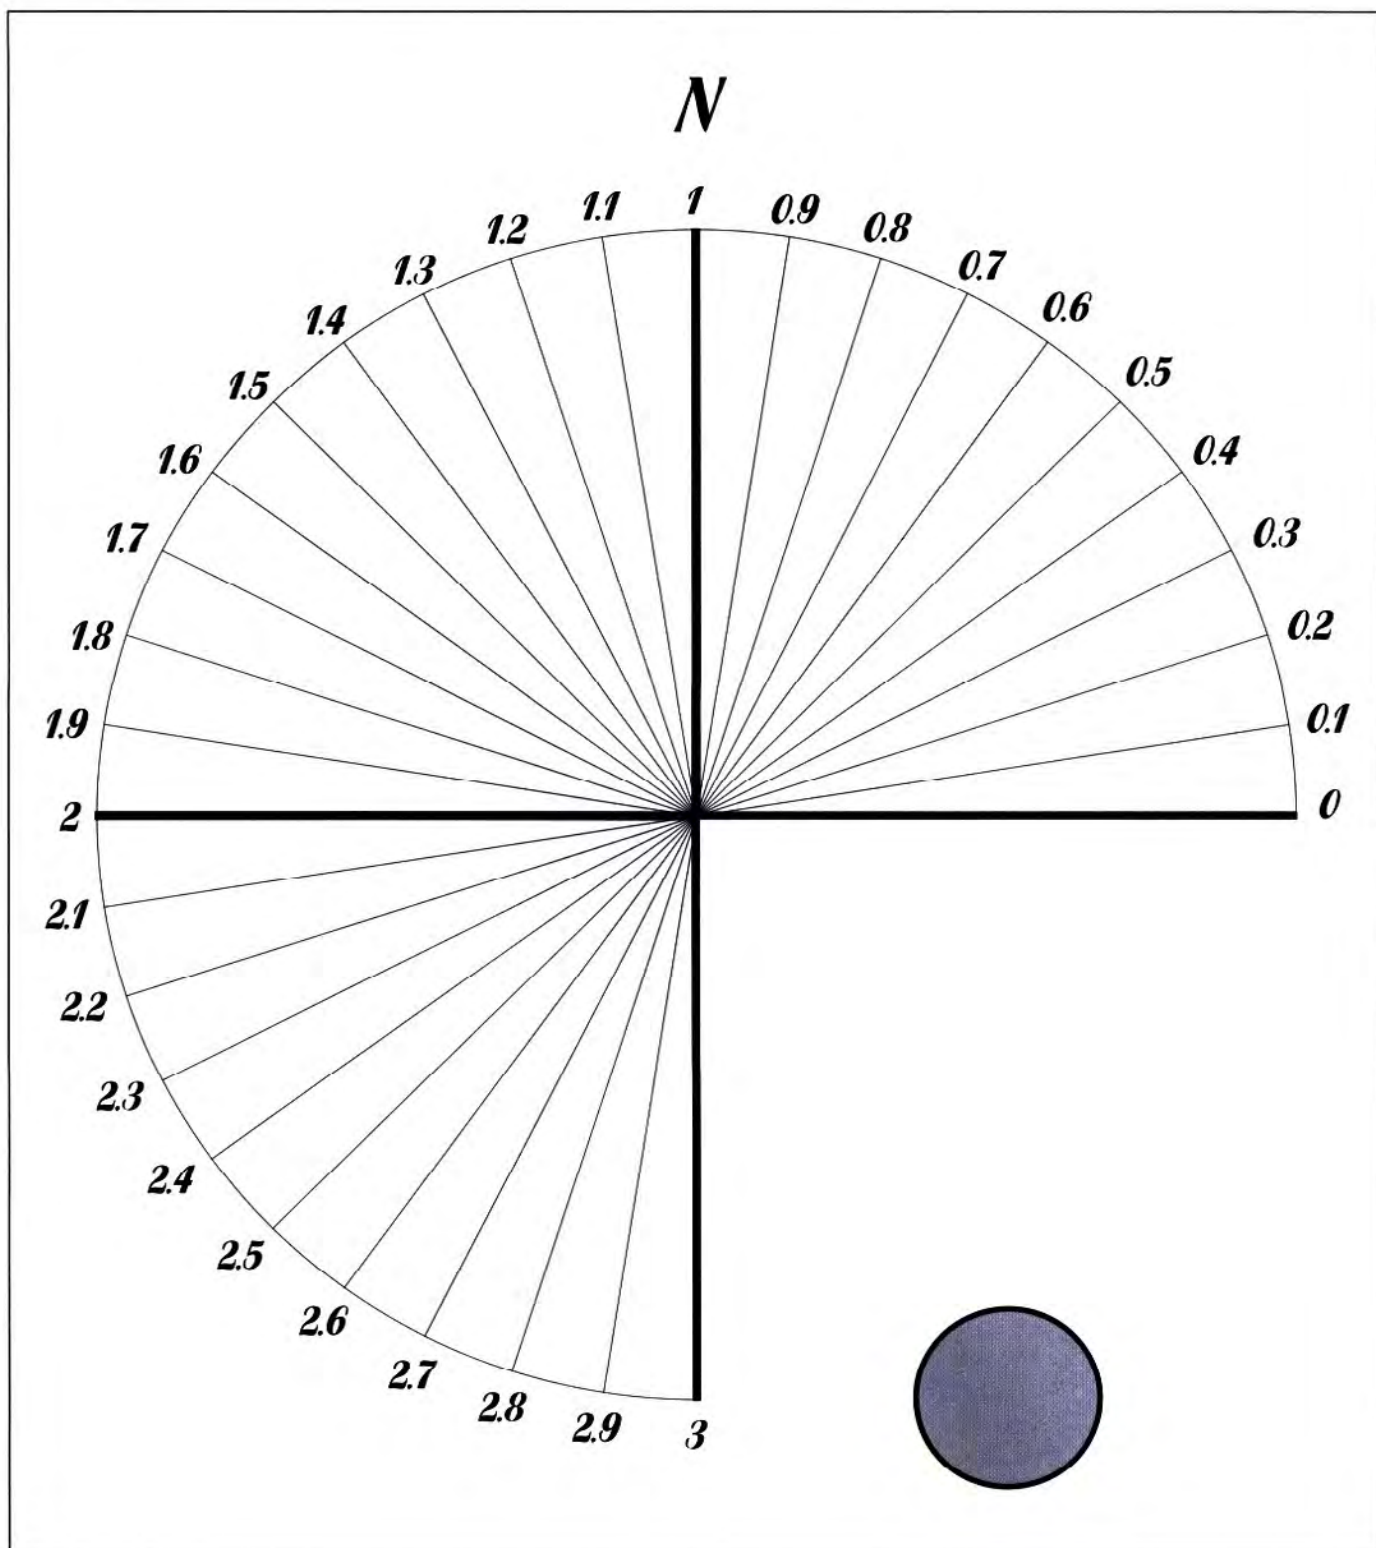

Below 0.5 is recommended to health care. 0.4 micron indicates a mediocre health. A measure less than 0.3 is a sure sign disease. In case of cancer the pendulum will swing instantly over 0 microns.

Remedies or placed their testimonies on the disk next to the photo in question can be analyzed and, if they increase the initial index reading, would be considered appropriate.

This procedure also applies to test homeopathic dilutions. By convention mental can be tested for the duration of the treatment times to take, etc..

Graph Dimension: 20 x 23 cm

Psychometric c La Foye

This chart was developed by the dowser Frenchman Jean de La Foye, published in book *Waves of Life Waves Death* is a consequence of a similar graph created by André de Bélizal.

This device was deliberately kept the issue in RW cH (spiritual) with all its risks. The main purpose of this chart is to test the vitality of a person, his honesty, and his intellectual faculties.

HOW TO USE

The graph should be oriented with the 90 ° north, or optionally placed within a Form Field artificial.

Place the testimony of the person to be searched in the center of the smaller circle.

0 ° to 90 °, we are in LN Ph YH Sh cH, - The Breath of Life - for Vital emissions. A person in good health is below 50, but as close as possible. As we approach 0, vitality decreases.

90 ° to 270 °, presents the RW cH - spiritual level equivalence. 180 ° to 90 ° presents a lie. Wary of individuals who are experiencing this index. 180 ° to 270 °, we frankness, honesty. Ordinary people are located in the middle of the quadrant.

To test the intelligence, we use the Hebrew word ha WR (Haour), Light, placed north of the graph.

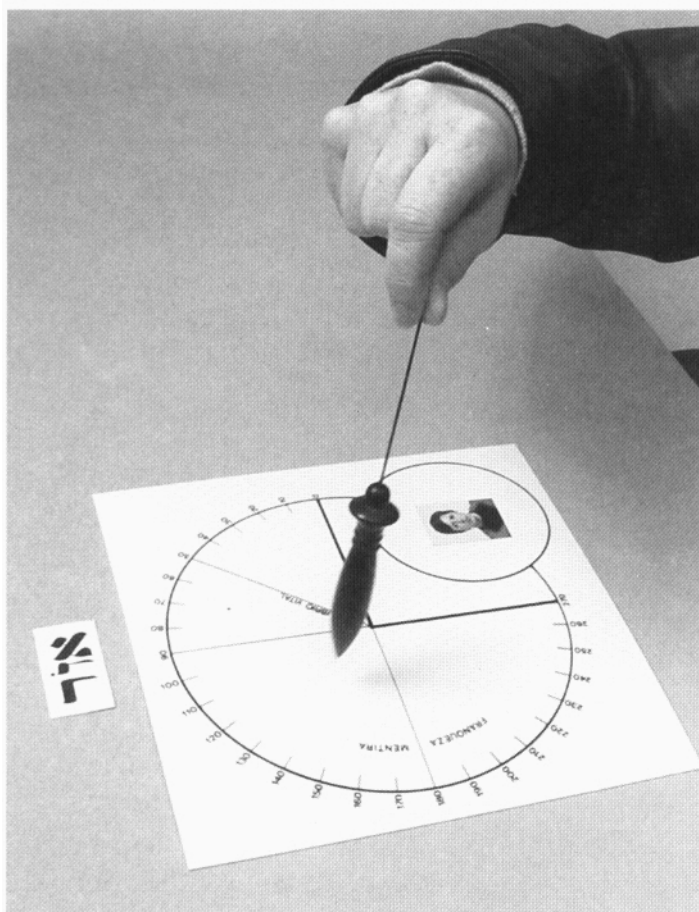

An average intelligence ranges from 80 ° to 90 °. Above 120 ° intelligence is higher.

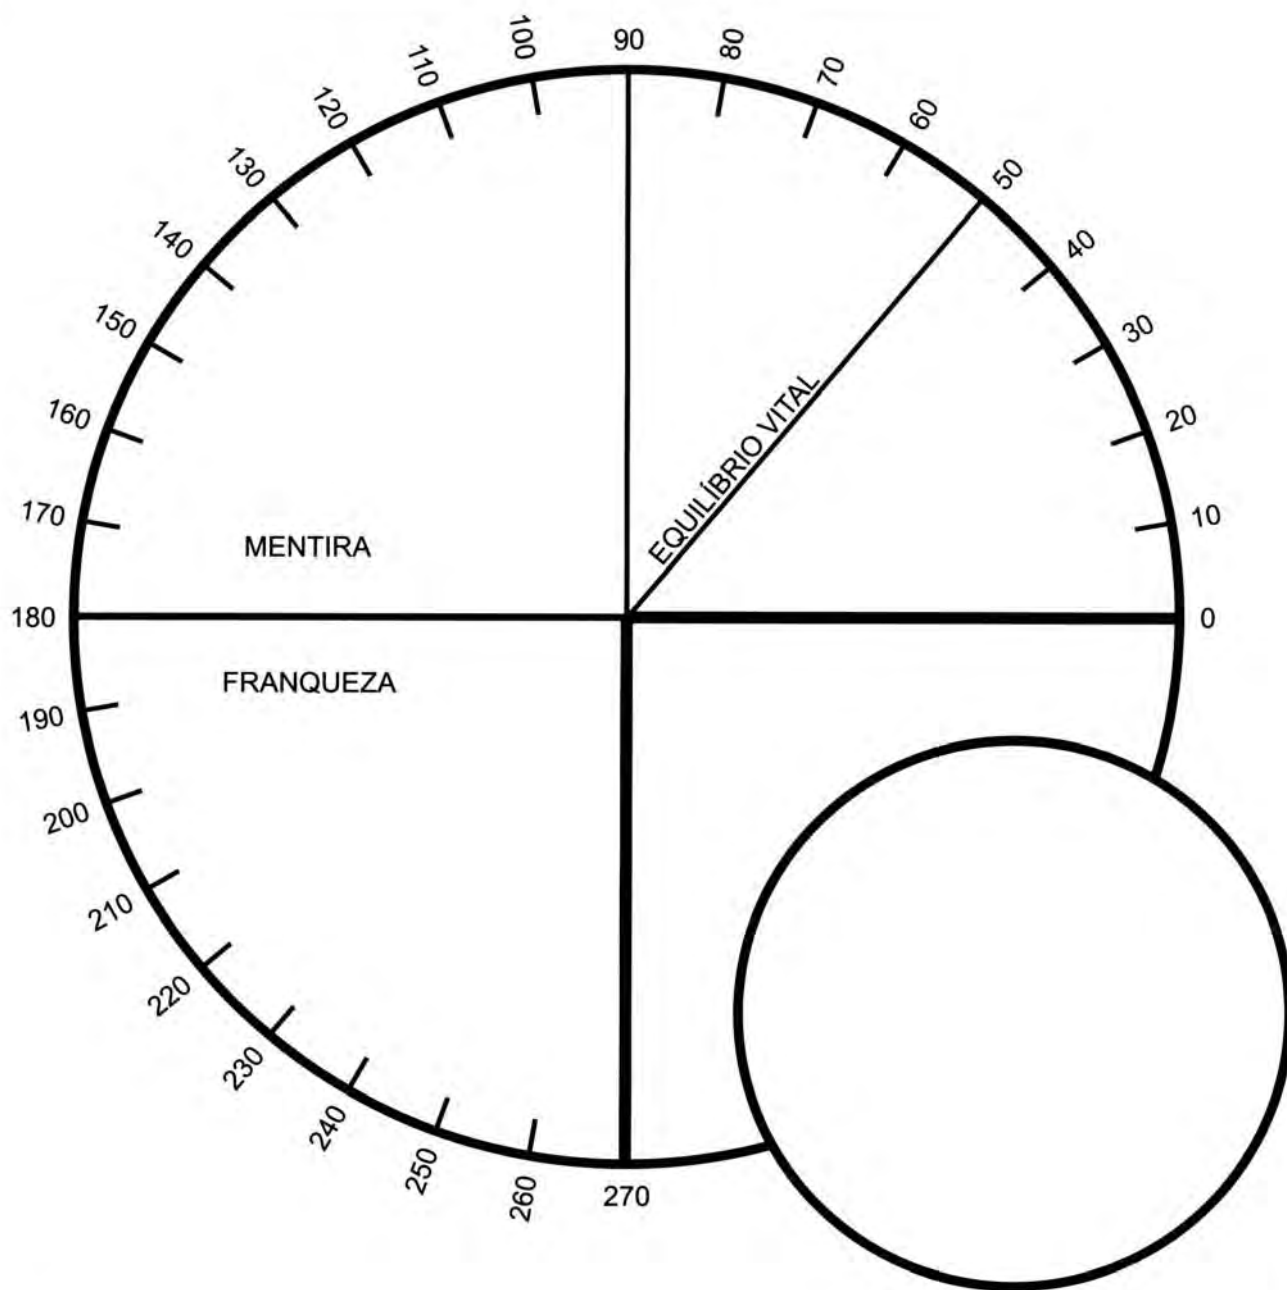

Place a neutral pendulum over the center of the large circle, it will eventually orient themselves in relation to the degree desired. Make the separation of the levels with us in the thread.

For greater accuracy, we can go the perimeter of a circle with a pointer. Upon graduation searched the pendulum wheel.

Never serve as the psychometric GRAPHIC emitter, since it presents the boomerang effect!

Graph Dimension: 22 x 22 cm

Hard Equatorial

Hard Equatorial creation of Jean de La Foye published *Waves of Life Waves of Death*, in the form of a graph drawn on paper, As the attachment, or a hard wood cut in this case the axes of the field directors are grooved shape (see in *Dowsing and Classical Kabbalah* Antonio Rodrigues).

- 1 - The diameter north-south artificial the Yod, $0^\circ - 180^\circ$.
- 2 - The diameter of Waw, $140^\circ - 320^\circ$;
- 3 - The diameter of He, $105^\circ - 285^\circ$.
- 4 - The diameter of Green Negative perpendicular, $90^\circ - 270^\circ$, to cancel emissions on a spiritual level.
- 5 - The radius of the UV Electric, 60° (La Foye found that to be the guiding field).
- 6 - A leaking hole in the center of the disk at the intersection of the axes.

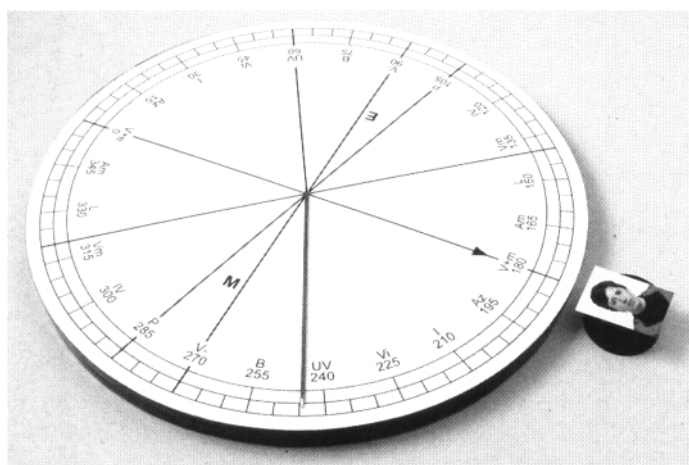

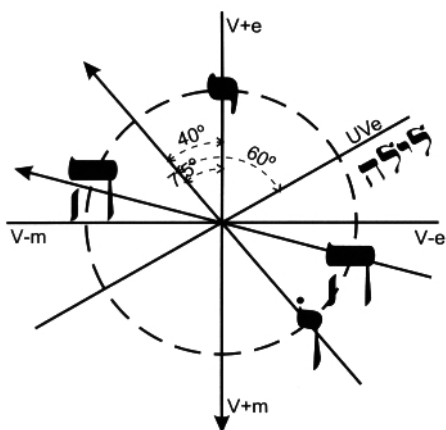

The Disco Equatorial Jean de La Foye works with a needle bent copper "L" and fits in the center hole. When this needle is the size of the radius of the disk or slightly lower, an emission occurs at 180° on the vibration to which the needle points, this emission spectrum is different. However, if the needle is equal to half the radius of the disk or somewhat less, the wave spectrum is sent undifferentiated. Here are some characteristics of the disc: with

Equatorial Disk is possible to detect the vibration emitted by a form or a witness placed before the Green Positive Magnetic (180° degrees). One may thus meet the wave and the wave-disease-curator of a patient. To treat a living being (human, animal or plant) simply submit your testimony to the action of its wave-curator necessarily in magnetic phase. With treatment by Disco Equatorial there is no danger because the emission ceases automatically whenever there is a saturation.

With the needle at rest at any point in the disc, and a witness placed opposite the 180° is detected on the center of the disc polarity (-) and the axis $0^\circ / 180^\circ$ polarity (+).

The detection wave-phase disease will give us electric mandatory polarity (-) on the witness and (+) under the same. The emission-healing phase will give us the opposite magnetic polarities in the vertical and Shin the testimony.

The analysis of any form will give us magical resonance (+) on the opposite form below, rotation of 180° in the colors of the spectrum, the Aura remains stable.

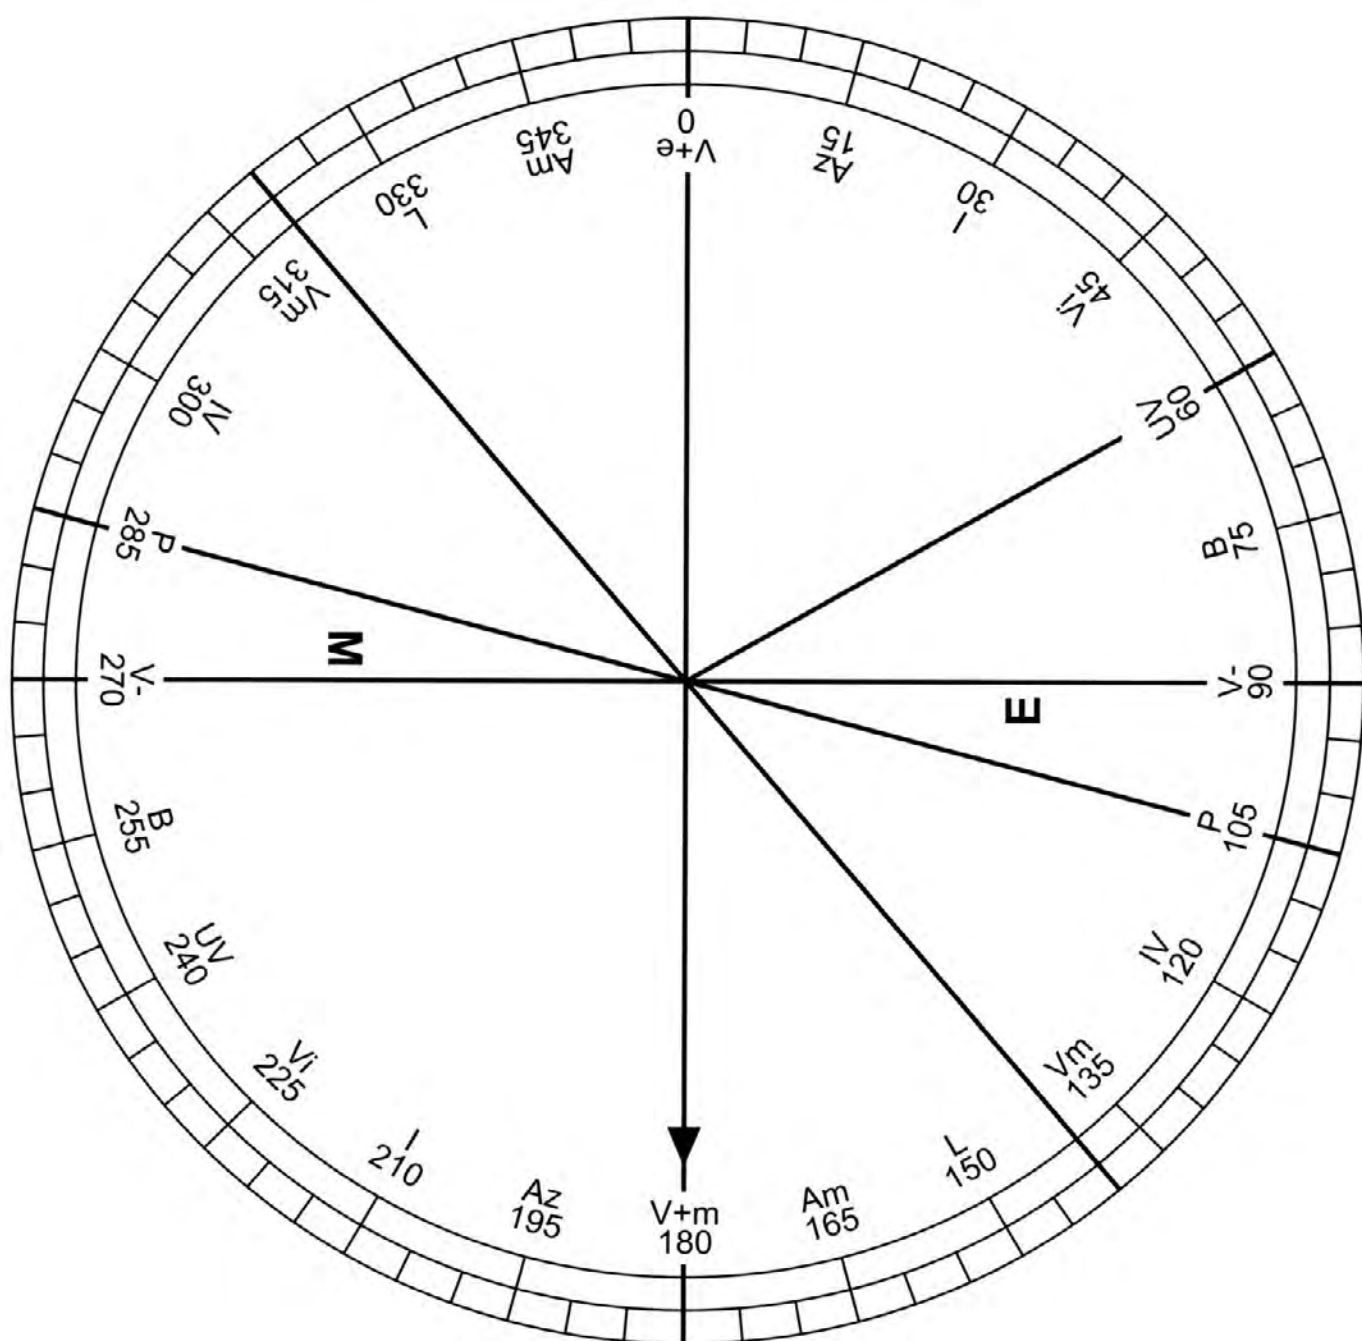

Emission spectrum of differentiated

In the equatorial disc on a needle 320° cancels polarities. The 320° is the equilibrium point of the set of wave shape. However, detectable with fireworks.

The Disco Equatorial is a sophisticated detection instrument for all who work within the specialty "Wave Form". However it lacks potency so it can be used effectively as an instrument of issue. It is absolutely necessary to use any artifice amplifier. For example, a solenoid good size on exit and entry to the north pile some dowsing discarded the board with the major chord on some boards, or the link in the 110 Volts. Radiestesicamente Choose your option.

The advantage grooving Axes Officers Field Form that allows building equipment is independent of natural fields.

Diameter of the graph: 30 cm

Vital Field

Vital Field is characteristic of living systems. This field is perfectly oriented (Northern Form) by a living system in perfect health (human, animal, plant).

This chart is intended to facilitate the search field Vital to be made with pendulums cylindrical bearing shirts with appropriate artwork. Finally case any abnormality is found, one should try to achieve a rebalancing putting them pendulums around the testimony in their original locations. Thus the artwork issuers to impose a balanced energy field Vital witness. Of course this is just an energy healing technique to be applied in parallel to the primary therapy.

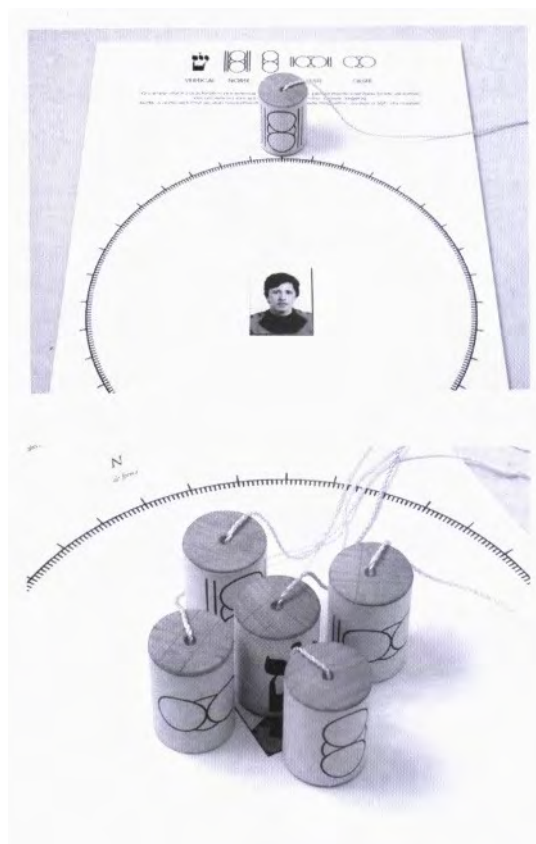

ATTENTION: In the living being in balance, Vital Field is only in a potential state. For detection, it is necessary to use a device to assist in the thumb on the little finger bent.

Any emission displaced position in relation to the scheme shown above, is a vital field may be disturbed and translate into more or less serious diseases.

The most serious diseases may reverse the vital components of the field, the Shin can even perform inverted (holding the wire suspending the pendulum the other end).

For more information, to report to books Waves of Life Waves of Death, Jean de La Foye and Dowsing and Classical Kabbalah, the António Rodrigues.

Dimension chart: 21 x 30 cm

Figure Wood

Graph classic for use in medicine psionic. The unique graphic designed by W. O. Wood, who was in essence a graph for generic searches in dowsing, was adopted by Dr. George Lawrence in his psionic medicine. This is a better version elaborate graphical and aesthetically. This instrument allows the therapist to research the disease and the remedies best suited to treat it.

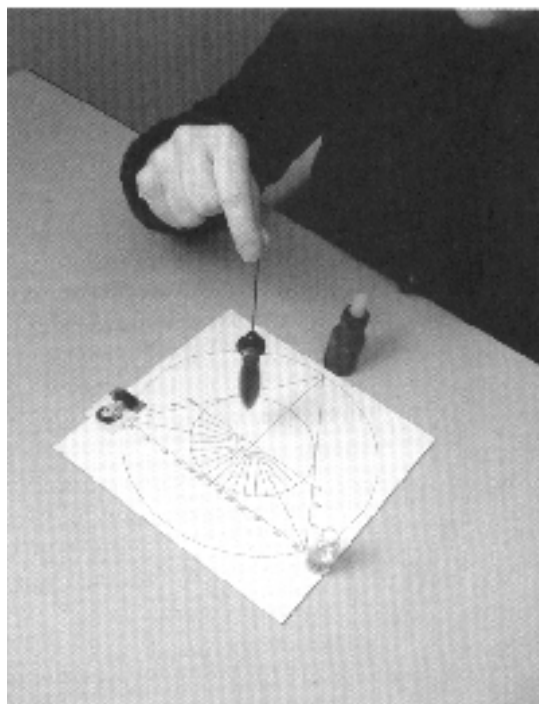

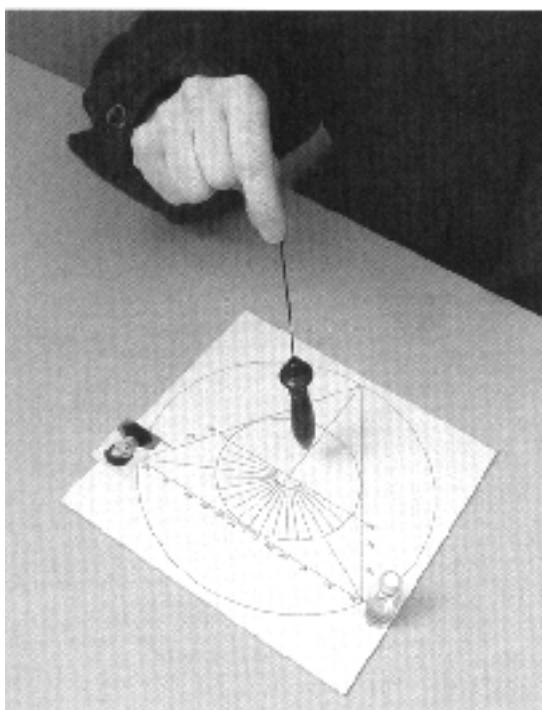

HOW TO USE

Put the chart on his desk, the point 0 aligned north. The dowser south, opposite the bottom vertex of the triangle. The testimony of the patient will be placed outside the circle at the vertex upper right triangle. On the opposite side is placed in the left corner Index Turenne disease or organ (testimony of artificial organs or diseases produced the second method dowser French Louis Turenne).

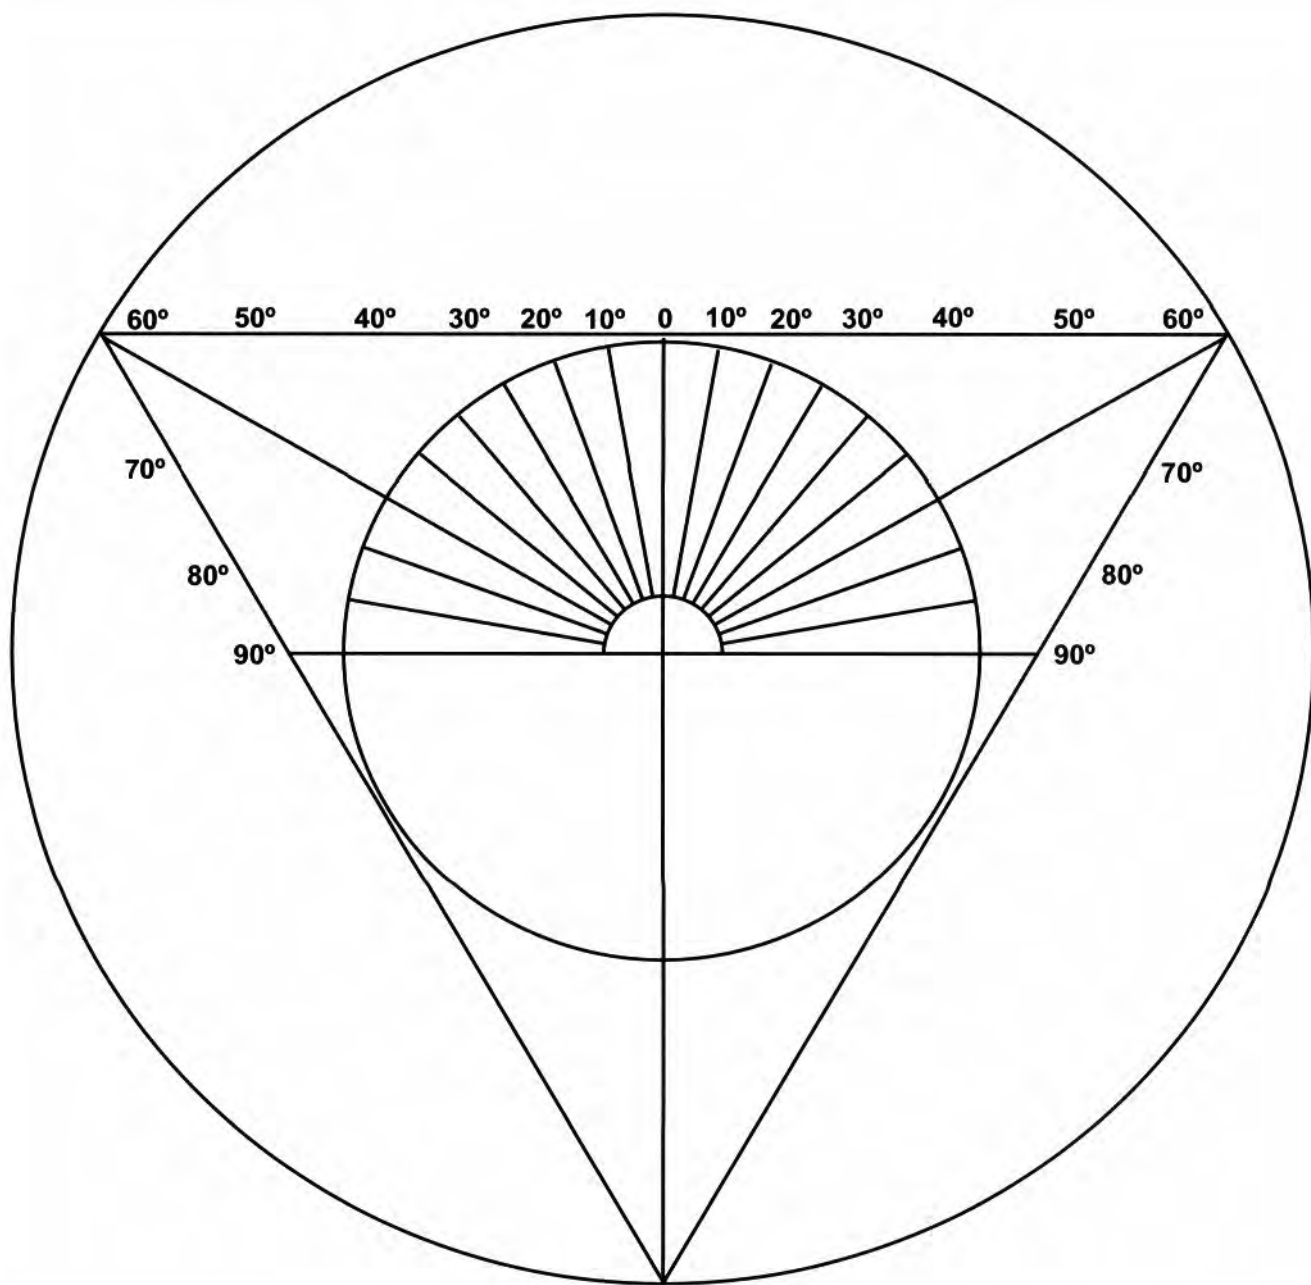

The pendulum released on the north-south axis will have a sharp deviation to the right or to the left, when the index corresponding to Turenne disease is placed on the corresponding vertex. Proceed following the selection / s remedy / s, putting one by one at the bottom vertex. One remedy that result in greater correction of the pendulum on the north-south line will / will the medicine / s indicated / s for the case study.

Experienced dowsers can replace Scores Turenne, hard to find, for equivalent testimonies created from lexical valued at decagon following the guidelines in this book decagon item.

Decagon

The word as a testimony of what it means.

Since 1946, the magazine *La Radiesteshie Pour Tous* published articles about the possibility of using words like testimonies and means of action dowsing. However dowsers all the time have noted that the words spelled newly lacked the quantum energy and that what we designated this quantum was acquired progressively over three days as if power were slowly deposited on the surrounding paper. This prevented the immediate use of the word testimony. This was the theme for the research of dowsers Belgian brothers Servranx. They realized that small chip card with words, when placed inside a circle drawn with ink, had the impregnation of word witness accelerated, thereby decreasing the long waiting period of 3 days.

Every geometric shape, regular or irregular forces can saturate the (poorly defined), no matter who witness and testimony-especially a word, to give you more power. But rare are the forms that give the word witness exactly what you lack to be comparable to the natural sample.

Searching in this way, the Servranx found several ways-witness materialization of these forces, not to mention most radiestésicos amplifiers that provide excellent material evidence of phenomena.

With insistence, the pendulum designated among all forms examined, among the most diverse, the decagon, ie, the regular polygon of ten sides.

The decagon is one of the privileged forms, which embodies the influences of a word-witness.

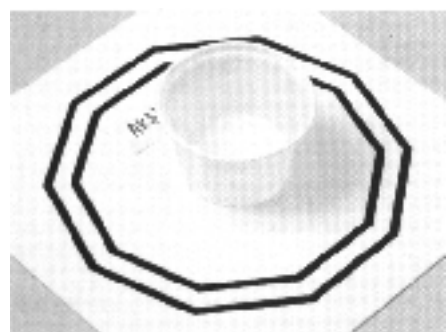

The decagon is the symbol of the materialization of things, his ten-sided matching:

- thought that presided over the execution
- the verb that evokes (names, symbols, etc.). substance
- energies that crowd this substance
- magnetism (and critical radius, number, number)
- the species to which the thing belongs, his character
- properties and the character's own thing
- the impregnations, the tunings, the resonances
- the state of things past
- the future state of the same thing

Starting from the idea of valuing the words in the witness-decagon, F. and W. Servranx were taken to investigate the effects of embodiment decagons having more potent, as the double decagon, rays 50 and 60 mm. Thus fell, much to the duration of recovery. Quickly realized that such a device allowed impregnations from a simple word-witness, impregnations that could be successfully used as remedies! The outcome of this work was published in *EXDOCIN* May 1958 and April 1959, and also published in book form under the title *materializations Dowsing*, in 1958.

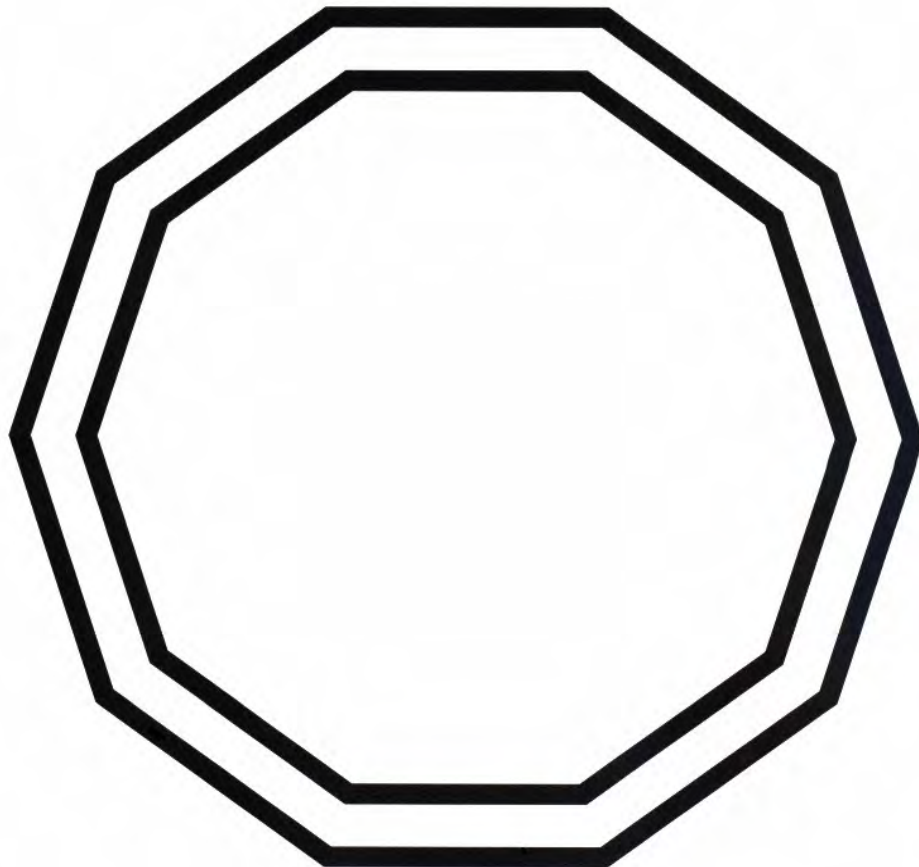

Valuation lexical.

Impregnating a liquid energy of a word.

HOW TO USE

Suppose you want to produce a homeopathic remedy urgently. Write on a piece of paper, with no black ink, the name of the medicine and encouragement necessary; put this paper on the decagon, more or less parallel to one side, place in the center of a small decagon round glass (glass of liquor 10-20 cm³) in the center and near the witness, not the witness. Leave in place all the time (with search pendulum). This time will be much shorter as the highest dilution is: approximately 5 minutes for the impregnation high dilutions, ten to 15 minutes for medium dilutions of 20 to 30 minutes for the low dilutions. It is best to determine the time with the help of the pendulum. Then you can serve the meaning of the word drug, the dosage is absolutely critical. If the pendulum indicated, for example, five drops every 3 hours, and the person ingests a single drop or a cup per day at once, the result is absolutely no, neither positive nor negative. Dosages may vary from a few drops in a little water up to half of the glass, ie, 5 to 10 cm³. The effects of the drug will be approximately the normal.

This technique is valid when the name of the thing
DESCRIBES THE COMPOSITION OF THING!

We can thus obtain impregnations:

- a substance, such as iron, copper, etc..
- one color, green, blue, etc..
- a remedy, Arnica, Sulfur, etc..
- a force or energy, life, thought, sound, light, etc..
- a person or animal, Mr. José da Silveira, a dog Zulu Francisco Mendes, etc..
- a quantity of 2 Kg, 1 km, 1 micron, etc.
- an attribute or quality, good, honest, likable, etc..
- a gender, male, female, negative, etc..

Both can be used paper on which the word is written, as a liquid or a powder neutral. The glasses containing substances should remain open during impregnation, after which had to be closed. The example of homeopathy, the liquid must contain some preservative to ensure its durability.

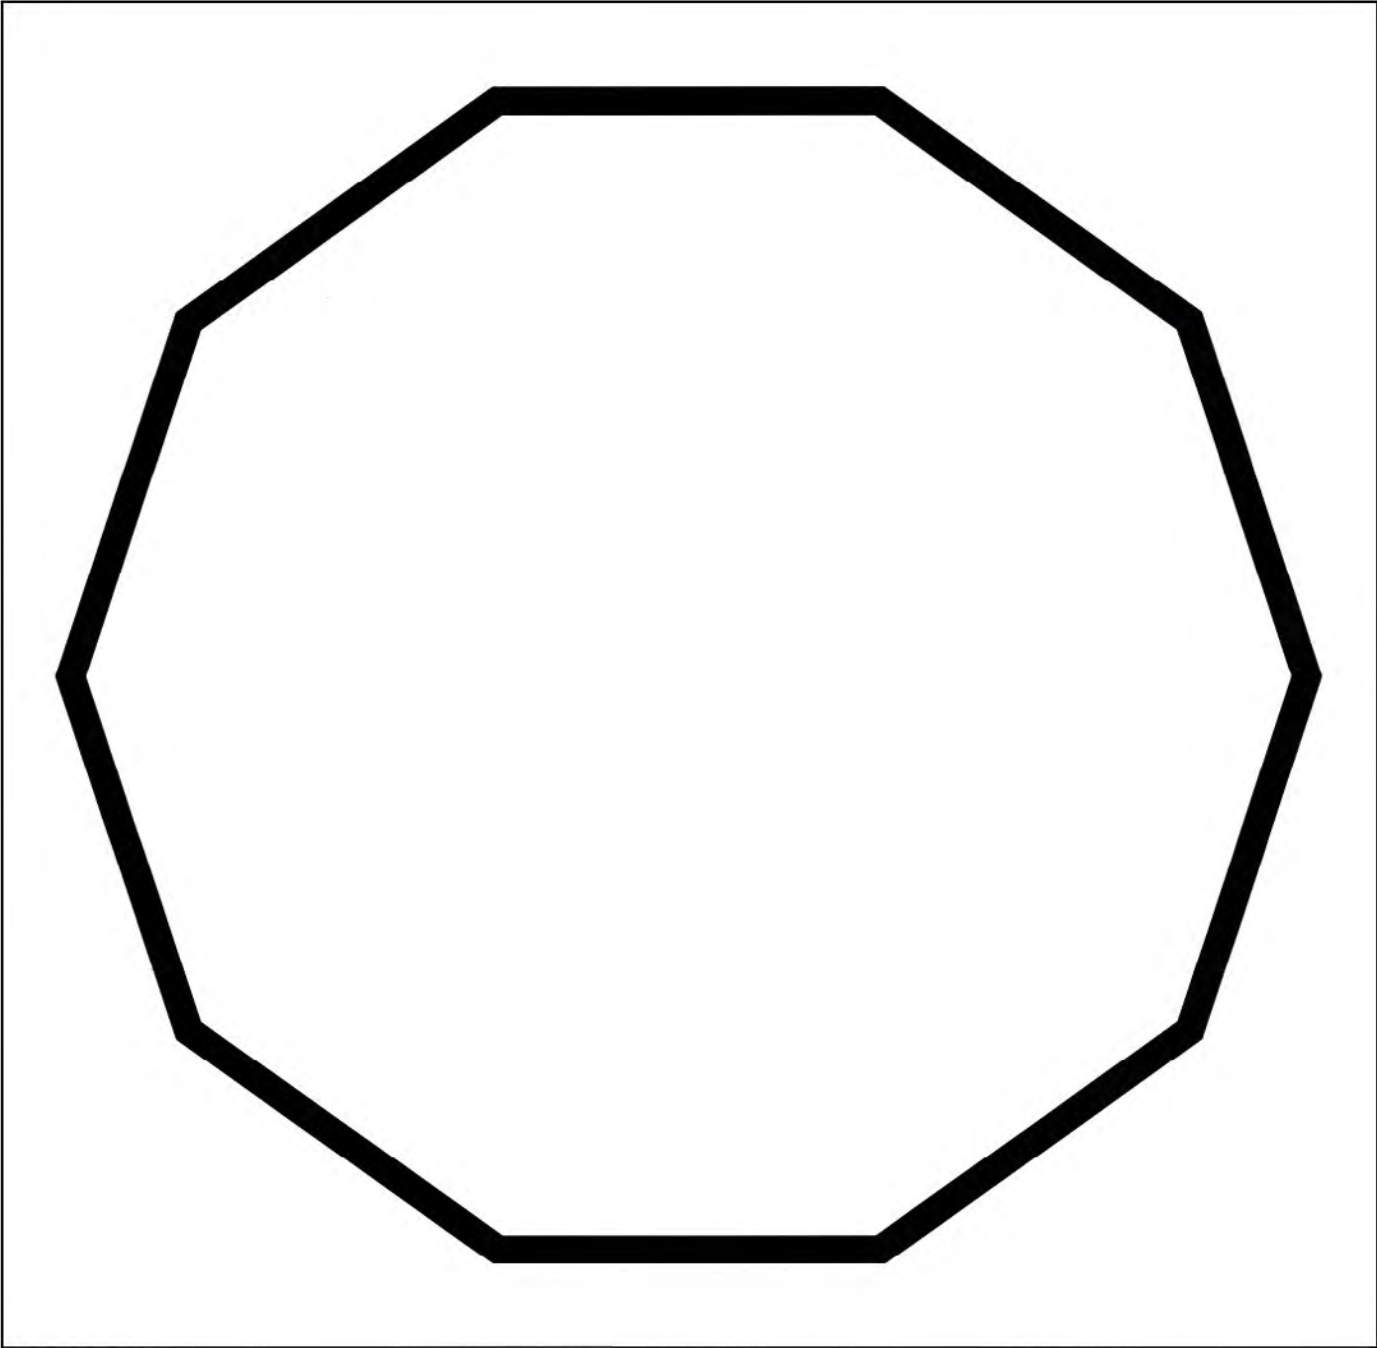

The technique varies when you want to imbue something with multiple influences, or when the name of the thing does not accurately reflect their composition, or even when it designates something of the past or of existence uncertain.

In this case, the decagon will be simple and the words are placed at the outer perimeter; impregnate the support is usually placed inside the decagon.

The Materialization Appreciation or dowsing can only be obtained through lexical testimonies!

Dimension chart - double decagon: size

Decagon simple: 25 x 25 cm

Hiranya

(Cosmic Energies & Biotic Radiesthesics Generator)

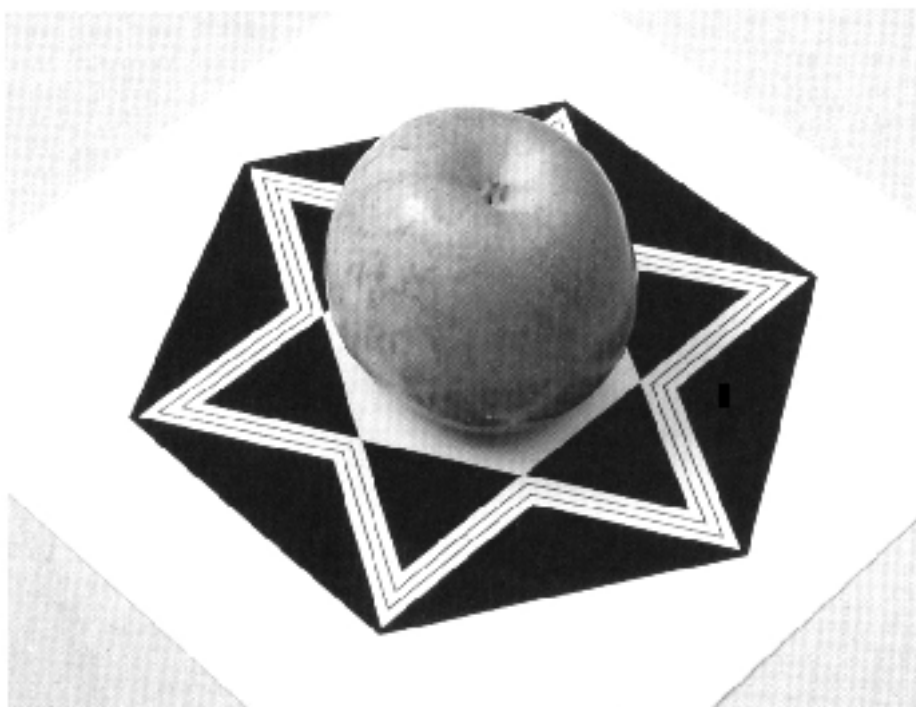

This powerful graph can be used as a Yantra. He is the representation in terms of the famous reel Hiranya. These devices are quite popular in Japan. Its use is similar to Lakhovsky coils, whose shape is the most popular open oscillating circuit, marketed as copper bracelet.

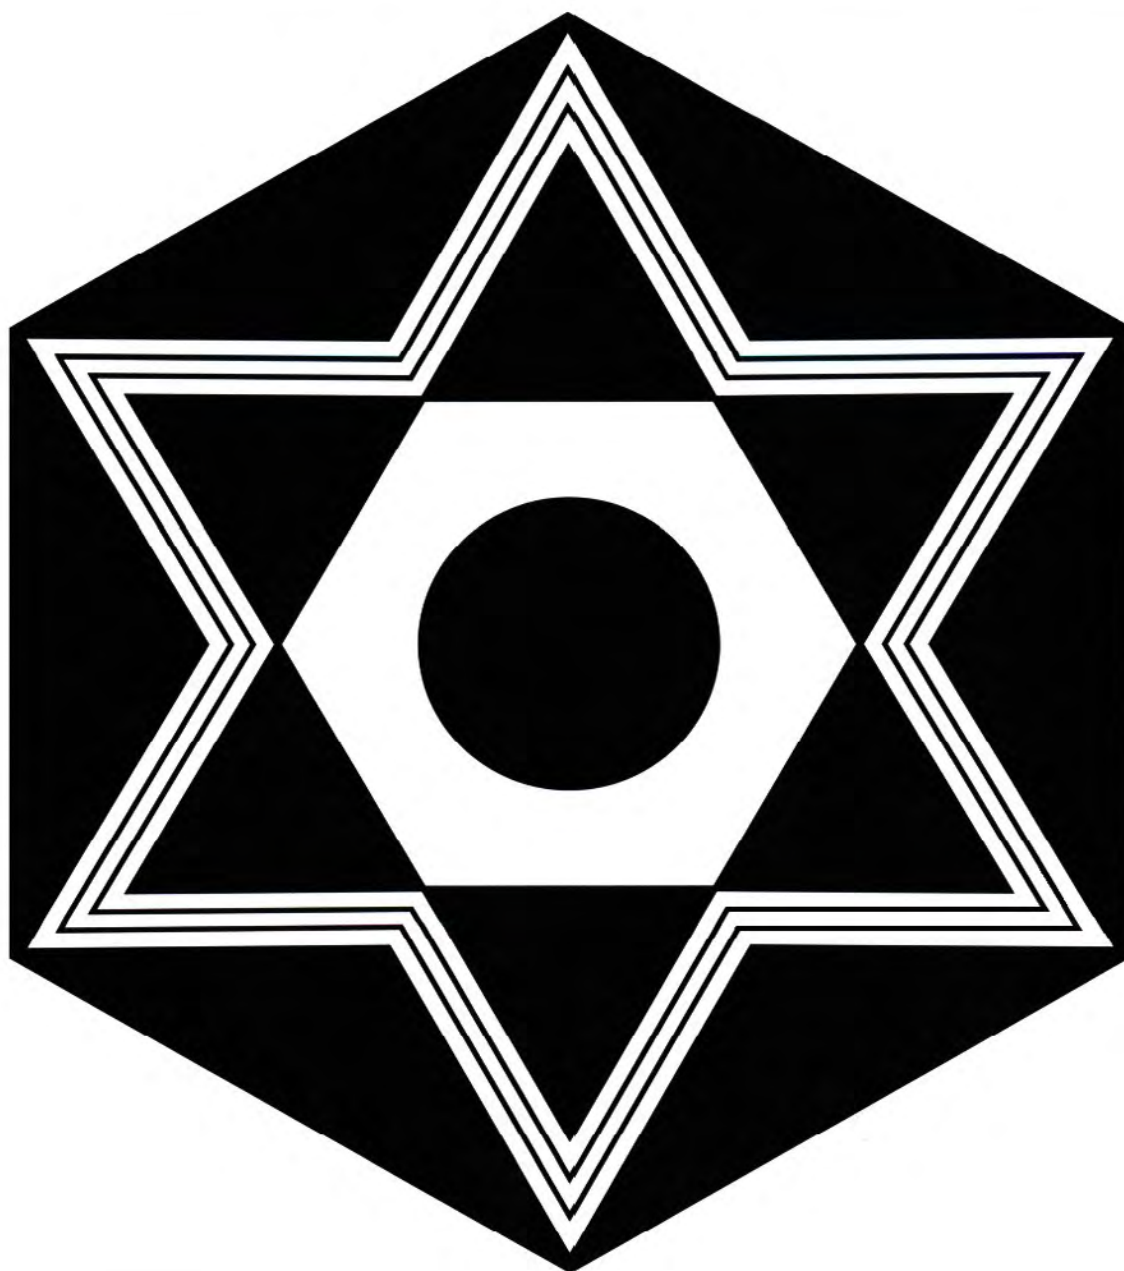

Like other charts, there are multiple possibilities for use of Hiranya. Experimentally plate Hiranya can be used to preserve food for certain periods than normal. When on display, "filter" the environment, rebalancing the energy source of psychic or physical.

To increase your field can be used in conjunction with precious stones, quartz crystals or stones or crystals programmed for specific purposes.

The chart dowsing is authored by Antonio Rodrigues.

Graph Dimension: 22 x 22 cm

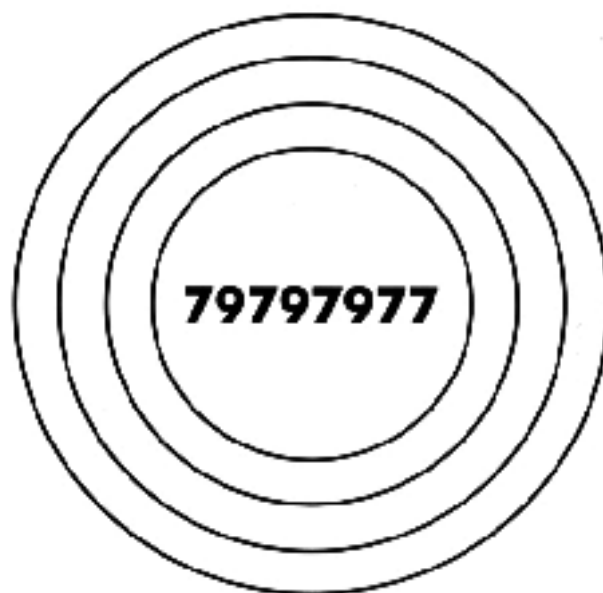

High Vitality The creation of graphics compounds of numbers within circles is due to H. O. Busby. This work was published in Europe by *La Radiesthesie Pour Tous*, July 1959. In a magazine article published in Australia, he writes: "I have not had the opportunity until now to keep you abreast of all the observations made by the accumulation and employment of certain energies. Spotted one undoubtedly of cosmic origin, which I called" **HIGH VITALITY** "since its effects. This is represented by the numbers 9797979 written in the center of circles

concentric. My technique is to energize rolled stones of the river with the help of this graph. To put it on the rocks this hard and do rotate the pendulum up to saturation (which I note by stopping the pendulum). One of those small stones just so great to get effects. Simple example: I placed a small stone so energized leaning against the outside wall of a house built in masonry. With the pendulum followed what happened: in a few days the whole building was saturated, then it spread to the garden which is all around. Well, all garden plants stood to grow in a way quite vigorous ... "

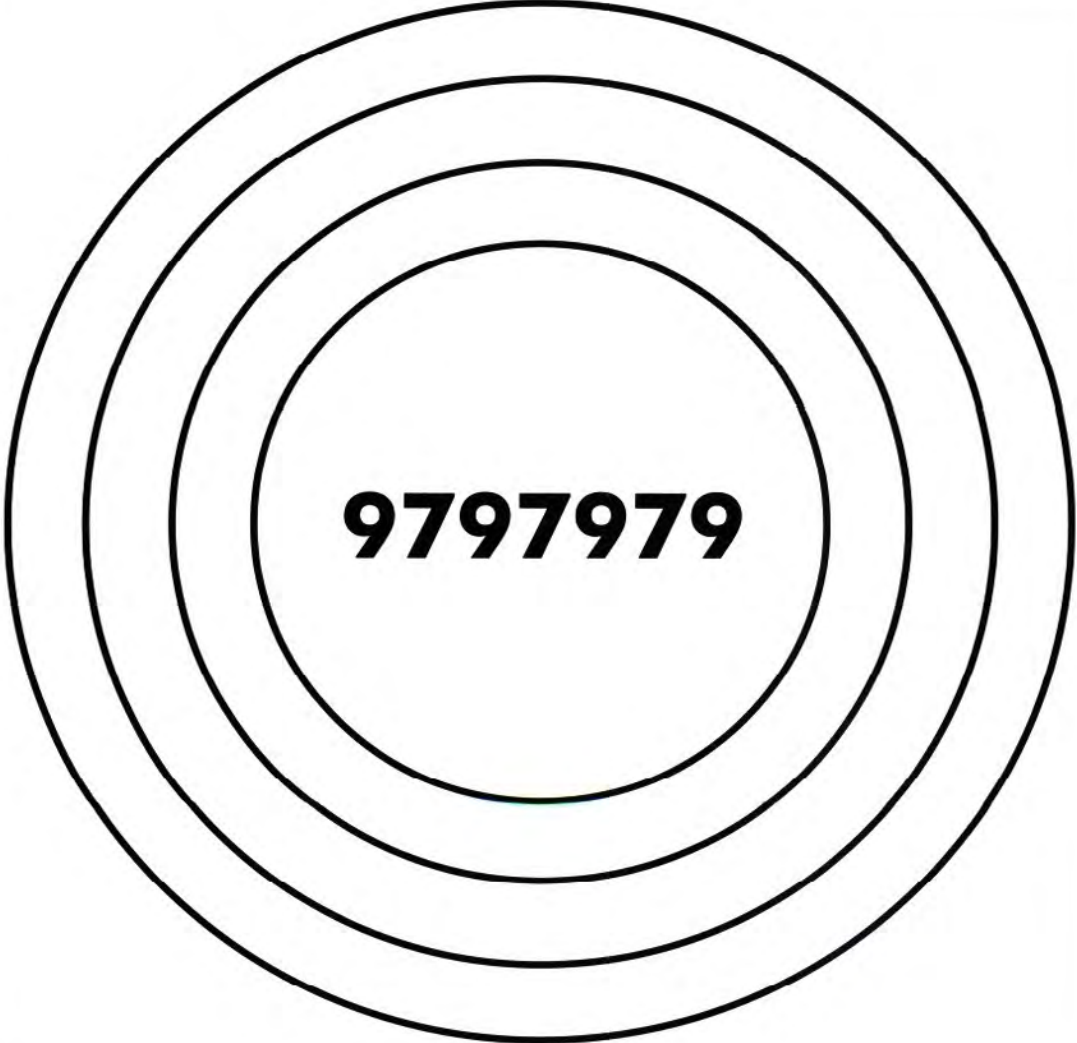

The graph of high vitality also can be used to energize water, which then can serve for feeding or watering

plants, fruits and energizing food in general. A plant pot placed on this graph presents an enhanced growth. Also cut flowers kept in water have increased its duration. We believe that these are just some Among the many possible suggestions for implementing the graph.

Size chart: size

Second version for High Toughness.

The image features four concentric circles centered on the page. The circles are drawn with thin black lines and are evenly spaced. The innermost circle is the smallest, and each subsequent circle increases in diameter by a consistent amount, creating a series of four nested rings.

9797979

Alpha-Omega

This chart was developed by the Belgian brothers Servranx dowsers, and published in *La Radiesthesie Pour Tous*, June 1963. Its purpose is to investigate the numerical sequence and the number of circles to perform according to technical charts radiestésicos H. O. Busby, author of the graphic *High Vitality*. Let's take the latter as an example to demonstrate its performance.

We know that the technique allows to generate sequences of digits which were confined to a certain number of rounds, able to capture and convey certain force (energy) cosmic appropriate to an end specific. By this process we can express a subtle beneficial energy, a energy medicine especially for a particular purpose.

Let's write on a small slip of paper the words to be searched. We call this "visual reference" since it does not have the proper quantum energy of a lexical testimony, but to establish an visual focus of mentoring and consequent easy end in sight.

One. Place the pendulum in the middle of the line Omega-Alpha, on the separation of Sections 15 and 9 and ask the following question: For this technique it is possible to express numerically the cosmic force appropriate for this purpose?

2nd. If the answer is yes, put the "visual reference" on the letter Omega and question how many digits of the number sequence is composed sought with the pendulum on the Omega.

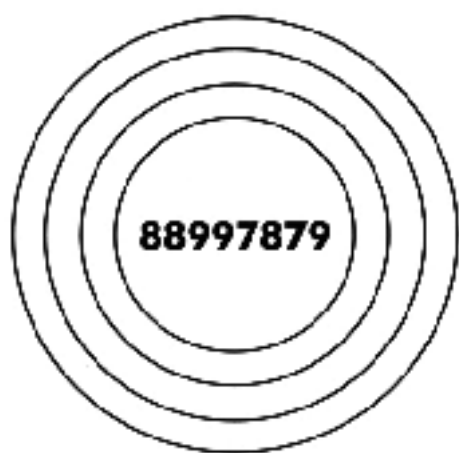

3rd. Putting the "visual reference" on the letter A and the pendulum about the same, while the index finger of his free hand, or a pointer on the first home of the Omega Sector. The pendulum will indicate the first digit of the number sought. Now place your finger in box 2 and successively repeat the process until you reach the pre-defined number of digits.

4th. Obtained the number, write it down on a small slip of paper and place it on the line Omega-Alpha, between Sections 15 and 9. Find out if this is really the number sought, if not repeat the process from the beginning to reach the desired number.

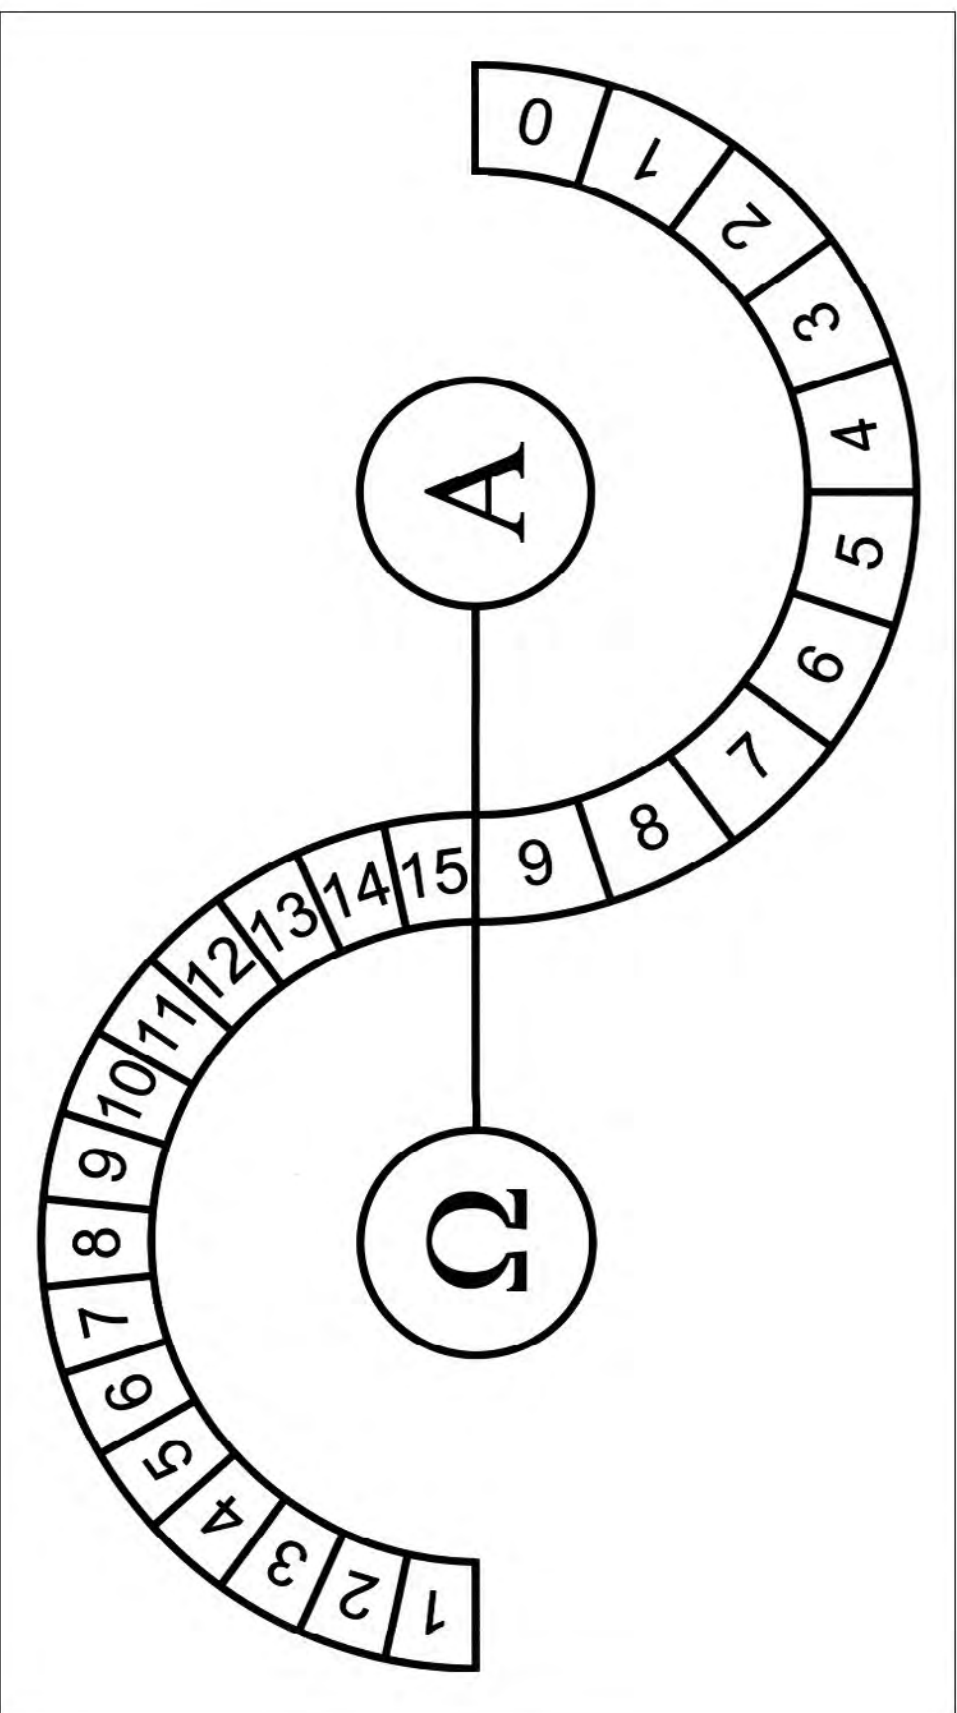

5th. Confirmed number, put it on the Omega and discover how the pendulum circles compose the final graph.

6th. Trace the circles and write the number in its center. The dimensions are not critical, however the minimum diameter of the outer circle should be 12 inches, and figures in written letter thick. We know that in dowsing, graphics smaller than this size have no contribution energy sufficient to produce satisfactory results.

Keiti
SCAP

Keiti

The first reference on the use of Keiti for rebalancing environmental appeared in 1936, the first book-Chaumery Bélizal, Vibration Testing Dowsing. According to research conducted by André de Bélizal, the statues of Easter Island would function as ward off intruders or invaders from the island, as they project a strong emission of Green Negative spectrum wave form. This issue produces a deep malaise, and ends up weakening their targets alive. To be able to move the island without being affected by these emissions, the Easter Islanders created some boards protective.

There are two types of boards, called Keiti, a large dimensions, exposed in front of the shelter, and other low volume. A specimen of the latter was offered to Mr. Janssen, Vicar Apostolic of Tahiti. This board was gifted to him by the natives surrounded by numerous female hair. This allowed to assume that the Easter Islanders Keiti put the wig on, to leave free body movements, preserving the individual however. They could thus face the danger zones with impunity, both on sea and on land, without experiencing harmful effects.

A copy of these boards stuck in the roof of an apartment makes waves away harmful soil. The original boards with characters written so unchanging retain their properties indefinitely.

The writing rongorongo consisted of 120 pictograms, which could be combined in more than 1000 ways. Each image represents a word. The material seems to be all ritualistic. They worked character lines on wooden boards. The lines were boustrophedon ("How ox plows"), ie the words from one line were written from left to right and following the line in opposition to previous upside down.

The plates act as a very efficient Keiti neutralizing harmful energies. It is now known that the appliance appliances such

as TV, clock radio, etc.. emit certain types of harmful waves. These waves can be neutralized by putting a plate under Keiti appliances.

Points of confluence of lines of force from underground, called points of "geopathic stress" often constitute strong emitters of harmful energies that disrupt the energy state of living beings, and therefore become disease-causing. These telluric waves, broadcasters

Green Negative spectrum of wave form, can be eliminated by using a plate Keiti placed on the point, or affixed to the ceiling of the room.

In some cases we can see positive results with the use of graphic Keiti the rebalancing of living through testimony.

The Keiti not saturated and does not require spatial orientation, and thus can be placed on the walls, the ceiling, or on mobile devices in generating emissions. Depending on the volume of the room, it is necessary to apply a higher number of graphics.

Dimension chart: 11 x 23.5 cm or 20 x 45 cm.

[illegible]

SCAP^(Symbol compensator Philippe André) Graph introduced in Brazil in 1989 by Dr. Neuci

Gonçalves da Cunha, obtained by private correspondence maintained with André Philippe, electronic engineer and dowser, a former collaborator of Jean La Foye.

In our opinion this is probably more a result of the search of La Foye, about which André Philippe worked for a long time, but nevertheless made the mistake of turning the original Hebrew characters, Jehovah's own words (IAVE) in their corresponding Latinos, and that's the thing "catch", since, as we know, the Latin characters do not emit the value of the written word. Thus became mere graphics incapable of providing the phenomenon of imposition energy characteristic of Hebrew Tetragrammaton. Also do not like the word "symbol", very little of the technical language dowsing, "graph" would be more appropriate. In a second version, André Philippe added some graphics that improved the original version, however, to insert in the center of the Latin Sh Shin Hebrew, the issue of life itself, once again demonstrates not yet learned the lesson from the master of La Foye. Let's try to fix the thing ...

a) we return to our roots, replacing the Hebrew letters in place their own systems.

b) replace the Sh unable to deliver what point does not have the bulk of transformer protective circle emitter solar circle, much better suited to a graph whose purpose is to design, deliver their intrinsic qualities.

Duality and Trinity are combined in this graph to generate a perfect harmony of subtle forces. Is based on the "law of compensation forces", from which we can neutralize harmful energies of any kind.

a) Its use does not require any spatial orientation, and may also be used vertically.

b) Its power compensation and its range are directly proportional to their size and weight of the material with what is done.

c) Its emissions occur simultaneously on the physical, vital and spiritual.

d) All of the energy spectrum of the form (spectrum Chaumery-Bélizal) is issued at once magnetic and electric phases.

e) Your use automatically adjusts (s) number (s) (s) Power (s) so (being magnetic or electric) needed (s) to the perfect balance of an environment, equipment, food, beverage, plant, animal or person.

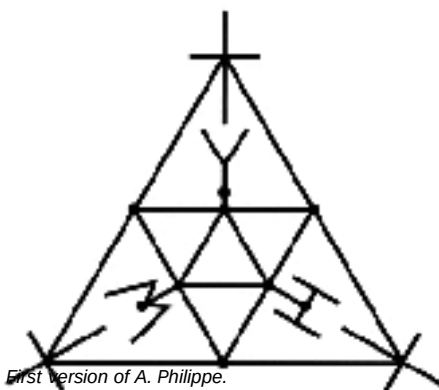

f) When the focus is very potent harmful, it may be necessary Using two or more symbols compensators in the environment.

Note: It is appropriate that a dowser connoisseur Geobiology make a specialized study of the affected area.

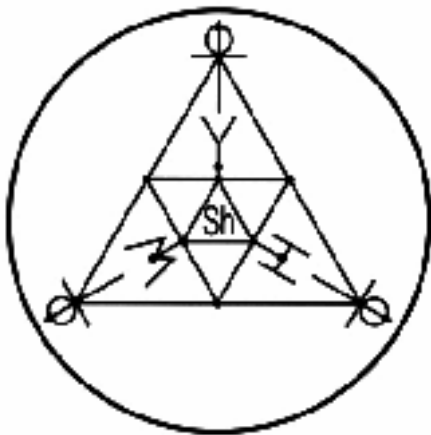

g) No need desimpregná because it is impossible to saturation.

The final version shown at right is the result of changes imposed by Antônio Rodrigues.

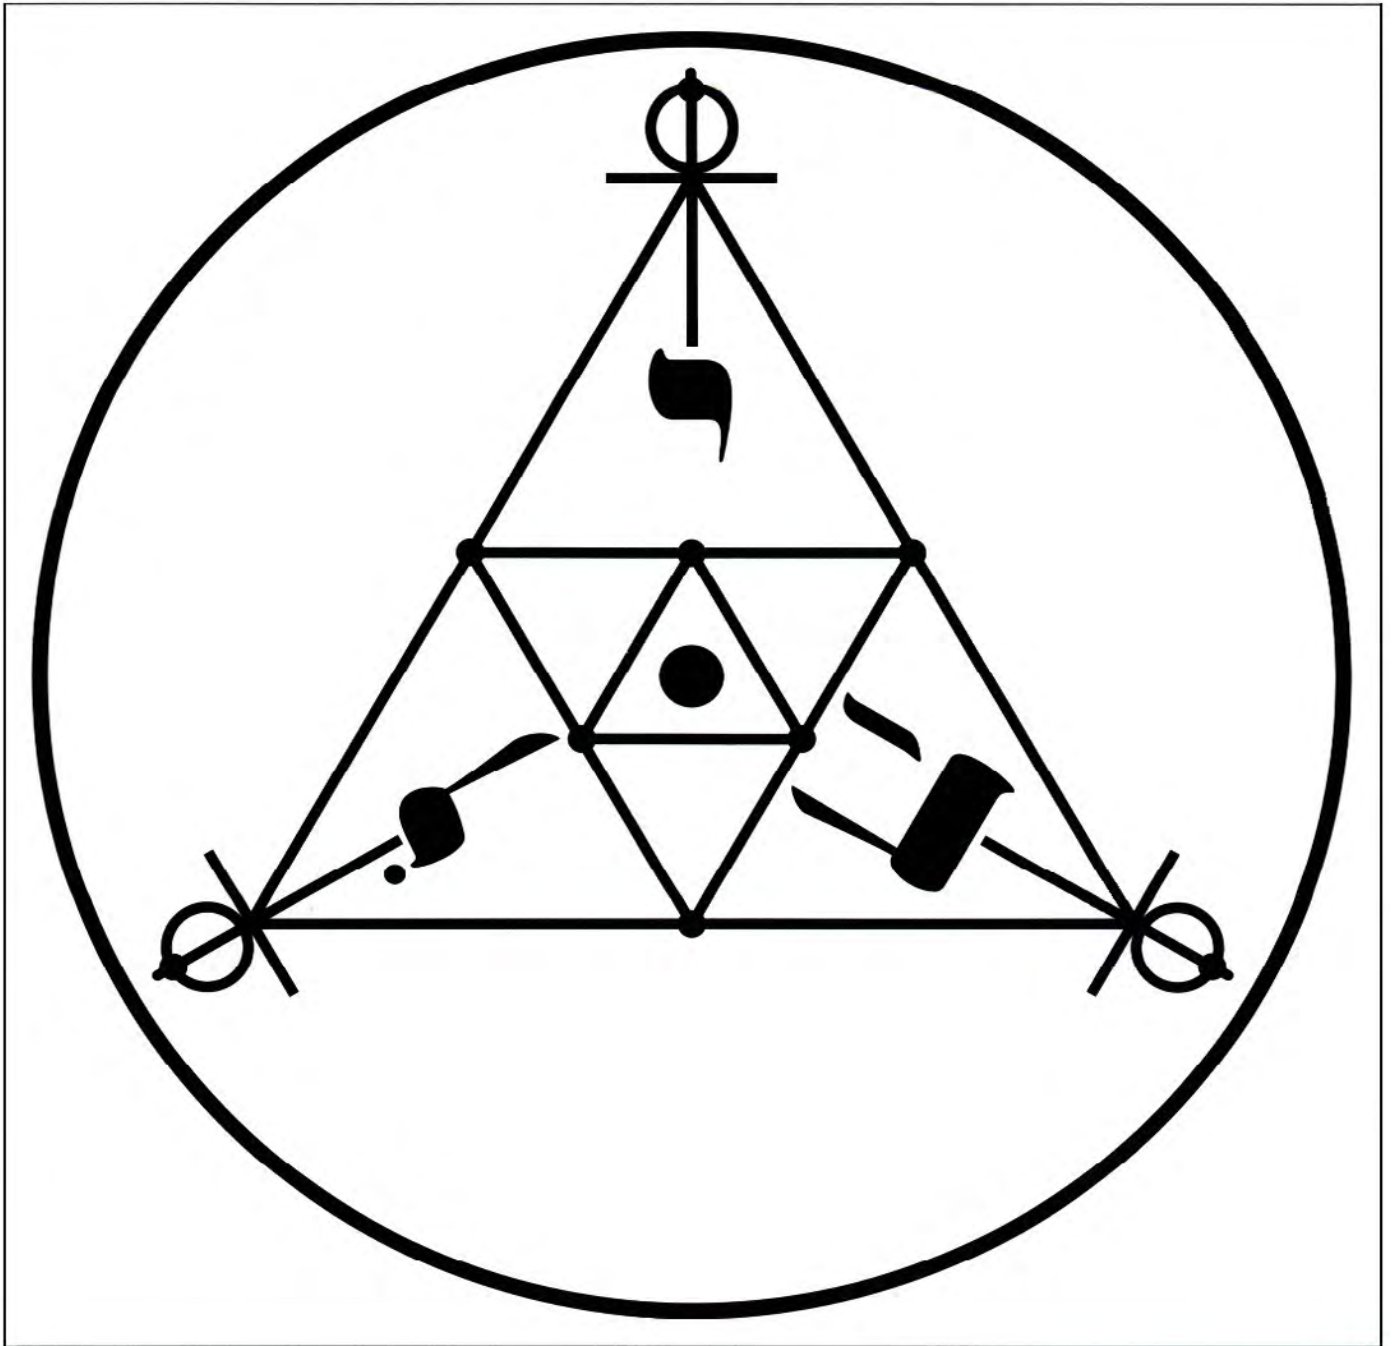

Graph Dimension: 21 x 21 cm

First version of A. Philippe.

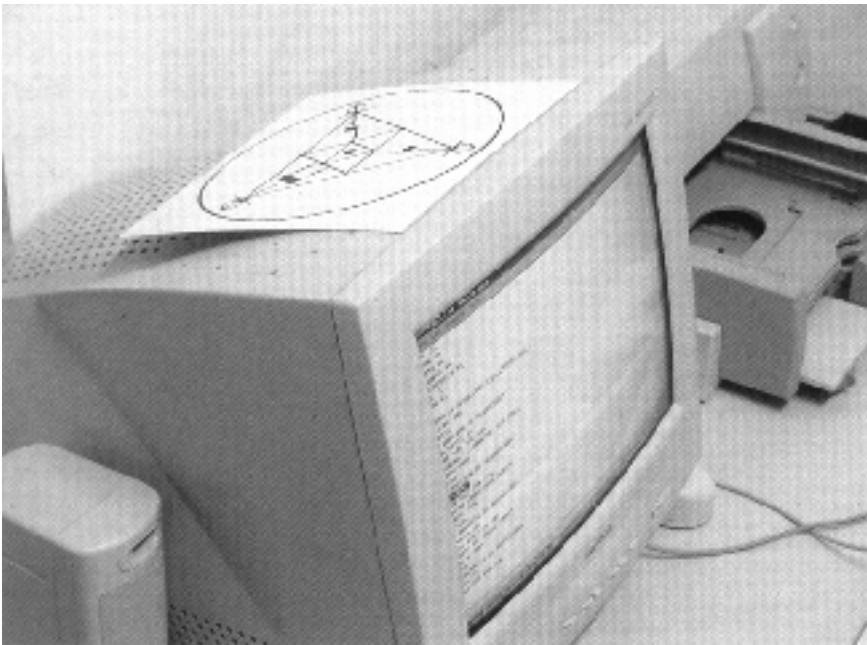

Second version of A. Philippe.

SCAPUSES AND POSSIBILITIES

- a) Placed on a point geopatogênico (crossing loop Hartmann called geomagnetic network), or any other focus of harmful energies, it cancels its harmfulness.
 - b) Placed under / over television, eliminates all harmful energy that it emits, such as alpha rays, beta and gamma, X-ray, Green Negative Red electric and electric.
 - c) Put on a light clock, eliminates the negative electric Green and Red conveyed by electric current.
 - d) Put under electrical appliances, electronic or radionics, eliminates any harmful energy, physical or subtle, they can issue.
 - e) Placed under the bed provides a restful and restorative.
 - f) Putting up a testimony in its center (hair or picture) of a victim of black magic, it nullifies all magical process.
- Note: Controls should be made with special pendulums used in Dowsing Kabbalah.
- g) placed on its center, food (solid or liquid) become healthier from the balance of your entire energy spectrum subtle and vital.
- Note: It is best practice to use such foods that have undergone cooling, because their vitality is reduced to about 50% by Green Negative electric existing in the refrigerator. After equilibration, it can be enhance the vitality of the food using the graph created by the dowser High Vitality Australian H. O. Busby.
- h) It is used therapeutically as an adjunct in the treatment of any disease, since all healing (plant, animal or person) can be achieved through the balance of the energy spectrum of organism subtle patient.

Tri-circle

The Tri-circle created by Jean de La Foye is a graph whose emission feature is the ability to deliver energy to own physical things, so can be used as brokers:

Stones Drawings
energized crystals
varied assets

Various symbols, hexagrams of the I Ching, zodiac signs,
geometric figures, etc..

Homeopathic remedies, floral, herbal

Colors

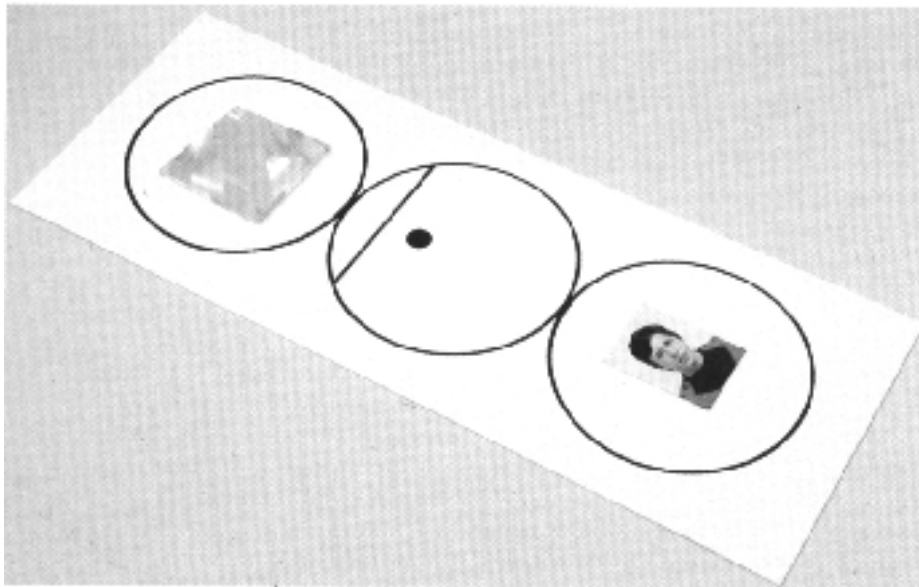

Testimonies combined

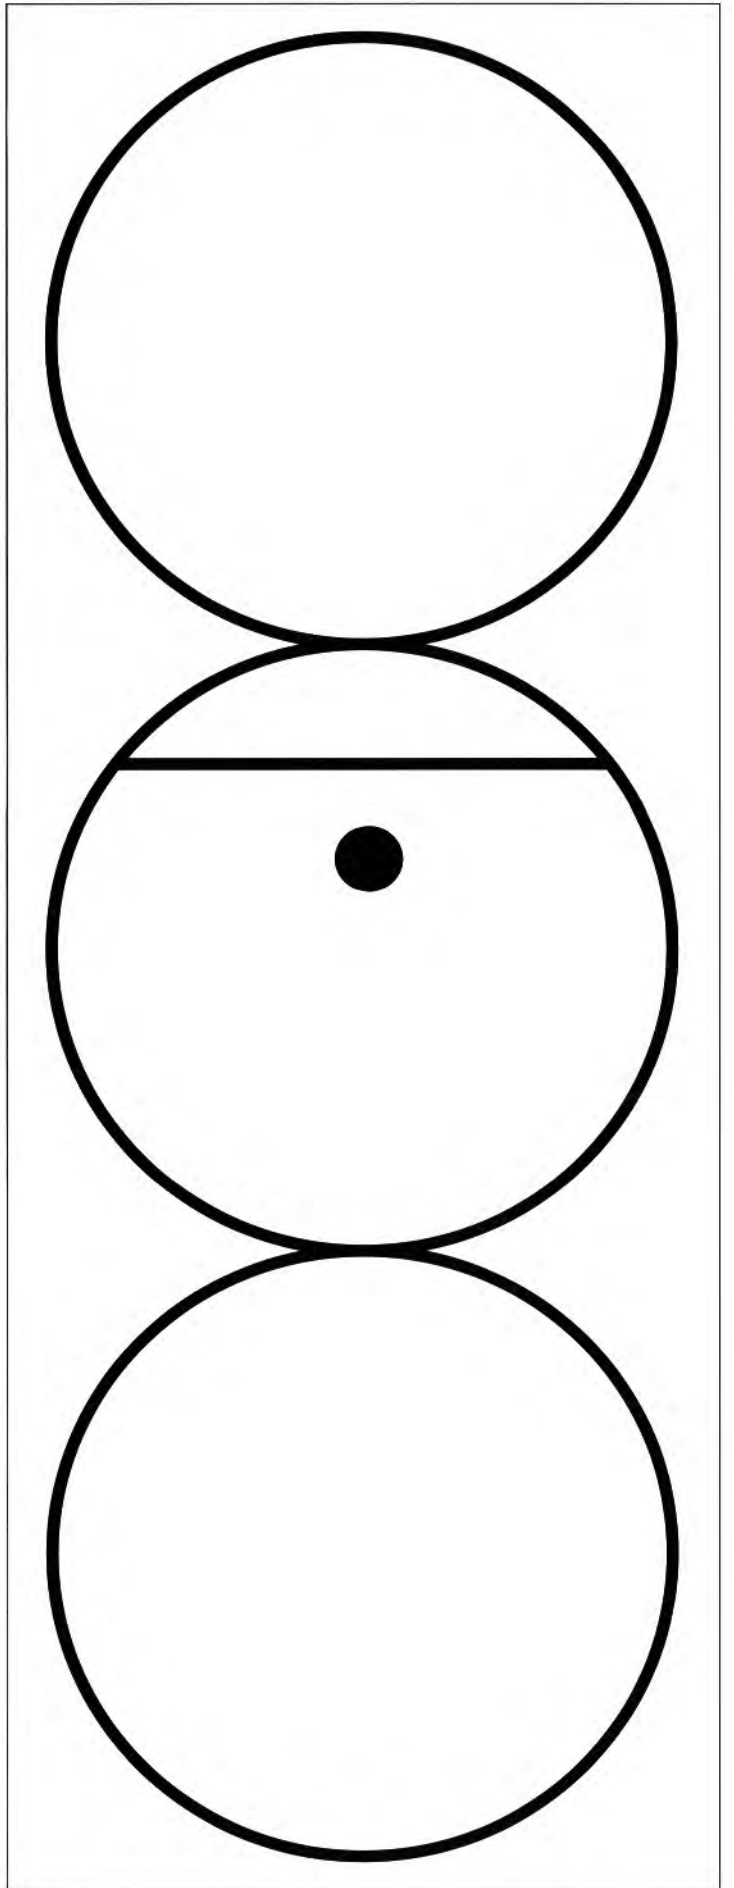

The use compulsorily aligned to the north, simply put

Circle in the north and the broker in southern circle testimony to radiate.

As always both the preliminary analysis as exposure times are controlled radiestesicamente.

Graph Dimension: 12 x 31 cm

SCAP (Symbol compensator Philippe André)

(Version finalized by António Rodrigues)

Graph introduced in Brazil in 1989 by Dr. Neuci Gonçalves da Cunha, obtained by private correspondence maintained with André Philippe, electronic engineer and dowser, a former collaborator of Jean de La Foye.

See more details about this chart in the "Graphics to rebalance environmental deleterious energies and Compensation."

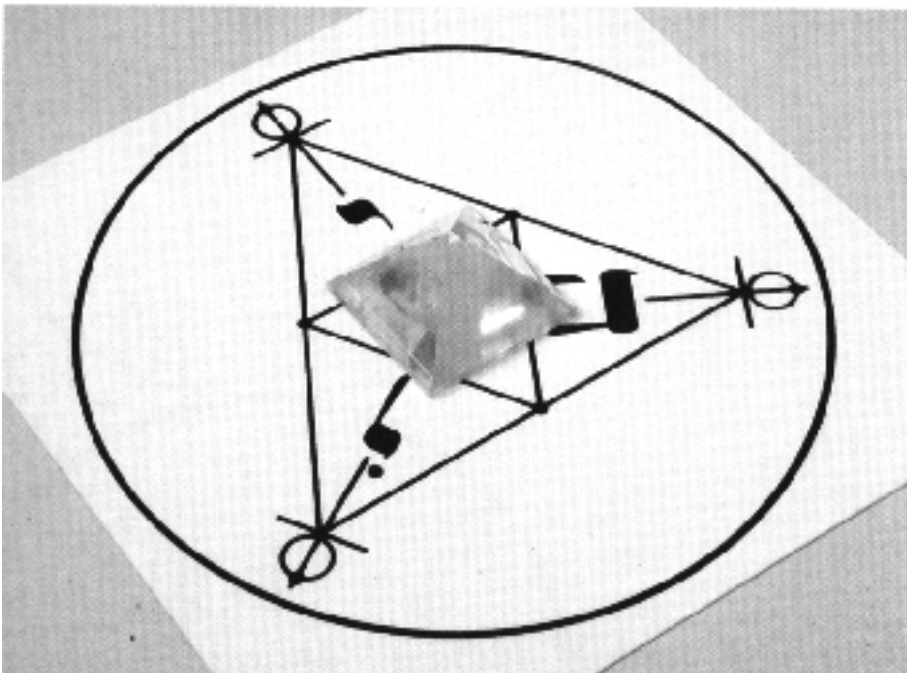

All charts based on sacred expressions do not require spatial orientation, yet, if possible, orient it with Yod north.

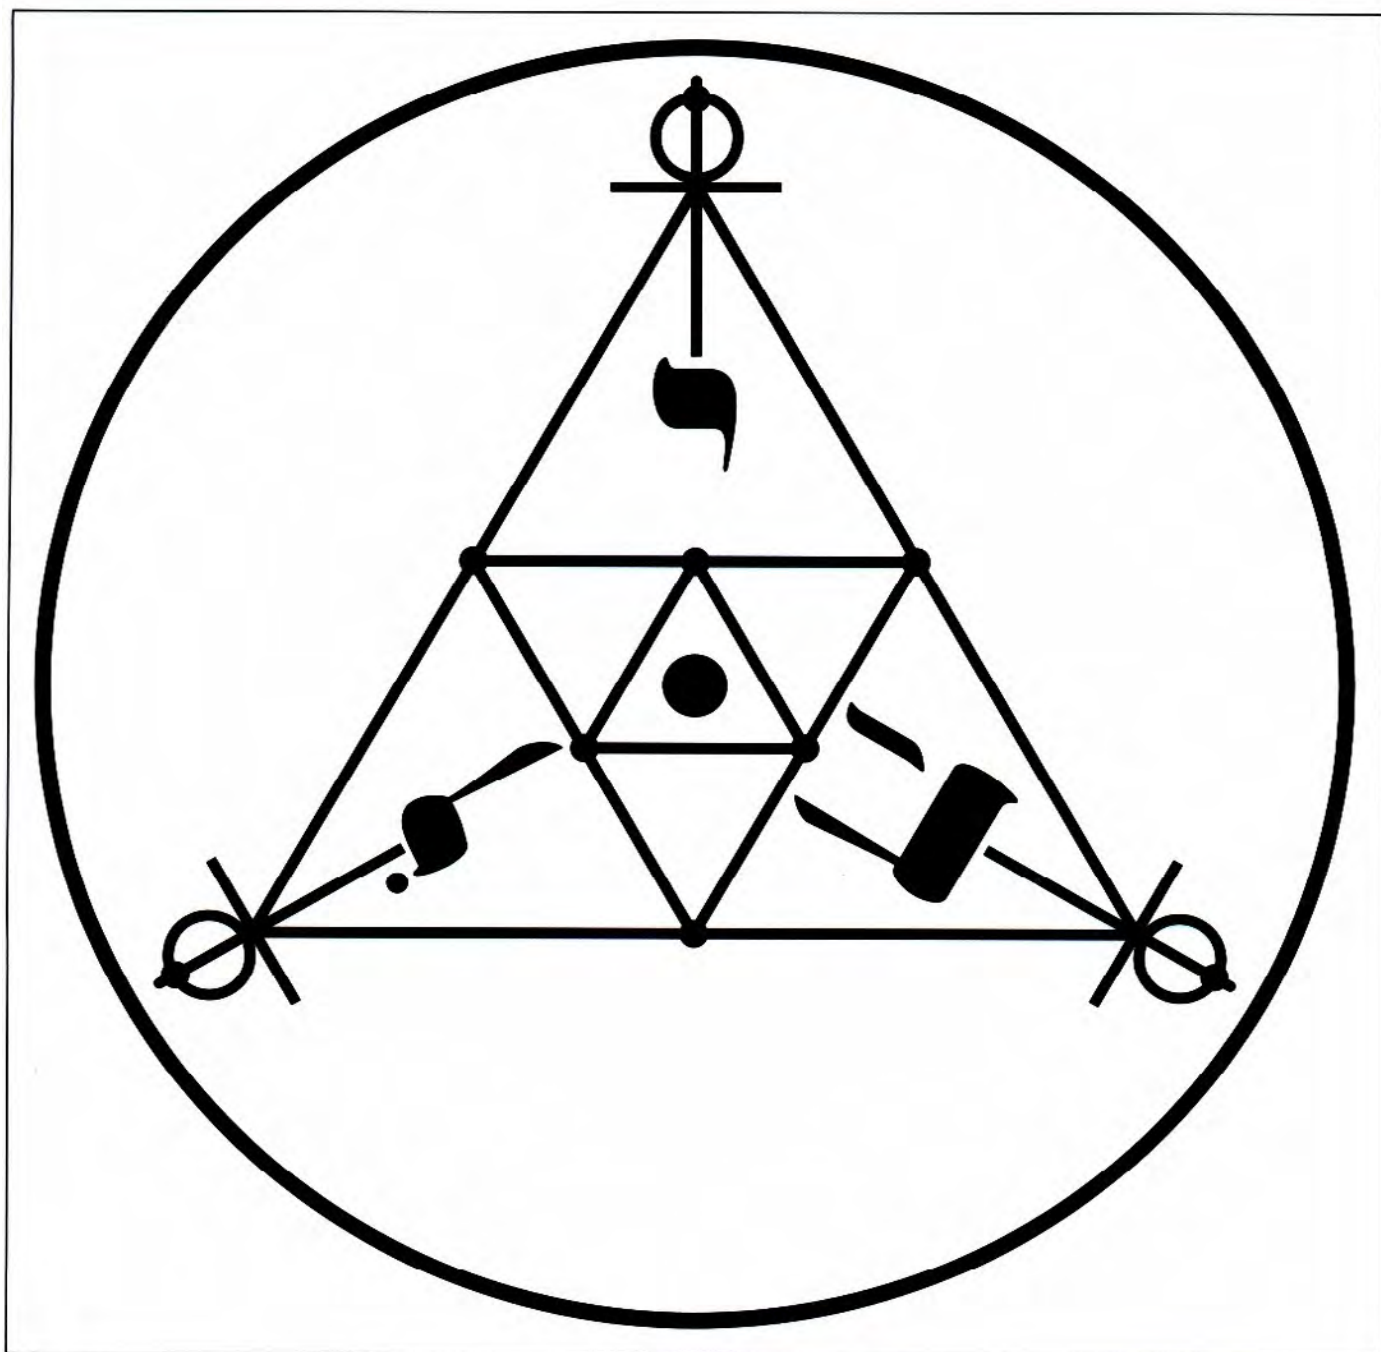

Besides the action of its own emission geometry, the SCAP projects the beneficial effects of the energy equation: health, welfare, protection and entities in any sphere volts.

As in the other charts, all controls will be made by dowsing, broker and united witness on the central point, any kind of testimony and any broker.

As previously stated, the graphics are an application of dowsing Dowsing called Wave Form, and anyone working with this area should have a whole series of graphs for the same purpose, and your choice depends on case to case without there is a plausible explanation for the fact, probably compatibility energy.

Graph Dimension: 21 x 21 cm

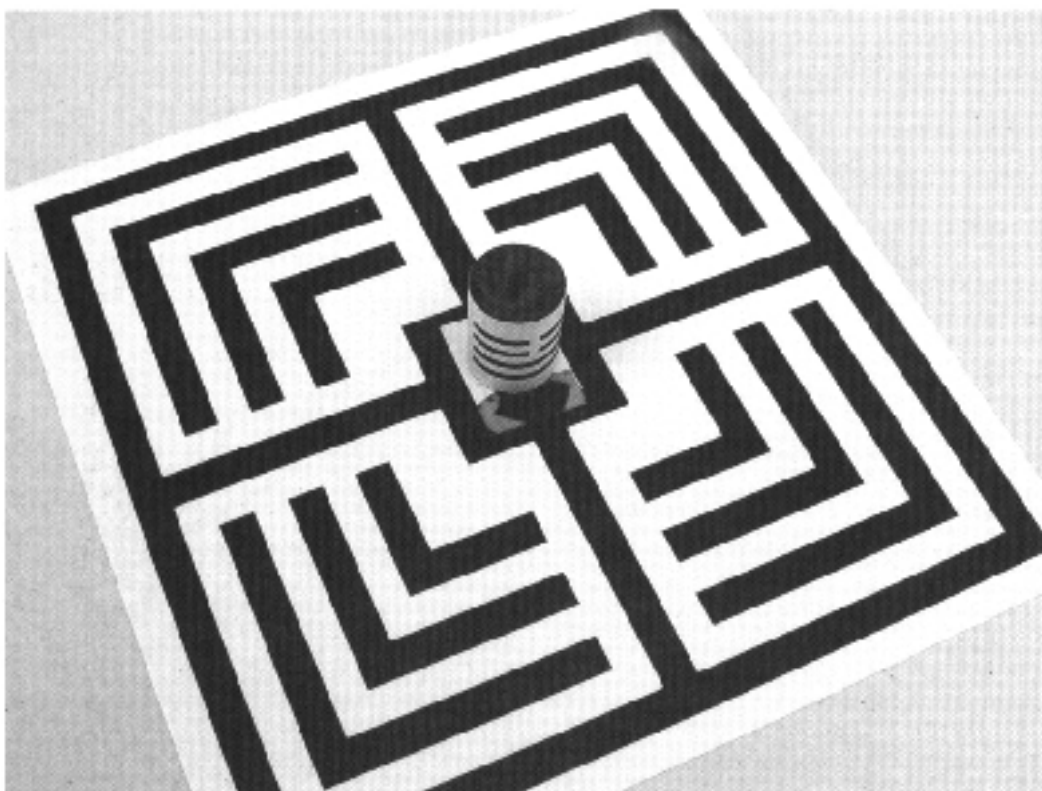

Bureau d'Amiens

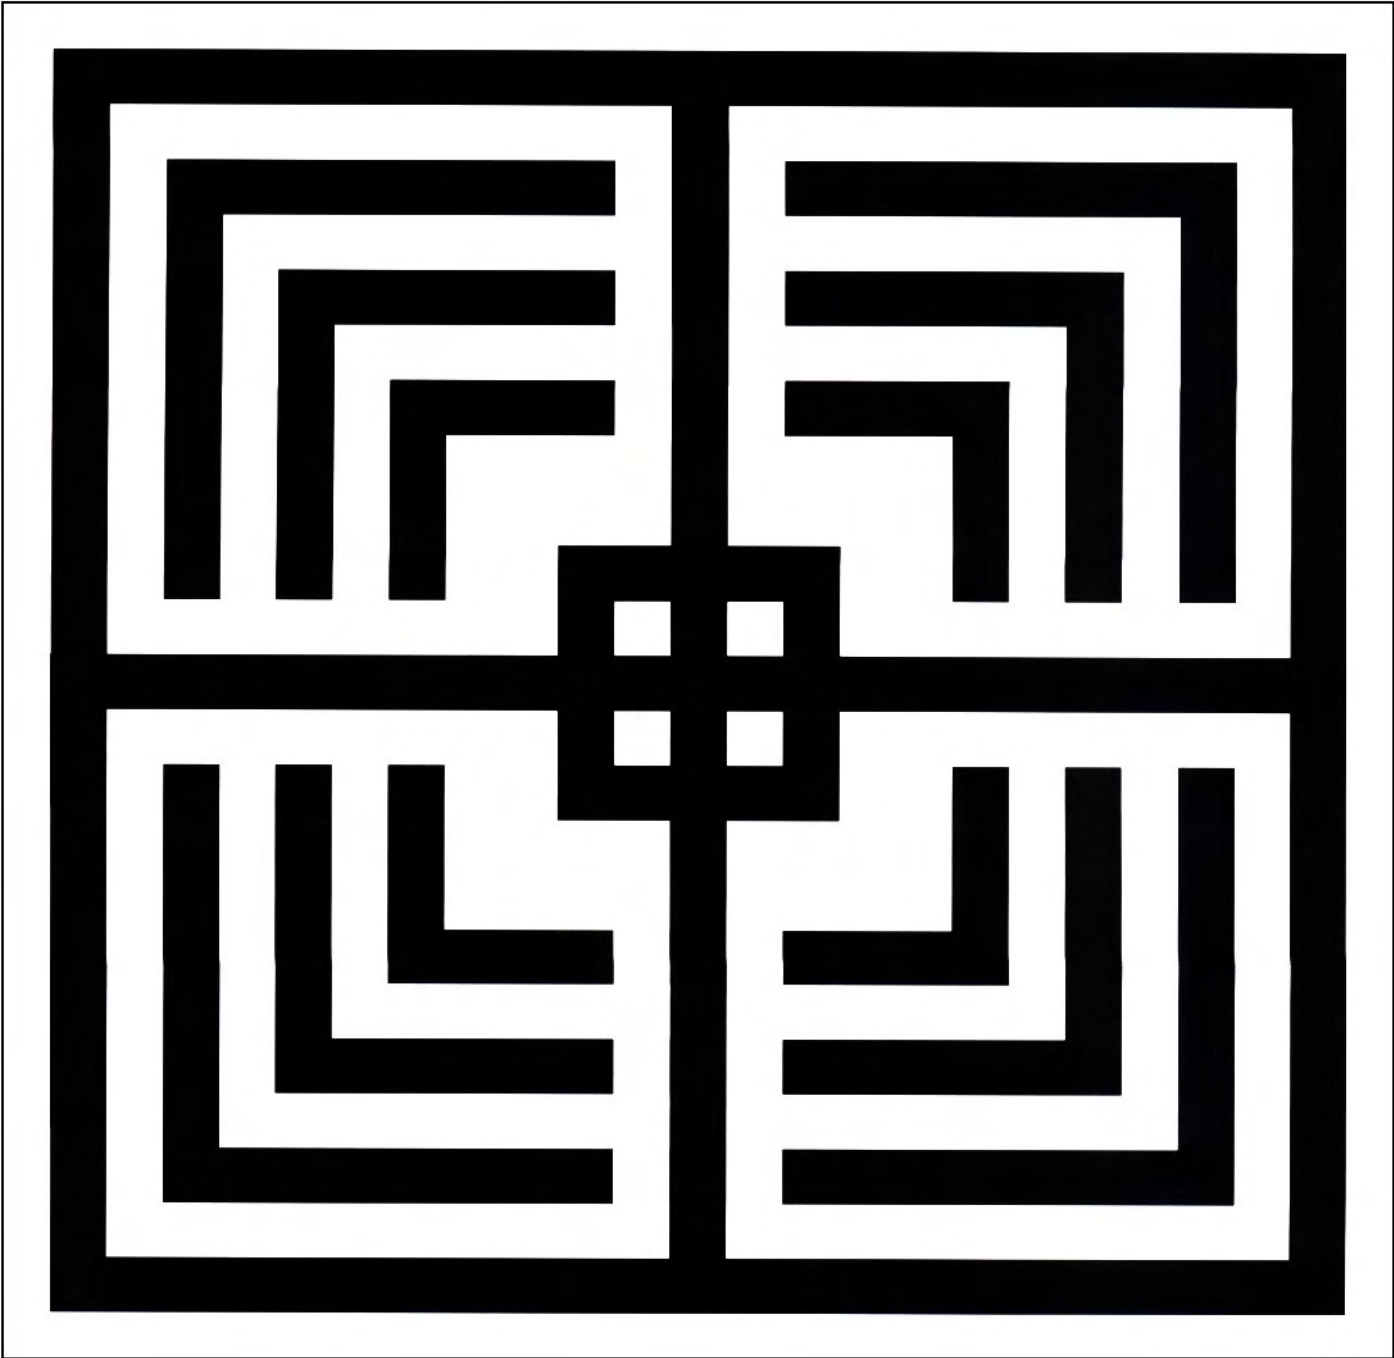

The Bureau d'Amiens is a square wave emitter shape, and as such, can be used to make the distance emission, or where appropriate emission long and smooth. Its dimension above the rest graphics gives it a high degree of stability in relation to environmental inharmonious energies. If you need a little extra power, placing it for example on an accumulator pyramidal

- Placed under a pyramid, can be used as accumulator in the same way that the decagon (pyramid oriented north).
- Used as support for emissions distance, follow the following schedule of work: the graphic east to North or North Shape Magic (355 °), place in the center's testimony, (person, animal, plant, property, etc..) testimony about the place the main agent of influence (medicine, symbol, stone, etc..) Pendule periodically to assess the quality of the issue, remaining time of issue, etc..

Graph published in a book by Jean Paul Honecker and recovered by António Rodrigues.

Graph Dimension: 25 x 25 cm

Whirl

Dowsing chart that helps the person who uses the materials achieve goals. Created especially to get material goods, financial improvement, employment, etc.. Depending on the form of their bows, this chart serves as a "precipitator of material goods." It should be borne in mind that all the work of obtaining material goods should be followed very criteria and research, because there is a whole process that must be understood and respected.

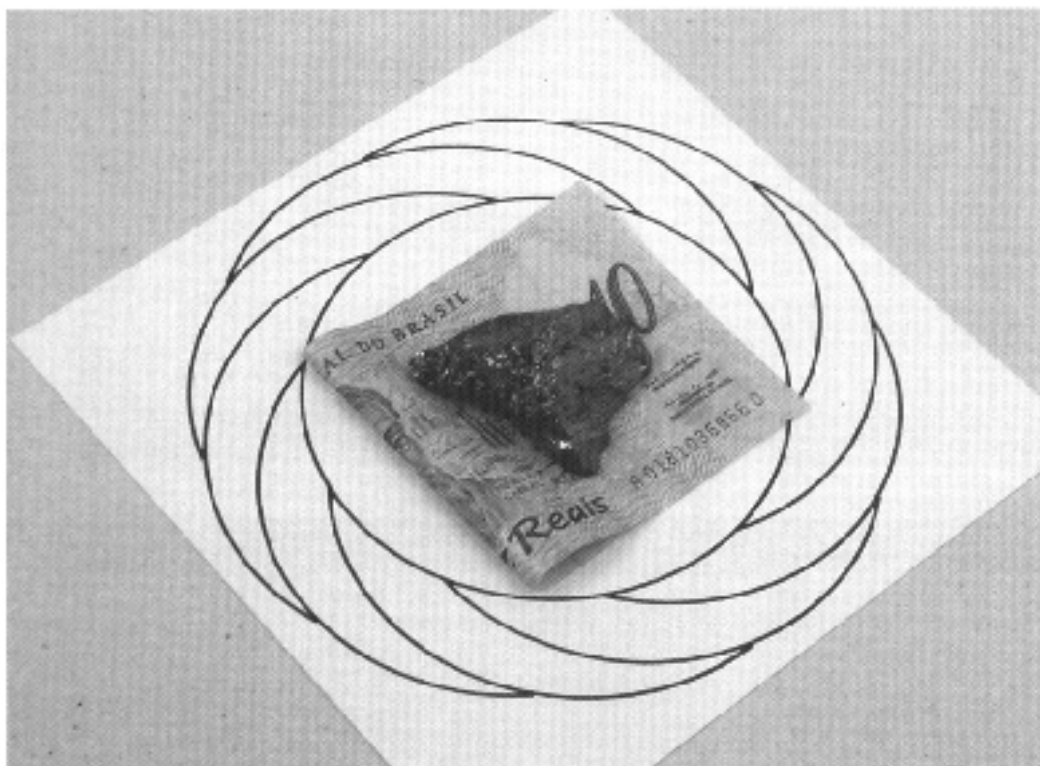

You can also use the Vortex for the benefit of another person, making use of a witness (photo or hair), and the objective to be achieved, both placed in the middle of the graph.

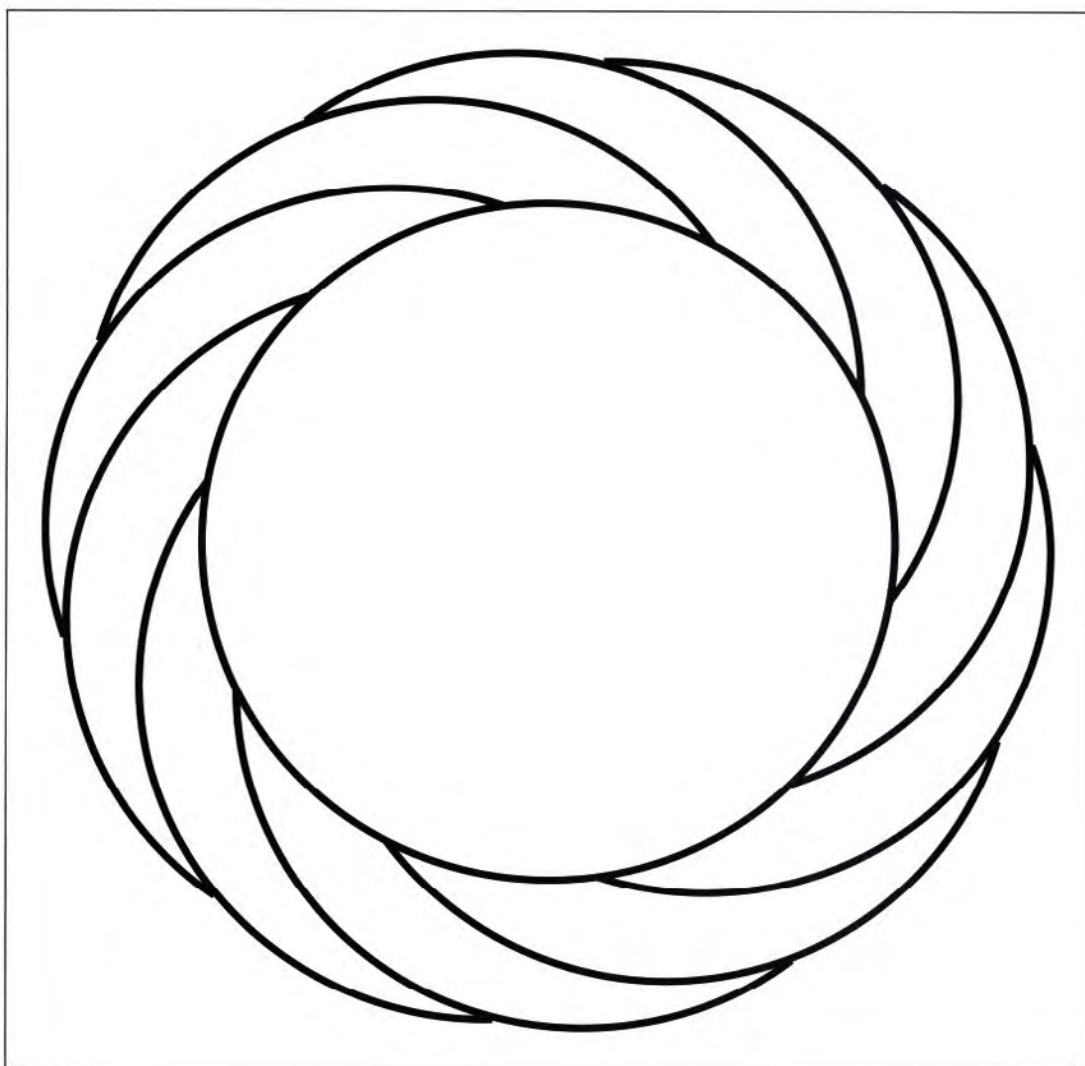

EXDOCIN published in December 1965 under the name Vortex-Ring, the Servranx stretch on the effects of whirling energy in its various manifestations, the Whirling Dervishes ascension to spirals of smoke.

Do you have an old house in alarm clock those noisy engine? Place it flat on the table, the graph on it Tourbillon, upon testimony and broker. The "shock wave" of the clock mechanism amplify the emission of the graph.

A recipe for making money? Keep a new note for a while in your pocket or say, close to your body to impregnate with its energy. Arrange your testimony (a photo) in the center of the graph, above note about these two things and a mineral (casseterita) or a metal related to the acquisition of material goods (Jupiter) (a rod tin, for example). Go to fight and good luck ...

Size chart: size

Peggotty Board

Peggotty Board

There once was a man who liked to radionics and, to his surprise, had no sensitivity to achieve some response in plaque friction (a kind of radionic pendulum). You know what did he do? Do not give up and invented a number of devices based on different principles. Your name: Darrel Butcher, English aeronautical engineer profession

The Board Peggotty is a device action at a distance especially attuned to problems with bones, muscles and cartilage. Remember a small chessboard upon which are placed in specific houses, cravilhas (peg), according to standard tables radionic Delawarr.

This is purely an instrument of treatment. Should be used where, after established diagnosis, therapy of choice energy, distance, fall on this device.

Place cravilhas in homes following the following explanation of illustrations and a dim light (25 or 40 W) at 450 or diagonal of the plate.

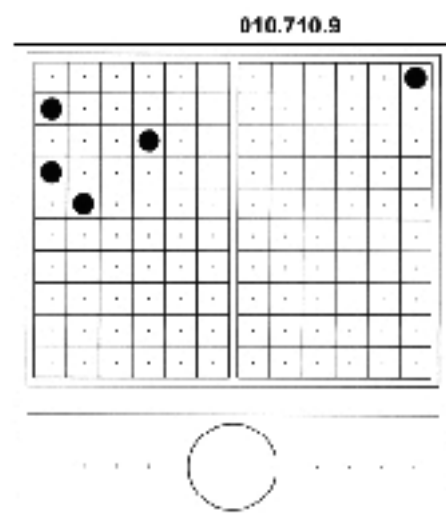

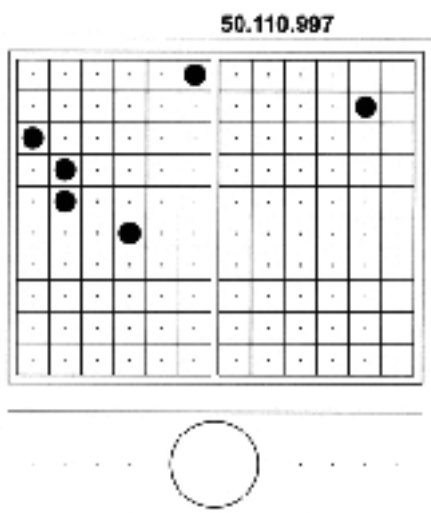

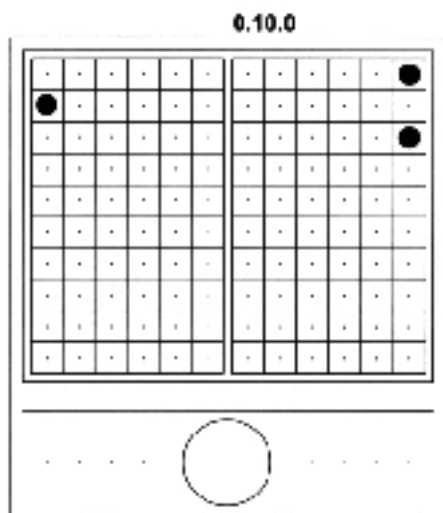

The first row of houses from right to left has the following values 0. 10. 20. 30. 40. 50. double lines core 50. 60. 70. 80. 90. 100. (Note that the 50 appears twice).

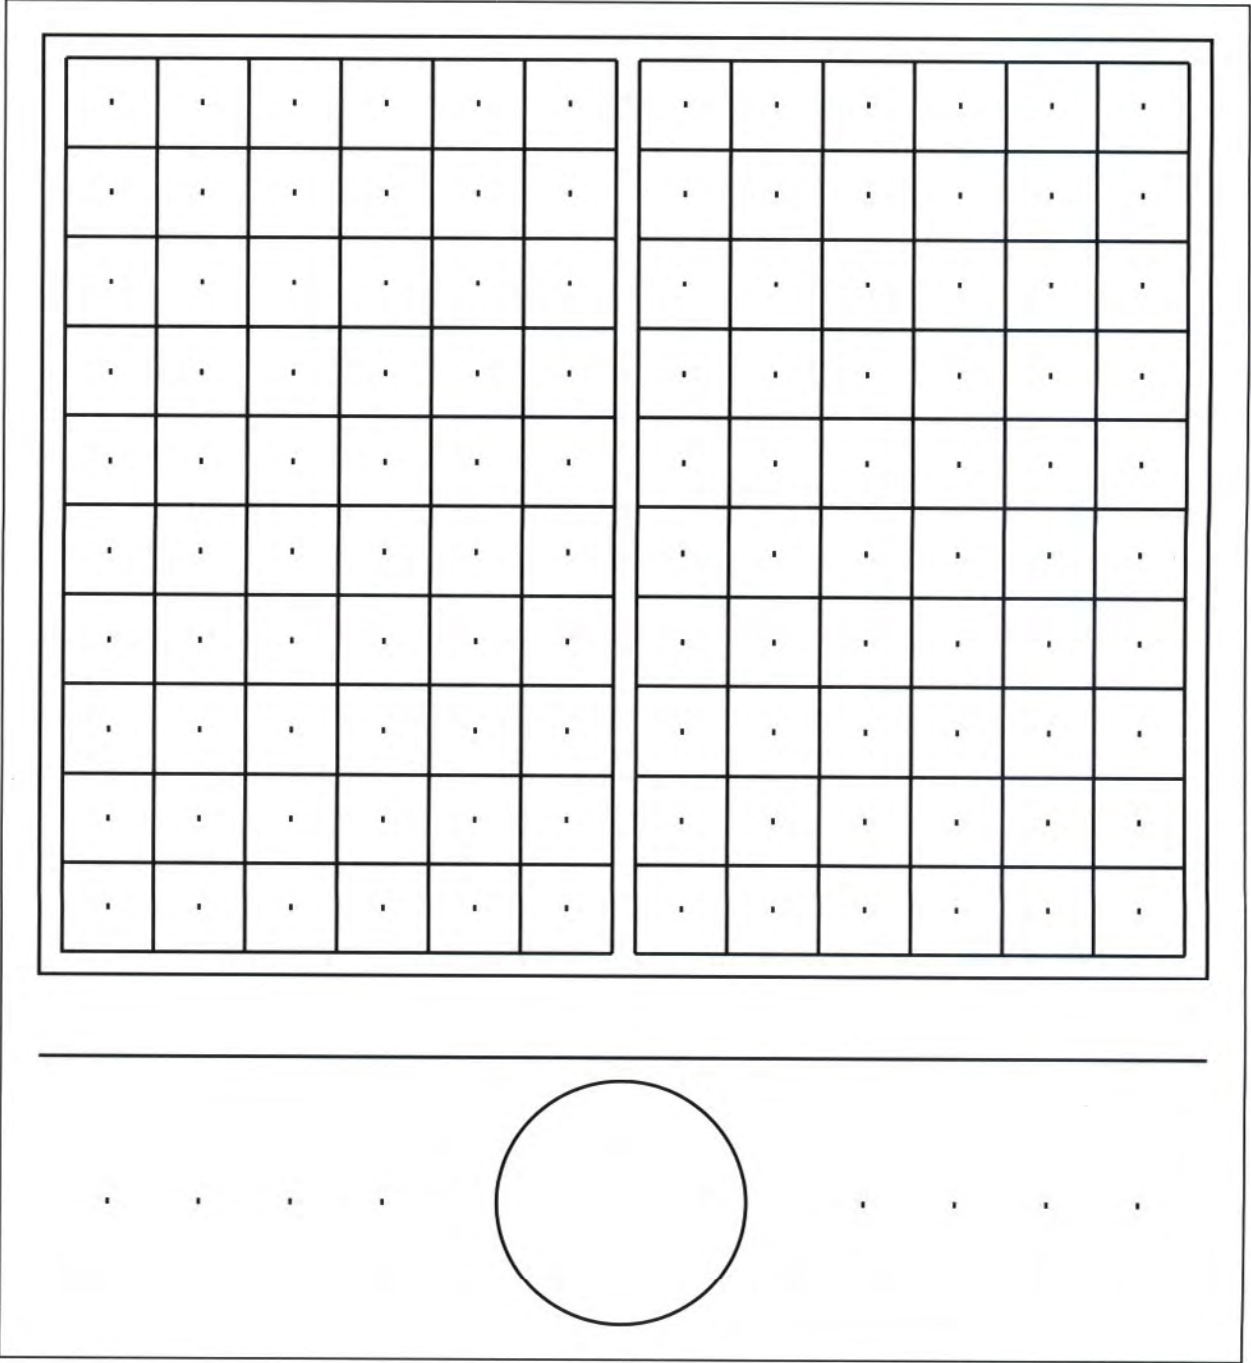

The second row of houses from right to left has the following values 0. One. 2nd. 3rd. 4th. 5th. double lines core 5. 6th. 7th. Eight. 9th. 10. (Note that 5 appears twice). (Thus the end plate.)

When 50 or 5 occur in an index, cravilha put in the house on the left of the double line.

0 Hair testimony of the patient will be placed in the area bounded by the circle.

Telerradiador Created and published by Vasariah in text form in *Treaty Full of High Magic* which raised copies of all forms dimensions and by those to whom much can be 10 cm 7 cm and 9 cm, finally ...

It is certainly an example of a device that works! E consists of:

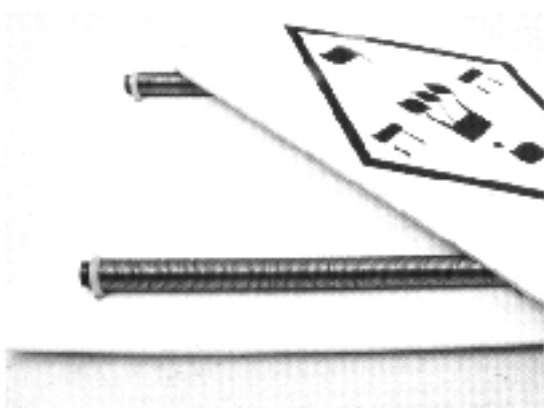

- A small plank of wood or plastic.
- Two thin iron bars.

Each bar is fitted with solenoids metal left and right, placed on the board with 10cm space and oriented north-south.

For purposes radiestésicos, witness (pictured) and the broker will be posted on the Mystical Symbol which, in turn, will be placed on the two metal bars, photo head north. All recommendations regarding time, etc.. must be observed.

If you want to mount a Telerradiador follow the dimensions of the drawing.

Size chart: size

Solenoids with iron bars

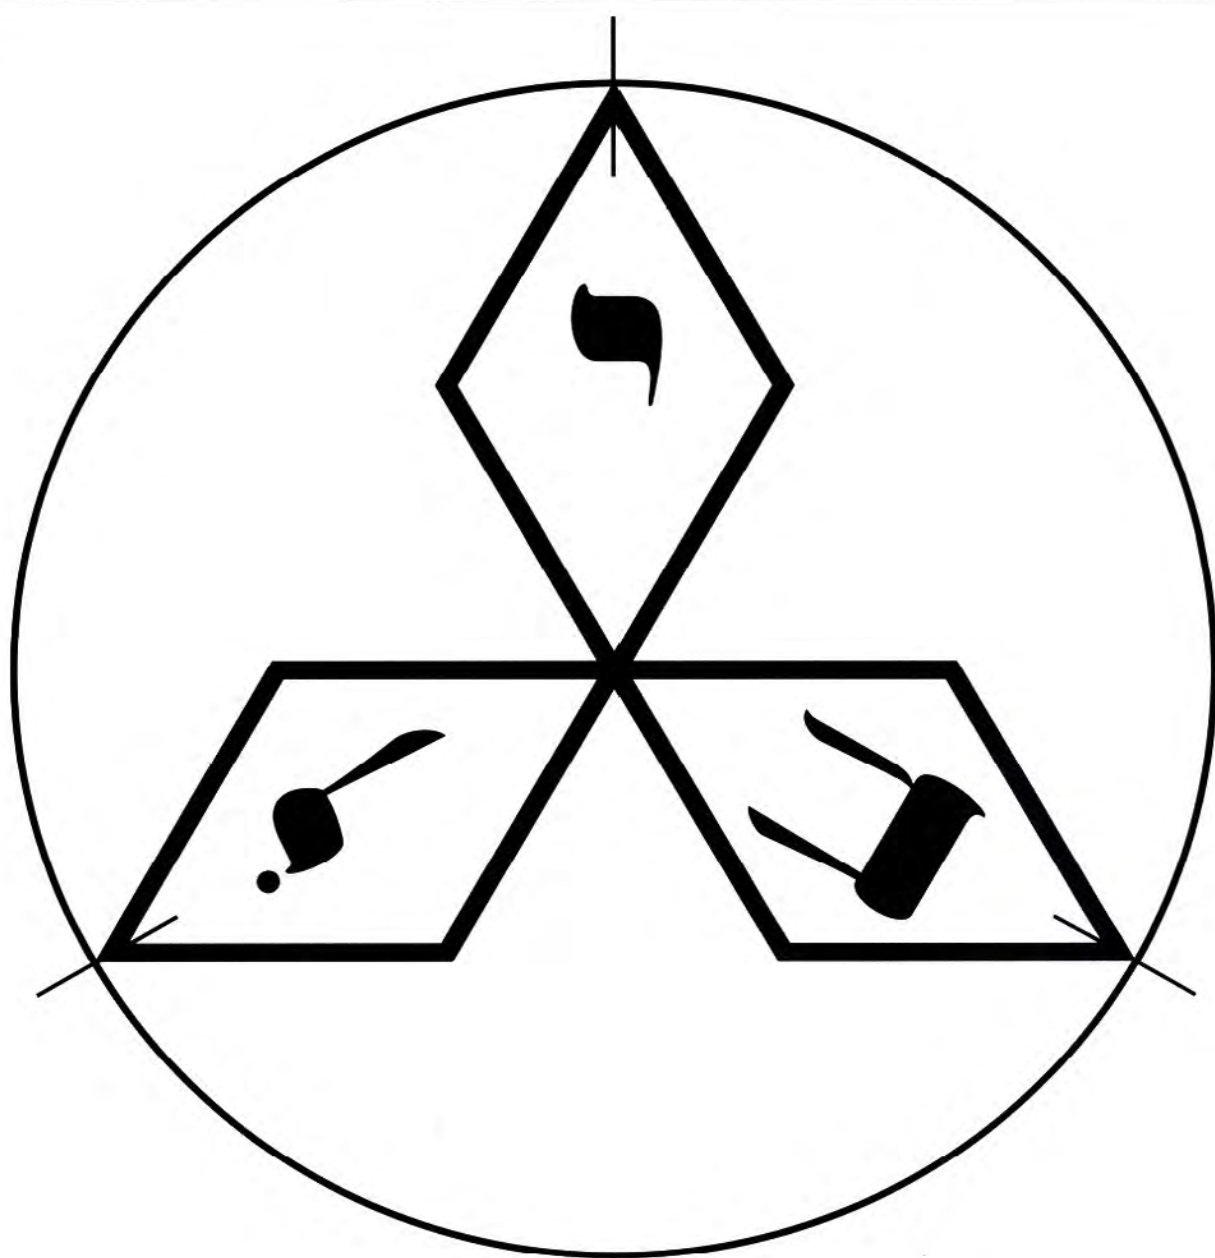

Compensator Mindtron

The use of the words spelled in Hebrew sacred prints this graphic qualities that allow you to promote balance environmental problems from land, not requiring spatial orientation. As for environmental protection against harmful energies of psychic origin is overriding its orientation with Yod north and maintenance of horizontality. In this case, the energy lies in the potential state. For purposes of testing, just put a small object (a pencil) on the graphic and immediately these energies manifest in dynamic state, are detectable Shin, Node Life and the Lives.

Besides useful, dowsing is a treat for those who enjoy unraveling the hidden. These undoubtedly find other possible applications This graph. Author: Anthony Rodrigues.

Size of chart: 19.5 x 19.5 cm

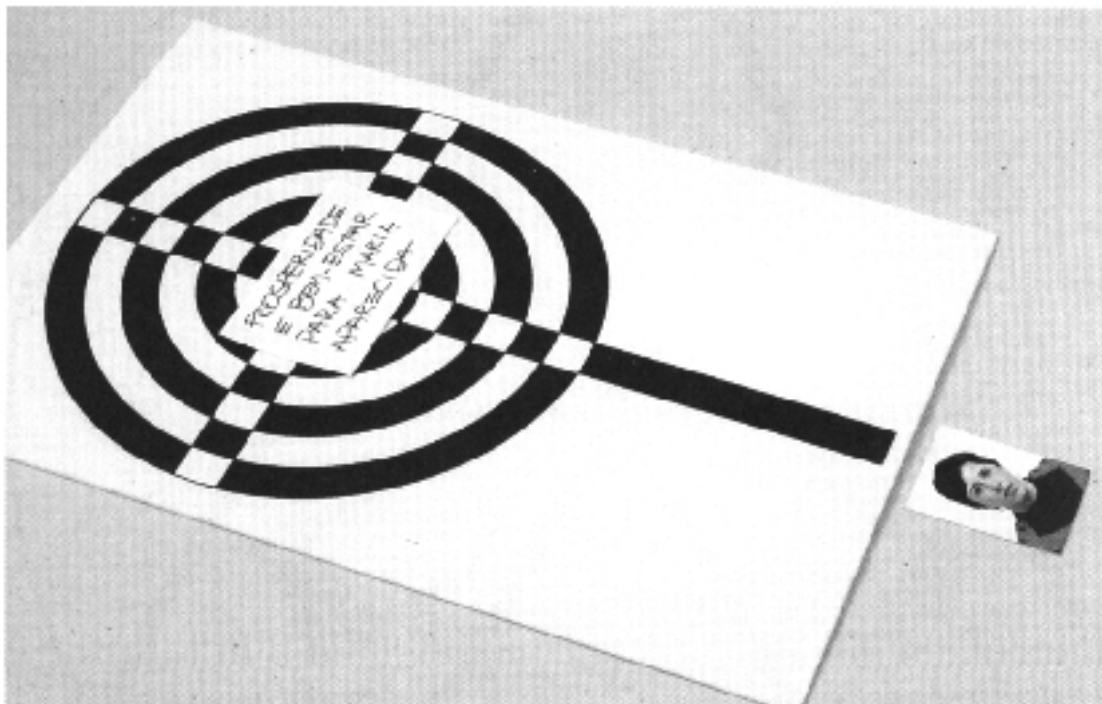

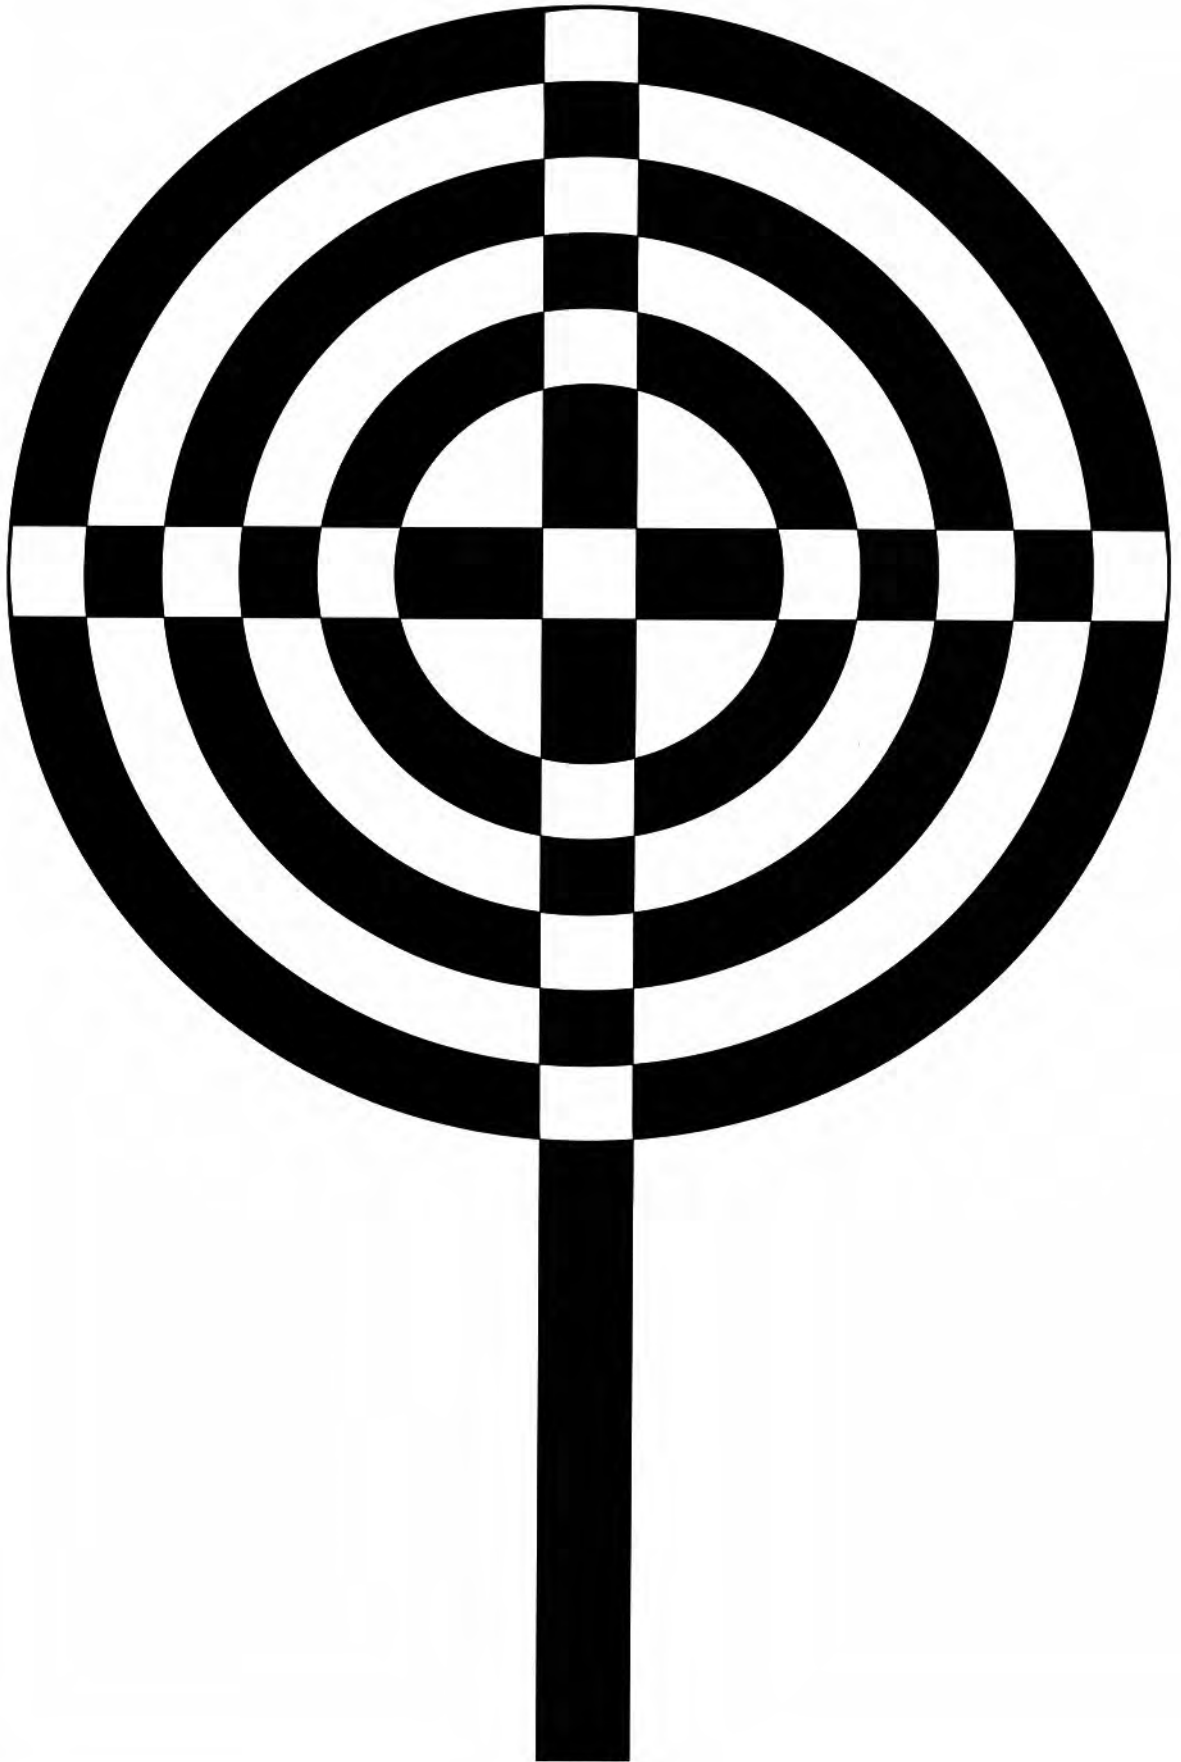

Atlante Cruz

Local mythical never forgotten, Atlantis, still present in the popular imagination. This chart dowsing is a representation of that place, showing the three circular walls around the island city. The axis of the cross represents the major access channel.

This graph searched by António Rodrigues is equipped with a strong power to issue and especially suitable for working with material goods. Must be driven on the north-south axis, as shown. Put the components that form the broker at the center of the graph, the witness can be a photo should be placed at the end of the long arm of the cross to the south, the area indicated with the letter T. Pendule always to check the time of issue and other issues related to work. When judging the work, do it using always the biometer.

Graph Dimension: 17 x 25 cm

Labyrinth Amiens

Labyrinths have always had about the imaginary man a very special attraction, the symbolic content, as a representation of the creation, the living image present in the collective unconscious of the ill-fated flight of Icarus labyrinth of Daedalus, the constant threat of deadly attack the Minotaur and finally , the aesthetic beauty of their intricate convolutions.

Present in many old buildings, the weather and the wicked were relentless with mazes, leaving only a few. Several mazes in Gothic churches showed their floors, the left and of Chartres Amiens.

In dowsing devices is one of the most difficult and sophisticated use. Easier than that of Amiens to Chartres.

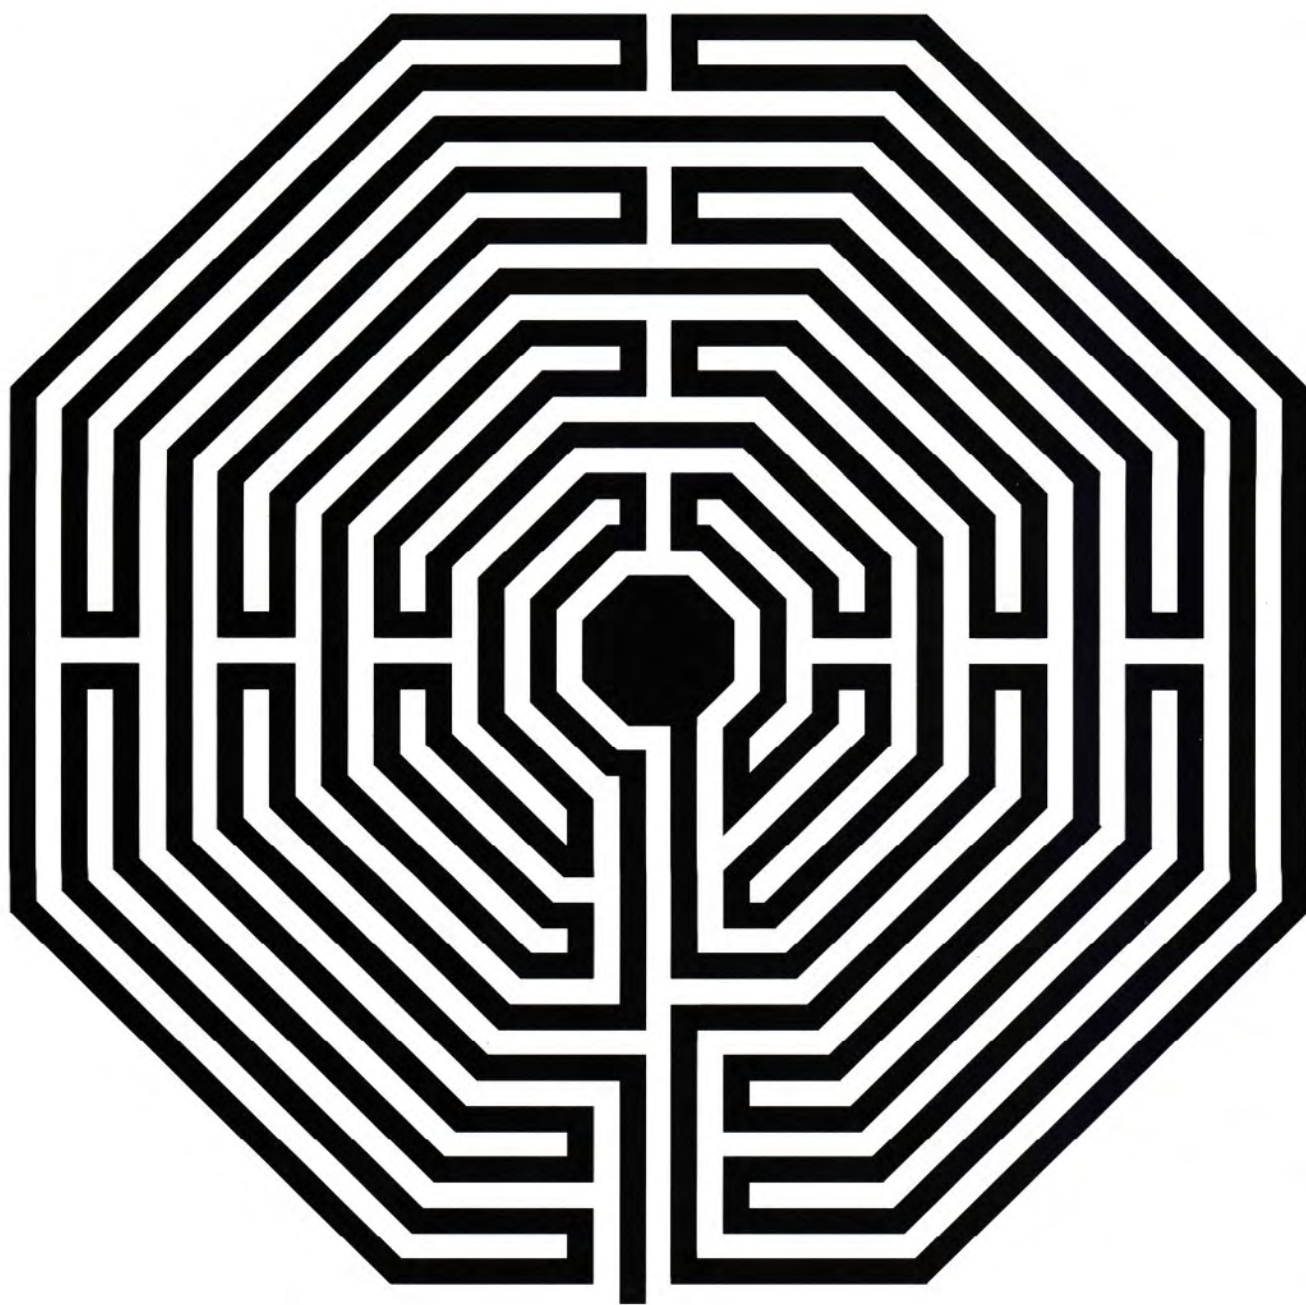

Make the most you can copy the attached chart, 50 cm in diameter now would be a good measure. Emissions are done in the center. This time,

for once, I'll give you a problem:

- search for the meaning of the alignment;
- polarities;
- the EIFS;
- levels;
- Hourly emission frequencies;
- orientation spectrum BCM (Bélizal-Chaumery-Morel) and its phases;
- which devices use to change emissions;
- Biometric rates.

Dowsing is it, research! and ... sometimes the hidden reserves in the most beautiful surprises ...

Dimension chart: 32 x 32 cm

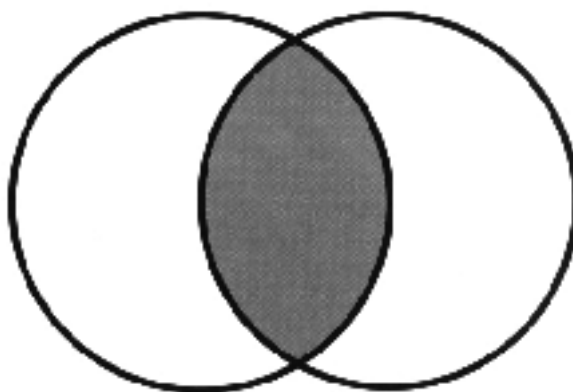

Vesica Piscis

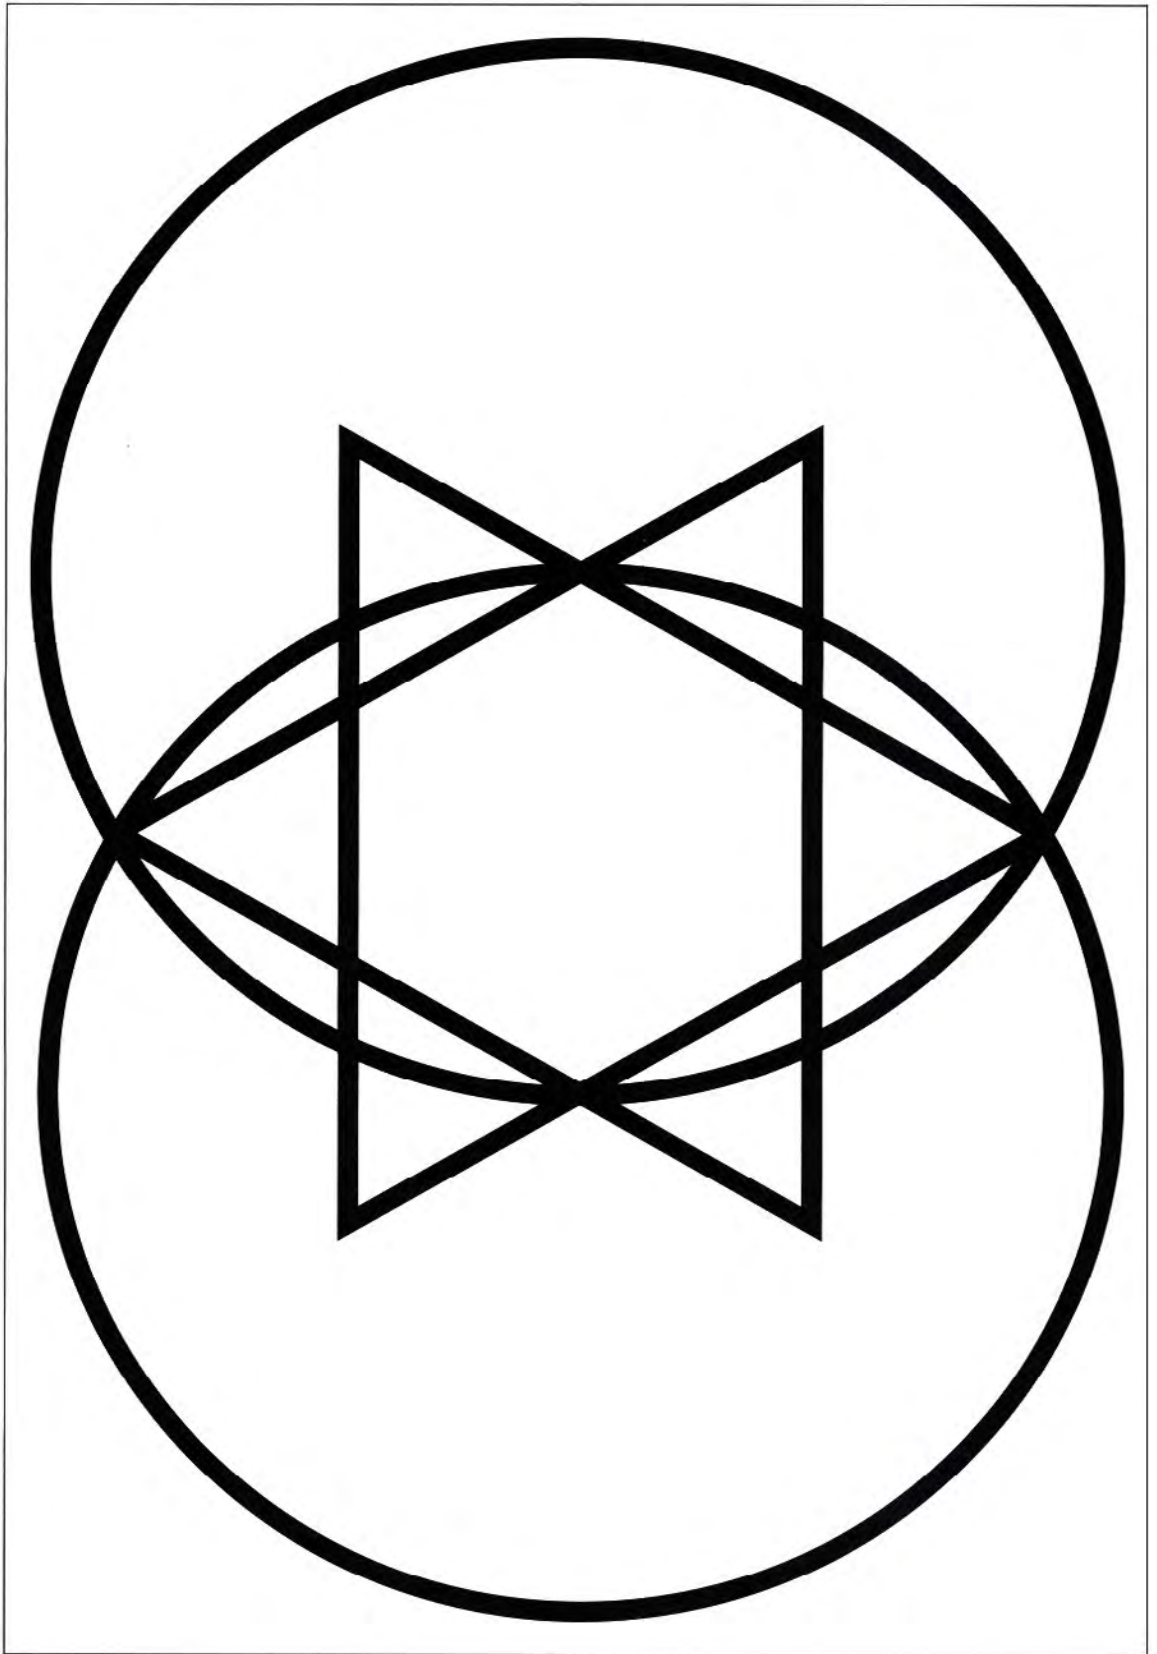

The resulting area of two overlapping circles with centers tangent is known as Vesica Piscis. This type of fish is a source of reference to Christ, the union of heaven and earth, between the creator and creation.

The Vesica is a generator of forms, since all regular polygons are obtained through a succession of constructs on it. The vesica is the seed. The Solomon's seal inscribed therein gives the potential energy emission, broadening the spectrum of use.

Size chart: size

*The area of the Vesica
Piscis*

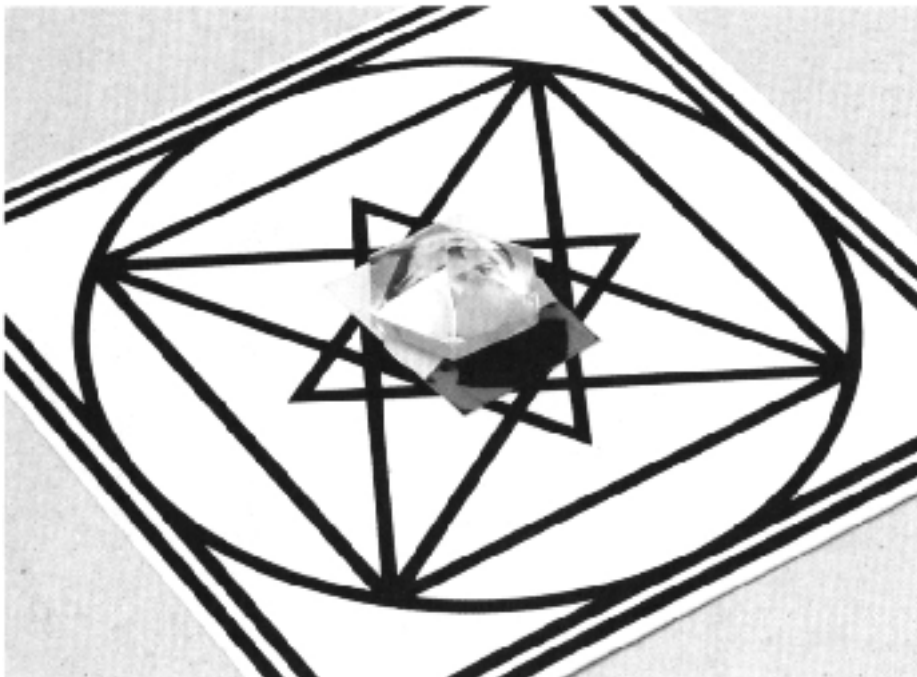

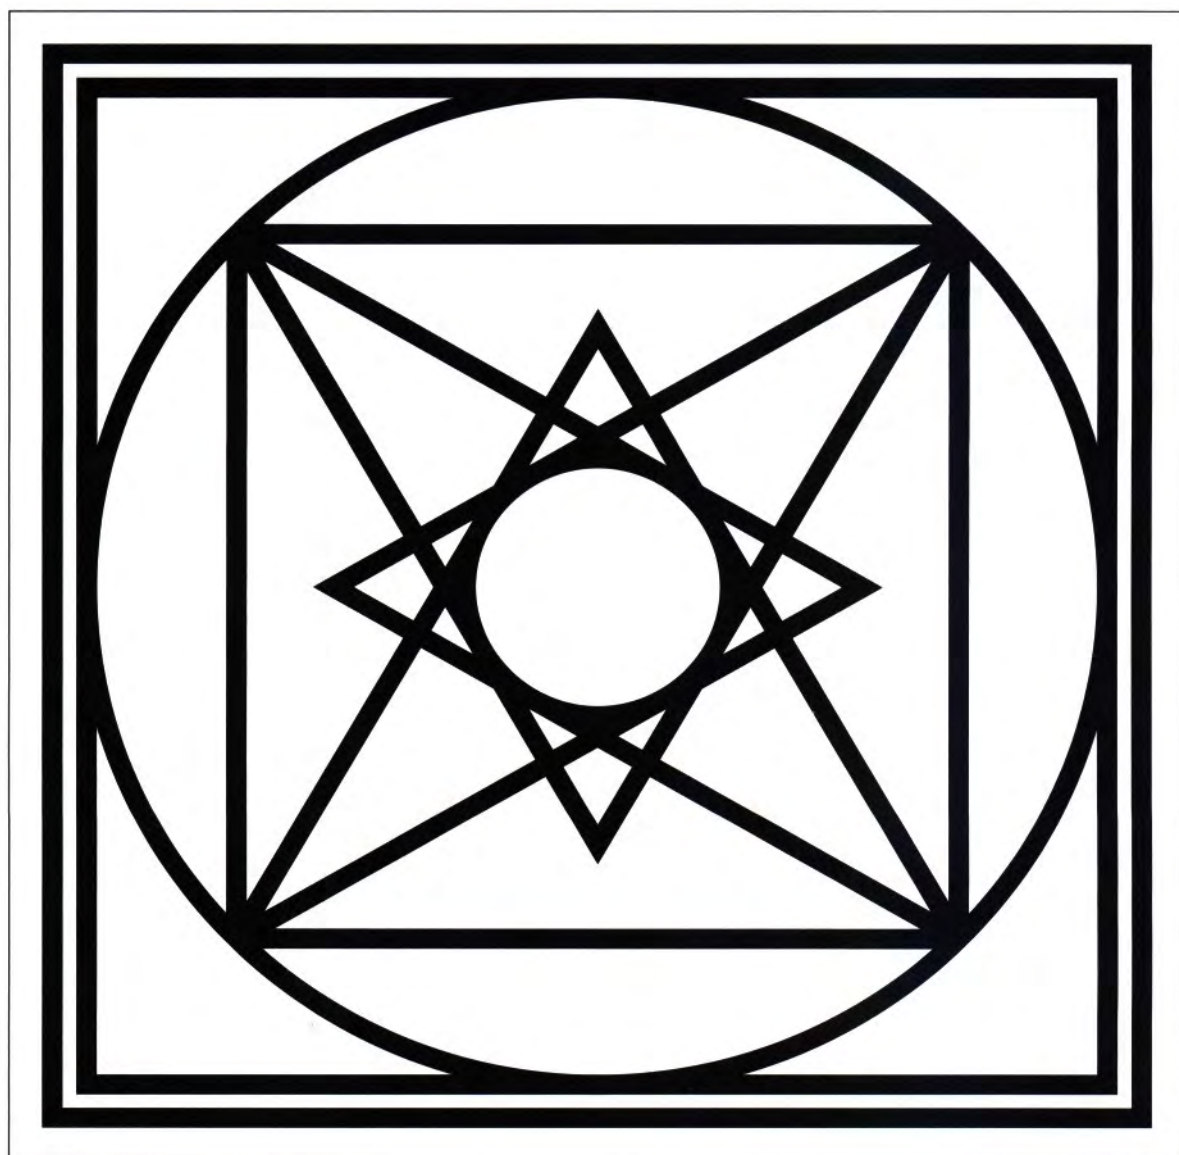

Flat Pyramid This graph represents the faces of the pyramid batting. Experience has shown to be a graph with a very incisive action. Since 1990

when it came on the market, has been used to:

- Heal pain and small physical problems, placing the Pyramid Flat face to the place in question, remaining so for several minutes. At first the pain may persist or even increase, but soon diminishes completely.
- It can also be used for material goods, find jobs, achieving goals materials, etc.. in this case use a broker on the testimony previously valued at decagon. As in the other charts, the power to issue the distance can be increased by making use of quartz crystals or stones.
- Also in the general problems without apparent solution or when already exhausted all known resources, finally, acts as a sort of emergency dowsing.

Size chart: size

Kit- Chrome

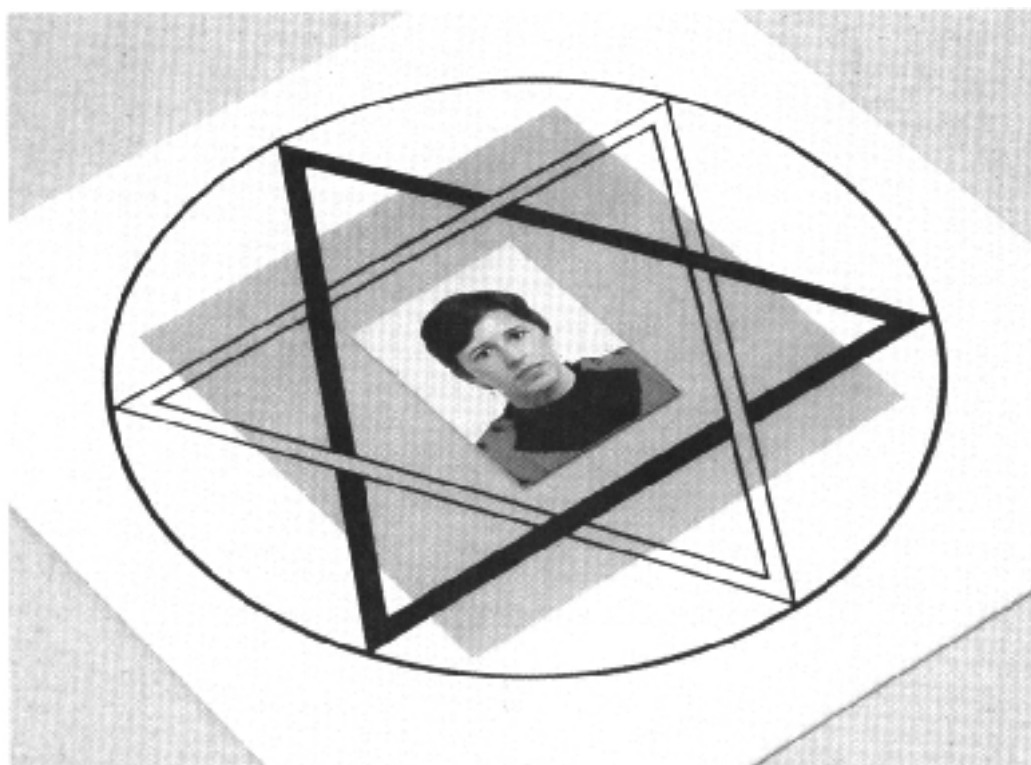

The Chrome Kit was created by António Rodrigues based on the known qualities of the seal of Solomon, this variant has the dynamism and quality. The Seal of Solomon has been used for more esoteric various purposes during the times. And its use is well known as a symbol of protection.

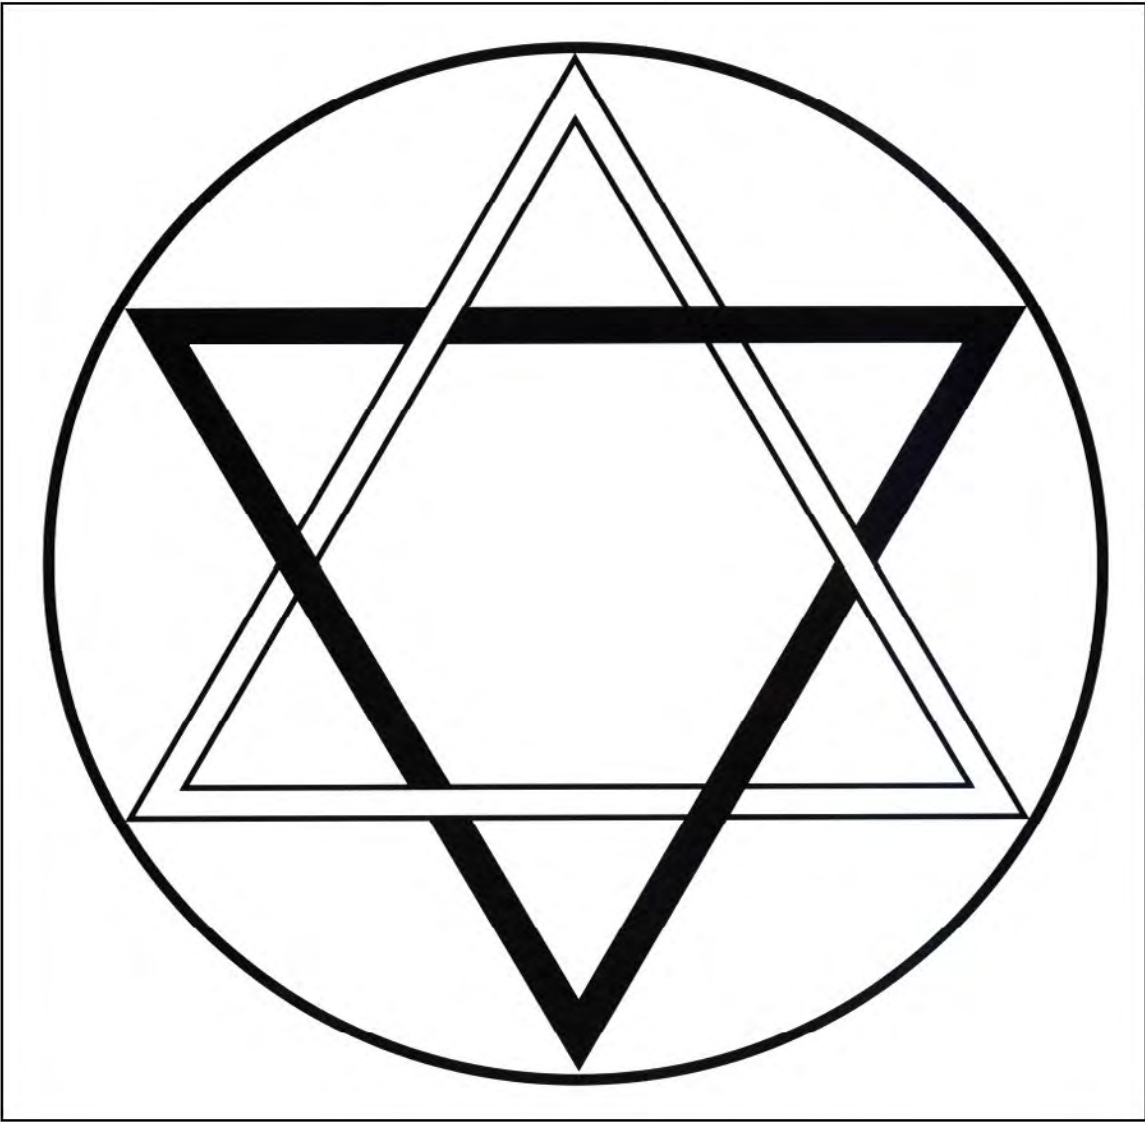

The kit Chromium intended to practice through the use of color therapy testimonies, and therefore can be applied at a distance.

Align the card toward the north as indicated and place on your witness the center of the person being treated and on this, one of the films accompanying the color chart. Other applications are possible with this graphic dowsing, such as personal protection or treatment distance using homeopathy as brokers or any other energy medicines. The transmission time must be controlled radiestesicamente, however should not be employed in cases of degenerative and cardiovascular disorders.

Can be used with benefit to carry water or juice, thus adding greater vitality.

Size chart: size

Ba-gua

The Ba Gua known as the Emperor Fu-Hsi, is what has been studied by dowzers. Published in 1936 *Assay Radiesthesia Vibratory* Chaumery-Bélizal and, in 1959, in EXDOCIN.

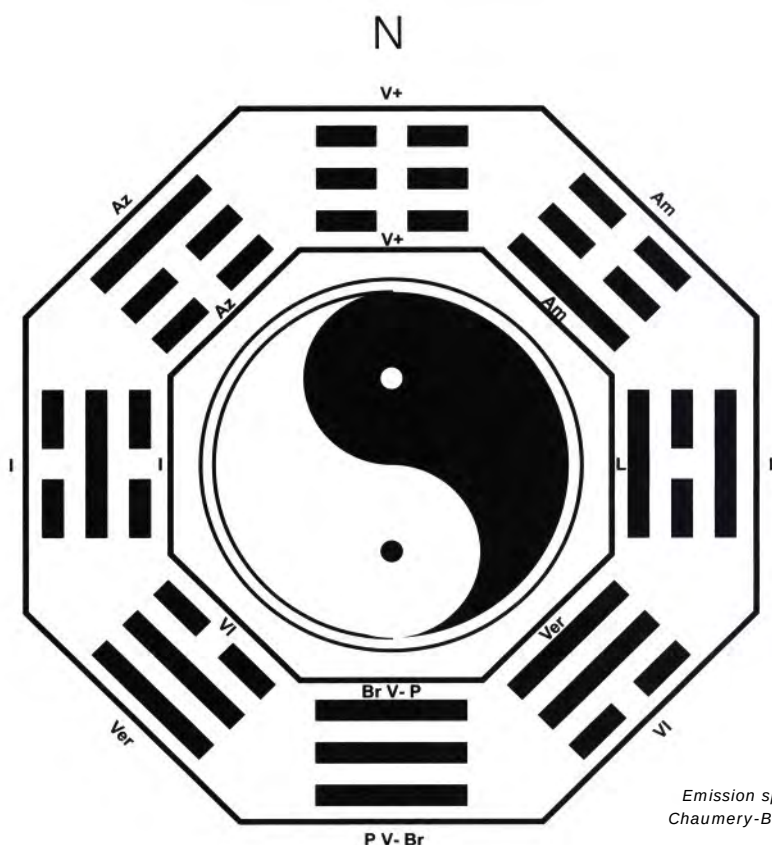

Aligned north-south, allows you to send any distance and any testimony broker placed in the center of the graph. Using a photo as a witness and as a metal broker, a color, or any kind medicine, the beneficial action of Ba Gua is felt immediately. Because the potency of the graph are not advisable emission duration longer than one hour. When in doubt, pendule for the right time.

This Ba Gua can be used as an oracle, always oriented north-south. In response to questions, the yes and indicates Yang Ying indicates otherwise, the immobility of the pendulum indicates the lack response or when it is indifferent. Then the indicated trigrams can clarify the meaning of the responses.

Certain noxious telluric waves can be eliminated thanks to the Ba-Gua, placing the graph on the point of release.

With the trigrams colored in green and red, you get a powerful emitter of waves form.

Graph Dimension: 25 x 25 cm

Emission spectrum
Chaumery-Bélizal.

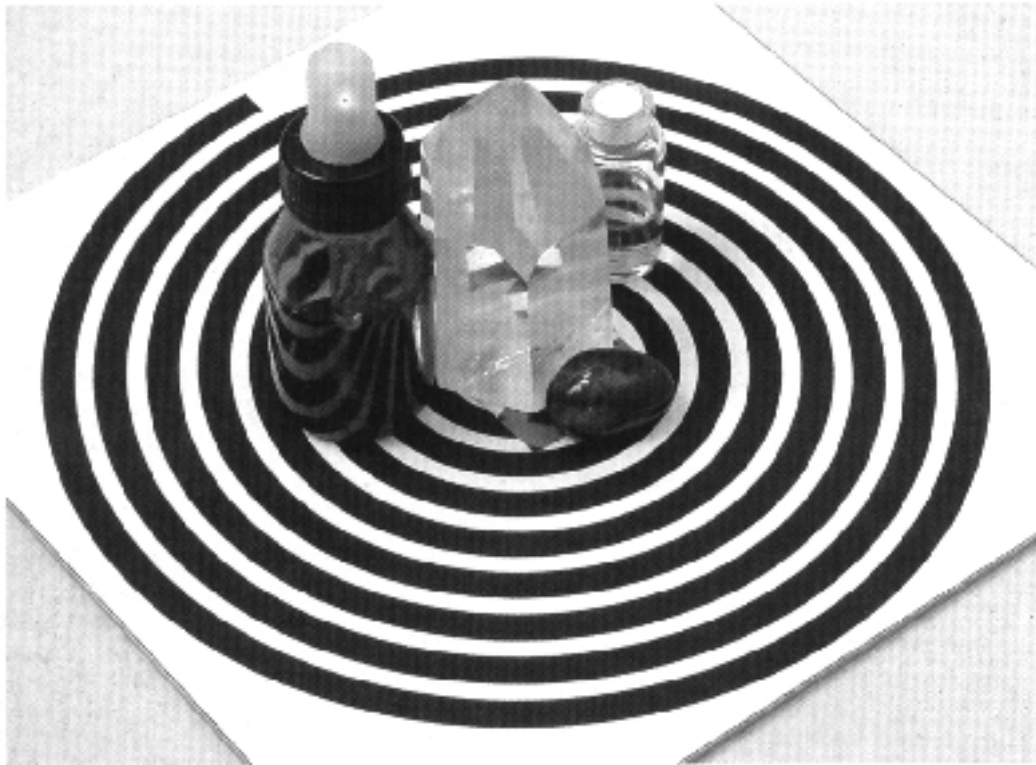

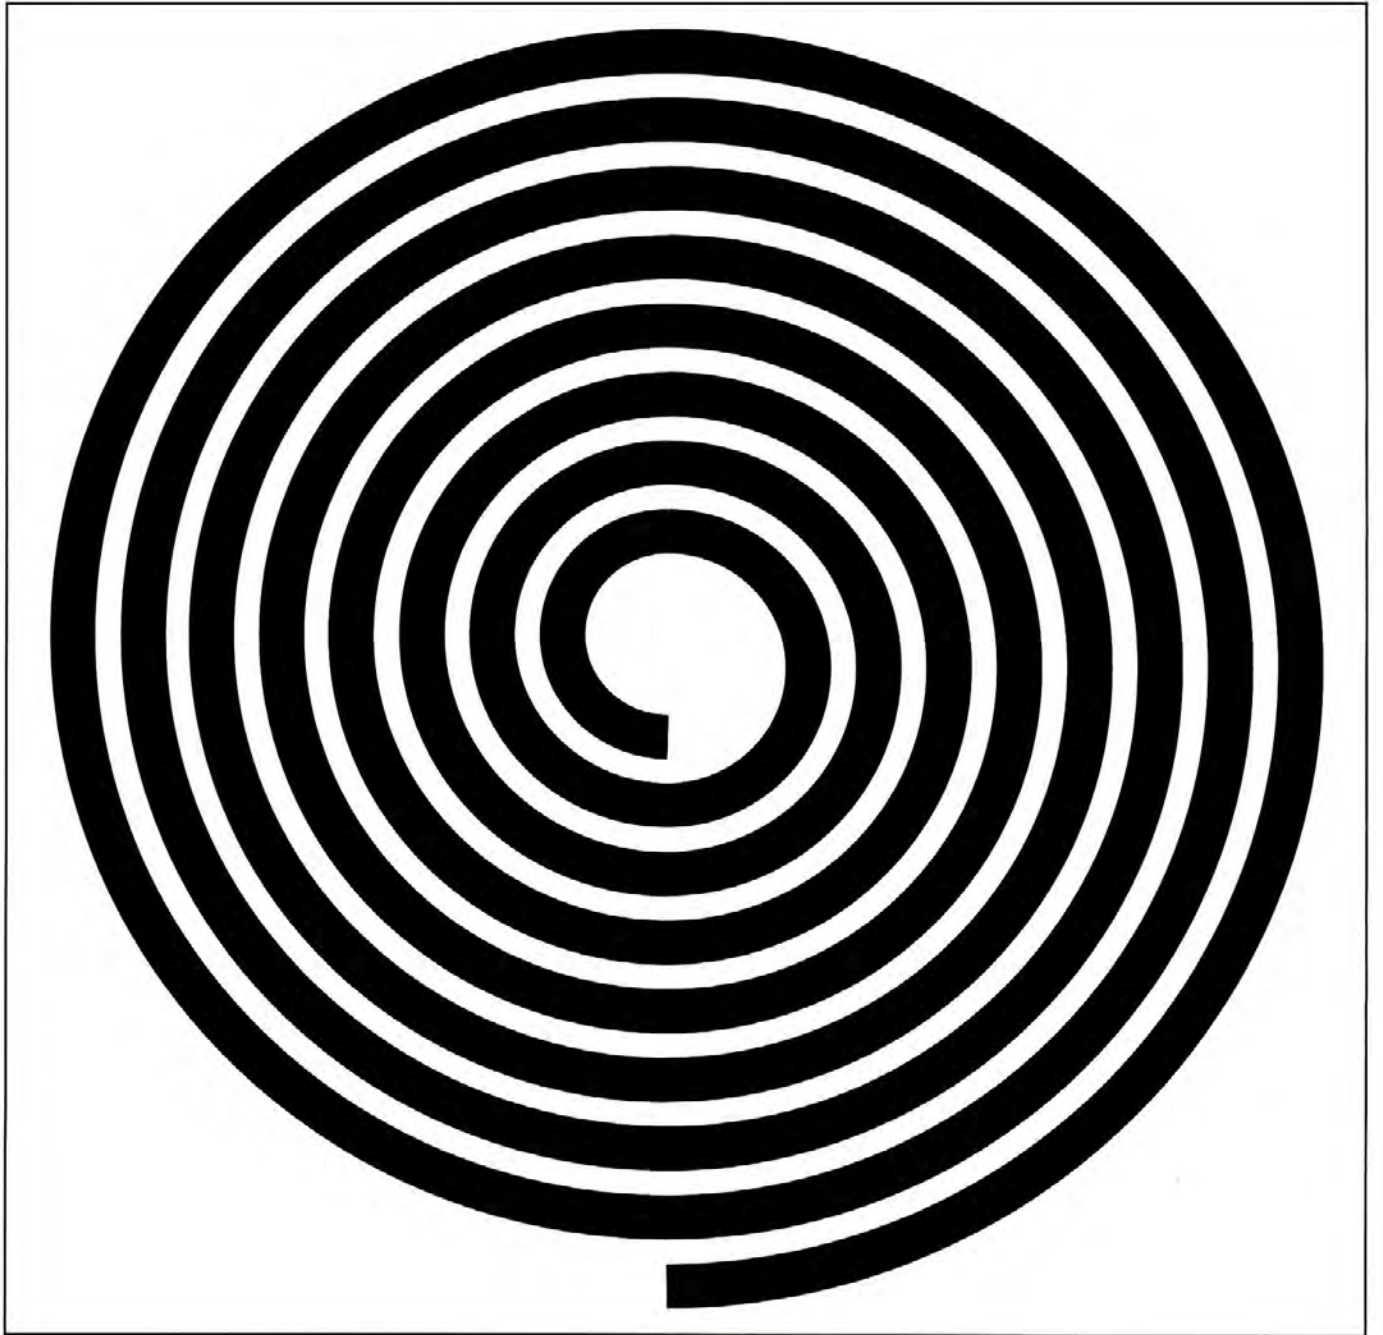

Spiral

Would you like a dowsing chart absolutely neutral? Not reversed the colors, does not alter the polarities, which did not add any unknown energy component set to work for you? Well, there is this chart, a solenoid, in the form of spiral levorotatory, with all of the above characteristics.

To use, set the initial point of the spiral form to the north of the center of the integral elements of your search if possible a clear quartz crystal (a tip), a clock ticking on the table. Periodically, review the process radiestesicamente.

Size chart: size

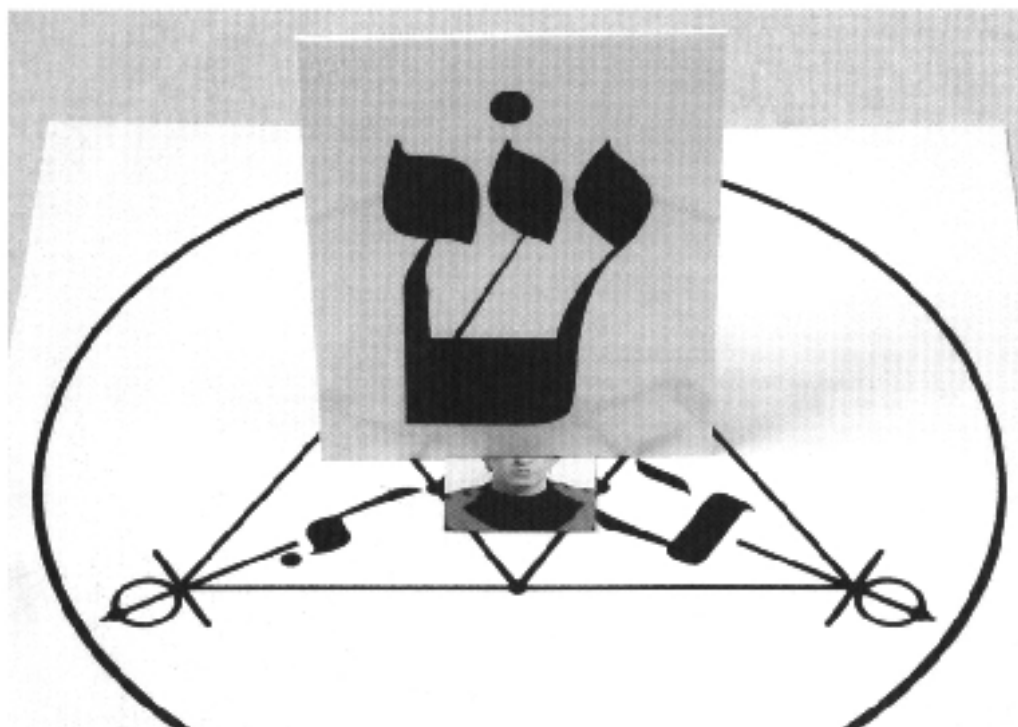

Shin

Shin can be used as a supportive element in an energy therapy. Its application is attempting to reimpose the vertical component of Vital Field.

In cases of magic, degenerative diseases and other diseases when they reached critical states, the Campo Vital present in all living beings have their horizontal components moved, rotated and vertical component representing the vital current upward inverted. This can be detected with a pendulum with the Hebrew letter Shin, secure the lower end of the wire, ie, with the pendulum upside down. The turnover time indicates the reversal.

The graph Shin should be placed upright on the testimony of the patient, and the two on a graph chosen radiestesicamente issuer.

Graph Dimension: 8 x 10 cm

SRIM

Hrim

Krim

Klim

Graphics created by António Rodrigues and intended for viewing, to establish a connection with the principles represented or issuing work to assemble the distance. In the latter case, strictly control the time of issuance, the graphs on the following pages are presented in this order:

SRIM, original mantra of Goddess Lakshmi, the principle of plenitude and fortune.

Should be used to attract prosperity, good luck, or help maintain the property already acquired.

Hrim, original mantra of the goddess Tripura Sundari-denotes the unity of male and female principles. Ealso the initial vibration Bhuvanesvari Goddess who presides over the three spheres.

To be used in maintaining harmony in romantic relationships, or the need to harmonize a couple in conflict.

Krim, original mantra of Goddess Kali, representing the power of creation and dissolution.

For dissolution problems and uncomfortable situations for the definitive cutting of ties.

Klim, original mantra symbolizing the eternal aspect of love. Efficient in cases where it is desired to stimulate an improvement in sex life, maintain stability in romantic relationships, enhance attraction and desire among peers.

IAVE

The graph IAVE was created by Jean de La Foye, a noted French dowser. In the sixties, La Foye was called to collaborate with the Kabbalist Gaston Jean Bardet in the research for the new book Bardet: Mystique et Magies This was the first contact with the Hebrew language, which would be crucial to the work of La Foye radiesthesia .

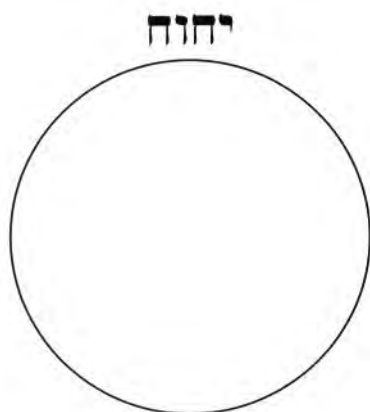

Hebrew, a language with amazing properties. The Hebrew writing emits waves into vibrations so the value of words and the forms by combining the characters.

This version now presented is the result of research by António Rodrigues, as the previous versions were present in the trade. The current version has a more stable and did not show the drawbacks of previous, when you could see a certain "saturation" due to the use of the golden ratio.

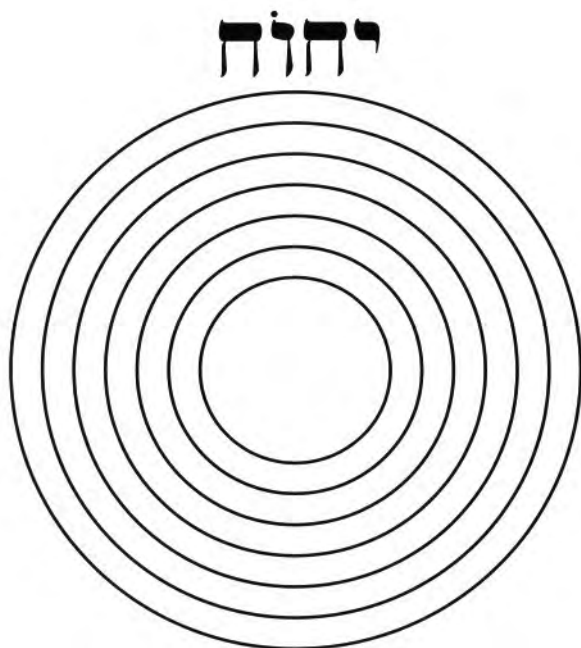

The "IAVE" is a graphic neutralizer "magic waves," created by processes, ritual magic or any kind of psychic attack. And also, a graph very simple to use, simply That is to put a "witness", ie, an object or sample of the person you want to help (something that has the same frequency energy of the aura of the person, a photo, a lock of hair, etc..) in the center of the graph.

This is enough to neutralize that any kind of negative influences from magic ritual. The graph can also be used along with certain psychic self-defense techniques, which further increases its effectiveness.

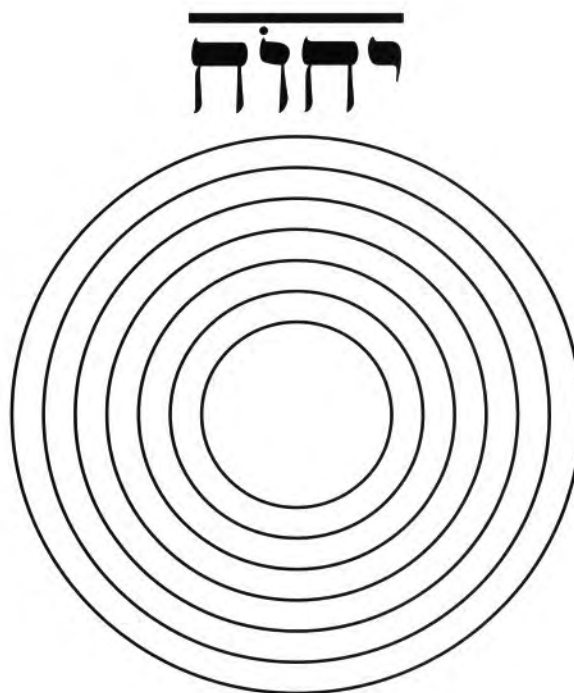

Dimension chart: 18 x 30 cm

Original version of La Foye.

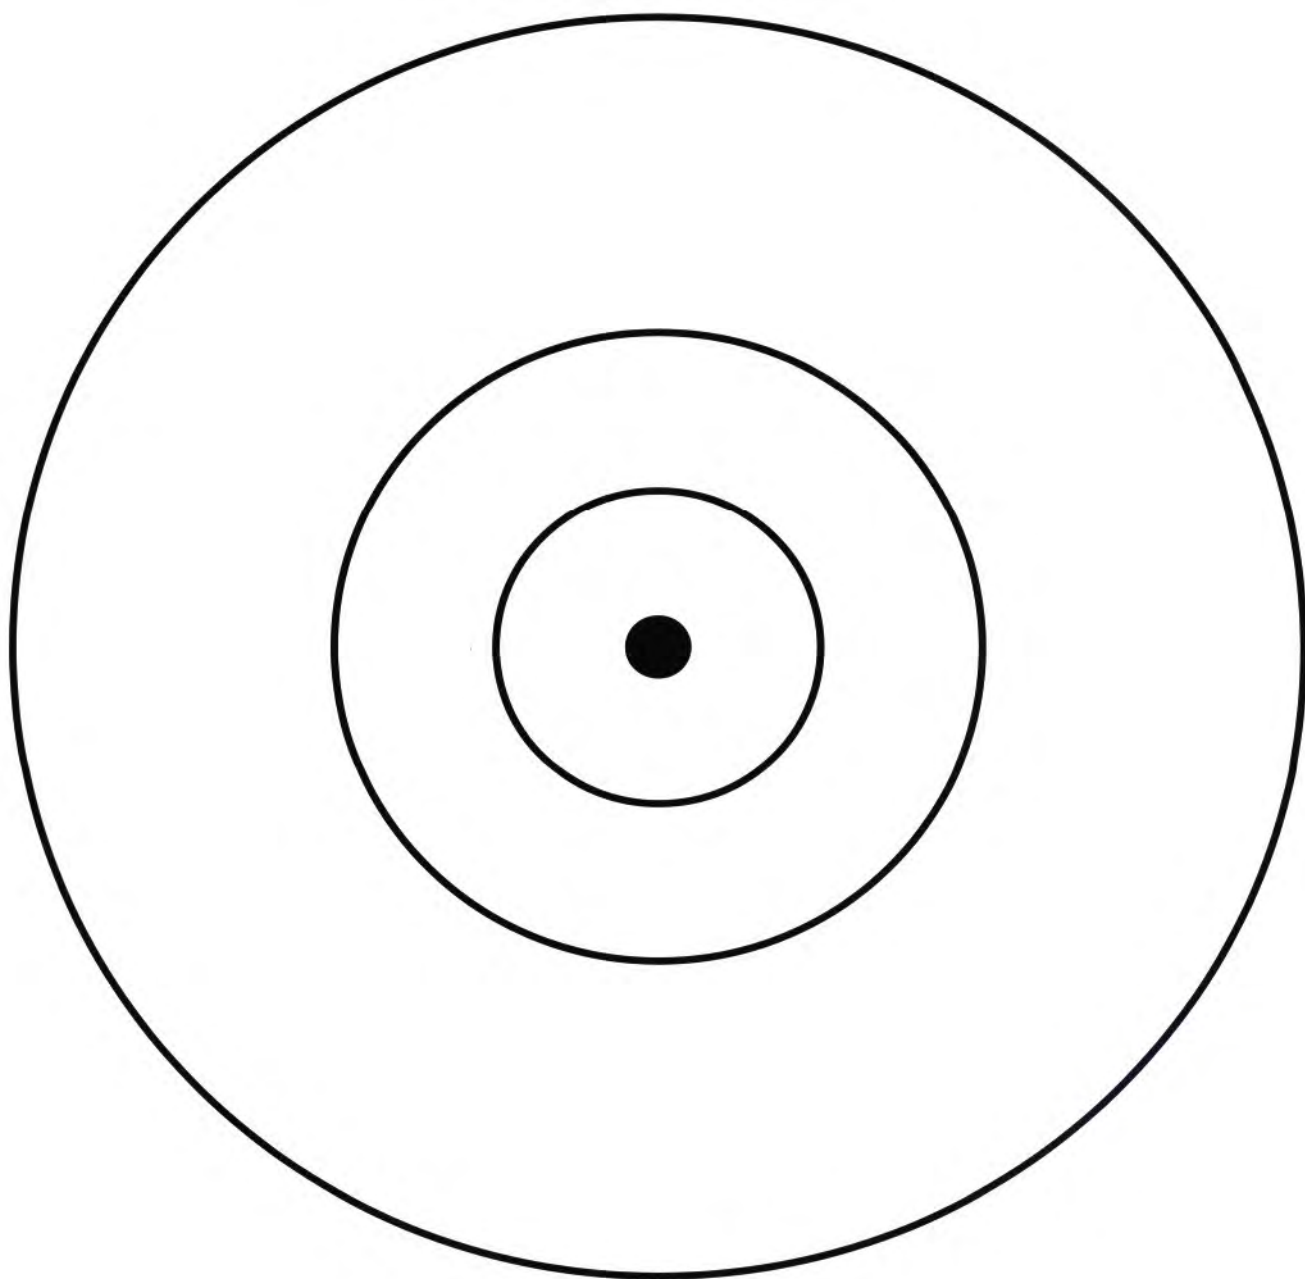

First version of A. Rodrigues, using the golden ratio.

Second version of A. Rodrigues. The addition of the word straight surmounting directs the issue to the center.

יהודה

Anti-magic

The Seal of Solomon has been used for various purposes during times esoteric. It is well known its use as a symbol of protection. Nowadays dowsing the wave form has incorporated into their graphics, because its properties stations.

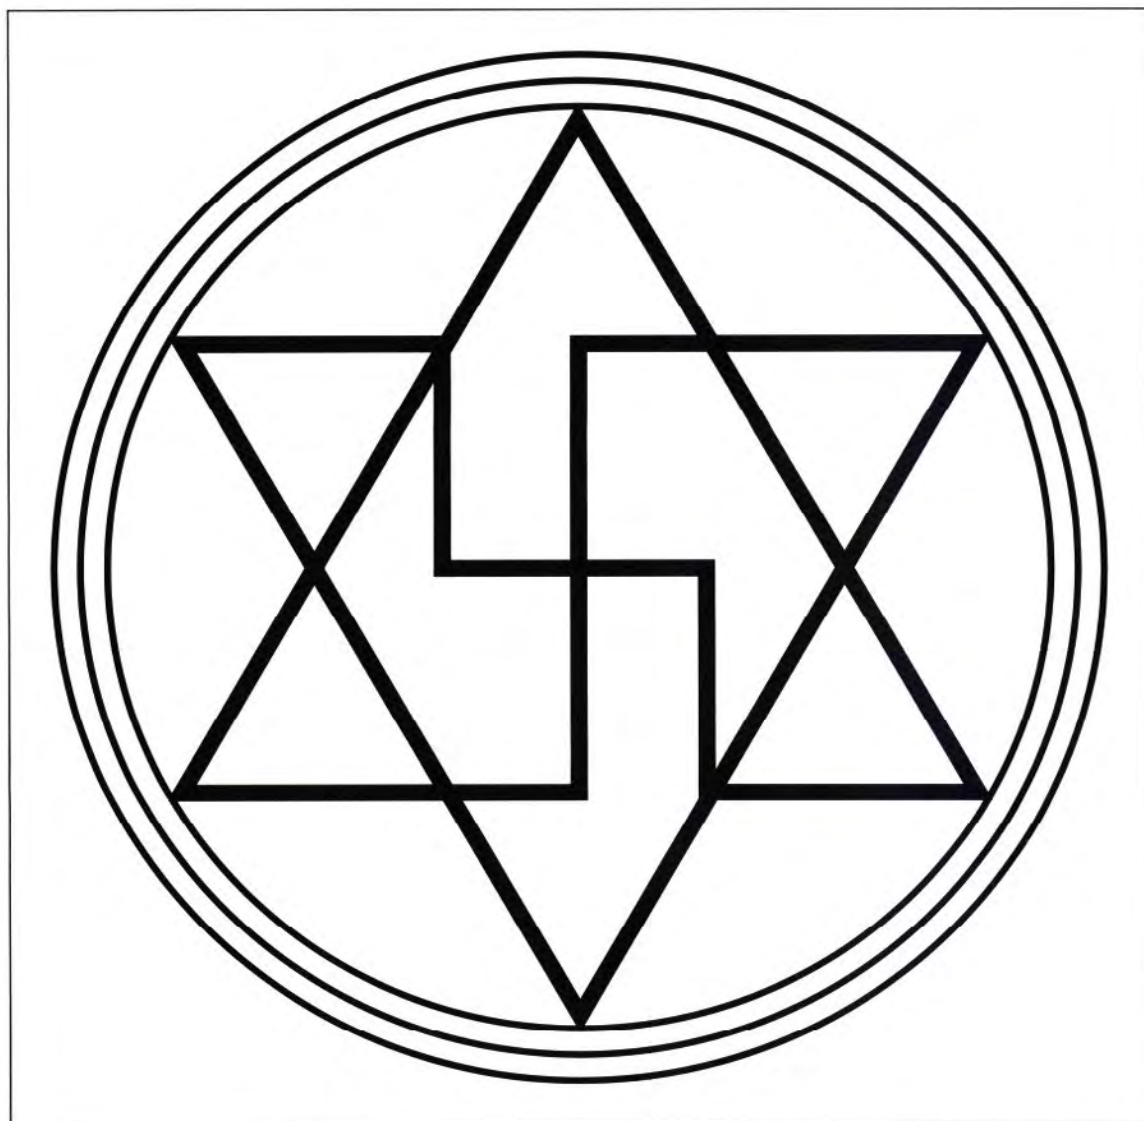

Published in the book Full of High Magic Treaty of Vasariah, and recovered for radiestésicos by António Rodrigues and named by the author of "Pantacle Neutralizer".

The graph antimagic intended to eliminate states magic present in living organisms, through the use of statements, so the distance could be applied.

Align the card toward the north, as shown, and place in the marked point to the testimony of the person being treated. The broadcasting time must be controlled radiestesicamente.

Size chart: size

Nine Circles

This graph has the property of protecting material goods, places, objects, living beings in general against external negative energies. Can be used for applying the distance, simply by using a quartz crystal stone or any other stone related to the ongoing work.

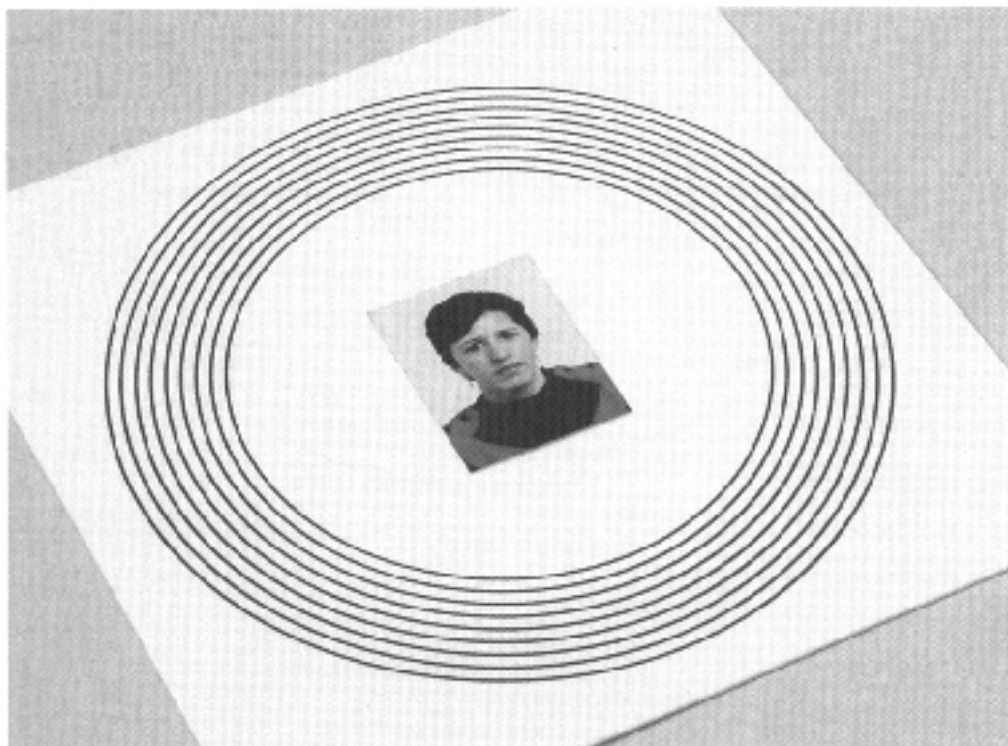

The circle is known in all cultures as protection element and the number of concentric circles are related to the sphere of action, leaving most of the plans for the finer materials.

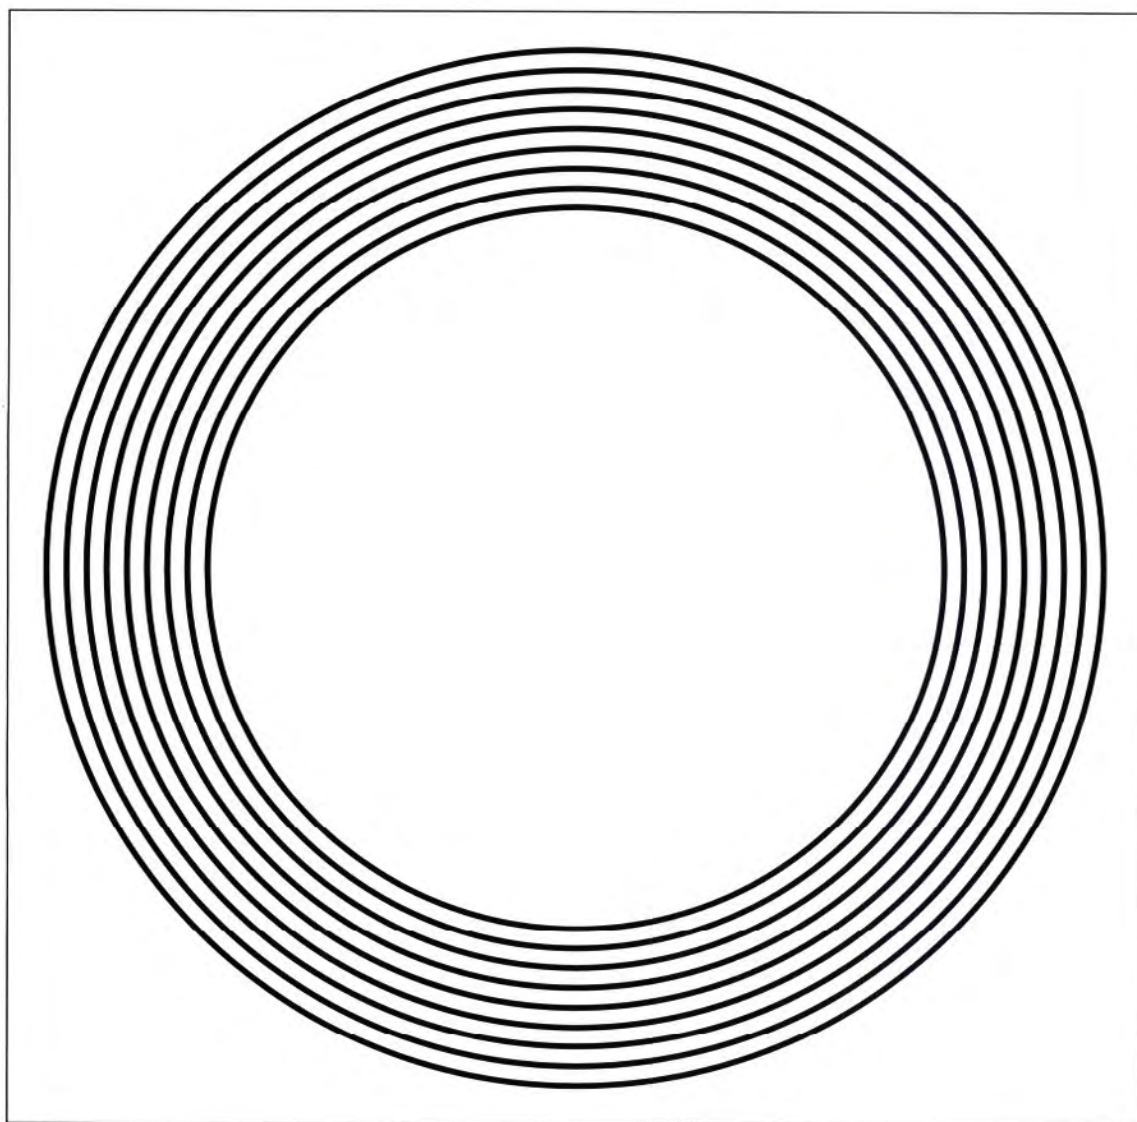

To work with the Nine Circles chart, making use of a witness, you should put a picture of the place or object, or hair, if it is a person, and on this testimony, the purpose or broker lexical previously valued at decagon, and over it all a quartz crystal.

According to the belief of the current users of this graph can be protected cars, homes, possessions of value, people, plants, animals or abstract things, as a business to be conducted or a decision to be made. Ecan protect possessions from theft, disaster, fire, robbery, destruction, etc.. A plant can be protected against insects or diseases, an animal against disease. Since a person can be protected against a huge range of external factors, such as envy, jealousy, theft, works of black magic, negative vibrations intentional failure, hatred, etc..

During a test or exam, the person can use this chart to protect themselves from external thoughts to the subject of the test, not distracting, thereby forming a protective energy, simply leave them at home on the graphic testimony (an picture) and on this, a quartz crystal blank. Mentalize the device at the time of testing.

Size chart: size

Shield

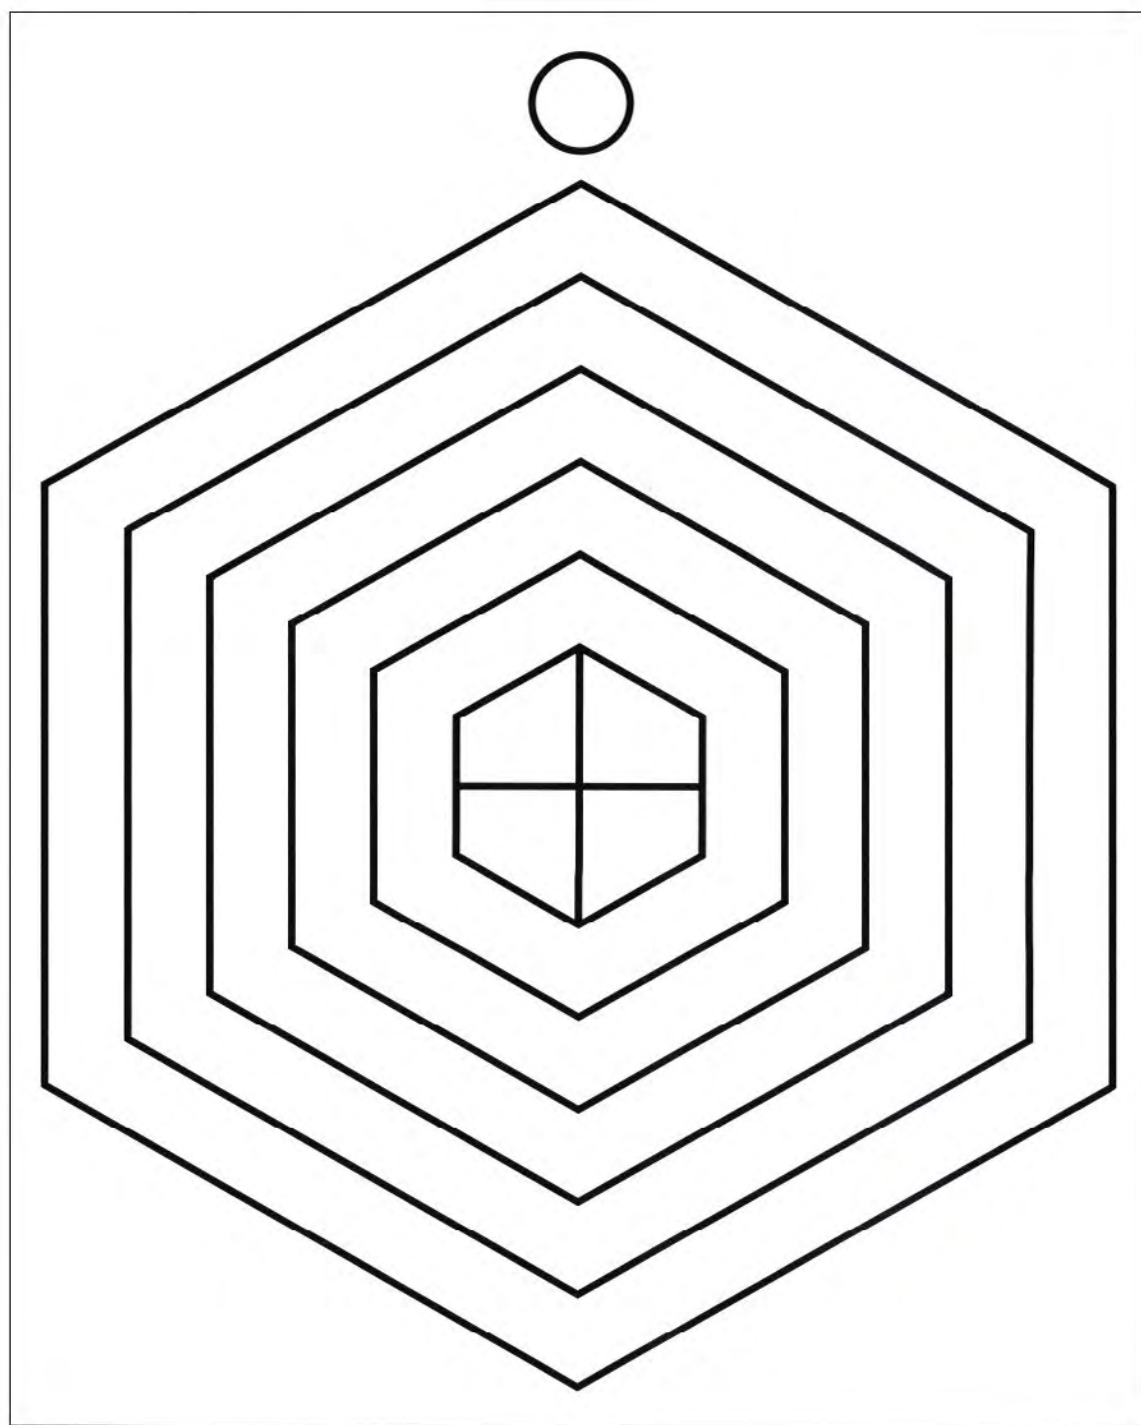

Itthe first chart dowsing anti-magic published in the journal, the EXDOCIN. Another feature that makes it noteworthy: it is also the first to incorporate a northern artificially, in this case the small empty circle.

This chart stimulates the unconscious mechanisms related to psychic self-defense, which keep us protected against psychic attacks made through procedures of ritual magic.

Place the witness natural or synthetic, which can be a photograph in the center of the graph on the cross.

Theoretically, the residence of the witness for ten minutes in the center of the graph is sufficient to protect a person for one day and a half. You can test radiestesicamente which the timing of exposure in order to get more effective protection. Keep under control the action, as are possible consequences of saturation.

Size chart: size

Mystical Symbol

This chart is authored by Vasariah, published in *Treaty High Magic*. Pantacles support the item. The name assigned by Vasariah: The Mystical Name of Jesus, however the expression spelled in Hebrew means "O name Jesus in Heaven" expression much richer and meaningful talks since the moment of ascension, the meeting of the Son with the Father

"And a mighty mystic pantacle used to expel the bad vibrations of low mood. Protects against nocturnal visitors. How is employee support where necessary part of the changing forces that are often evolving universe.

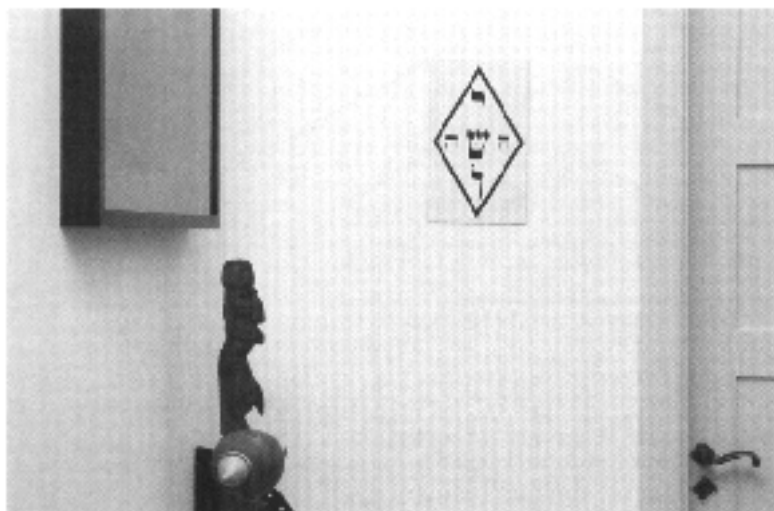

It is used in the practice of spiritual development, to view for two or three minutes.

It's a Pantacle DISCHARGE. "

When used vertically, the Yod will be up and when horizontal, to the north. In the case with testimony and use, this should be on the central letter.

Symbol Mystical can be used as "decoration object" ie, placed in a frame and affixed to one wall. His influence is plainly beneficial, protecting against "evil eye" and negative entities from any sphere.

Size chart: size

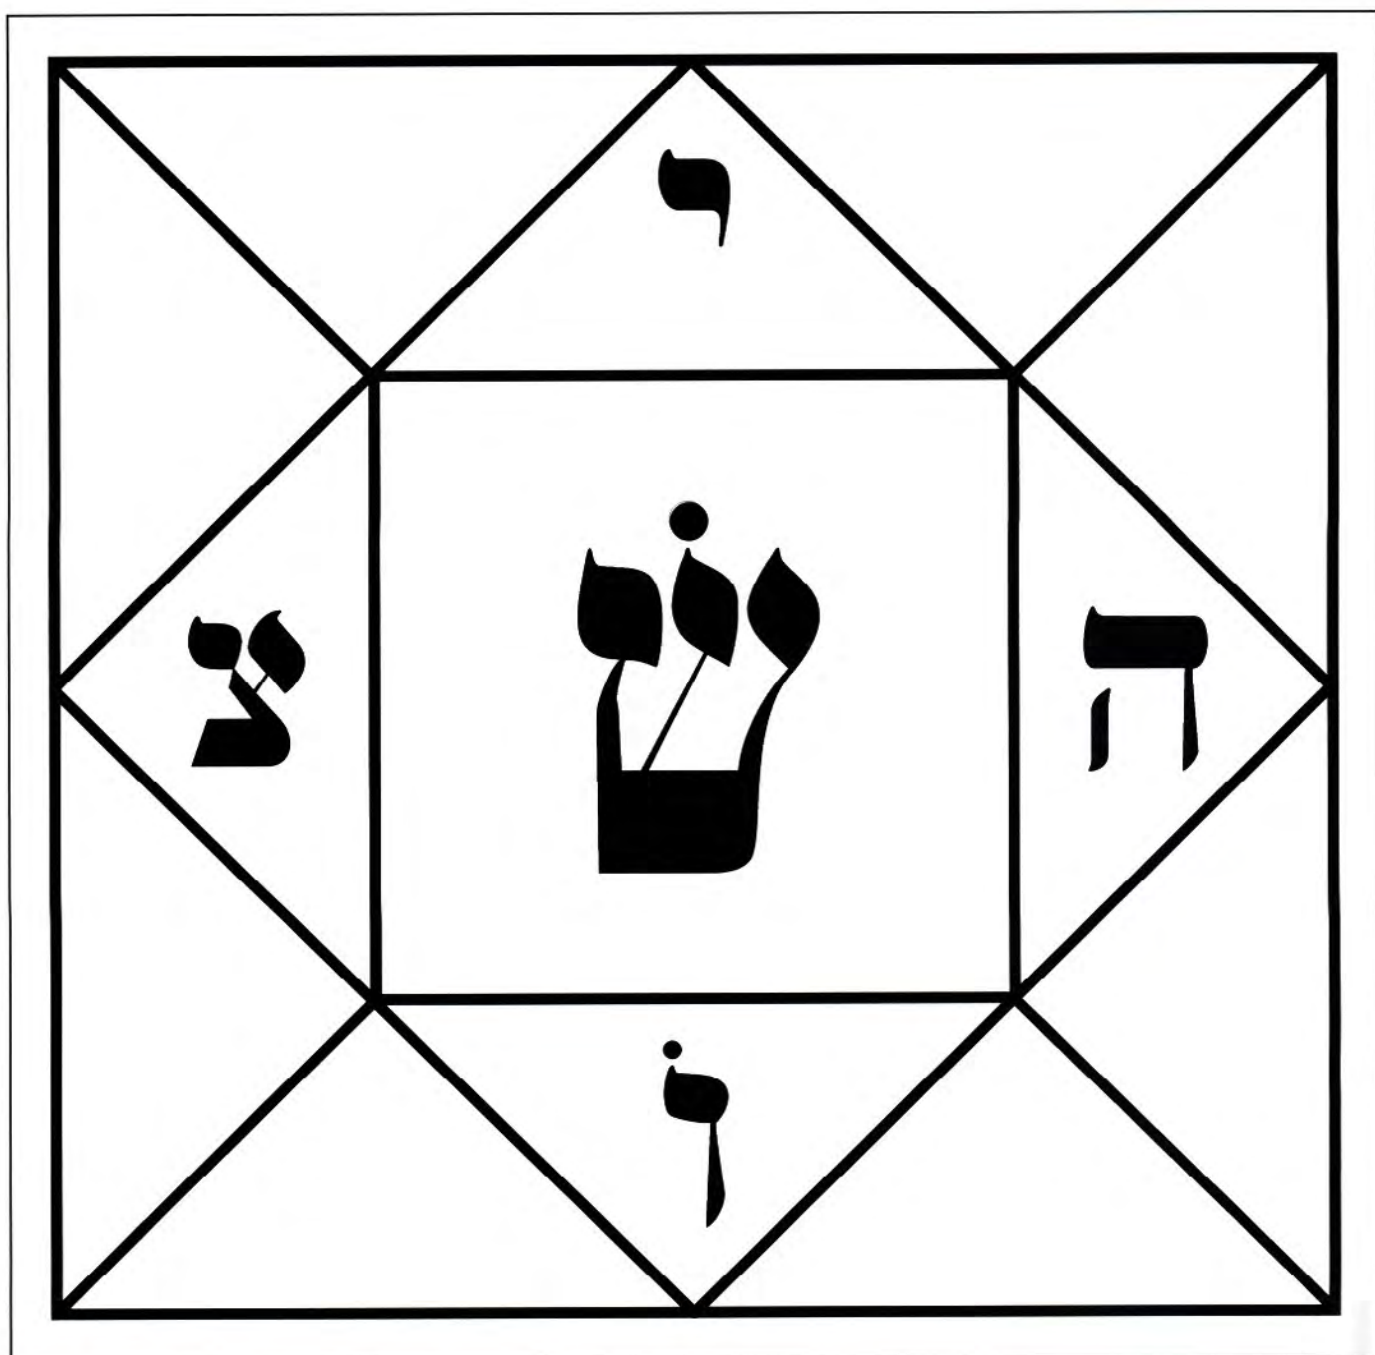

Magic Square

The Magic Square proves to be very useful when the person affected by a state of magic is nervous, restless due to the focus of energy intruder.

Created by António Rodrigues, this chart is based on the Hebrew word decoupage Unit, whose numerical value is $1 + 8 + 4$ and in the expression of the sacred name of Jesus on earth. Not to fear the state of saturation, as is natural to shutdown reach the saturation state, however it is always advisable to follow radiestesicamente process in order to make other measures when necessary.

If possible, align the side of Yod north to form 355° . Graph

Dimension: 22 x 22 cm

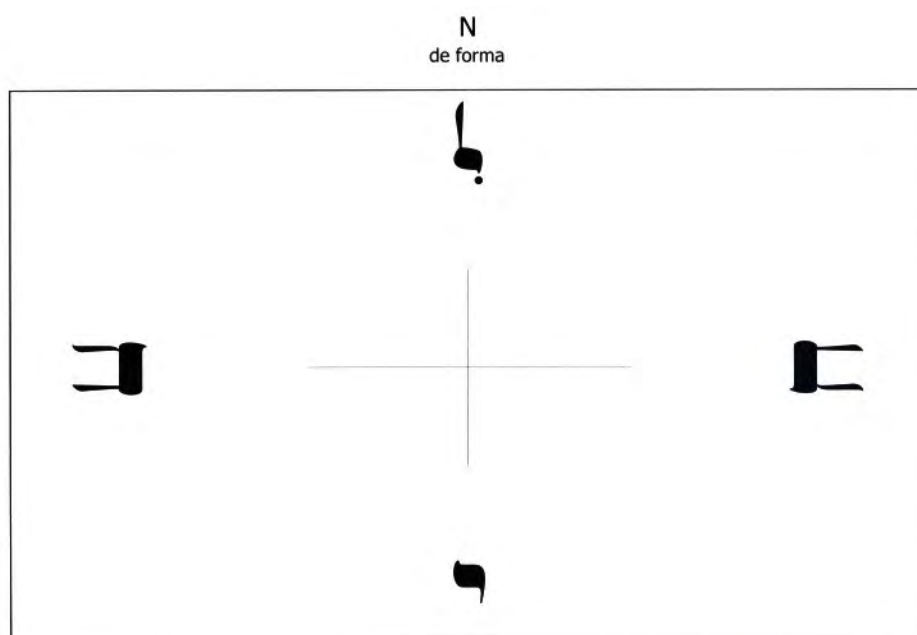

Form IAVE

Jean de La Foye left us a legacy unmatched, his research led to the discovery of dowsing cabalistic, but he has given us with a considerable number of instruments and charts for dowsing (Chart recovered by António Rodrigues).

The Form IAVE of Jean de La Foye, again based on the Hebrew Tetragrammaton, is an excellent graphic anti-magic environment, originally published in *Mystique et Magies* Jean Gaston Bardet. Its radius of action depends on the weight of the board, which is 10 m to 100 to 200 gr. and from 20 to 30 meters for 300 to 400 gr. And can increase the weight of the board, pasting it on thick cardboard or sheets of plywood. Do not change the size of the original board.

To achieve a smooth operation it is necessary that the plate is horizontal well, where appropriate, use one level of builder, or that the Waw is oriented at 355 ° magnetic.

Dimension chart: 18 x 30 cm

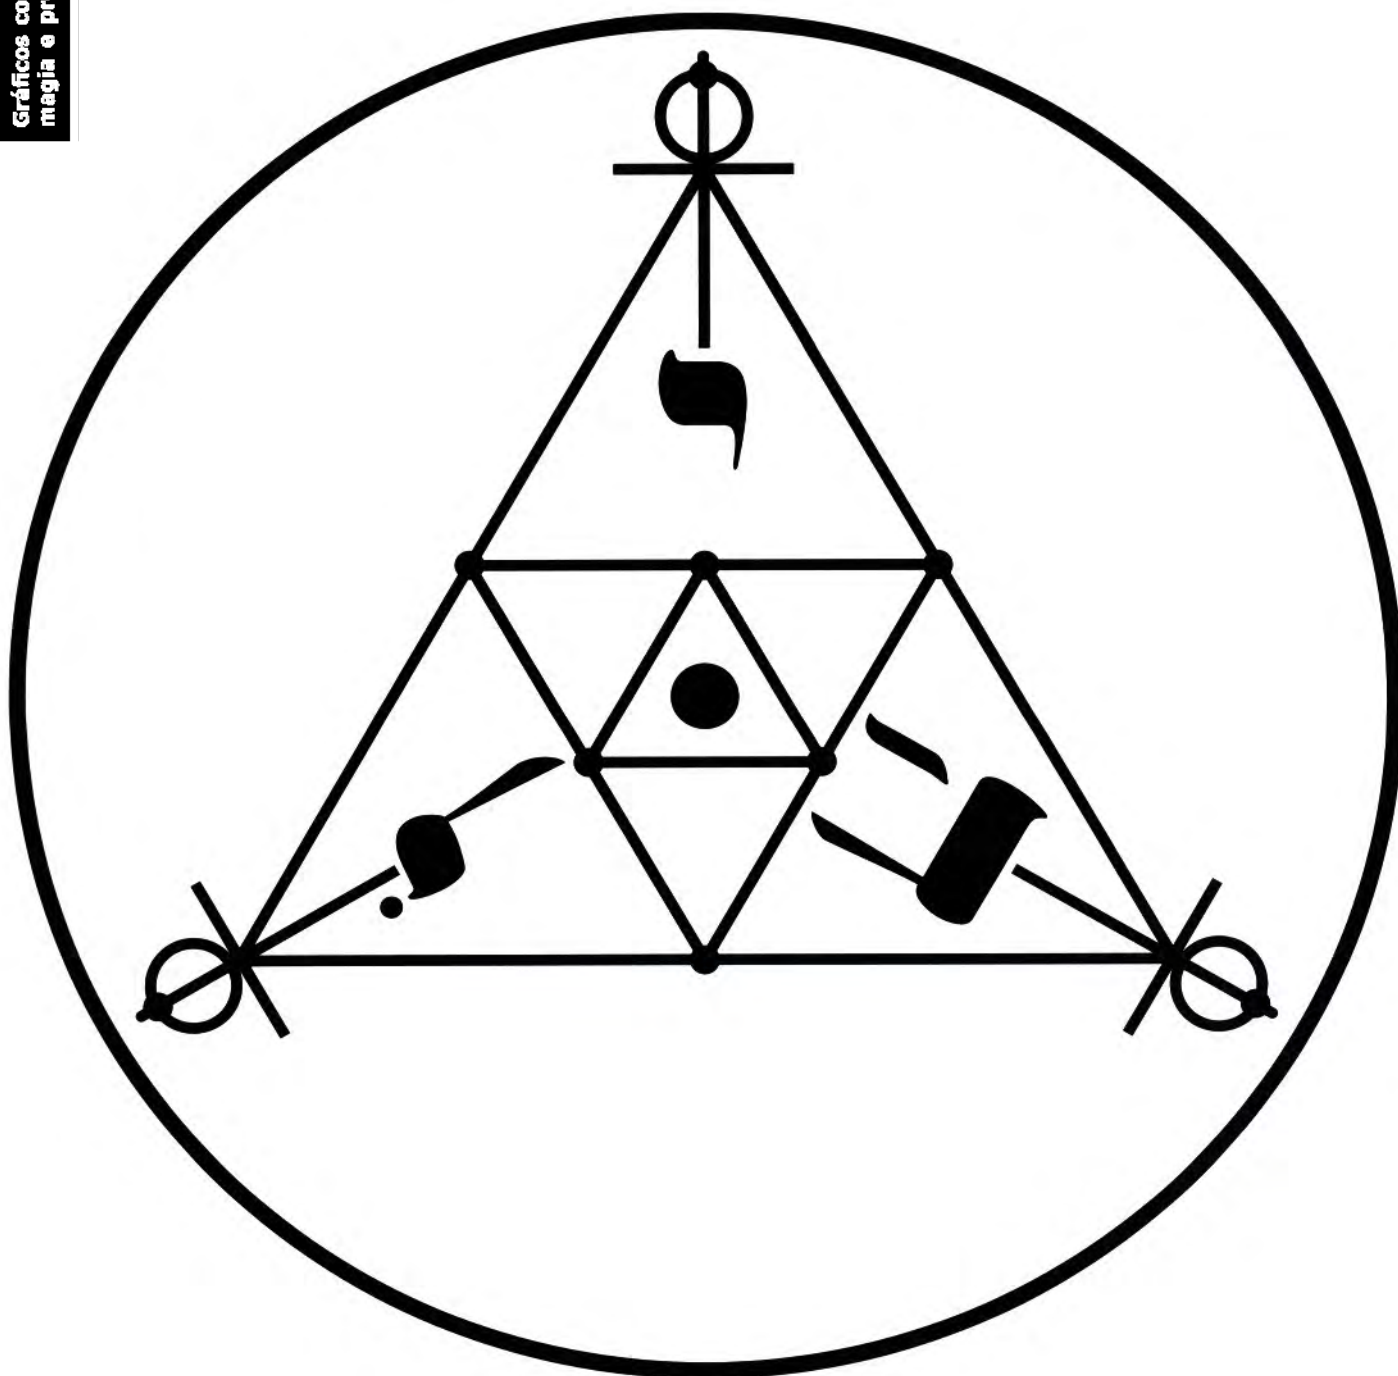

SCAP

About this chart has been said quite the item dealing with the issue.

As can be seen this device can be used in various situations, in the case of applications for protection in magic simply place one or more SCAP within a room to achieve a good level of protection. To put the personal protection of the witness to be protected on the central point. This chart does not cause saturation but, as the saying goes "There is no good that lasts forever ..." periodically assess with the dowsing process, disarm the assembly, clean and reassemble, this reactive process.

**Special
section
Graphics
diagnostic
area
Health**

Systems

Dowsing in healthcare, constitutes one of the most beautiful jobs of this technique. Depending on the seriousness of the application, only dowsers with a good workout should use it.

The following graphs are sequential in order to establish a diagnosis, however, the most experienced, may start the analysis by graph simplified selection, especially when the clinical picture of the patient, is already predetermined, then follow the indications resulting from this analysis.

Use a Biometer Bovis any time of the analysis in order to determine the percentage of imbalance (charts on pages 13, 15 and 145).

Always use a testimony of his client, the procedure will facilitate the execution of the test dowsing, as the research object lying on the analysis chart and not be necessary to have that person in mind, perhaps unknown, in parallel with each of the questions that are being formulated as it makes the analysis.

Before starting the diagnostics, provide photocopies table on page 138, noting go the results of each of the responses. As can be seen, are included in this table, graphs covering the subtle aspects of human anatomy. Often people suffering from some health problem difficult to diagnose, have some involvement in these areas.

The analysis was based on an explicit request of the patient. Or is aware of this fact? Has its consent to any energy therapy?

How to proceed:

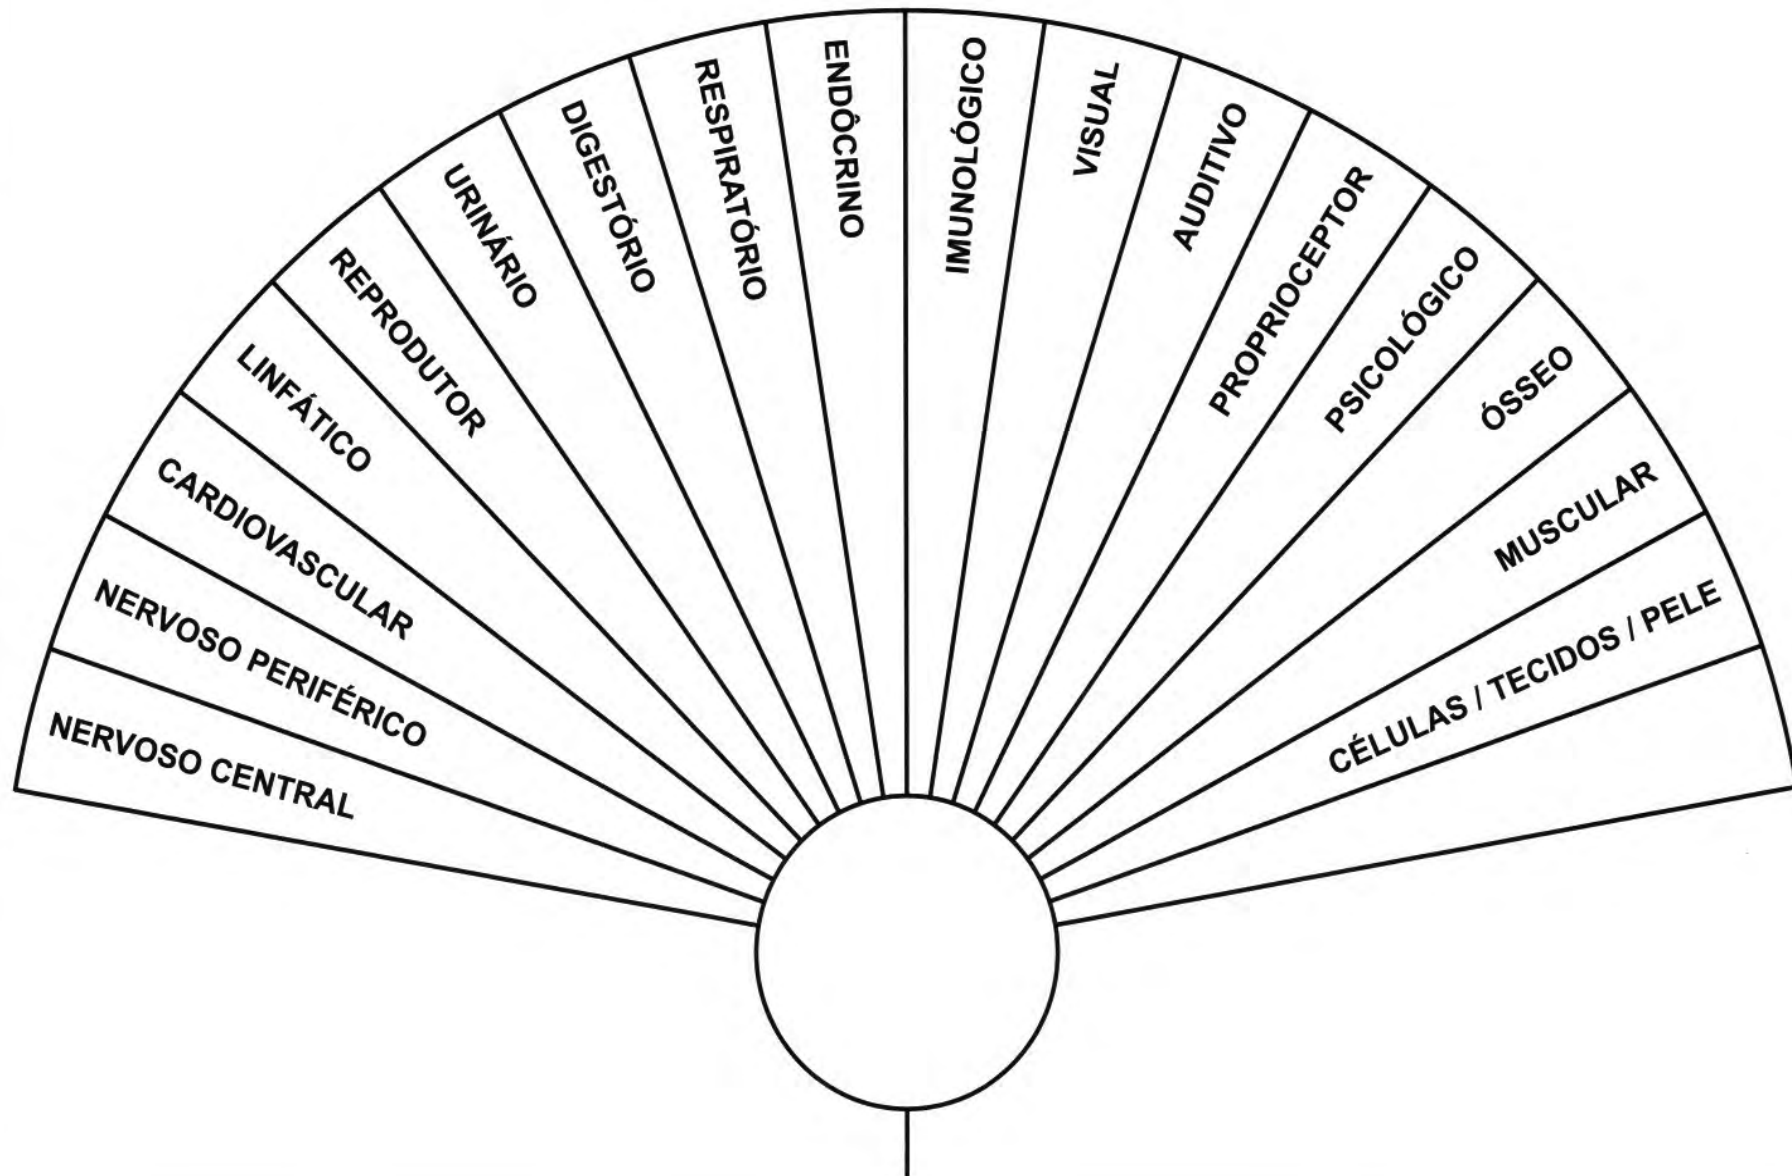

Your customer has a complaint? Say: Stomach pain

Put testimony about the empty circle, throw the pendulum (wired long) and formulate the following question:

"System which is related to stomach pain John Doe?" Repeat the question to exhaust all positive responses.

Annotate all systems with positive response at the end go to the next chart and examine all agencies involved with the outcome of this examination.

SISTEMAS

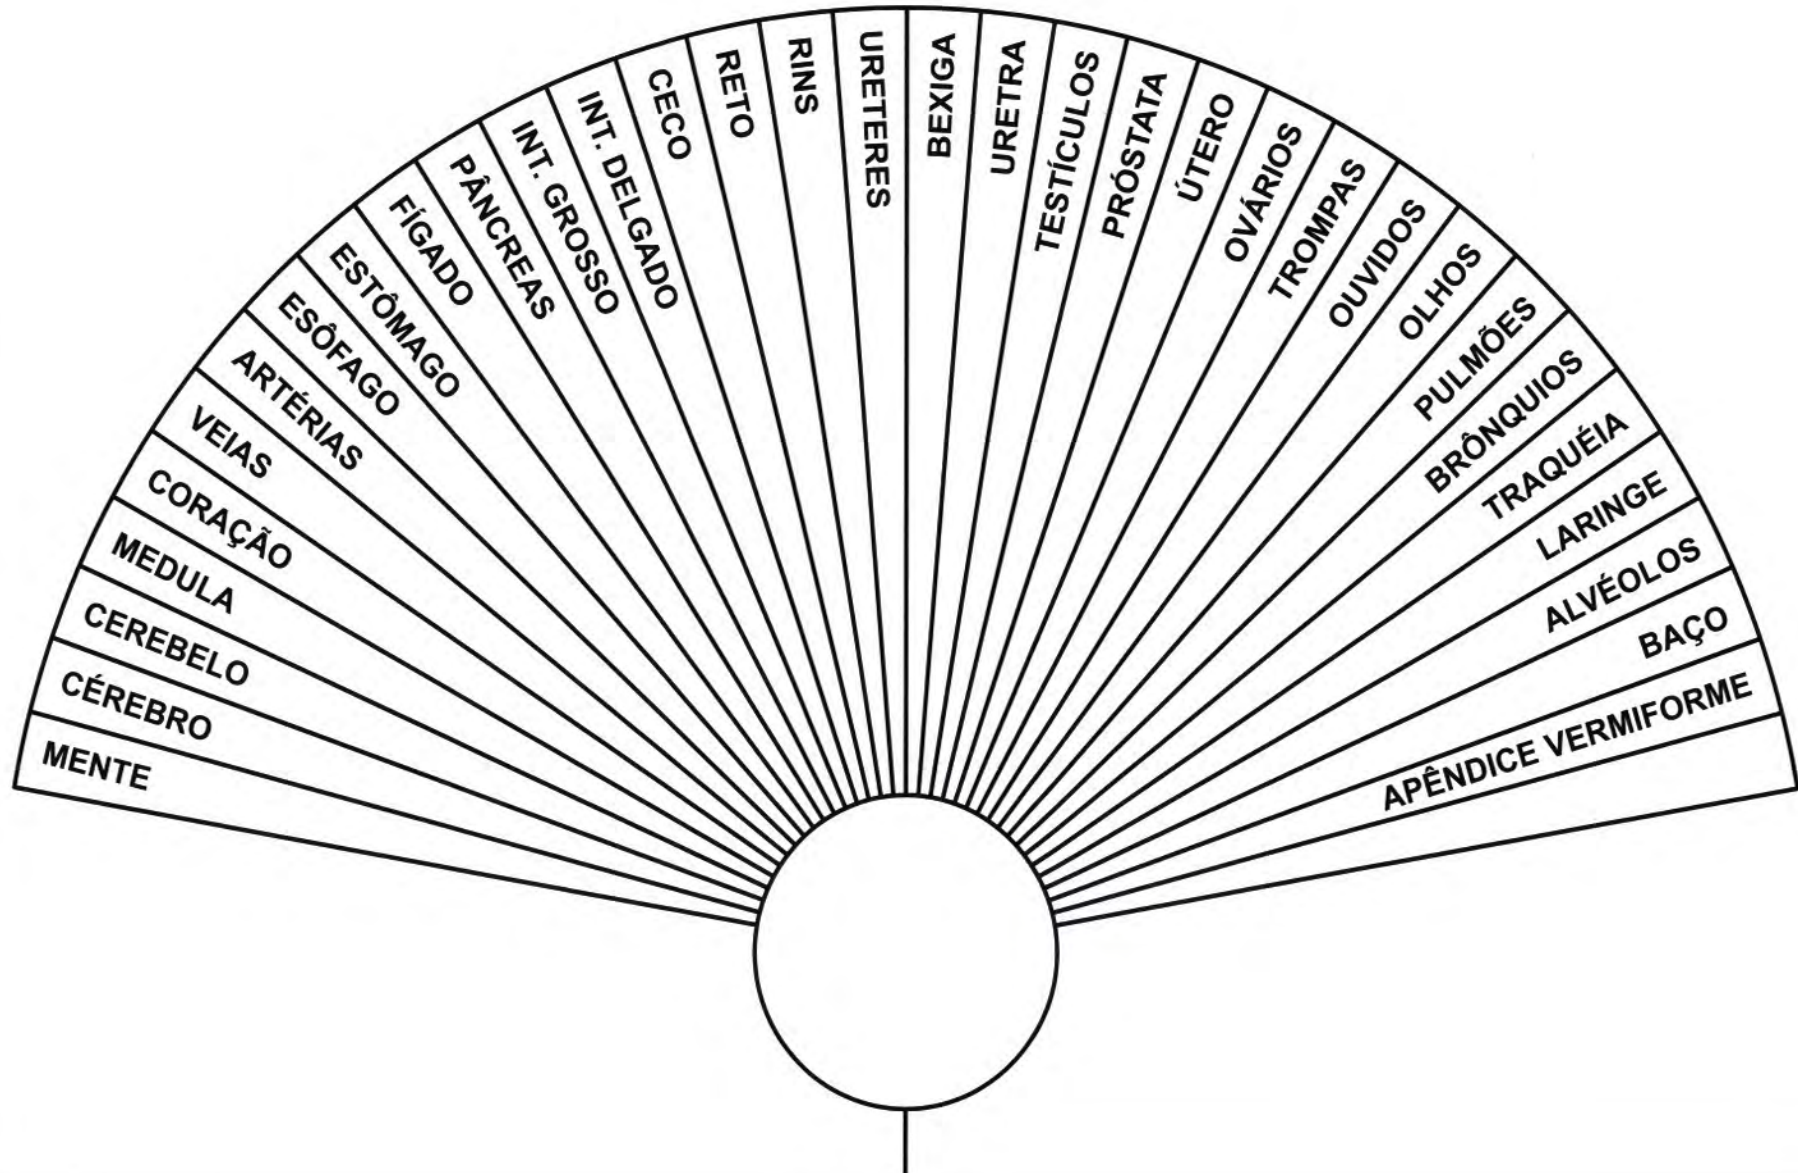

Analysis of organ

Continue the analysis, using the same recommendations of the graphical system, now investigating all organs, own the systems that had some relation to the patient's complaints, detected in the previous graph.

Continue using a Biometer also to determine the percentage of imbalance, each organ investigated. The bodies with higher percentages should be the first to be treated in any type of energy therapy.

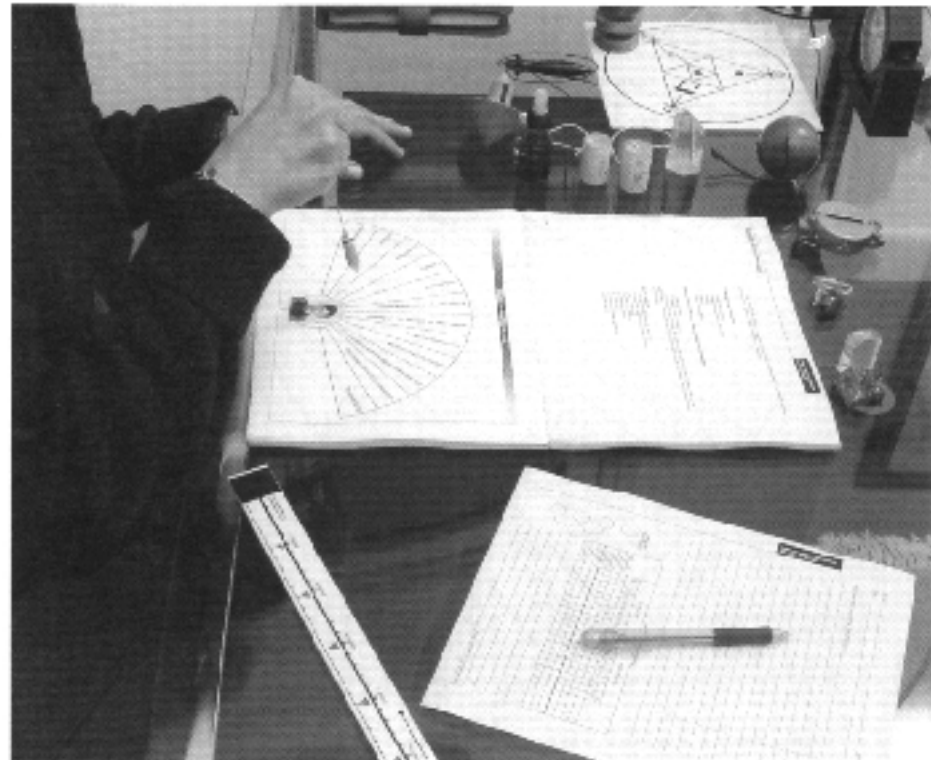

ÓRGÃOS

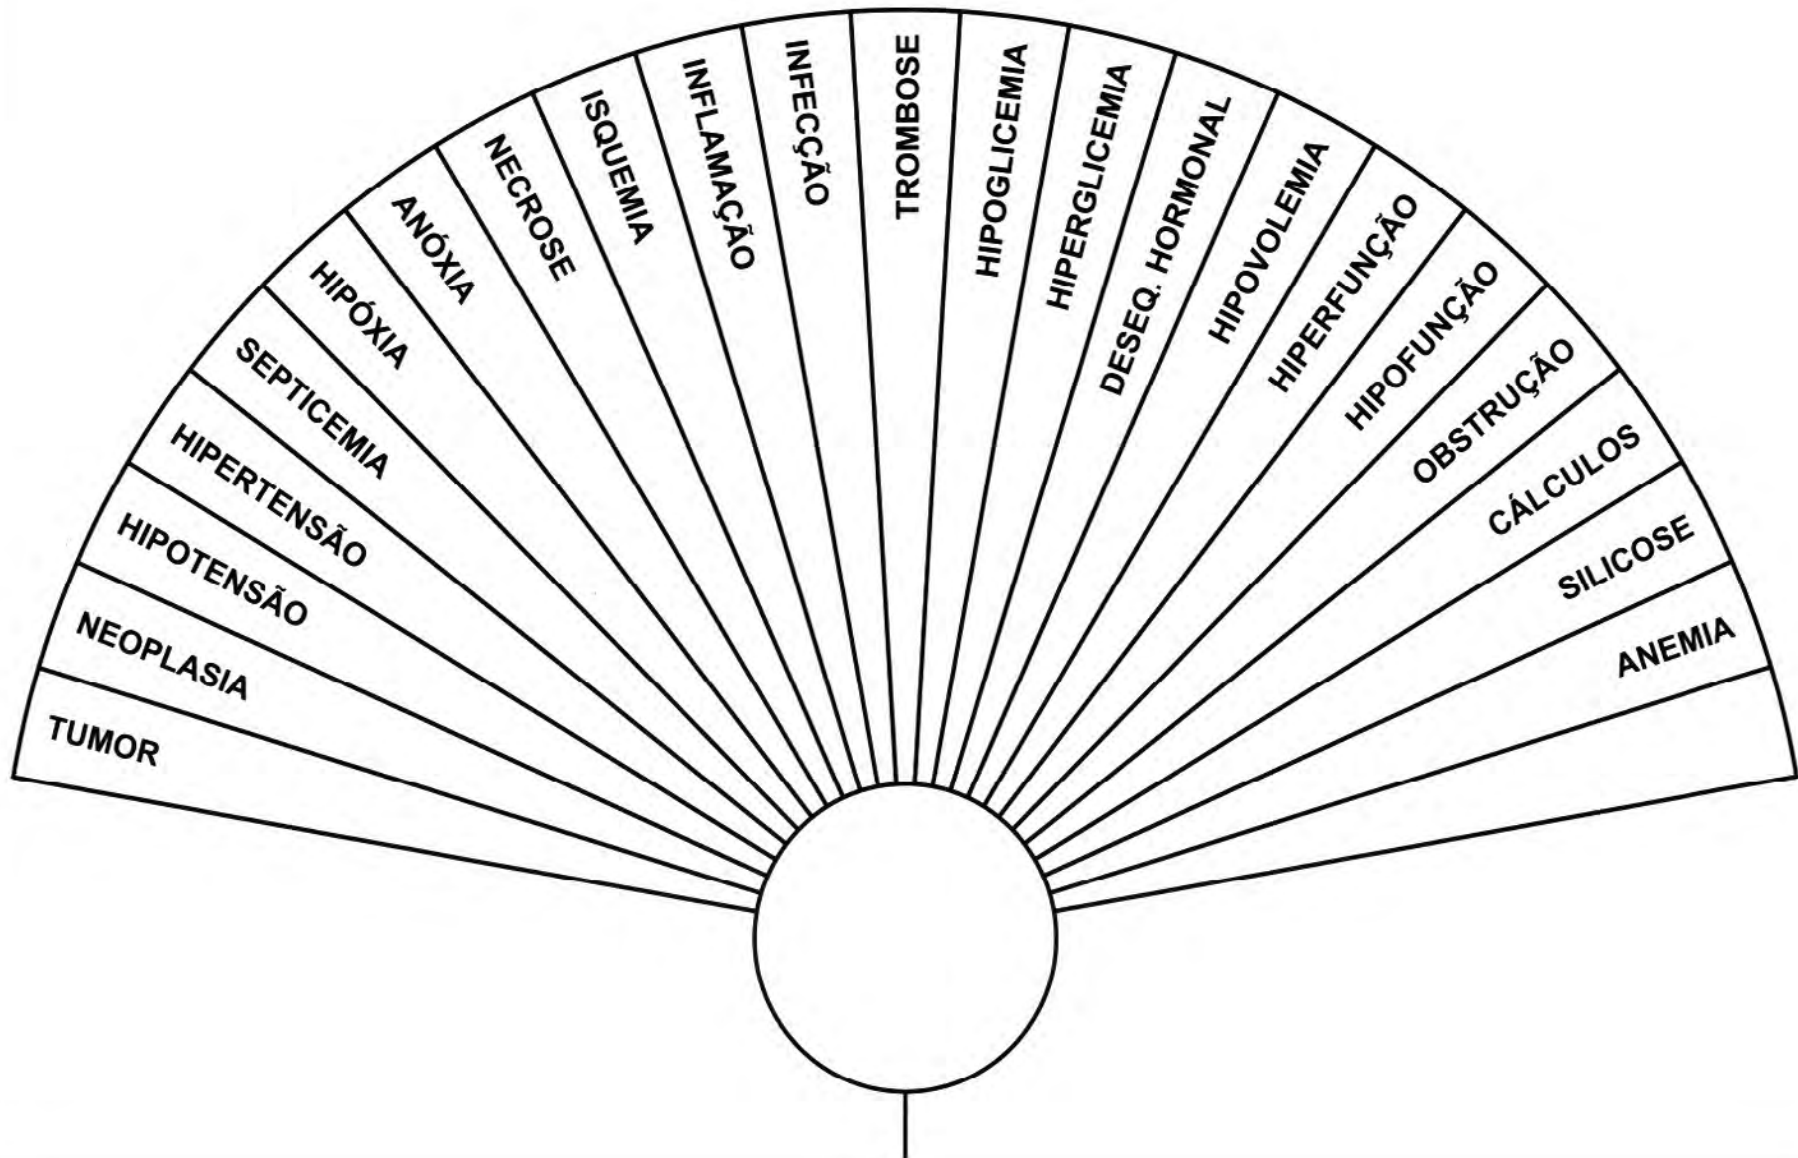

Terms

In this chart will analyze the conditions that determined the imbalance of the organs.

Keep logging on the table all the observed data, and their biometric values.

CONDIÇÕES

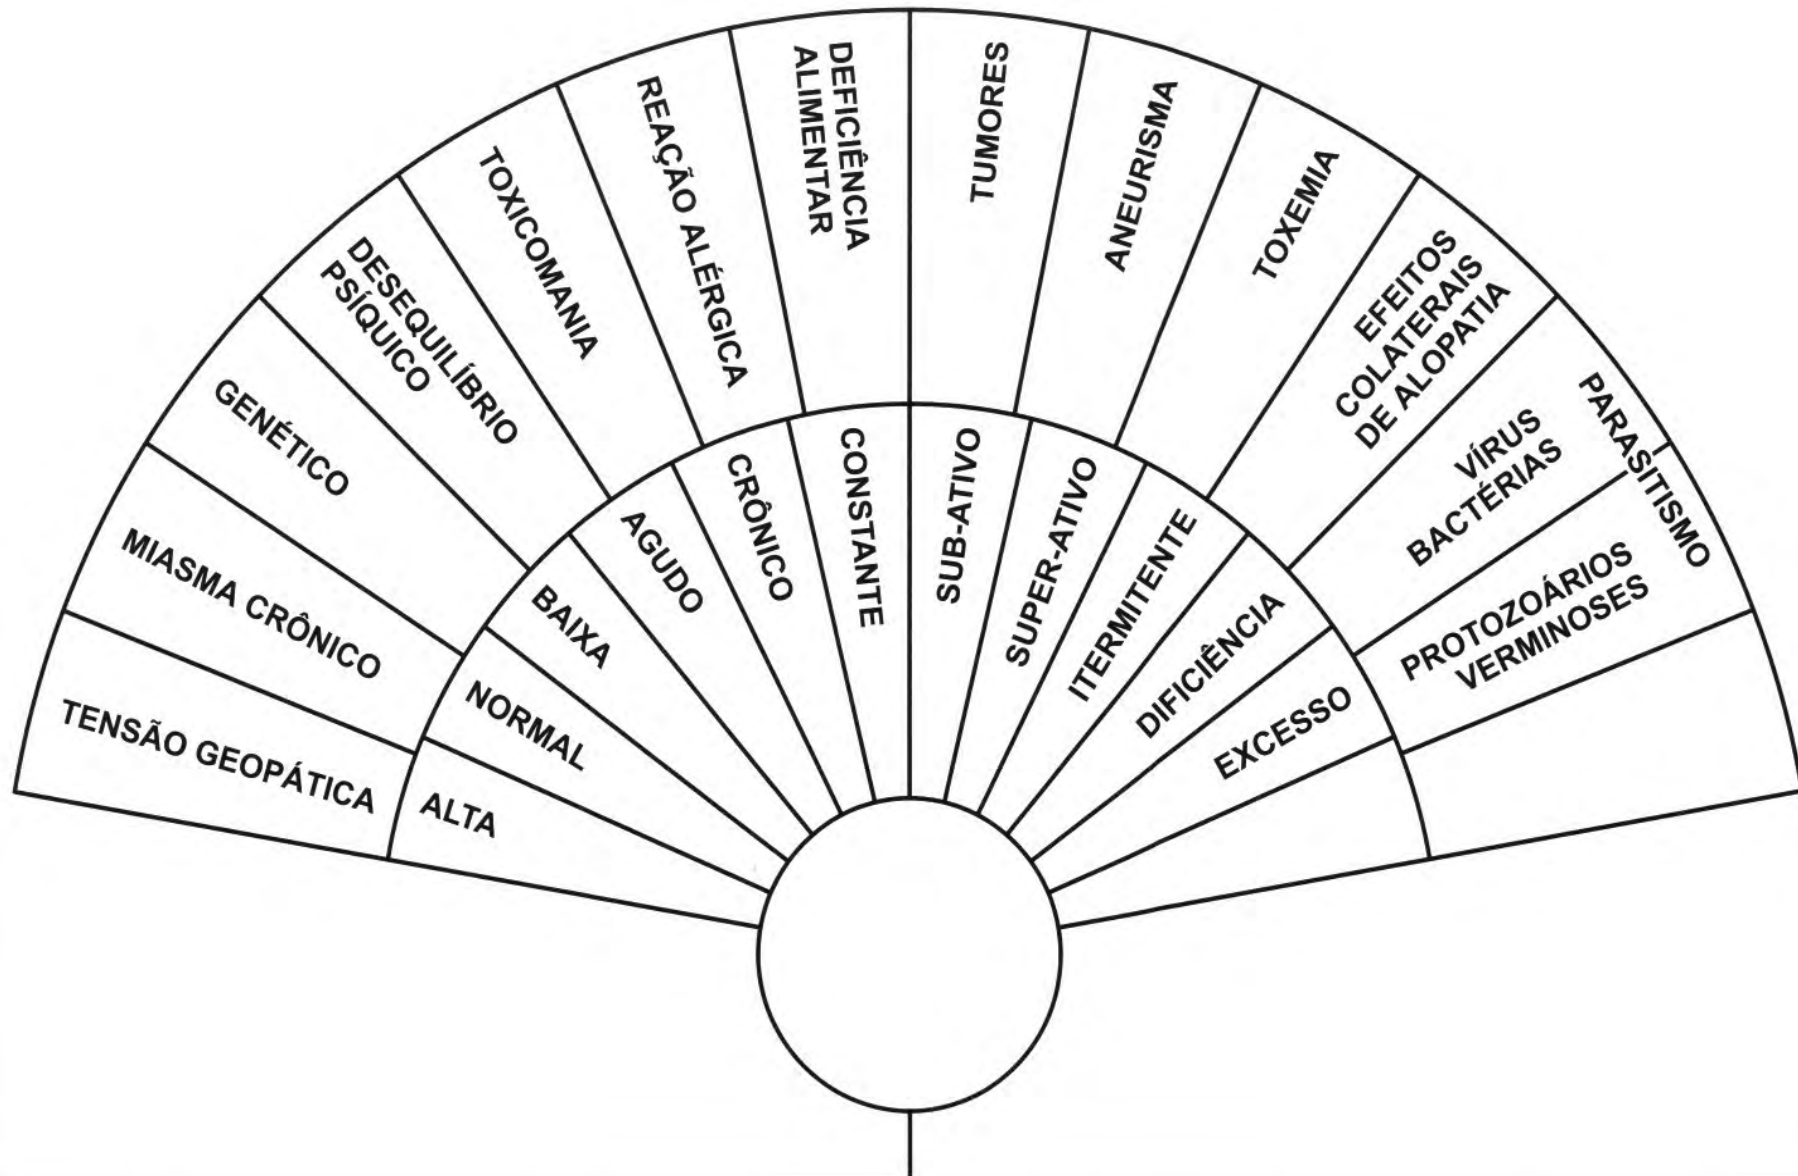

Causes 1

From the standpoint of strictly dowsing, this graph allows detecting the causative factors of the disease that the patient has.

Proceed to the first analysis using the external table and the graph, following the inside of it.

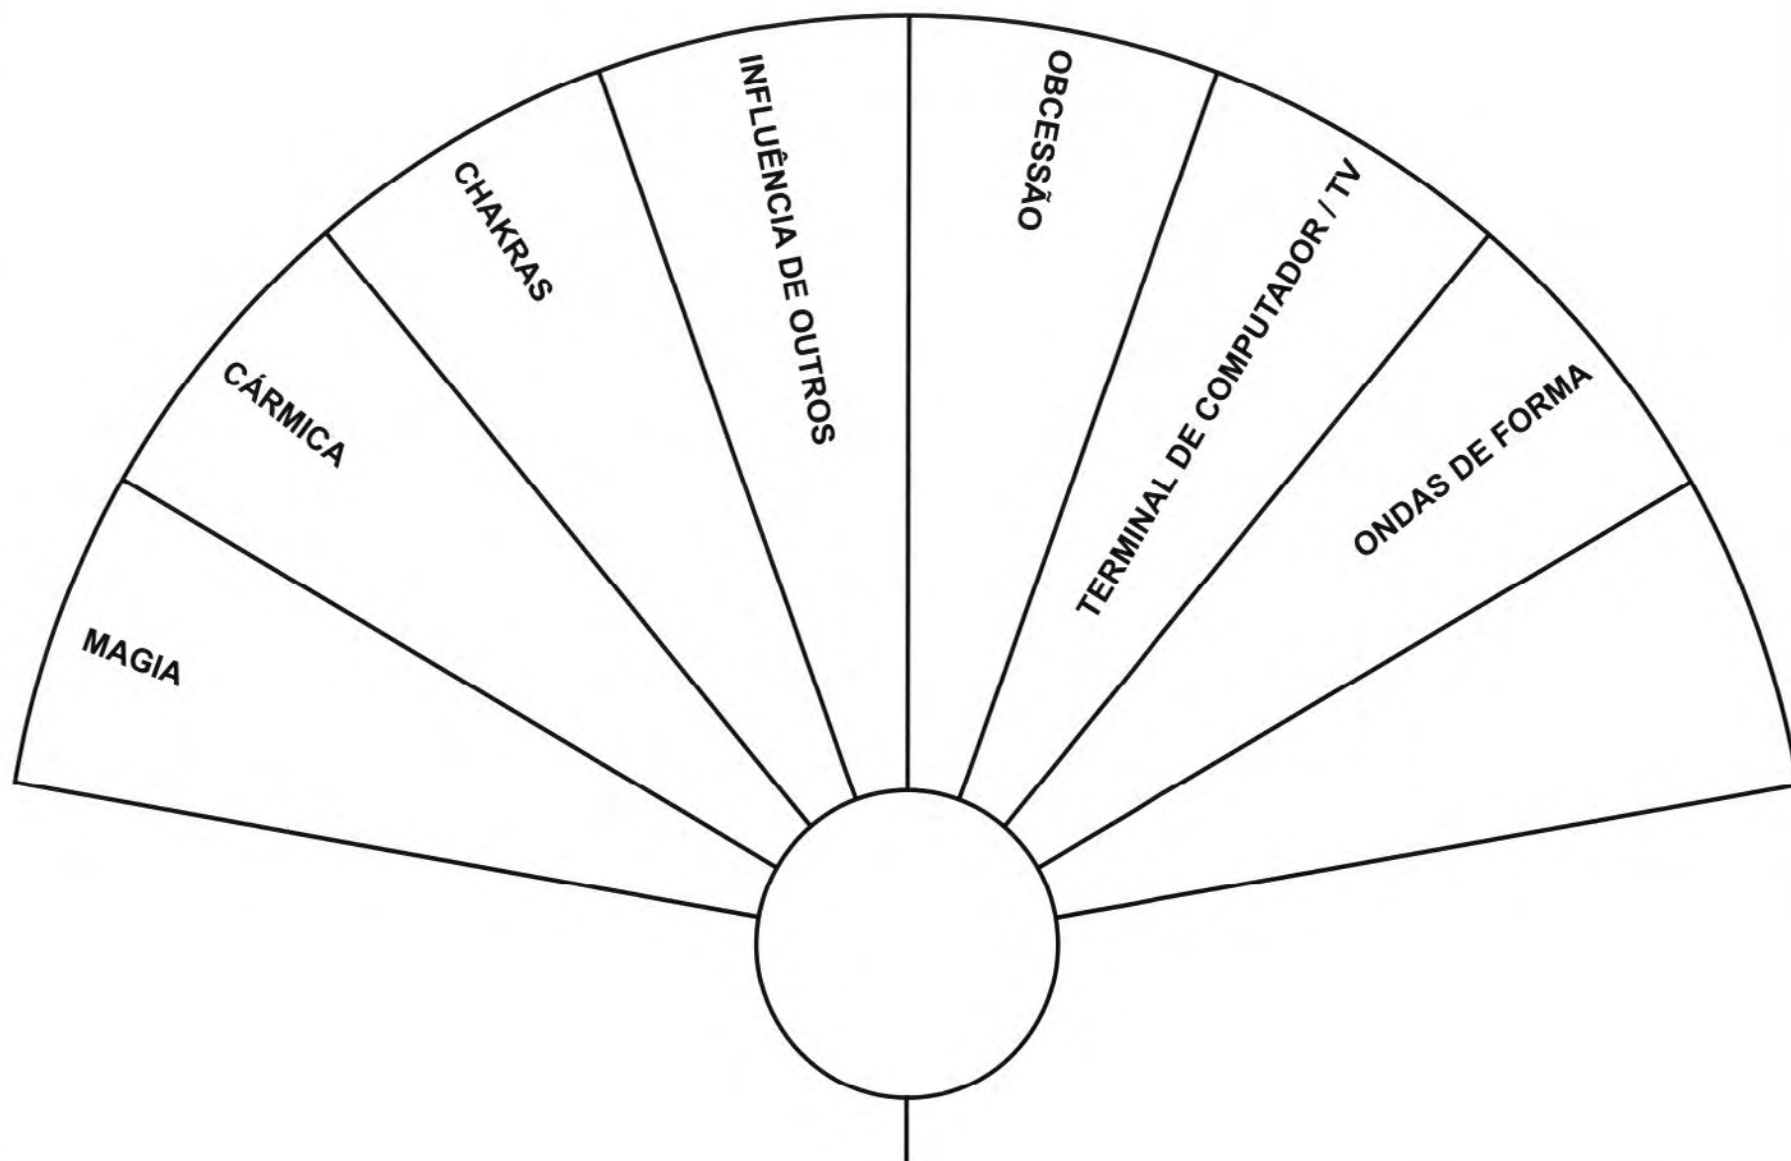

CAUSAS 1

2 Causes

This graph is a continuation of the previous aspects presenting however normally regarded as "magic subjective or" If you get some positive response, further investigation can be carried out by means of the set of graphs in the special diagnostic esoteric.

CAUSAS 2

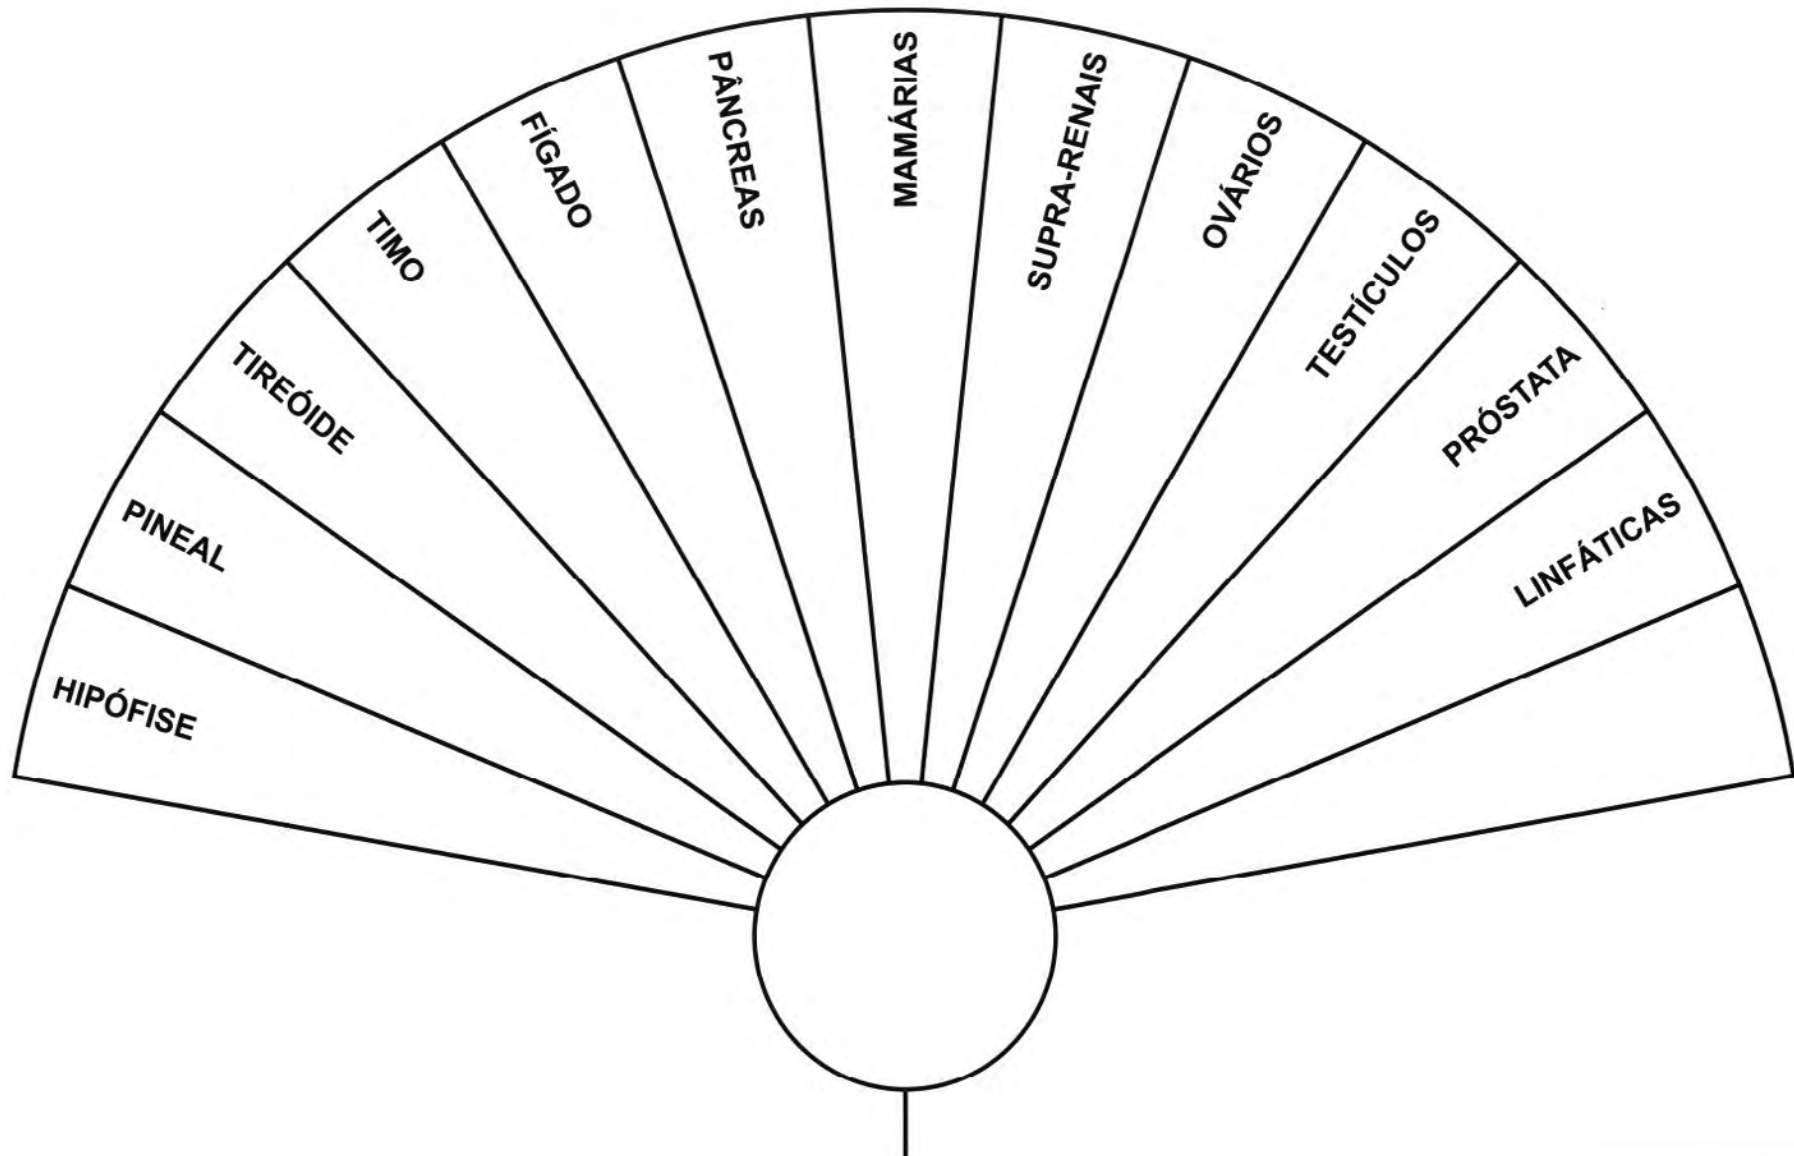

Glands

Continue the analysis, using the same recommendations of the graphical system, now investigating possible links to hormonal imbalances, with data collected up to this point.

Keep logging on the table all the observed data, and their biometric values.

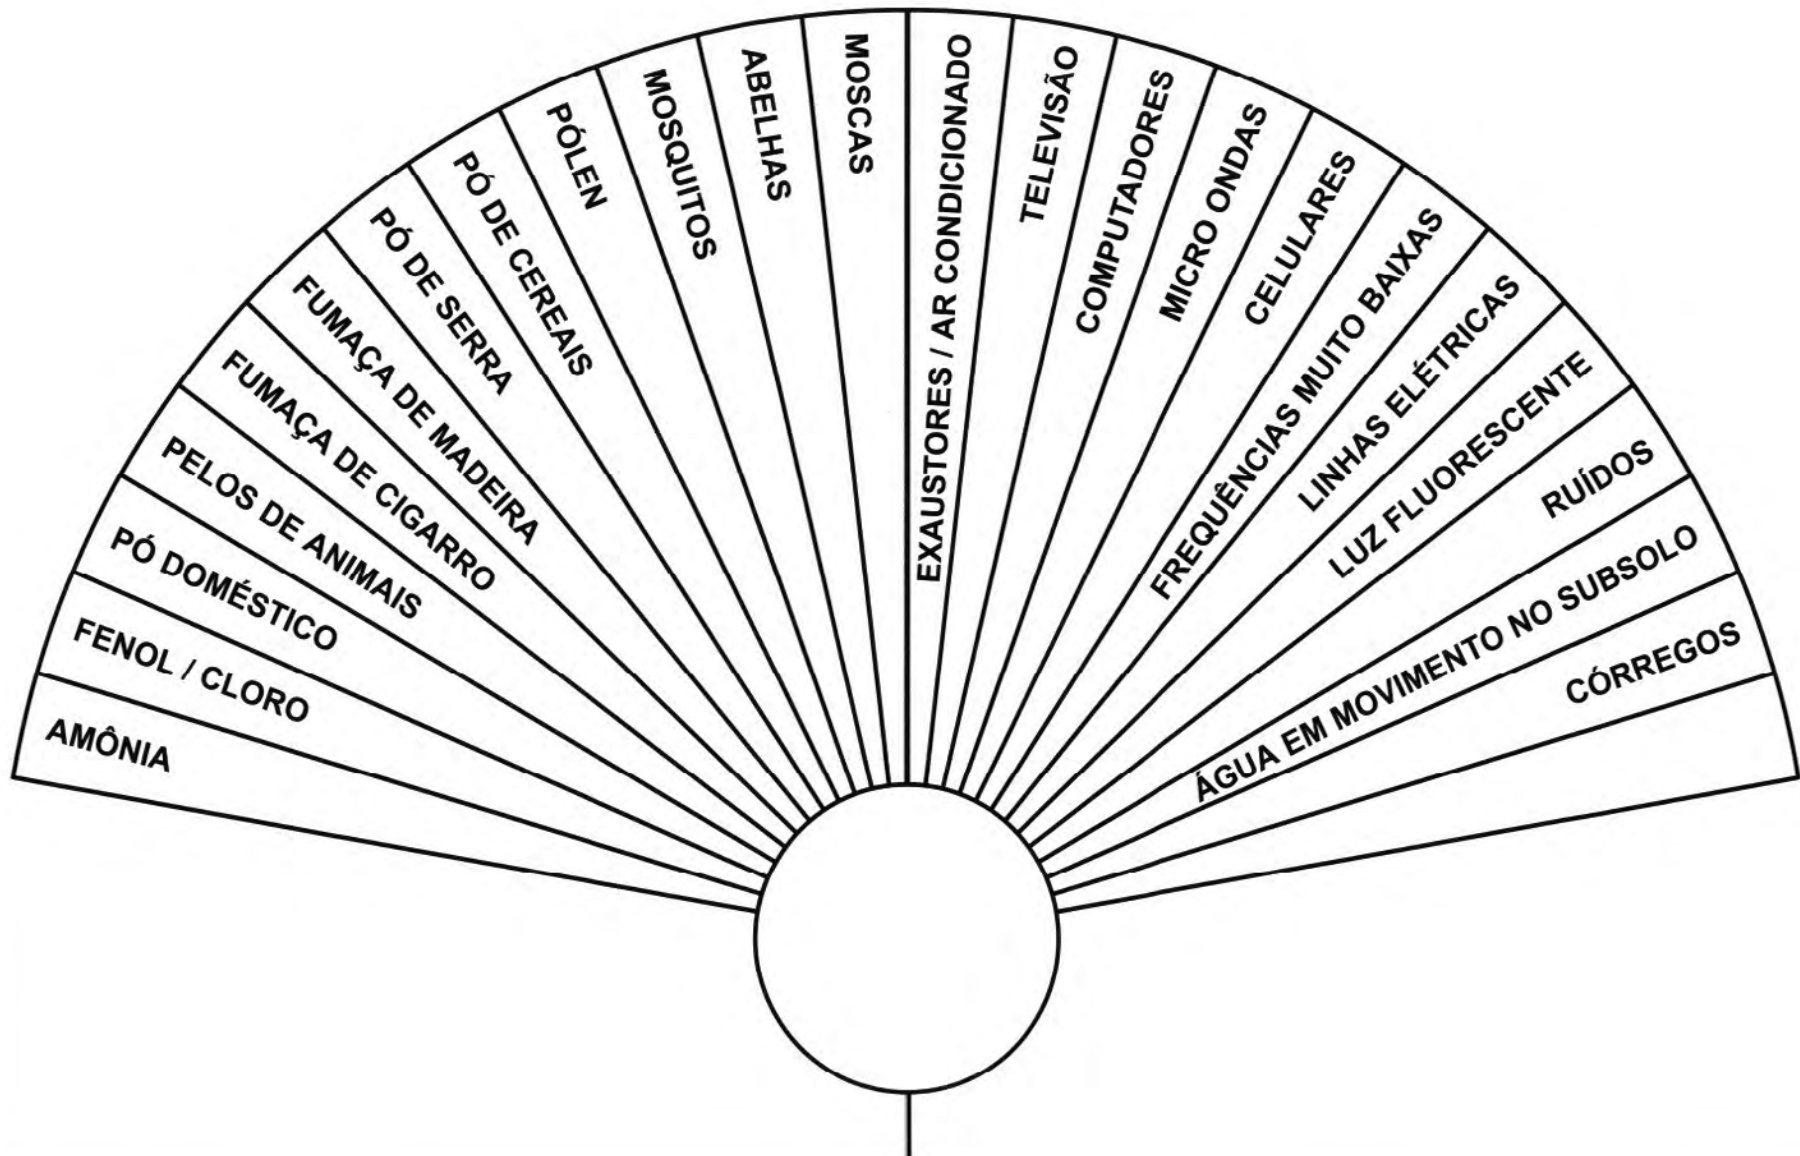

GLÂNDULAS

Allergies and adverse effects

It appears nowadays an increasing number of allergy in urban centers, arising no doubt from constant exposure to aggressive agents (cleaners, fumes, paints, food preservatives, electromagnetic pollution, etc.)..

ALERGIAS E EFEITOS ADVERSOS

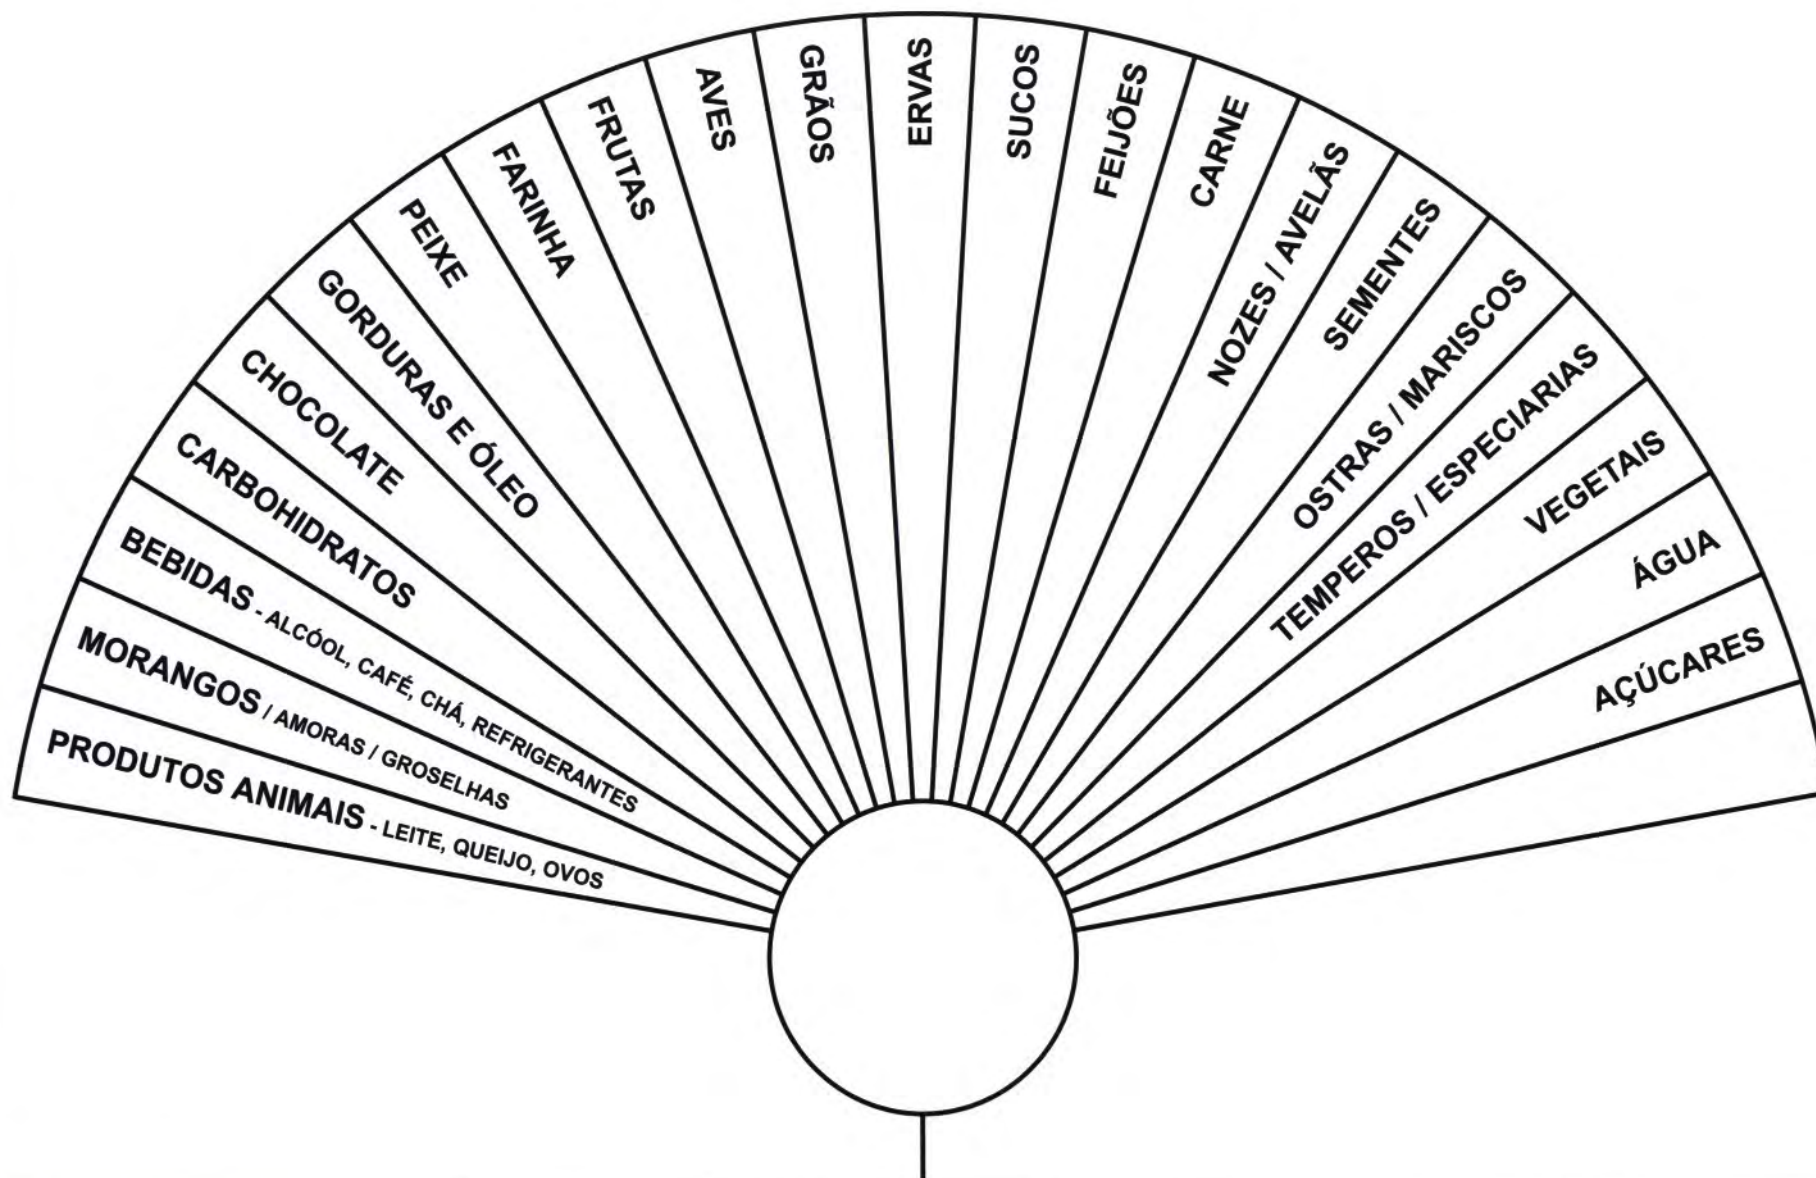

Nutrition and Food Allergies

Through this chart can be analyzed both qualities, food shortages and compatibilities, as the negative effects of eating certain products.

È well known fact that many people are allergic to chocolate, less well known however allergy to milk and its derivatives, and complications arising from an intestinal feeding.

NUTRIÇÃO E ALERGIAS ALIMENTARES

Psychic states 1

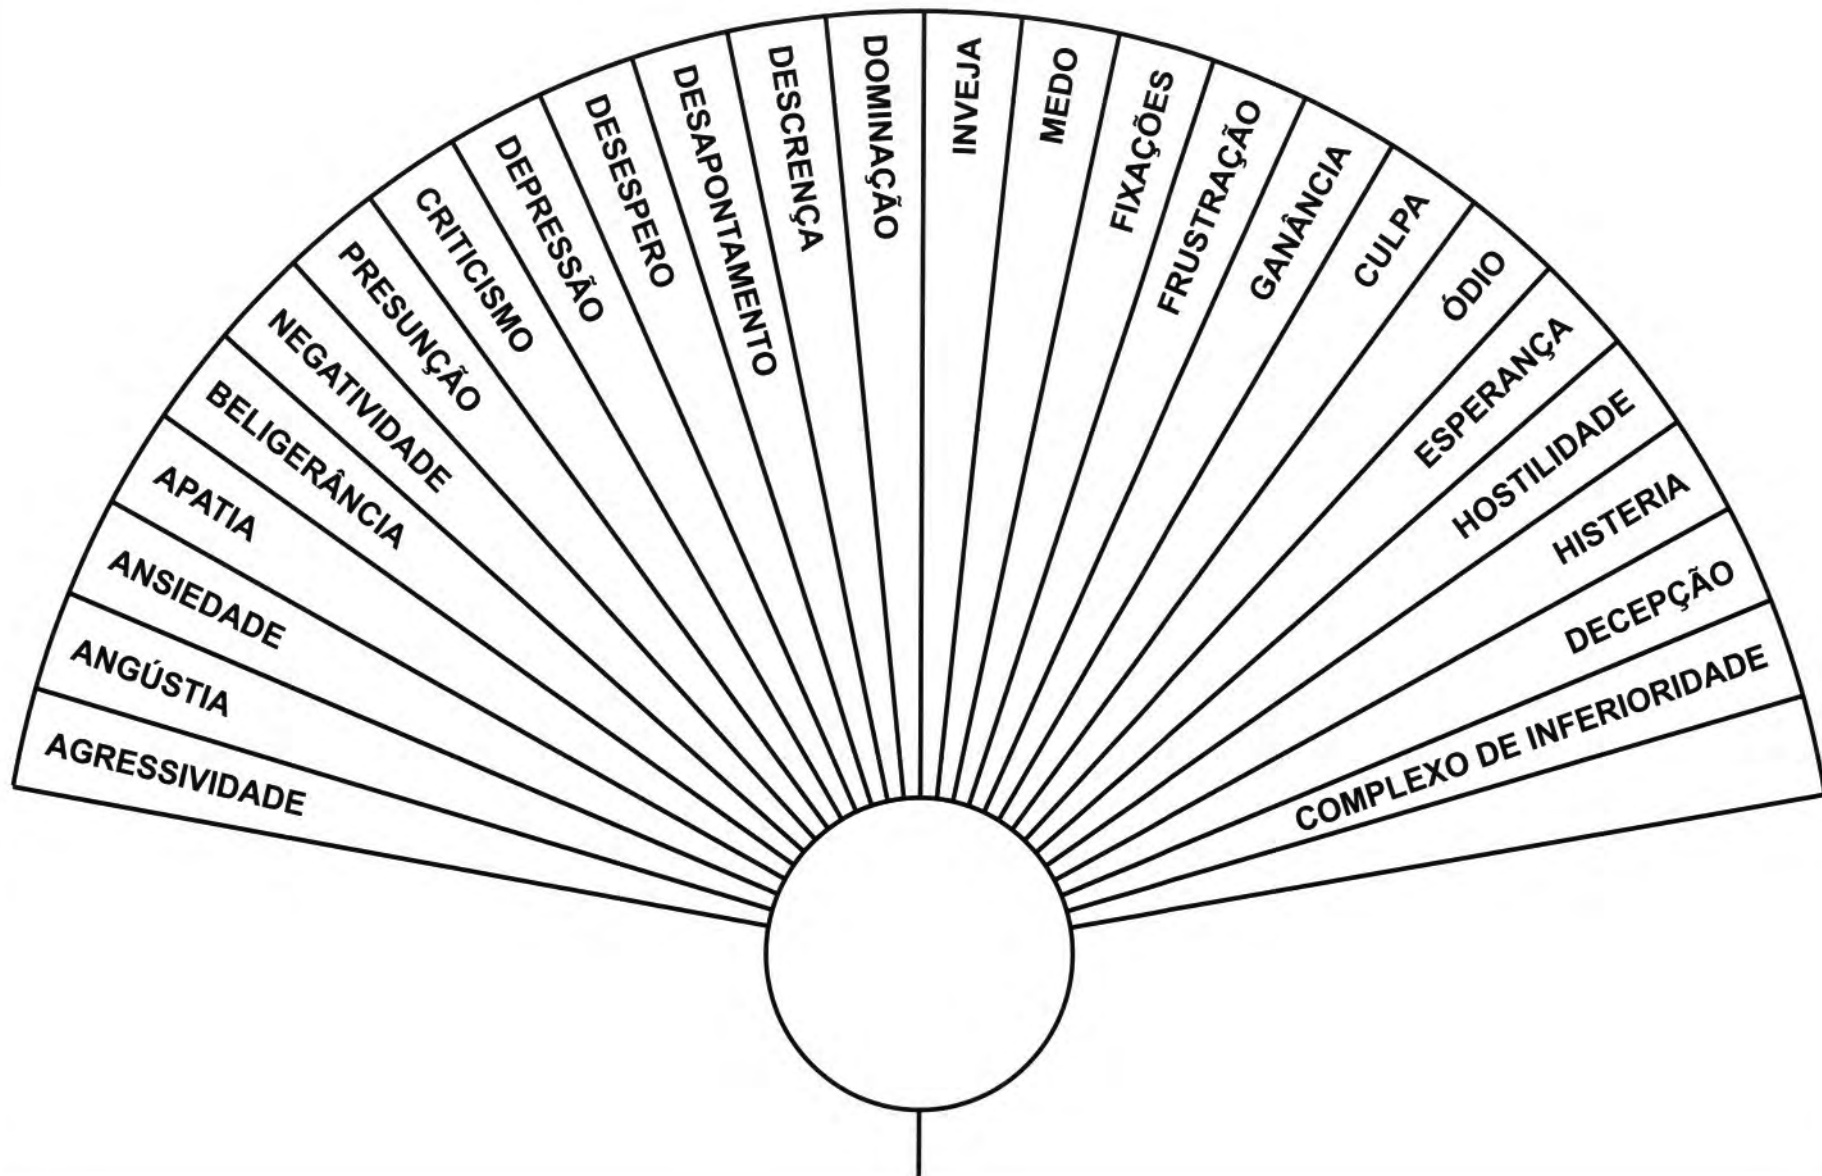

"There are no diseases, there are sick"

We become sick as a result of emotional factors the most varied and disparate, mostly in a totally unconscious. So unconscious that we refuse to believe that.

Investigate carefully charts: United
psychic 1,
Psychic states 2, Personal
motivations, compatibility in
relationships.

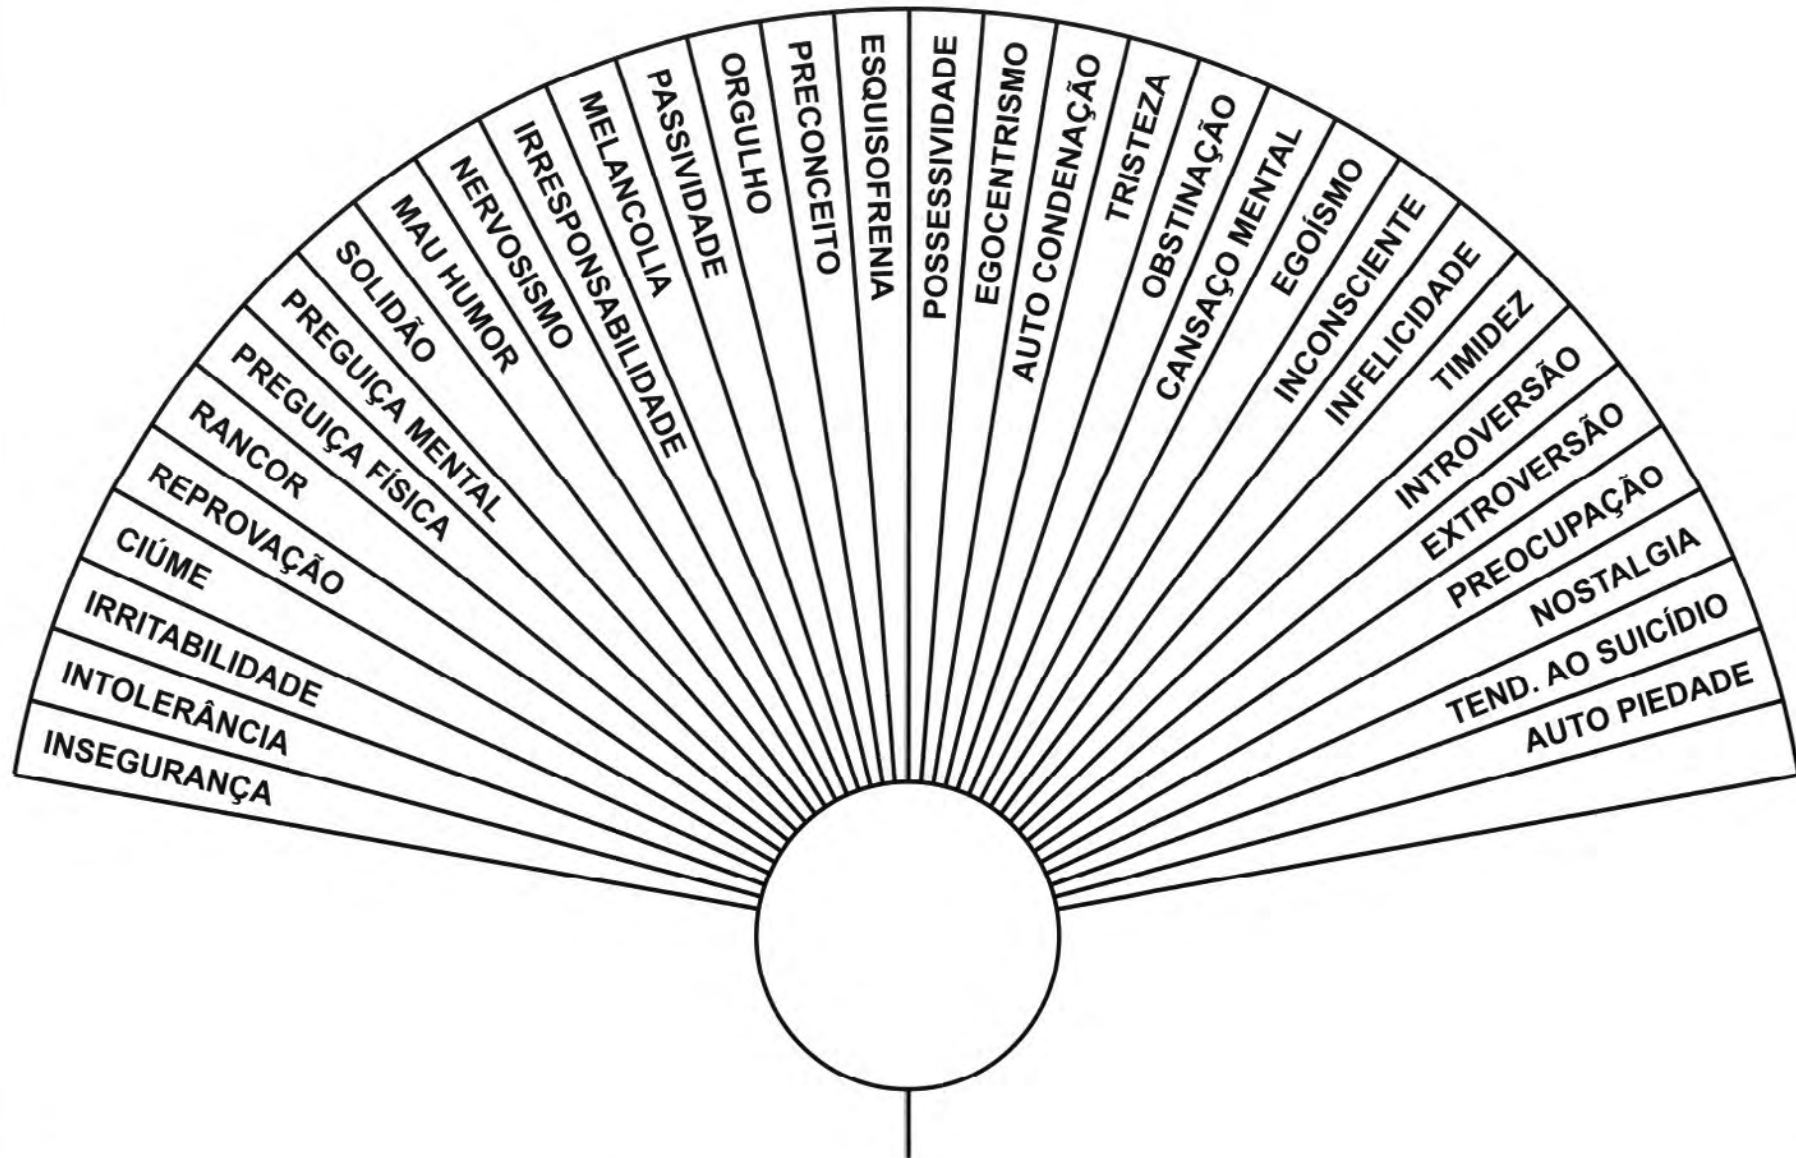

The four graphs are complementary. With the information gathered so far, it is possible to establish a final diagnosis. The next step is to determine the appropriate treatment.

ESTADOS PSÍQUICOS 1

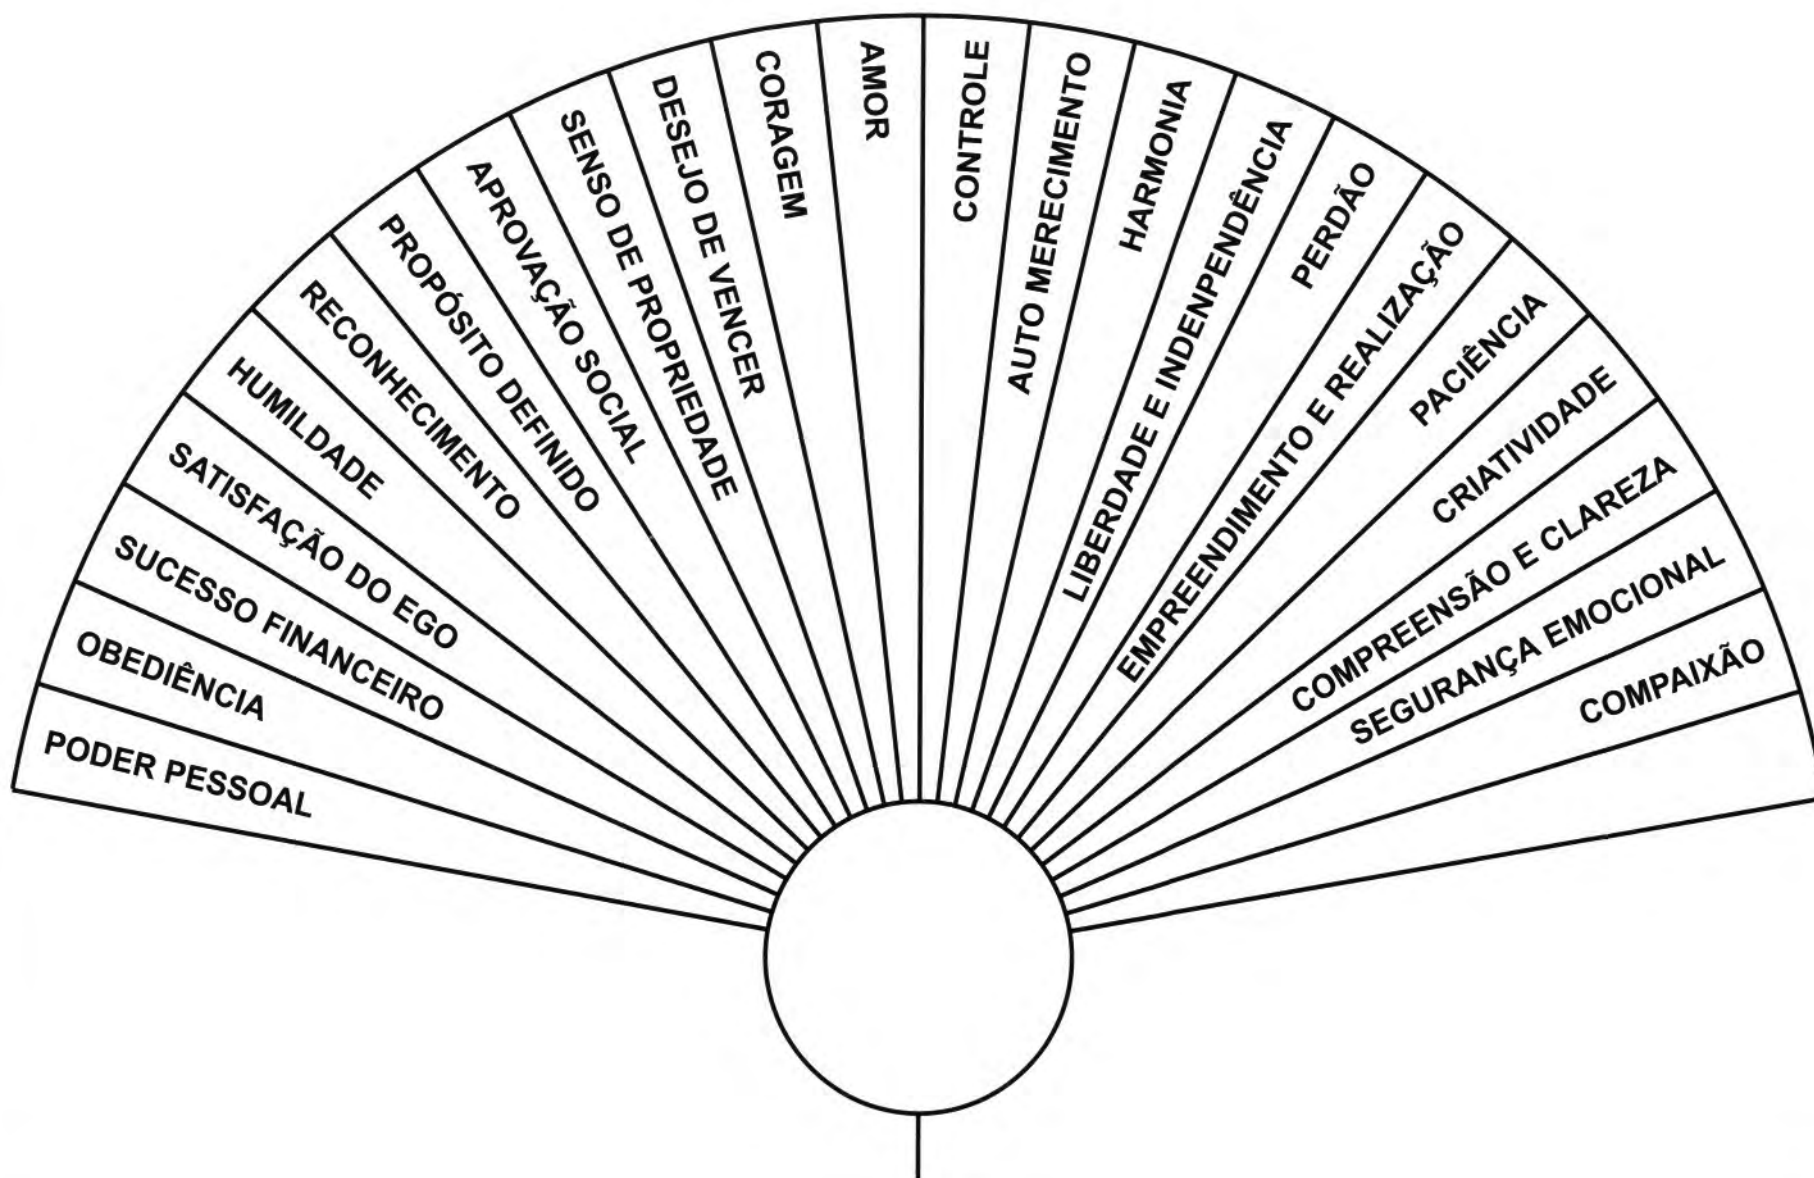

Psychic states 2

ESTADOS PSÍQUICOS 2

Personal motivations

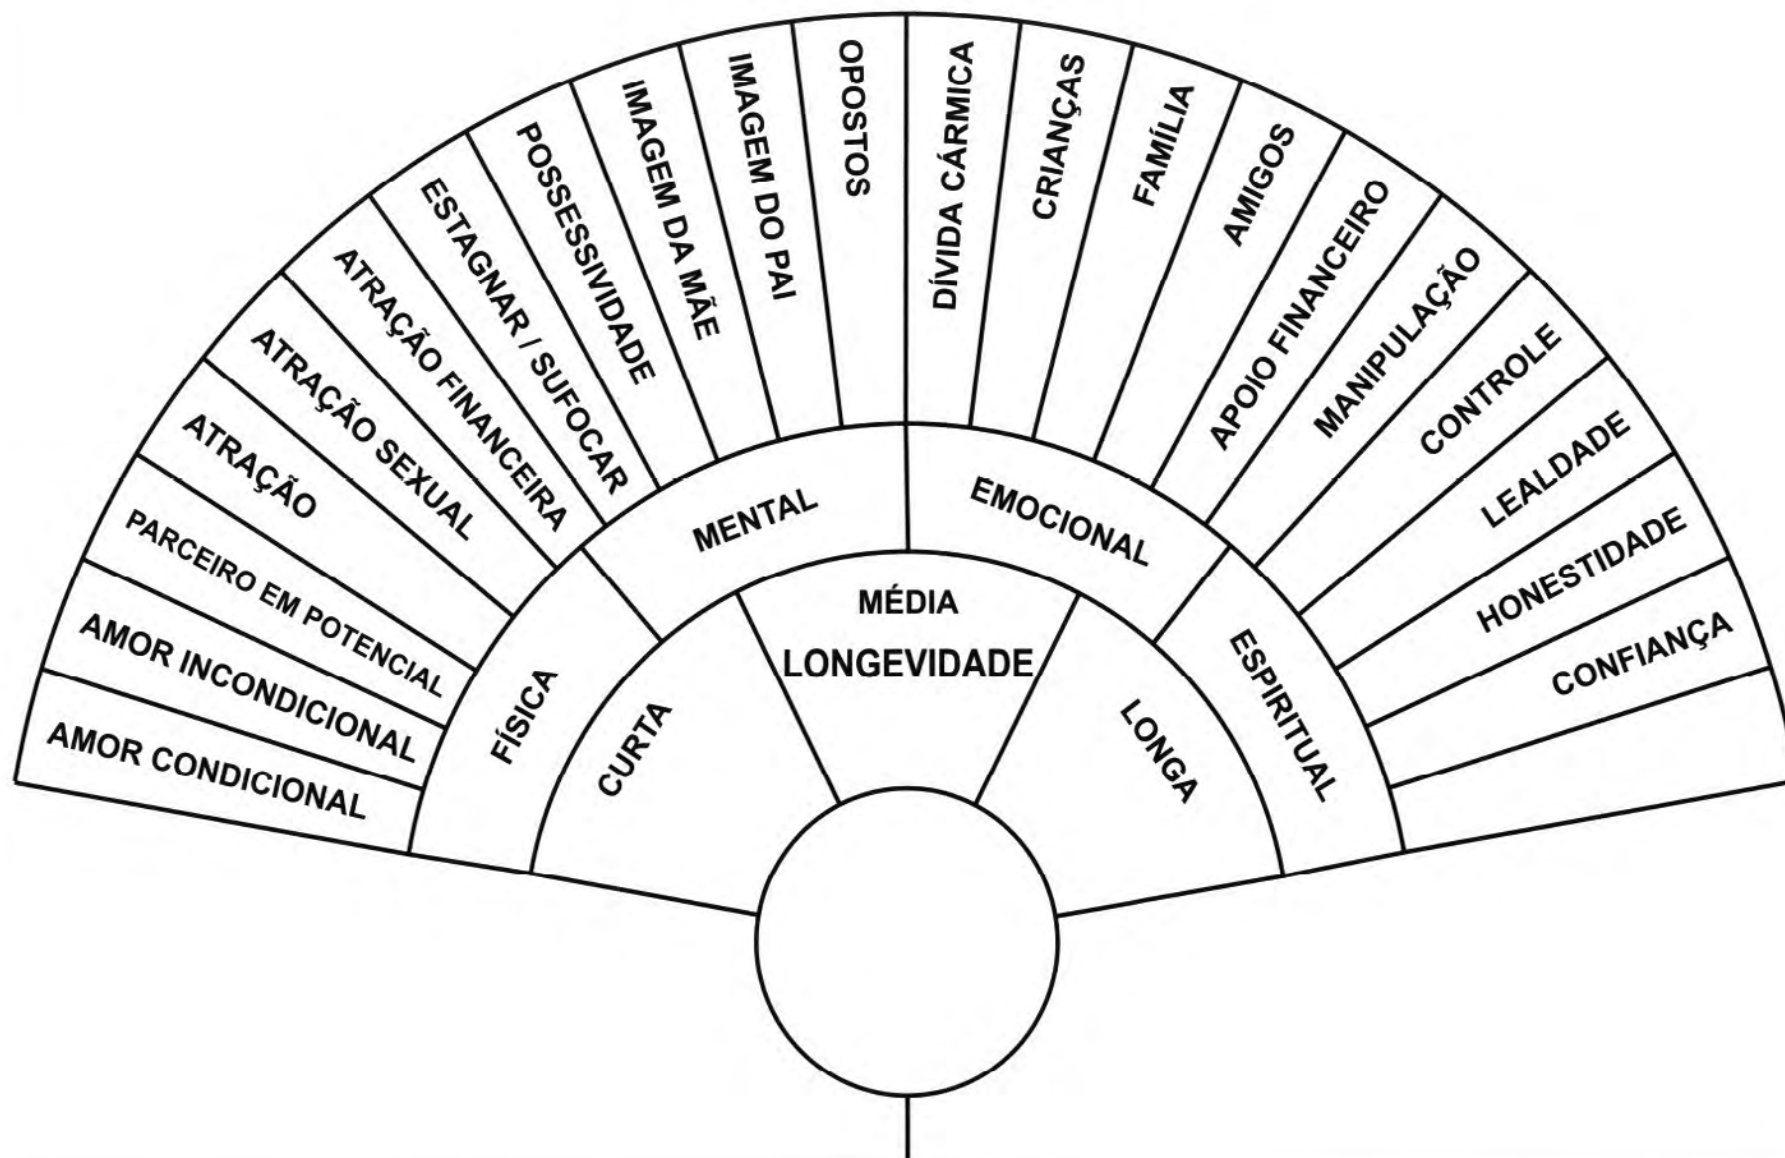

MOTIVAÇÕES PESSOAIS

Compatibility in relationships

Search first the factors present in the outer ring of the table after this done, search the middle and inner rings.

COMPATIBILIDADE EM RELACIONAMENTOS

Simplified selection

If you already have a preliminary diagnosis of your customer and want to shorten the analysis process, starting directly from the graph selection simplified.

Investigate subtle aspects

Chakra balancing
Because of imbalance of the
chakras: Subativo
Overactive
Lack of coordination

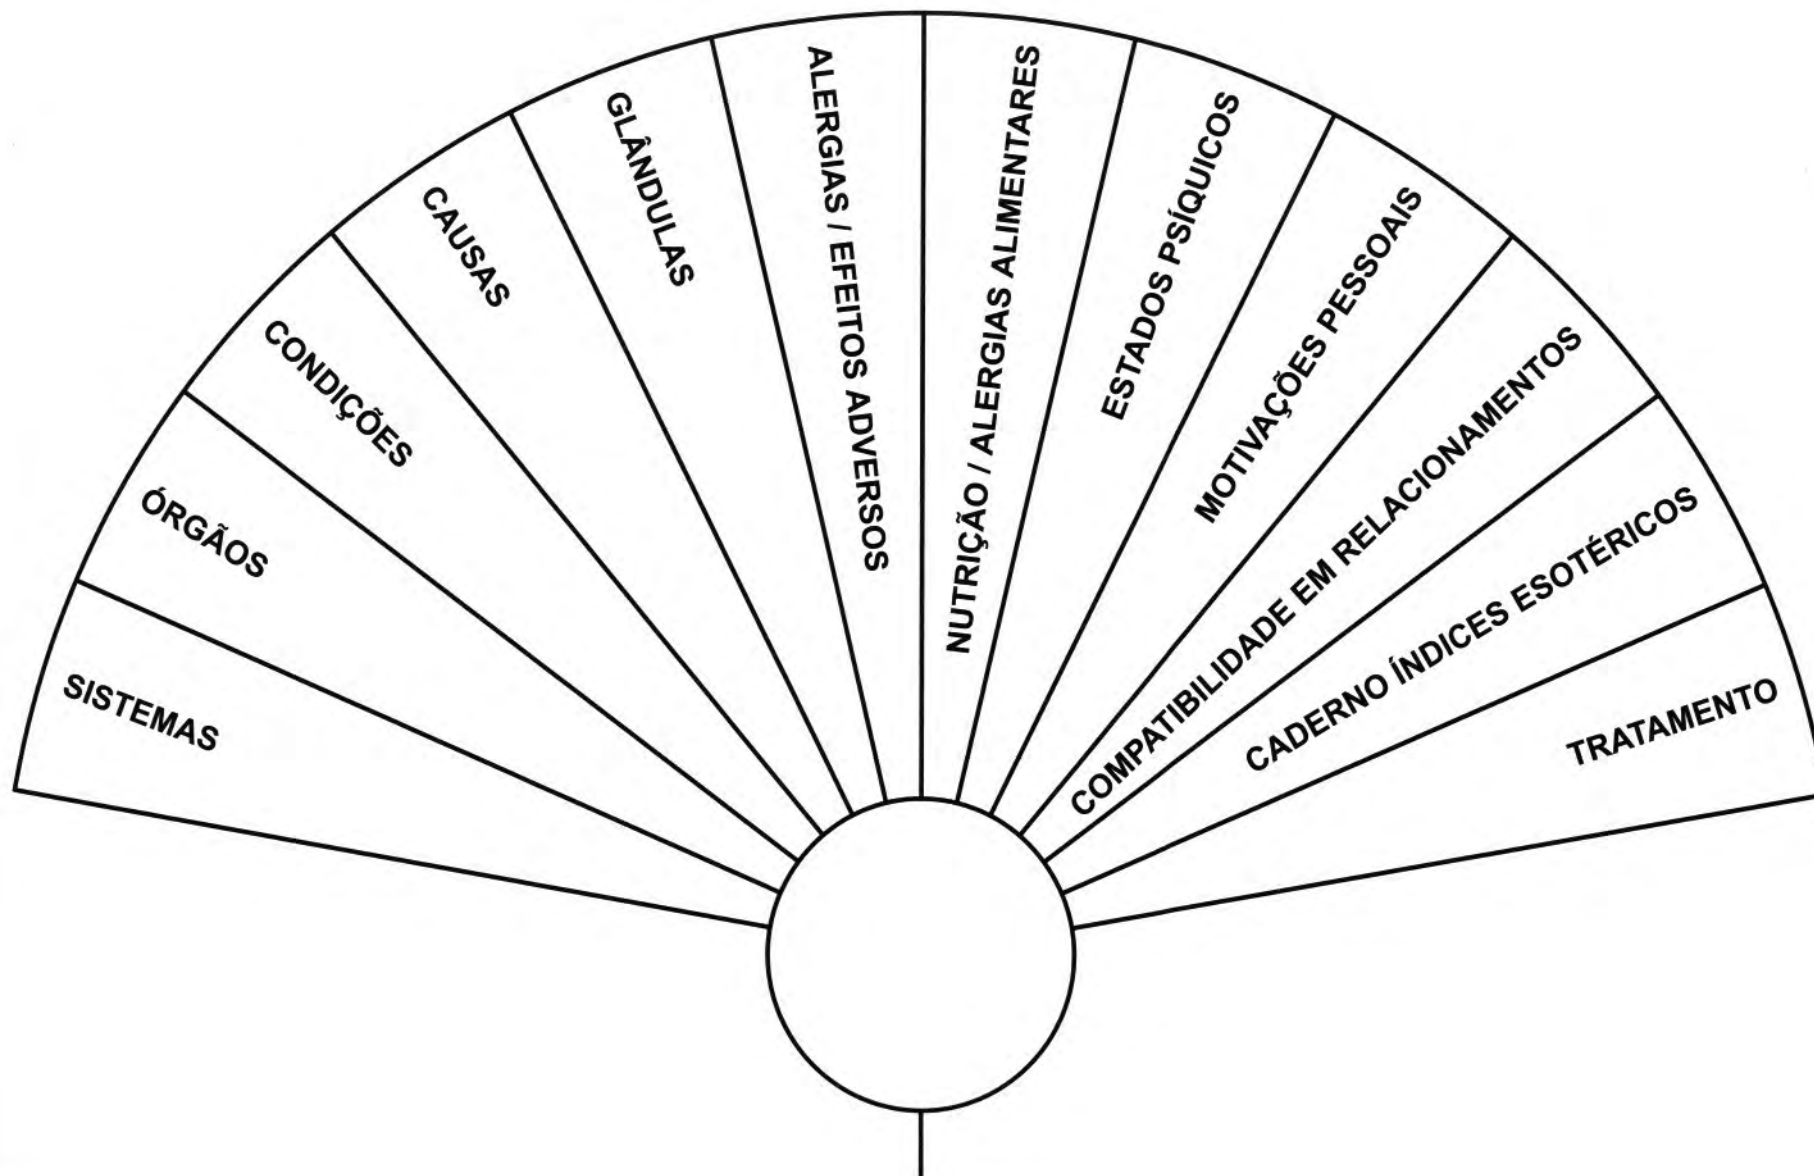

How-ray energy is manifesting itself in bodies

Geopathic stress
(See specifications on Geobiology)
All patients residing in places with high geopathic stress, not react positively to any treatment while the pattern is not rebalanced or pass to reside elsewhere.

Causes "magical"

(See book about esoteric aspects)
Imbalances psychic and esoteric order
Auto-enchantment
Interference traumatic
experience psychic
astral Poisons
Behavioral patterns obsolete
Implant psychic

SELEÇÃO SIMPLIFICADA

Treatment

Diagnose treatment techniques applicable to the case studied

Some techniques when used in conjunction with dowsing / radionics provide good results: homeopathy, flower essences, Schüssler salts, chromotherapy.

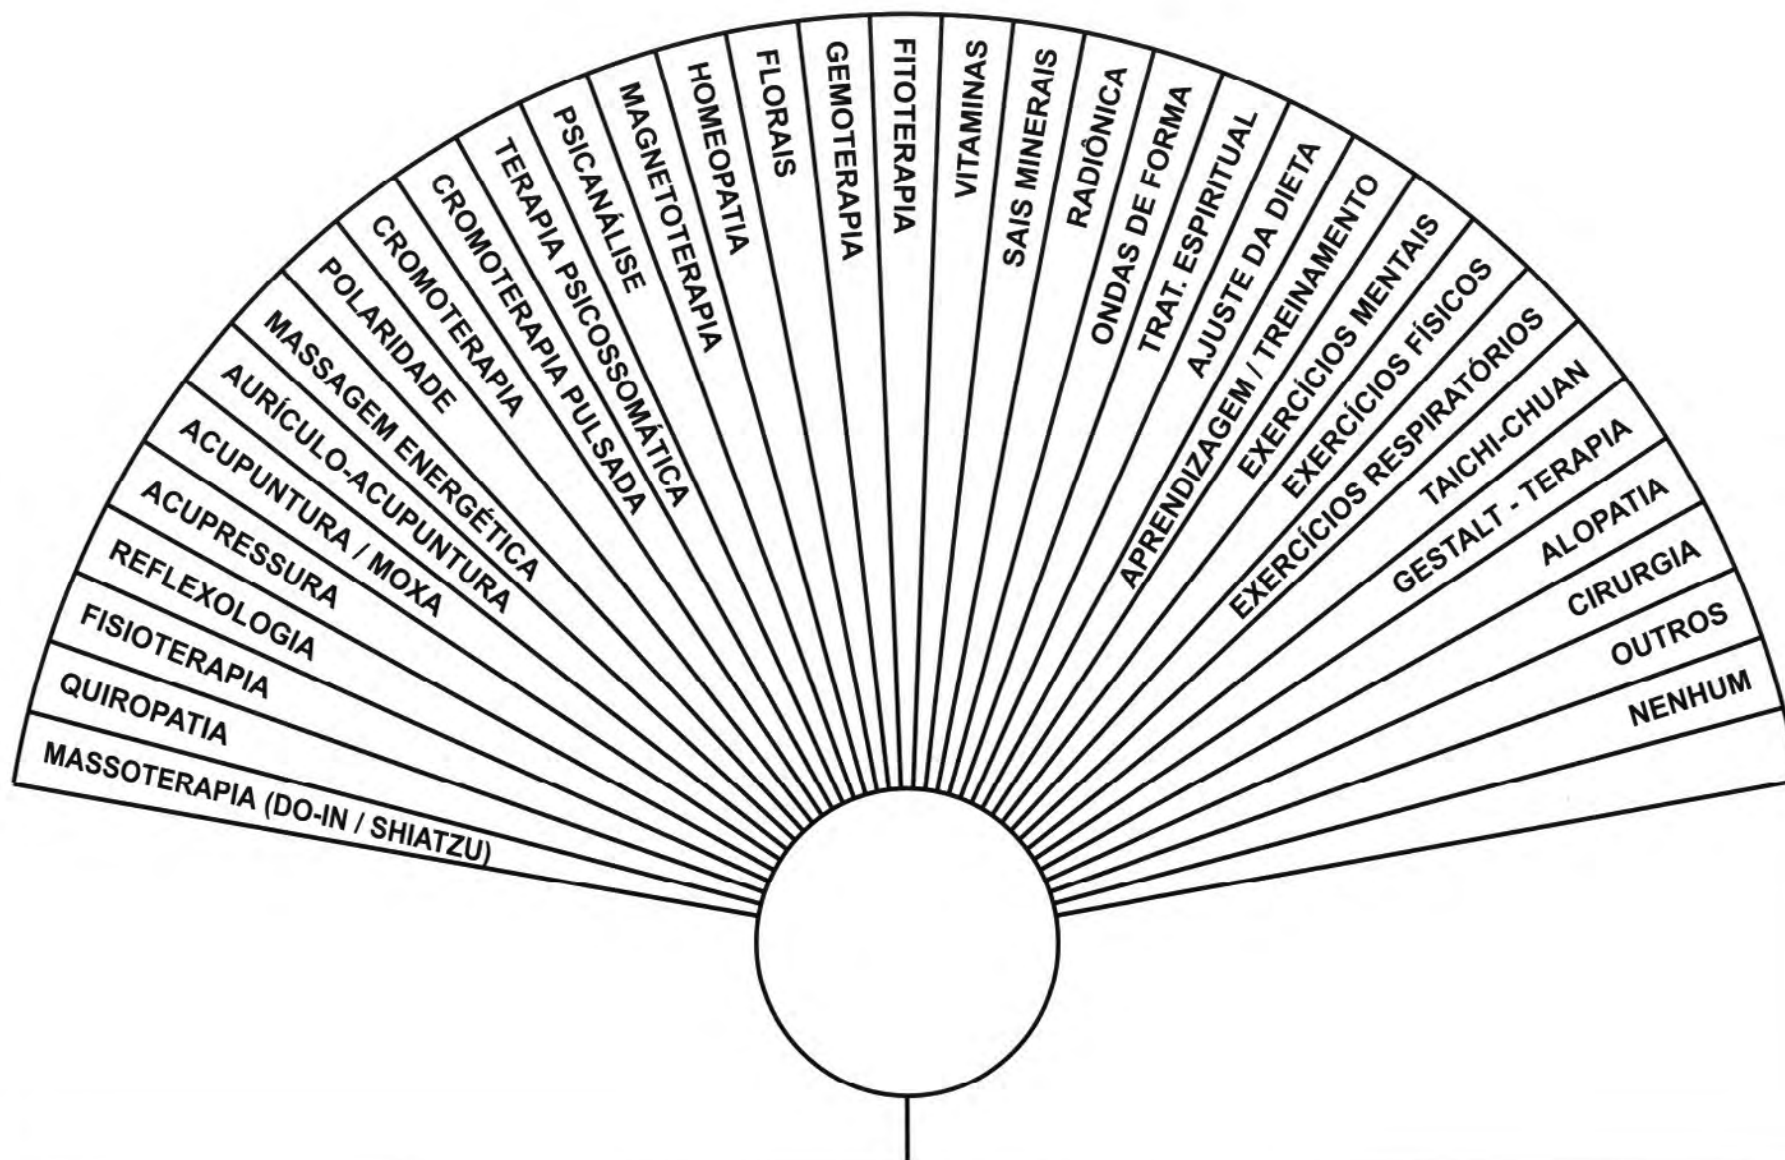

Want a hint? Make pulsar treatment!

When there is some kind of projection distance first work systems or organs that showed the lowest rates in biometer. Always go gauging application time on the clock dowsing. Since the first injections are made, check the contents resulting in the biometer to thereby evaluate the efficiency of applications. Try to eliminate the pain first or discomfort, alternating applications. This will have as a result collateral increase the confidence of the patient and consequent positive participation in this process. Like all other therapies, related to dowsing and / or radionics may prove inefficient, do not be discouraged. Look analyze the case from another perspective or reevaluate it in light of possible changes incurred.

Accurately determine the period for which it shall be conducted therapy chosen, and its application times.

Complete set of charts in this book by creating their own, attuned to their training and their working methods at the end of the book will find a design template for graphing based on the semi-circular shape.

General analysis

The Kabbalah Dowsing lends itself to a very special way to the analysis of the "hidden" manifestations of energy and gives us valuable information about these energies.

A diagnosis esoteric through dowsing can investigate objects, places, people, animals and plants, they are all likely to be carriers of this type of energy.

These energies can be coated from different aspects and are originating from different sources.

Objects with certain forms may present emissions detected by pendulums Hebrew Magic, Necromancy, Spirit and that no objects that are typically "magic" or ritualistic character, just how to trigger the process. Of course, living beings in their neighborhood will suffer their influences desarmonizantes.

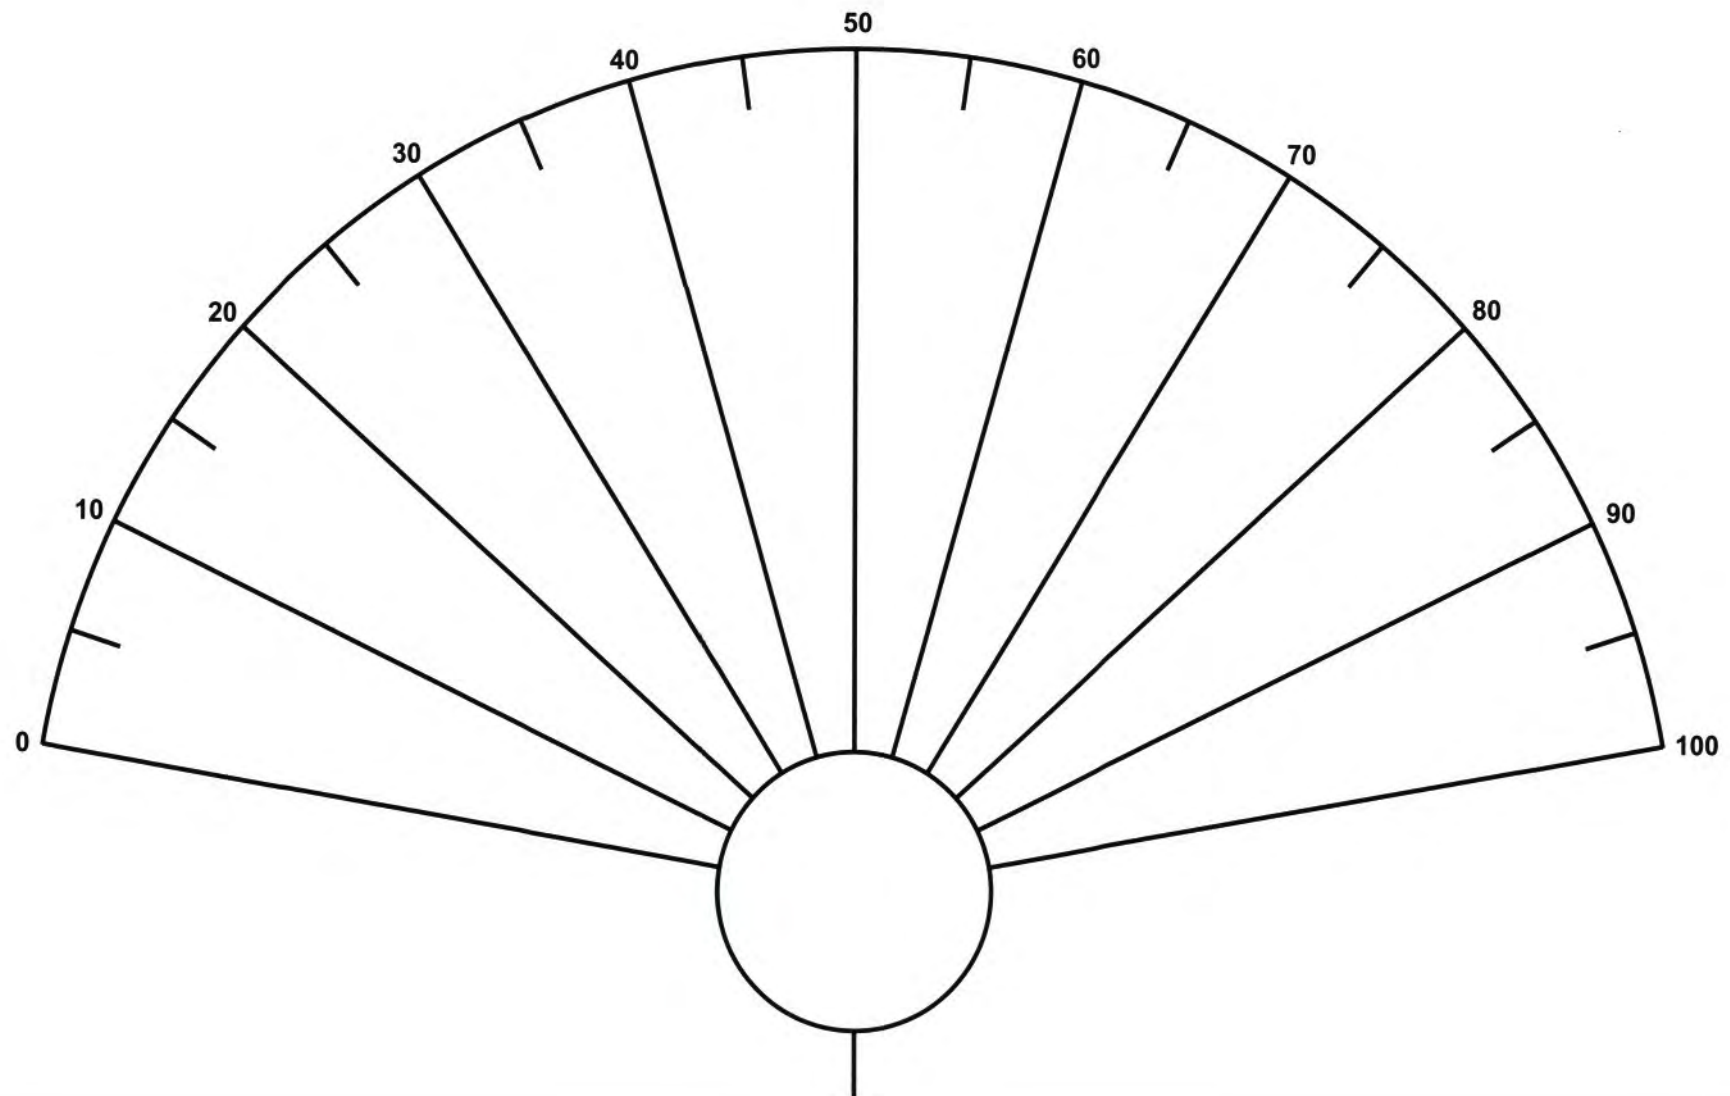

Any object of magical character, religious, can emit harmful energy, it is common to see reproductions of entities, for example the Hindu culture, animated by the psychic energy of those who look, worships, rituals do for them. Since then the picture starts emitting its contents archetypal complex, resulting from connection egregore.

Animals, plants, places, objects, often are carriers of energy projected by those who envy, want or even in some cases loves, loves. Popular culture calls certain people "dry pepper", or even having them say "evil eye." Without dowsing can only intuit these demonstrations. With dowsing can assess whether they are present, qualify them and quantify them.

This notebook, for analysis by dowsing esoteric, aims to facilitate and systematize the practice.

0 graph for general analysis should be used whenever it is necessary to collect some quantitative data. The graduation 0-100 lends itself to a percentile analysis.

ANÁLISE GERAL

Biometer scale 1

The Biometer enables energy assessment of places, of people through his testimony and even food. 0 optimal energy level is at 6,500 Angstroms.

SCALE 1
0 / 10.000

SCALE 2
10.000 / 13.000

SCALE 3
13.000 / 18.000

SCALE 4
18.000 / 36.0000

What is the rate of vibration ... ?, The place, the inhabitants
About Plan 1?

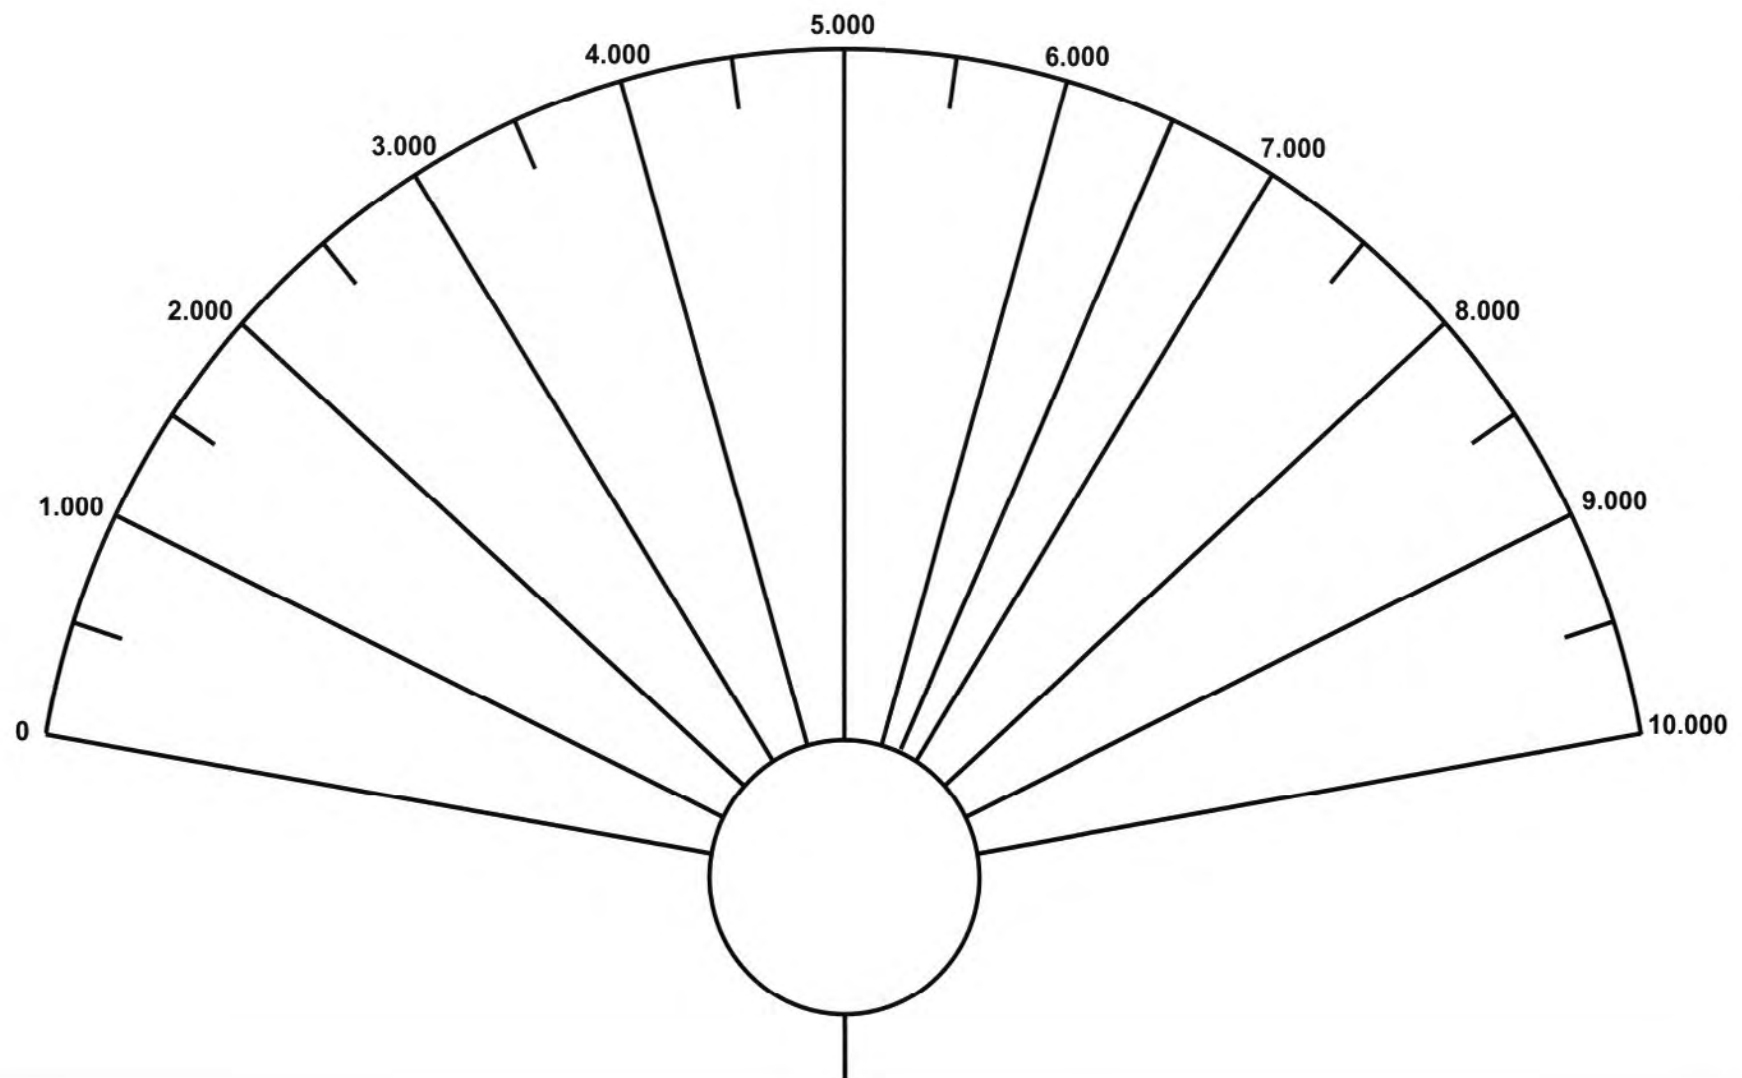

0-200 telluric radiation on the geomagnetic crossing
2000 Radiation crossing the geomagnetic network. 4000
Banda geomagnetic network.
5000 Below this rate, the vitality is bad, devitalization.
6500 Average energy physics - PLAN 1
9000 high Porch - PLAN 1

Above this high rate, viability is the permanent control: Everywhere
measured above this limit are called "GREAT PLACES
COSMOTELÚRICOS"

SCALE 1 "PHYSICAL"

SCALE 2 "etheric" body energy (beyond the conception of Bovis). SCALE 3
"SPIRITUAL" Measurement in sanctuaries, or rare points of initiation. SCALE 4
"UNKNOWN" A rare case of Santiago de Compostela.

BIÔMETRO ESCALA 1

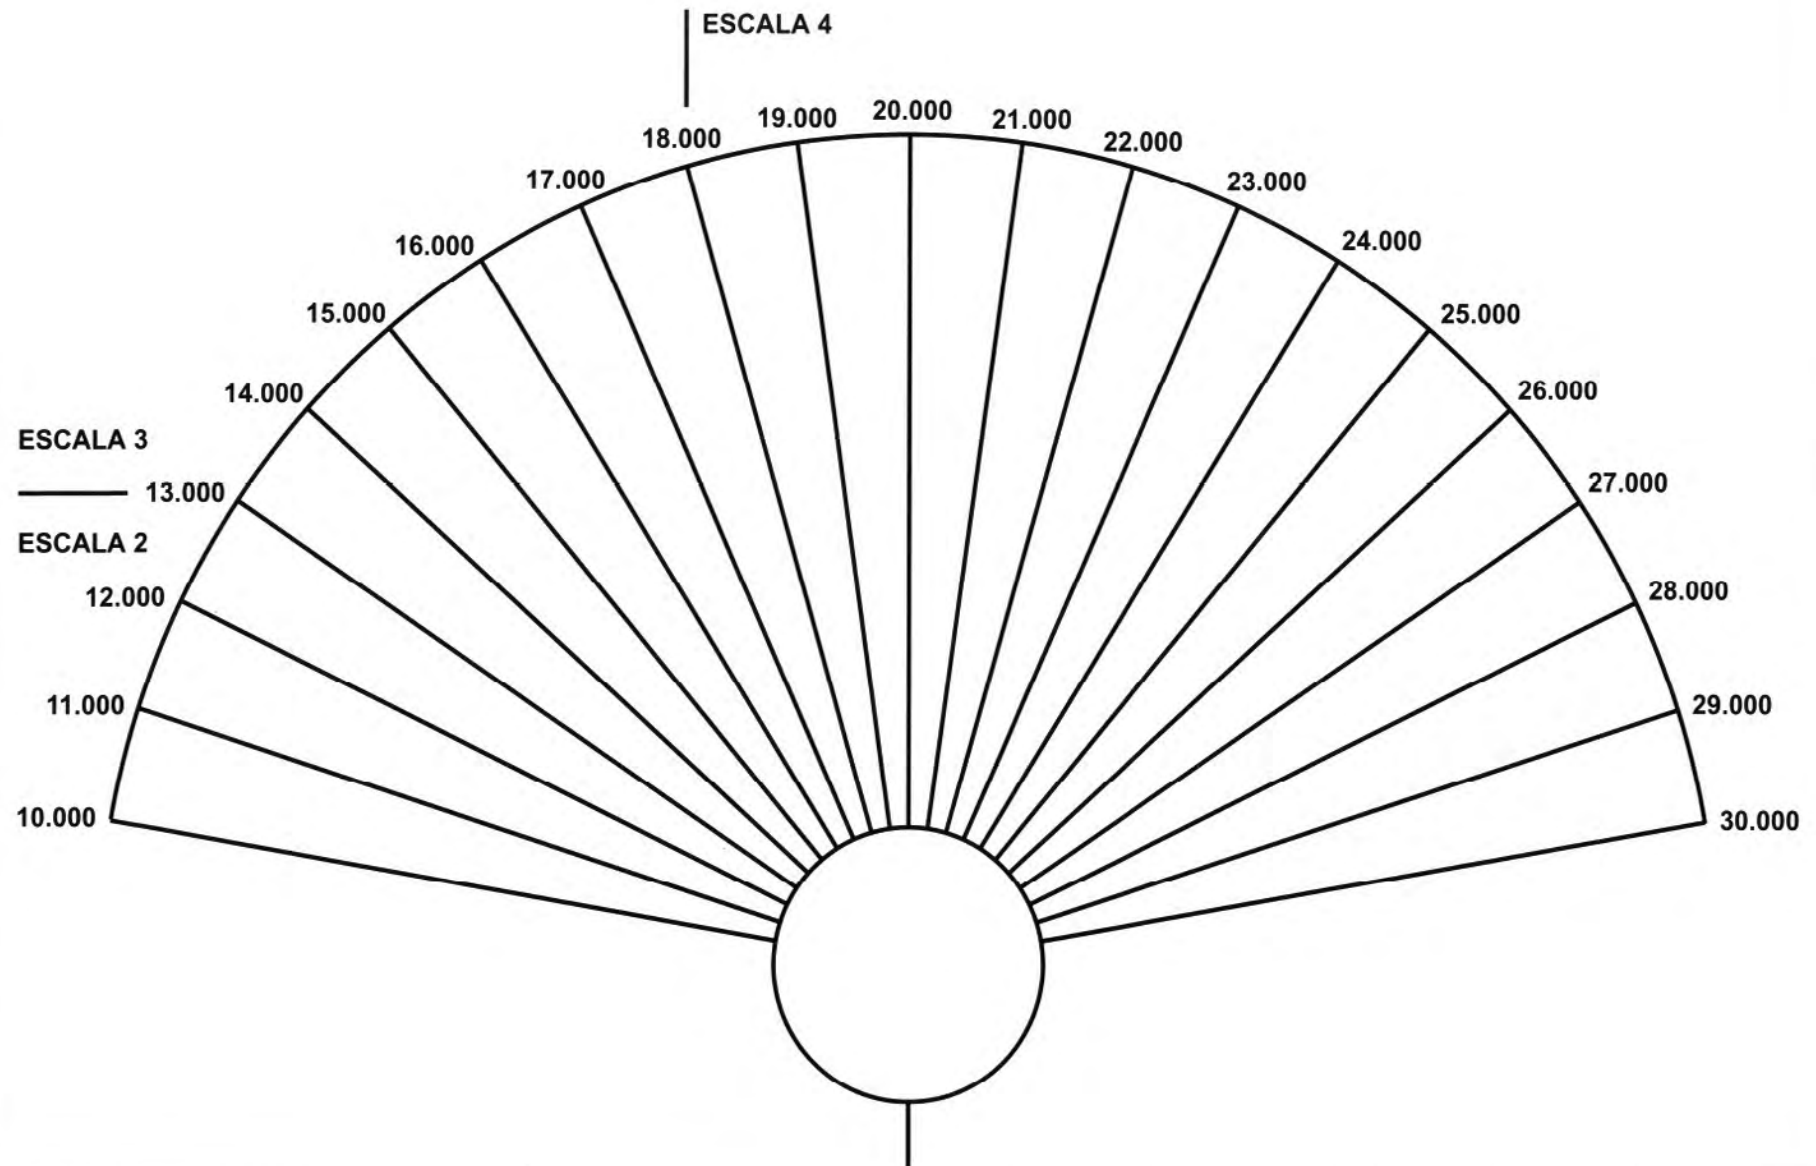

Biometer scale 2, 3, 4

0 Biometer Bovis in its original version did not include the scales 2, 3 and 4. These scales allow you to measure vibrations that are beyond the physical plane, for example, objects of worship, magical objects, sacred places, anything suspected of being under a state of magic.

This measure will give a quantitative, not qualitative. To better understand the object of the research on this scale is advisable to use the dowsing pendulums cabalistic.

To use this scale proceed in the same way as for the range 1.

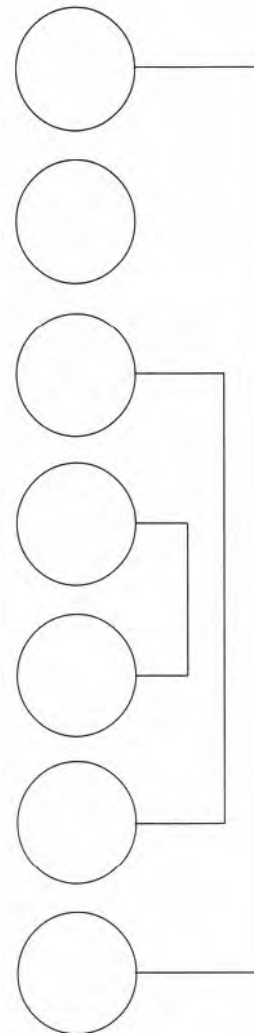

BIÔMETRO ESCALAS 2, 3, 4

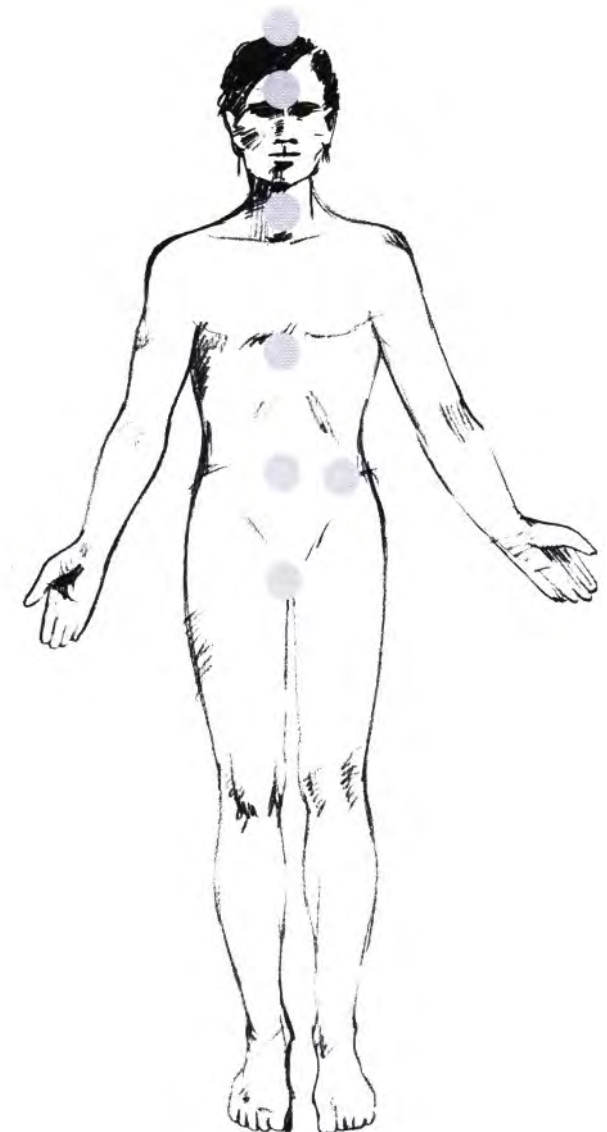

Analysis of the chakras

Put testimony about examining the circle, throw the pendulum and the index finger of his free hand or a pointer indicating the corresponding circles go to the chakras, the crown noting the base table on page 138 the values obtained.

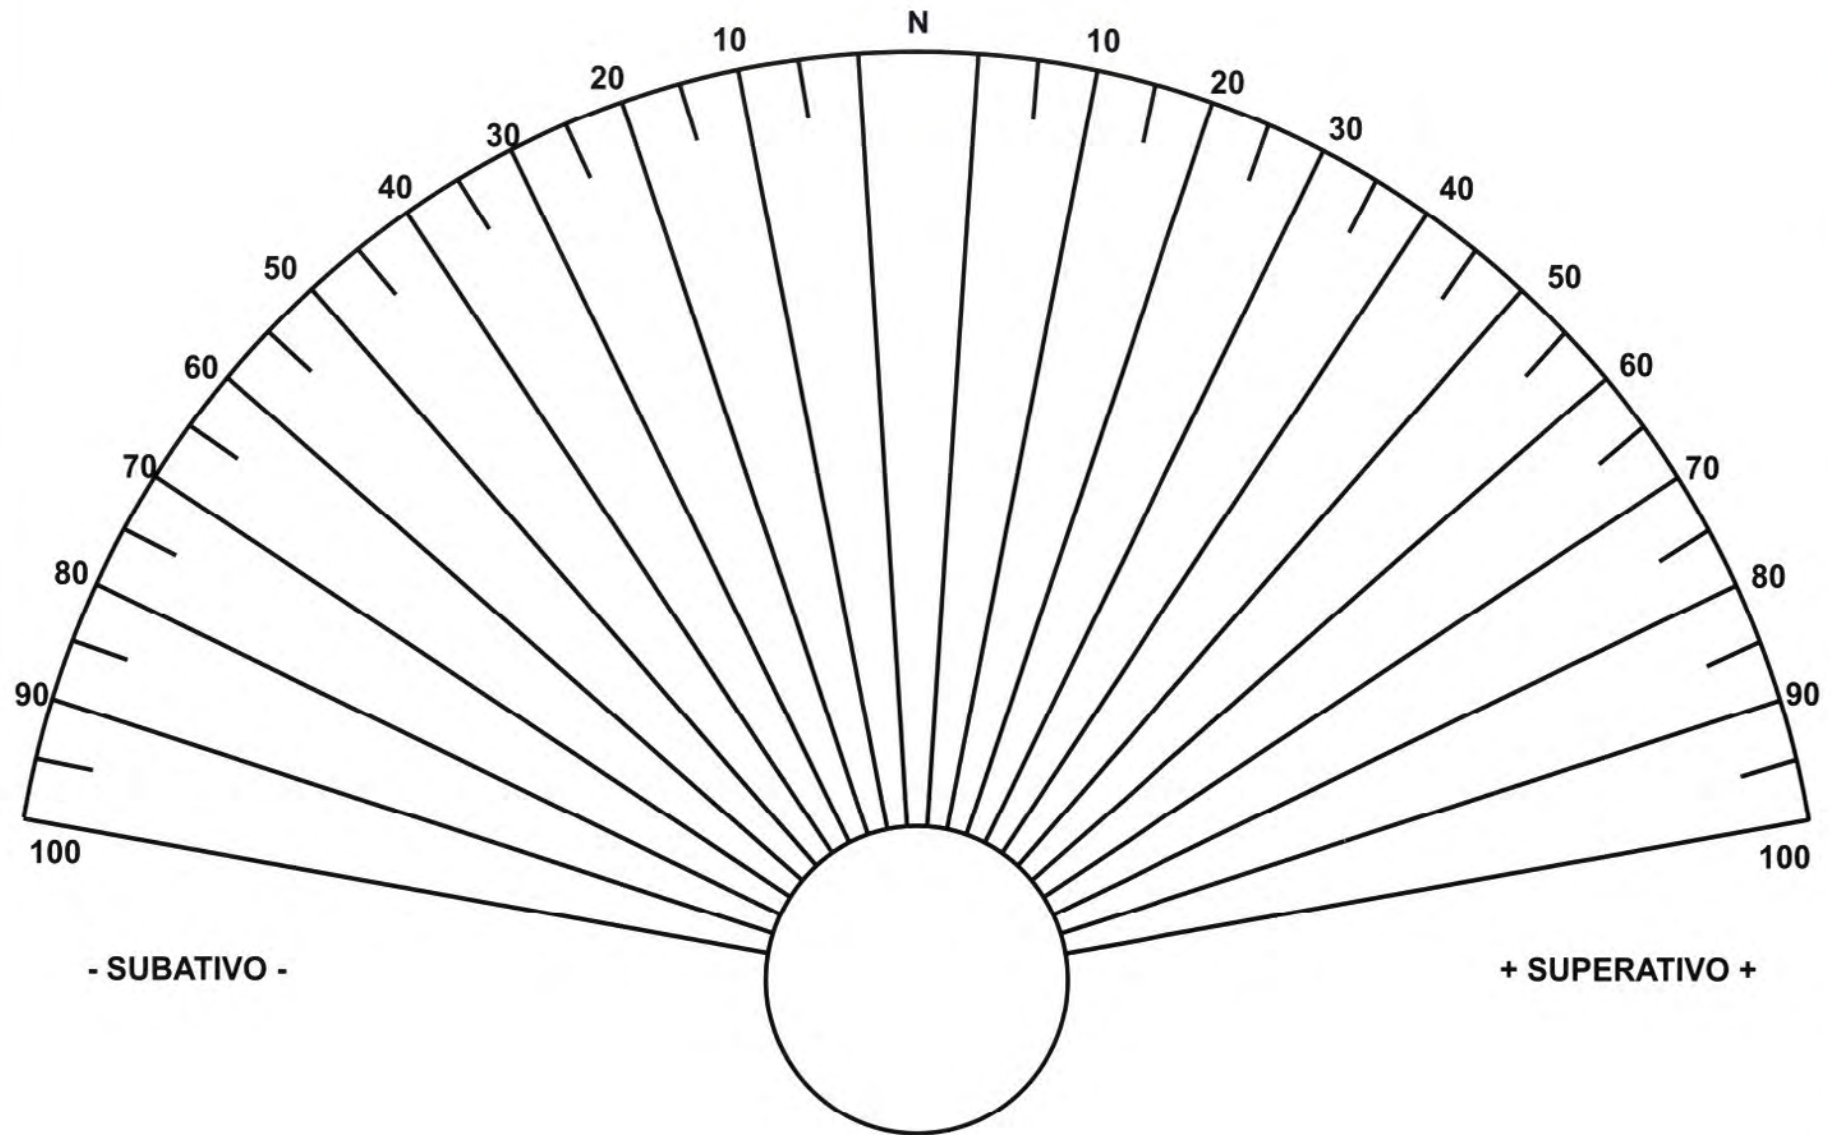

GLAND	CHAKRAS
PINEAL CORONARY	top of the brain, right eye.
PITUITARY	FRONT The lower brain, left eye, ears.
THYROID	Laryngeal parathyroid Vocal tract, bronchi, lungs, digestive tract
TIMO	CARDIAC Heart, blood, vagus nerve, circulatory system.
PANCREAS	SOLAR PLEXUS stomach, liver, gallbladder, nervous system.
Gonads	SACRO reproductive system.
SUPRA-RENAL	BASE Spine, Kidneys.

Splenic
SPLEEN
Index
vitality

ANÁLISE DOS CHAKRAS

Analysis of the rays

The correct analysis of rays provide a spiritual and psychological profile of the person investigated. To make the correct interpretation of the analysis of beams is essential to a perfect knowledge of the structure of the rays.

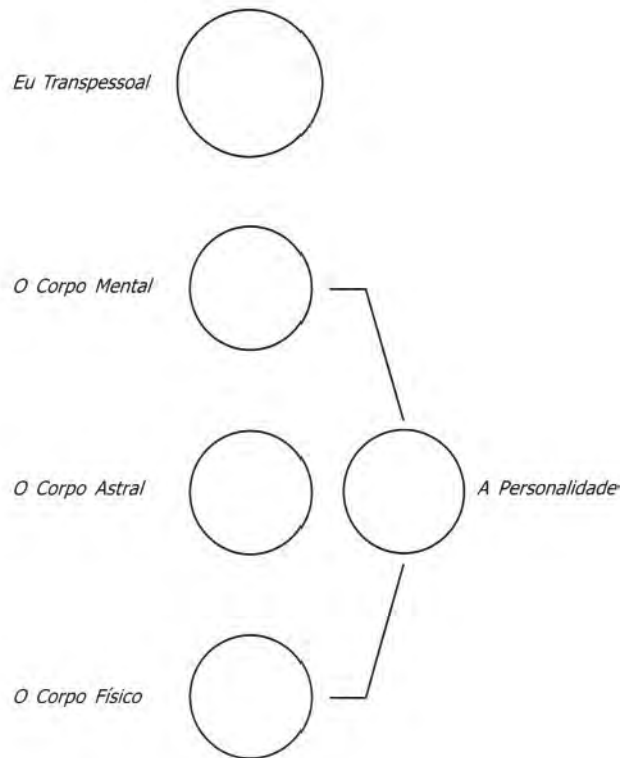

- Place the first two fingers of her free hand over the symbol of the first ray. Place the pendulum on the testimony of the patient and mentally ask the question: What is I transpersonal of the 1st ray?
- Repeat this until you get a positive response to one of the symbols of the rays. Dial the number that radius circle in the upper diagram represents the Self or Soul transpersonal.
- This process should be repeated until you get answer for each of the three subtle bodies and the personality ray.
- Write down each of the numbers obtained within their circles of the diagram supplied attachment.
- Search now through the body that is working radius transpersonal, and through subtle body that the personality ray is working.

ANÁLISE DOS RAIOS

Pendulums for dowsing cabalistic.

The "Hoodies" for Hebrew pendulums attached, should be photocopied, cut and pasted or simply fastened with small elastic on the cylindrical body of the impactors themselves for the depolarized Dowsing Kabbalah.

Besides the Hebrew expressions is attached a set of geomantic figures, figures active, usable for detection and emission.

Start your analysis by the expressions of content more "light" to slowly investigate the more dangerous aspects. Use of prudence, not voluntary or contact with certain energies can shoot contamination processes rather unpleasant.

Special section graphics for Search in Geobiology

Geobiology

The Geobiology is a science that studies the relationships between the environment, and its influence on the balance of the living. The Earth made a gigantic living being, vibrates and sends these vibrations beyond the soil surface. Some of these energies are beneficial and necessary for the maintenance of life, eg magnetism. Cosmo also bombards us daily, and the balance between telluric and cosmic energy in dowsing takes the name "Theory of forces compensated", enables the emergence and maintenance of life. Experimental research of some dowzers, gave rise to the name geobiology because initially only studied the problems of land-based sources. Later it was realized that everything, absolutely everything around us positively or negatively interfere with our biological balance, so is that today are taken into account the interference caused by the shape of buildings, parasitic emissions resulting from household appliances, the power grid power, the mental field of people and even the energies of spiritual origin.

In science a researcher stood out in particular:
Dr. Ernst Hartmann, MD
German and dowser, who has studied the matter more deeply, hence the main power grid of Earth is known today as Network Hartmann. This network is rectangular and measures about 2 feet from north to south and 2.5 meters

Urban Landscape with microwave relay tower, generating around electromagnetic saturation.

Prospecting loop antenna lobe with Hartmann

East to West. The walls of this network have an average thickness of 21 cm and can reach up to 80 cm during the full moon. Besides the effects of the lunar bands vertical network Hartmann suffer the influences of earthquakes and nuclear tests.

The intersections of the network H (Hartmann network) when certain energy emitting harmful take the name of "points geopatogênicos" for emitting gamma rays and Ve. These points can still send and V +, Red, and alpha rays and beta rays. When a person stands on these issues for a long time (sleeping, working, studying or leisure) it may develop many diseases.

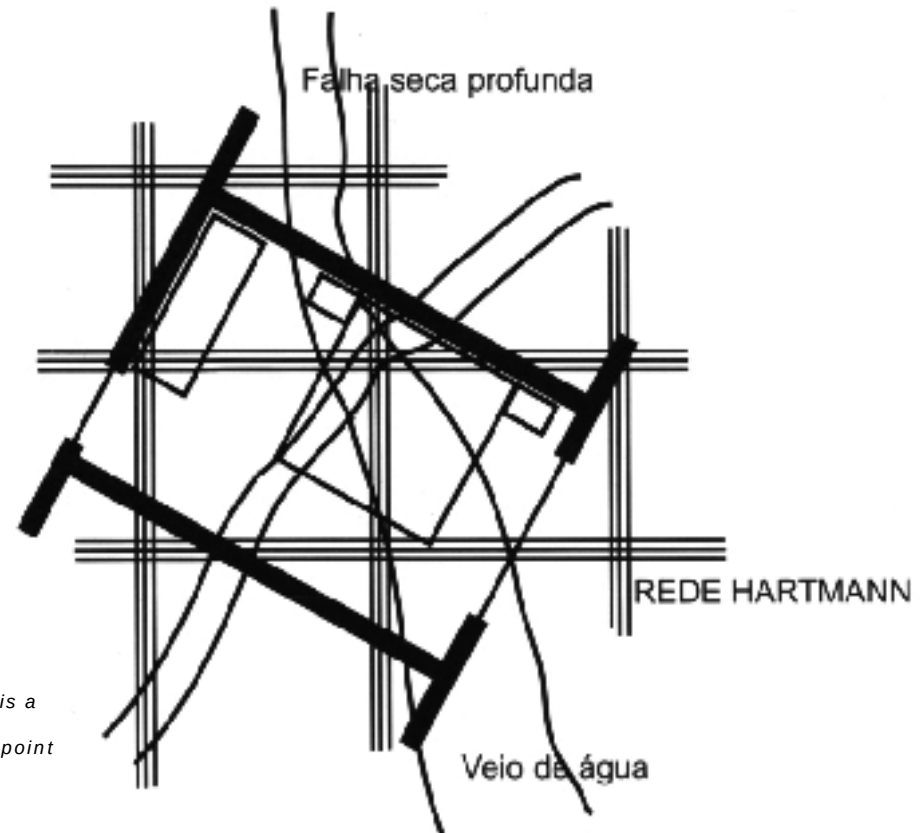

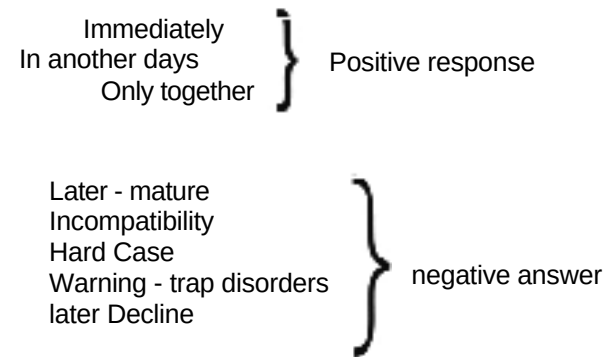

Illustration of a sleeping room, in which there is a shaft failure dried and ground water, the two were crossing under the bed, at the exact point of a crossing loop Hartmann, generating a point "geopatogênico"

Geobiology

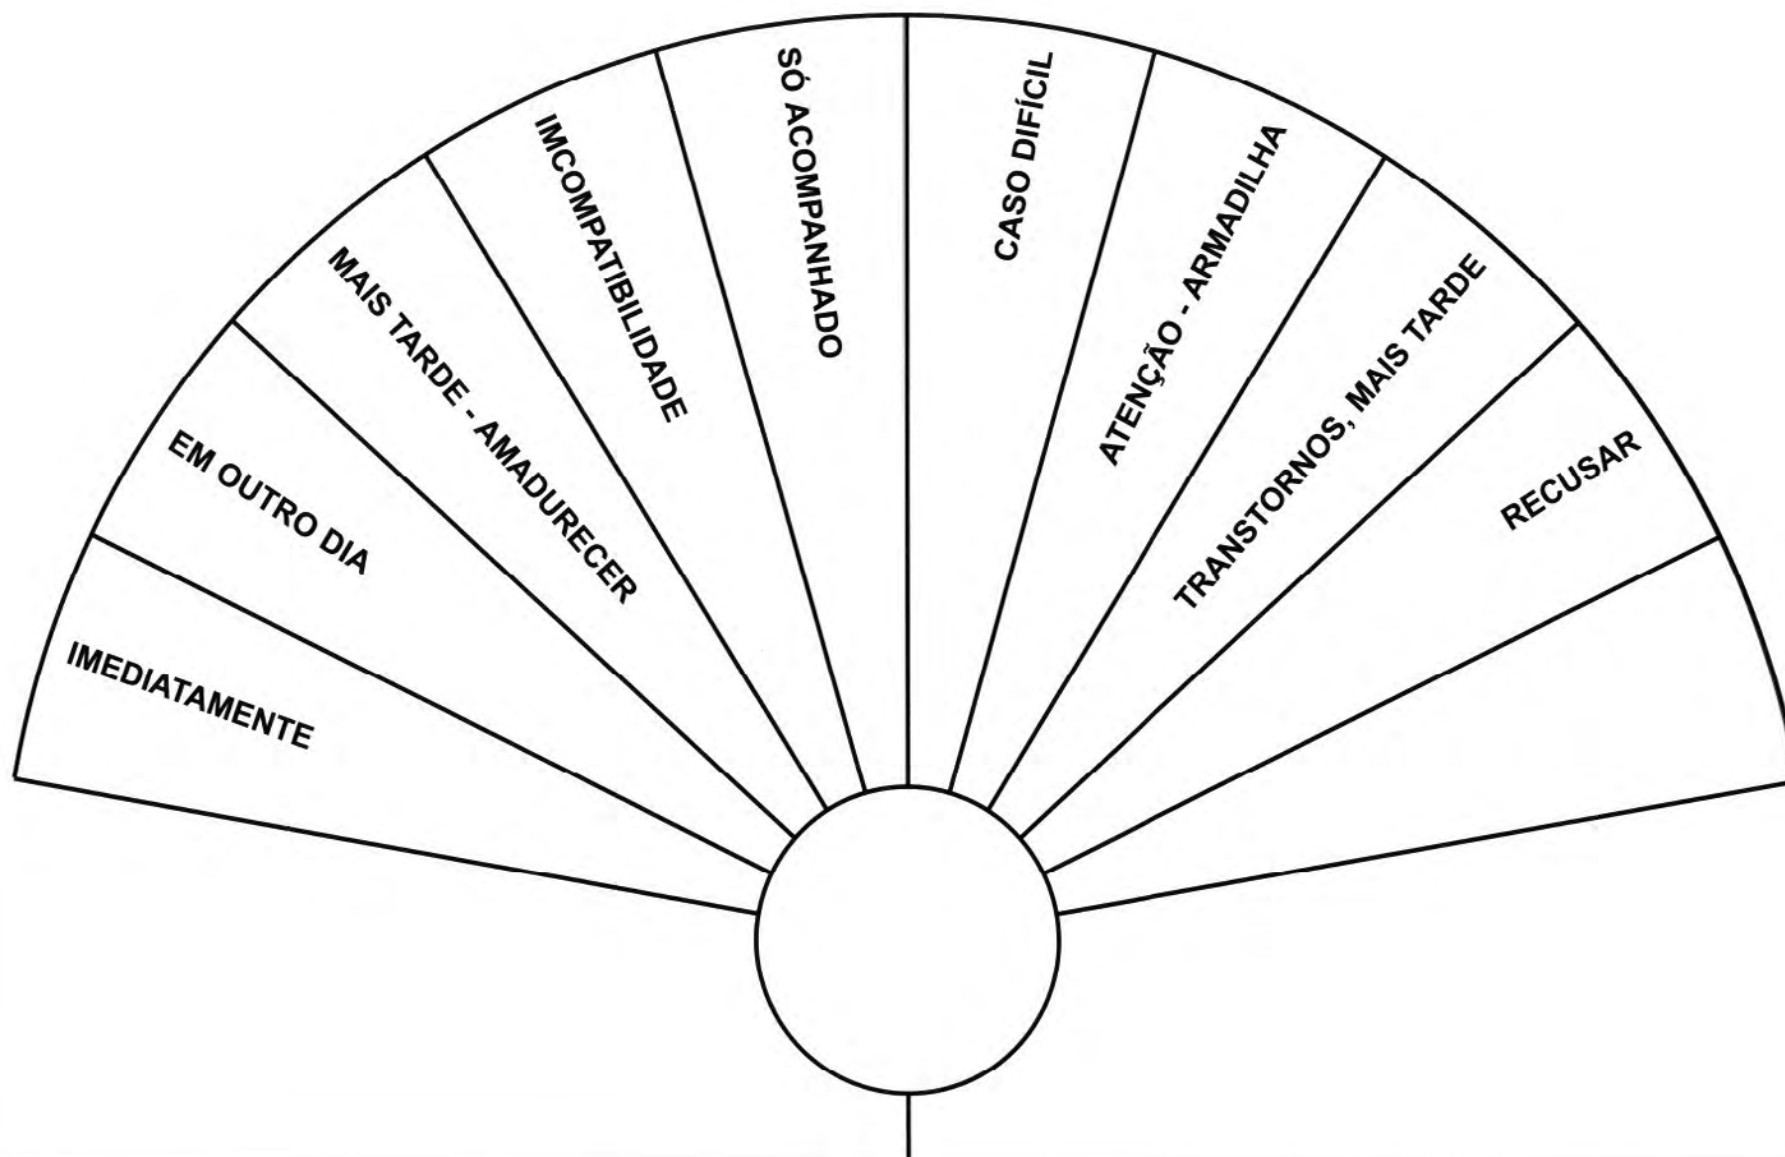

Whenever you start a dowsing in the first search procedure should be: Question: Can I do this research?

Sometimes the answer is NO, then this statement should be followed.

This ban may be temporary, then look at what date the search may be effected.

ANÁLISE PRELIMINAR

Vibratory rate

Question: What is the vibratory rate, the vitality of ... in percentage?
The place of the inhabitants.

Which the intensity of the vibratory rate?

Answer

0%'s testimony, extremely weakened (researching the origins)
55% until the witness is being devitalized (illness, etc.).
up to 72% good vitality of witness
beyond 72% is testimony enough energy

In the case where the measurement is made on one object, a jewelery, for example, placing the witness on the circle graph.

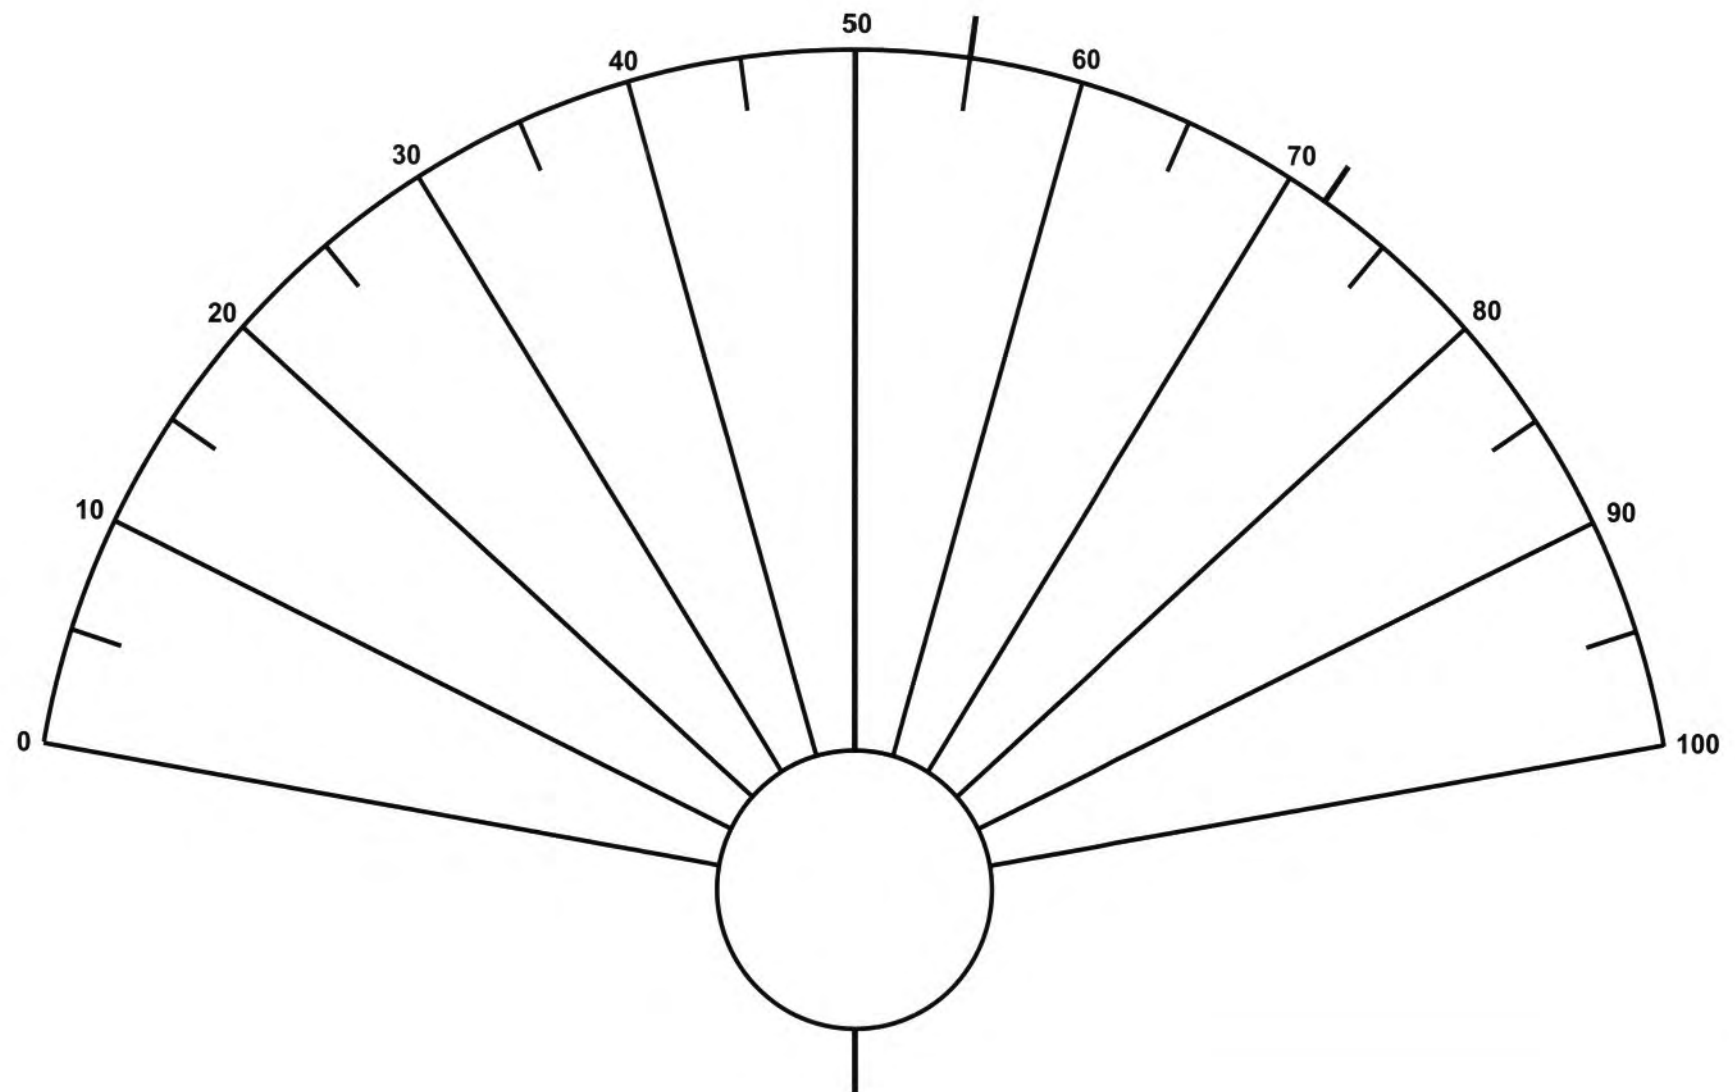

It is not advisable to use a vibrating jewelery with index below 55%.

This chart is valid for the control of vibratory rates on the physical, psychological and spiritual.

Another information can be obtained with the help of this chart, the intensity, strength, power emitted by a radiation, an object.

For example: a point geopatogênico have a vibratory rate of 20% and 70% and intensity. This point will have a low vibration more a nuisance than 70%.

TAXA VIBRATÓRIA

Biometer Scale 1

The Biometer enables energy assessment of places, of people through his testimony and even food. The optimal energy level is at 6,500 Angstroms.

SCALE 1

What is the rate of vibration ... ?, The place, the inhabitants
About Plan 1?

0-200 telluric radiation on the geomagnetic crossing

2000 Radiation crossing the geomagnetic network.

4000 Band of geomagnetic network.

5000 Below this rate, the vitality is bad, devitalization.

6500 Average energy physics - PLAN 1

9000 high Porch - PLAN 1

Above this high rate, viability is the permanent control: Everywhere
measured above this limit are called "GREAT PLACES
COSMOTELÚRICOS"

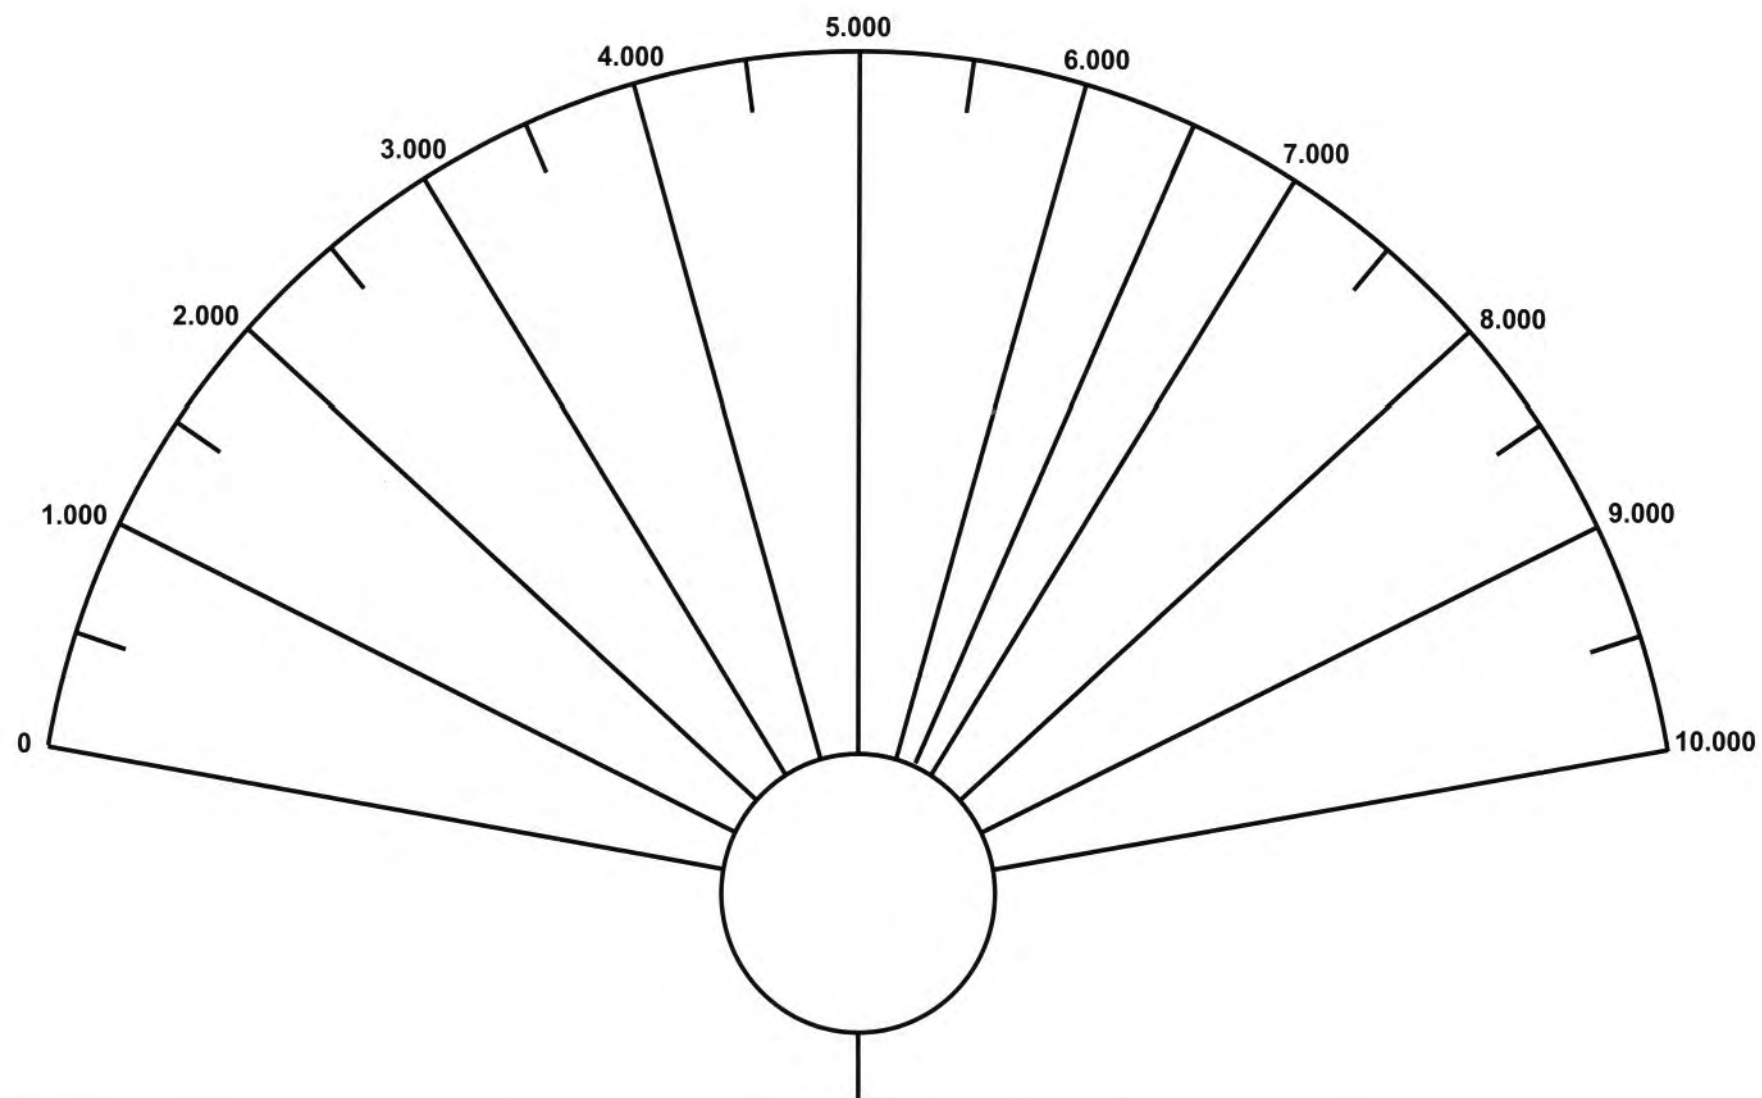

SCALE 1 "PHYSICAL"

SCALE 2 "etheric" body energy (beyond the conception of Bovis). SCALE 3

"SPIRITUAL" Measurement in sanctuaries, or rare points of initiation. SCALE 4

"UNKNOWN" A rare case of Santiago de Compostela.

BIÔMETRO ESCALA 1

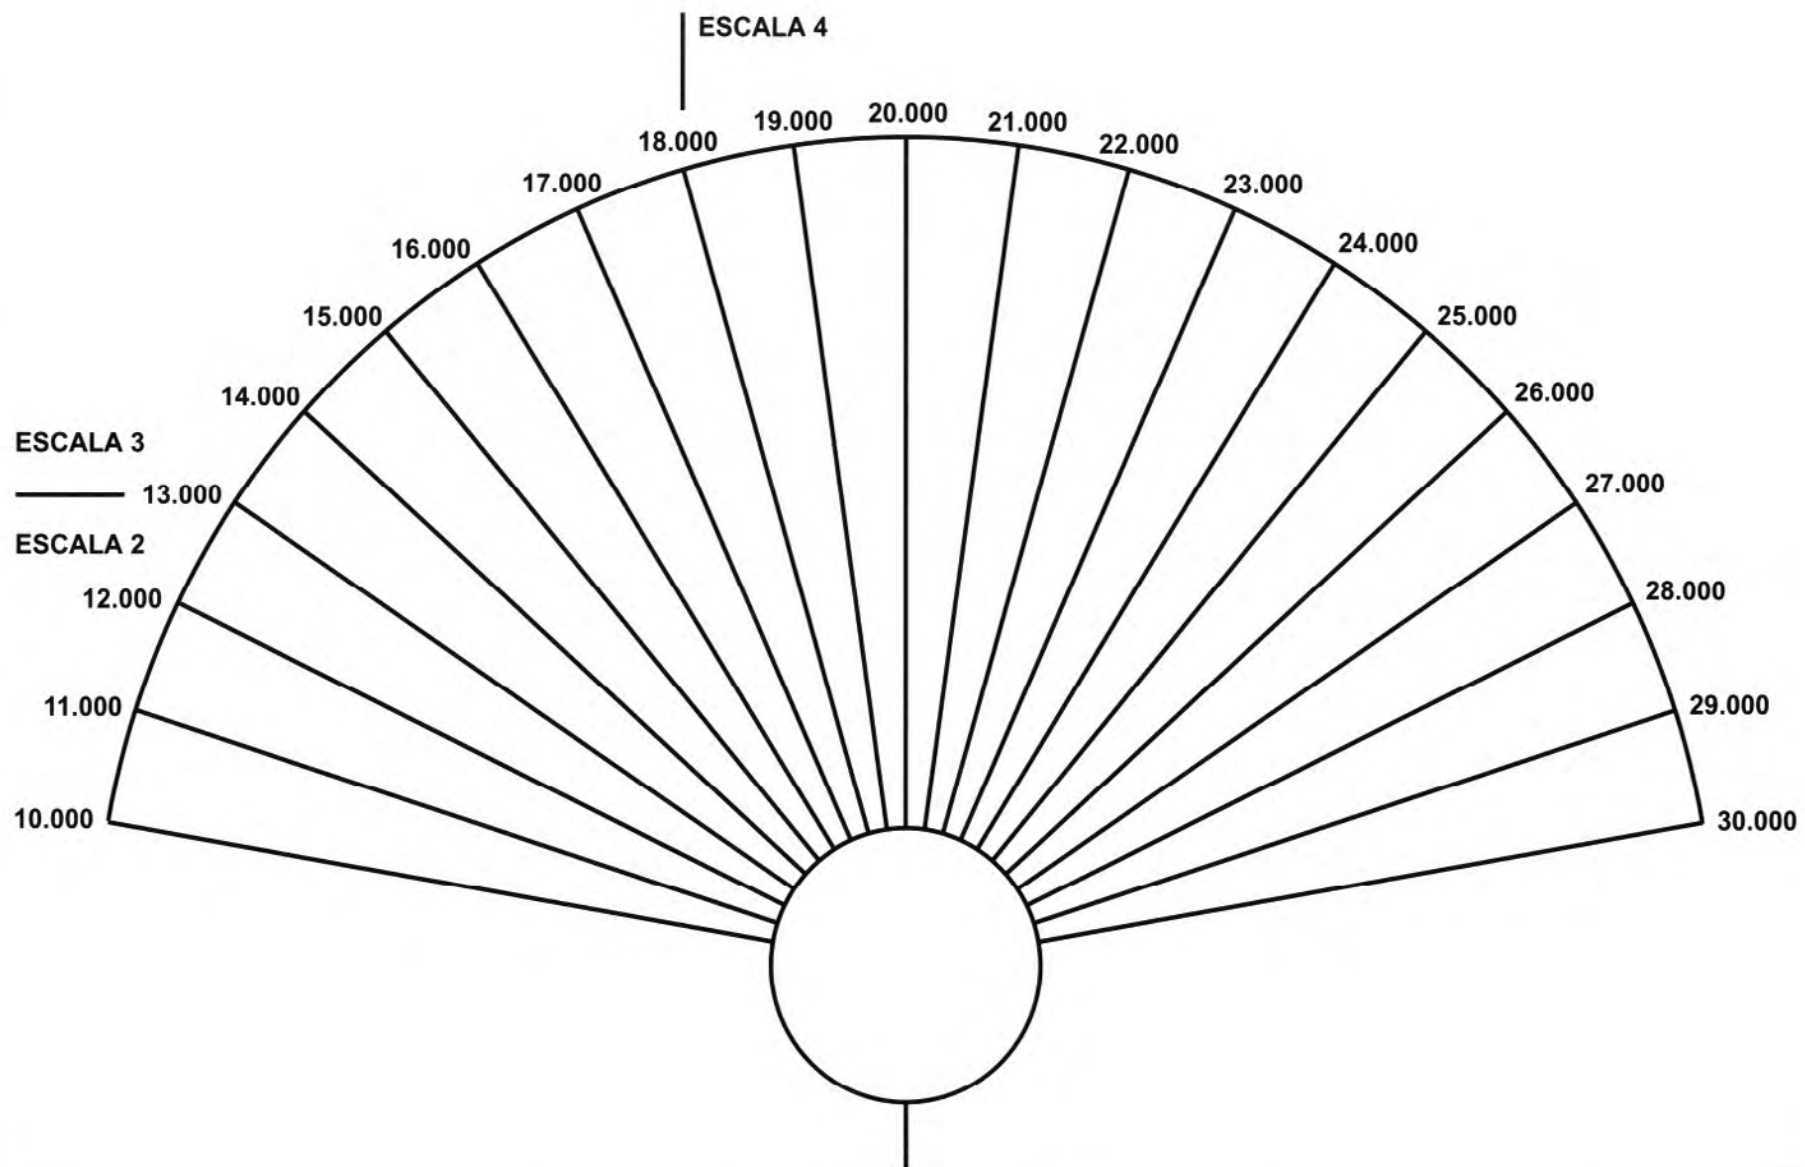

Bovis Biometer

The Biometer Bovis in its original version did not include the scales 2, 3 and 4. These scales allow you to measure vibrations that are beyond the physical plane, for example, objects of worship, magical objects, sacred places, anything suspected of being under a state of magic.

This measure will give a quantitative, not qualitative. To better understand the object of the research on this scale is advisable to use the dowsing pendulums cabalistic.

To use this scale proceed in the same way as for the range 1.

BIÔMETRO ESCALAS 2, 3, 4

Ruler Geobiológica

Align necessarily the graph toward North as indicated. Swinging the pendulum across to the chart on the 0.

Question: Are there harmful waves here?

Answer

Deviation of the pendulum to the right

Harmfulness of air

From 0 to 20 weak

Deviation of the pendulum to the left

Harmfulness of the underground

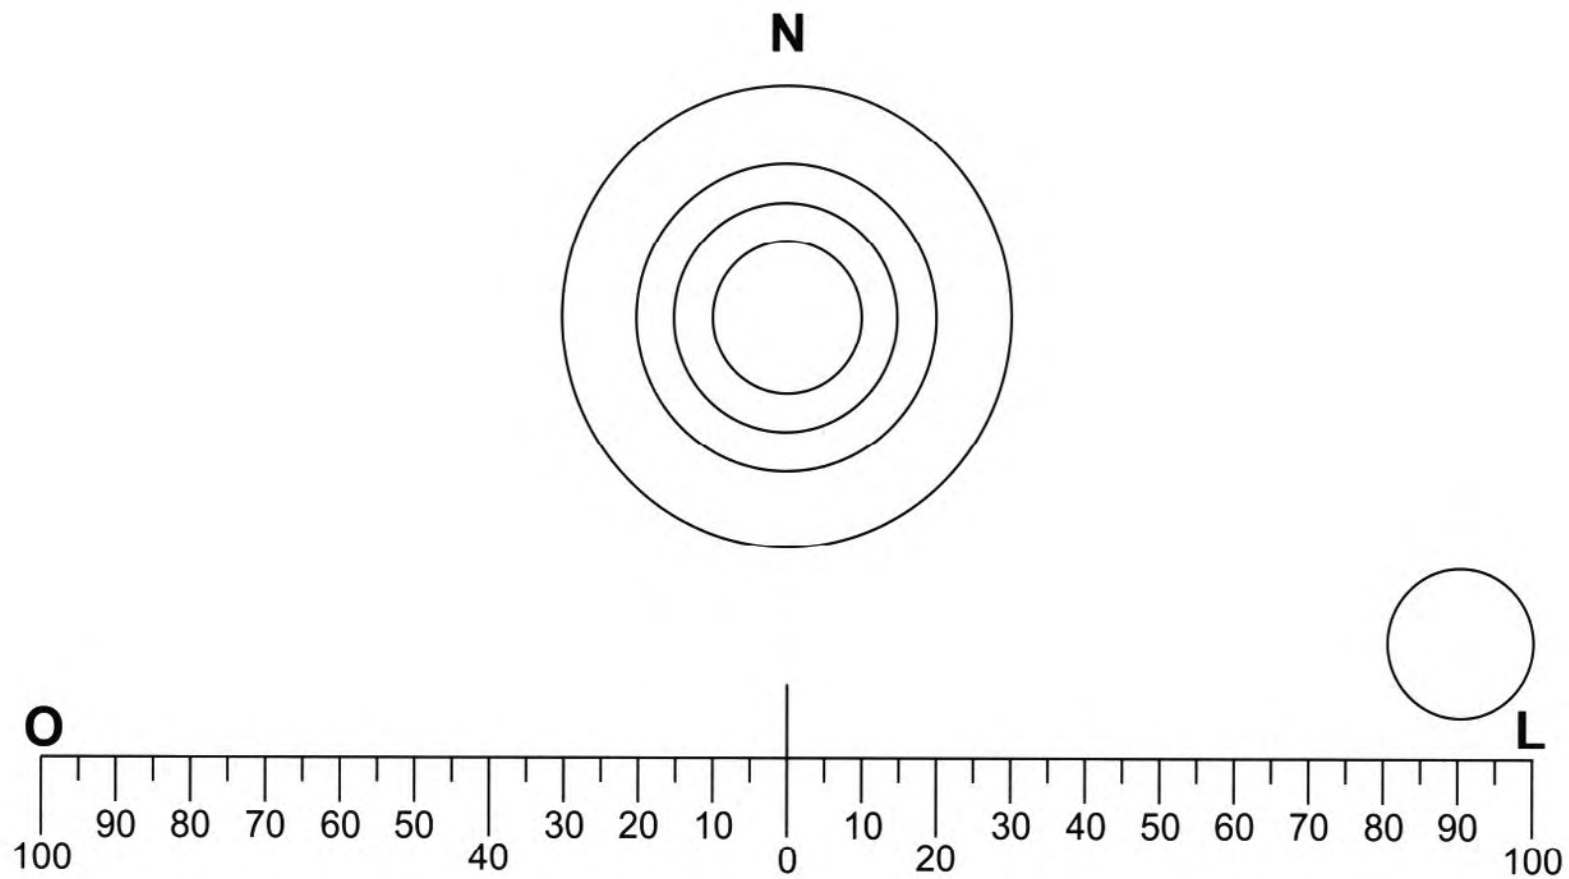

0 to 40 weak

Beyond these indices verify the origins of these waves with the following graphs.

Attention:

And there are several possible nuisances from the air and from underground. Repeat the above operation until pendulum clearly indicates that all harmful waves were found, then the pendulum will remain on the original 0.

RÉGUA GEOBIOLÓGICA

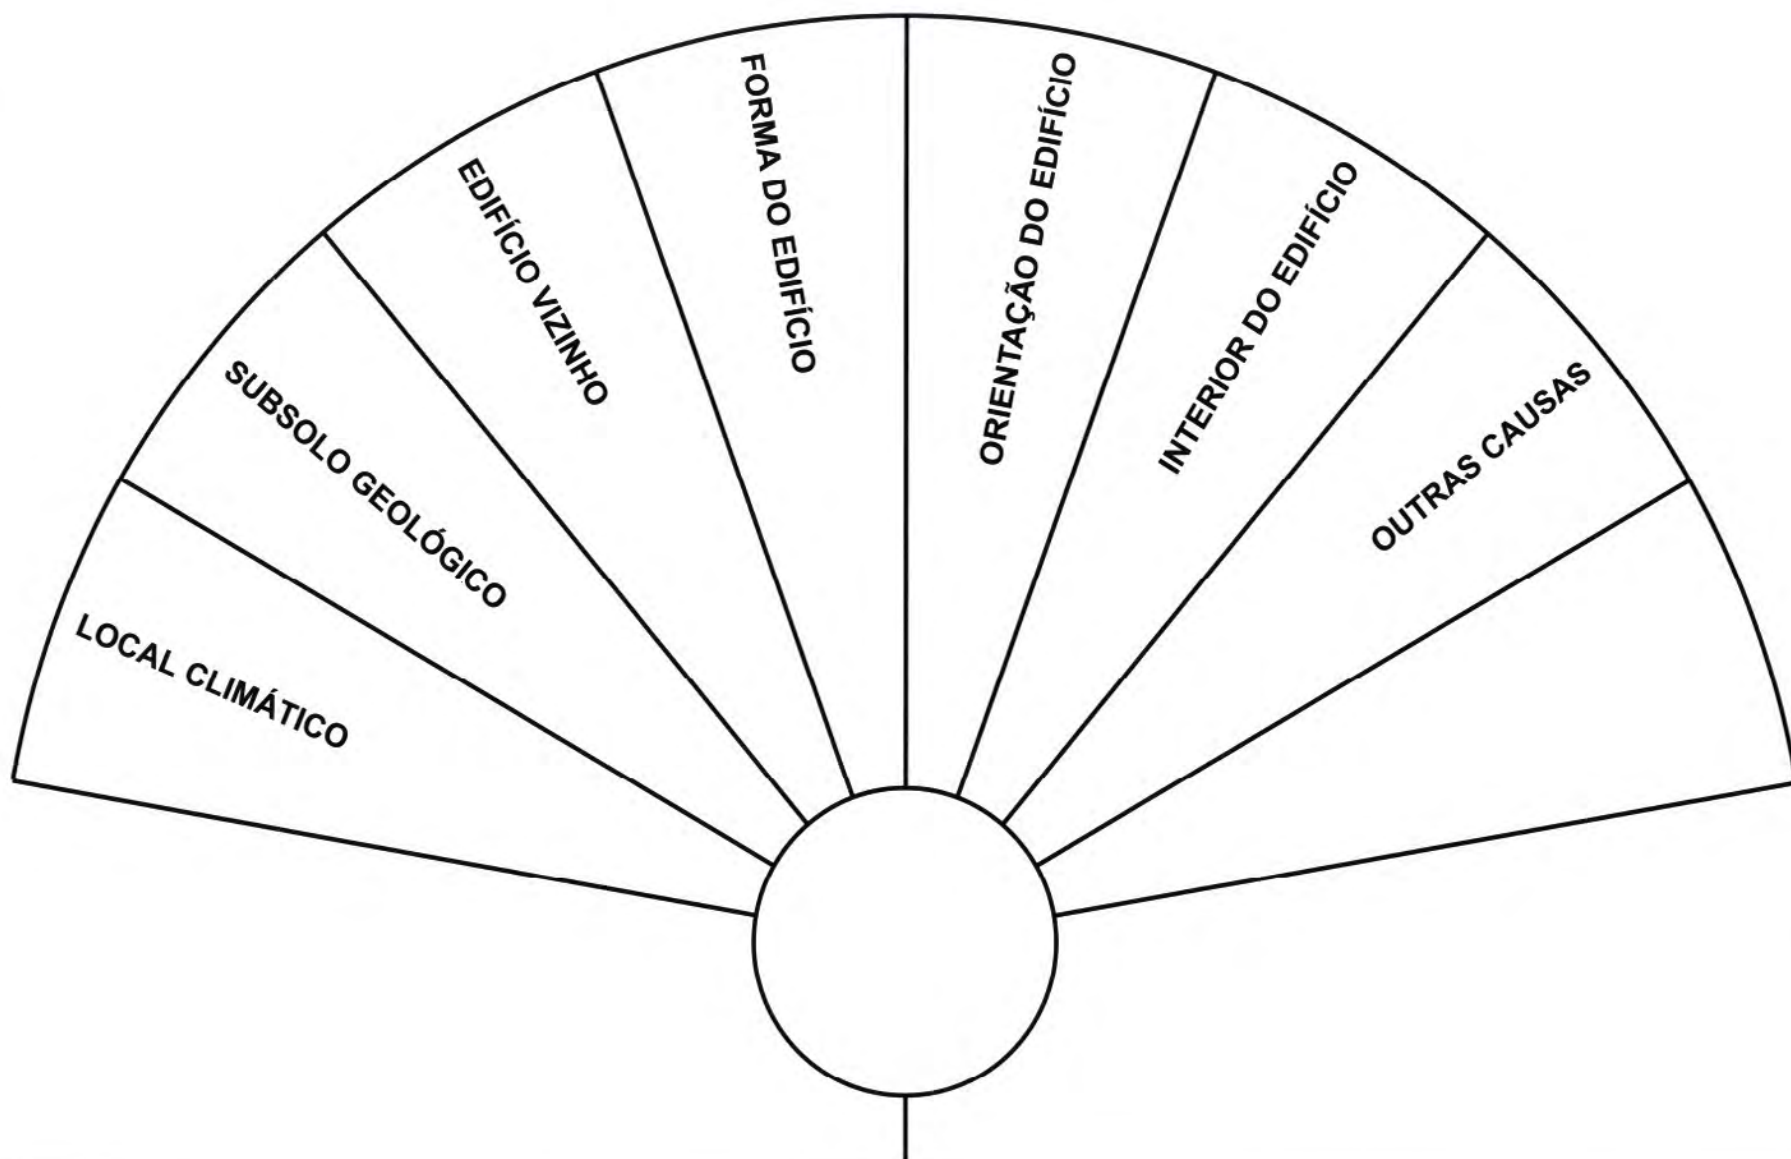

Origin of harmful waves

Question: What are the origins of harmful waves of ...?

This chart gives general information.

This graph is completed by the following two graphs.

ORIGEM DAS ONDAS NOCIVAS

Origin of waves

2 harmful

Question: What are the origins of waves harmful?

Answer

Water: determine if the water is running, its flow, direction of travel horizontally, or is stagnant.

Quadrangle: complete to see if you mesh Hartmann or other. Bed:

complete to know the origin, position or orientation.

Electrical Pollution: researching the origins, faulty grounding, appliances, etc..

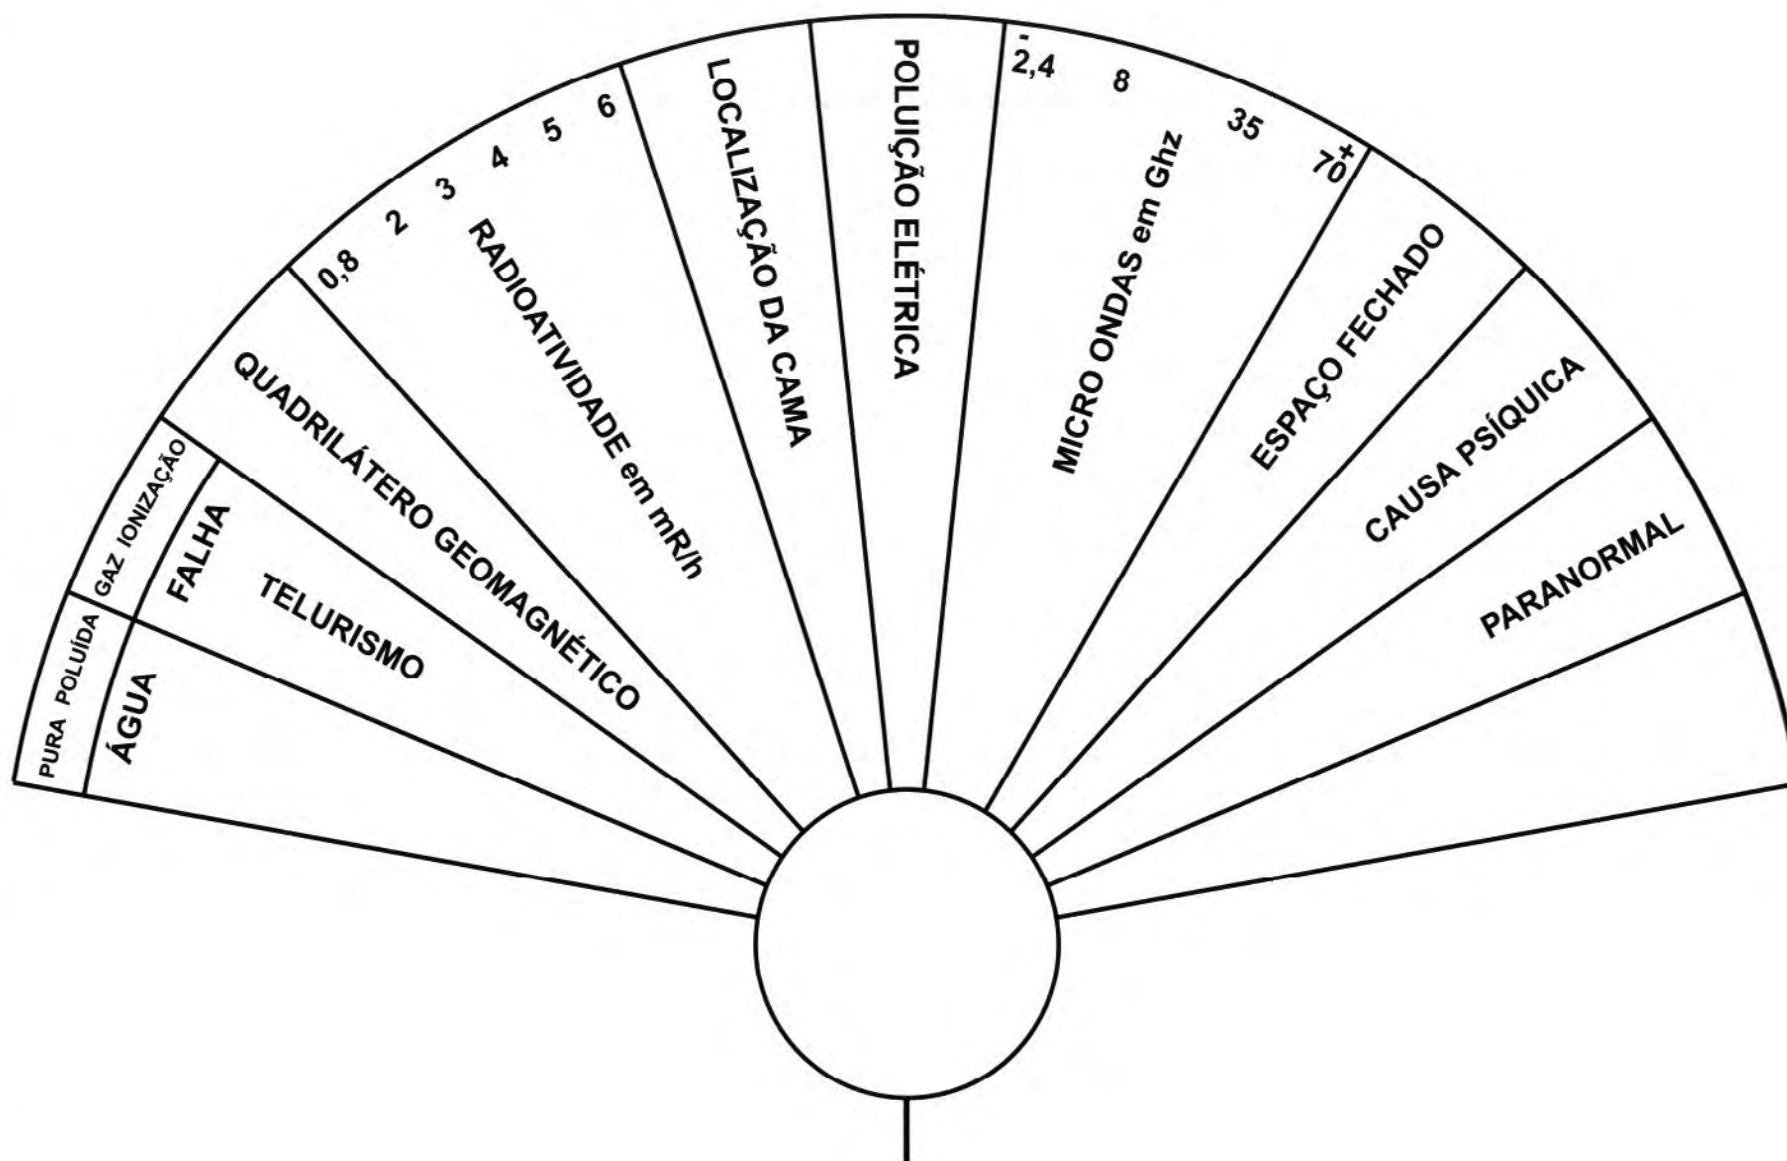

Closed space: chimney, septic tank, basement, well, natural cavity.

Microwave: researching the origins, N, oven, multiple

antennas. Cause psychic: for information only.

Paranormal: see chart on magic, use pendulums Kabbalistic

ORIGEM DAS ONDAS NOCIVAS 2

Measure spontaneous potential

To perform the search, keep the pendulum suspended over wired on the central area of the base line of the graph, while pointing to the area of the plant to investigate, or optionally with a pointer with the index finger of his free hand.

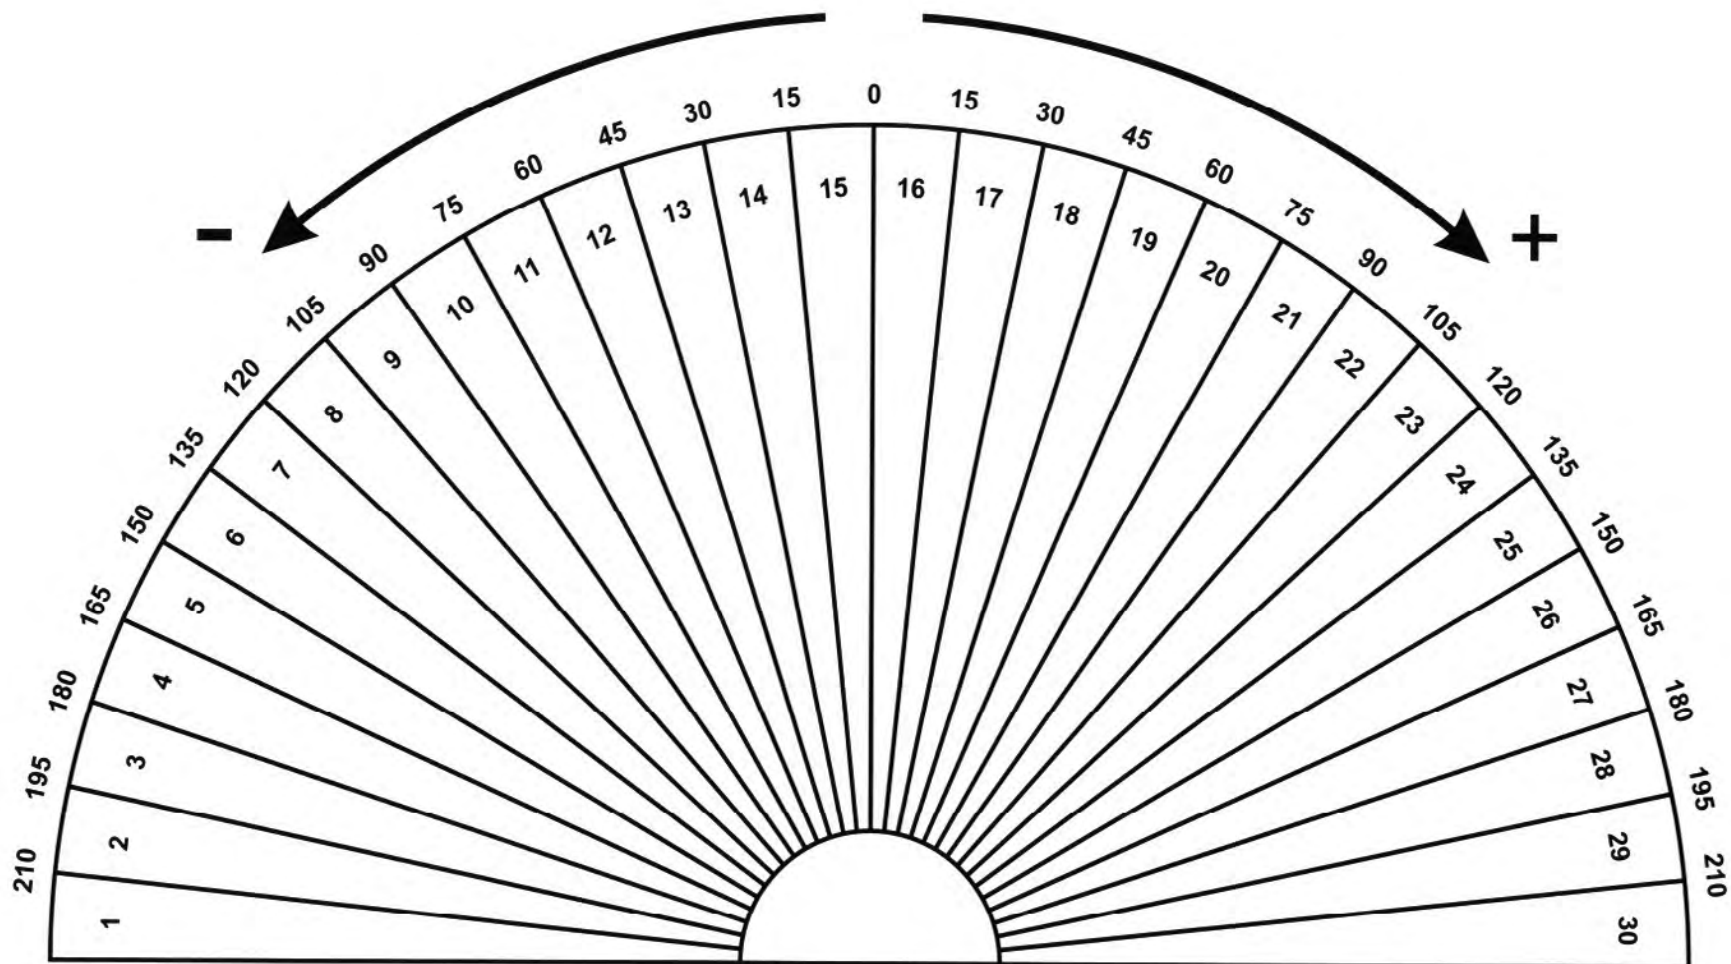

The book *Dowsing and Classical Kabbalah* our author has a chapter on research hidromineral, detailing this technique.

Meter potential difference spontaneous millivolt / meter. Its function is to measure electromagnetic anomalies issued by: (+) side - groundwater moving. Underground waters percolating between soil and rock semi-sane on steep slopes. The water going to the lowest place by generating a positive potential difference and anomalies causing harmful.

Side (-) - tectonic zone: fractures, faults, geologic discontinuities, abrupt contacts between different rock types, generating plans subvertical, with a difference of negative potential. These are places with very strong anomalies harmful.

MEDIDA DE POTENCIAL EXPONTÂNEO

UNIDADE DE MEDIDA: MILIVOLT (MV)

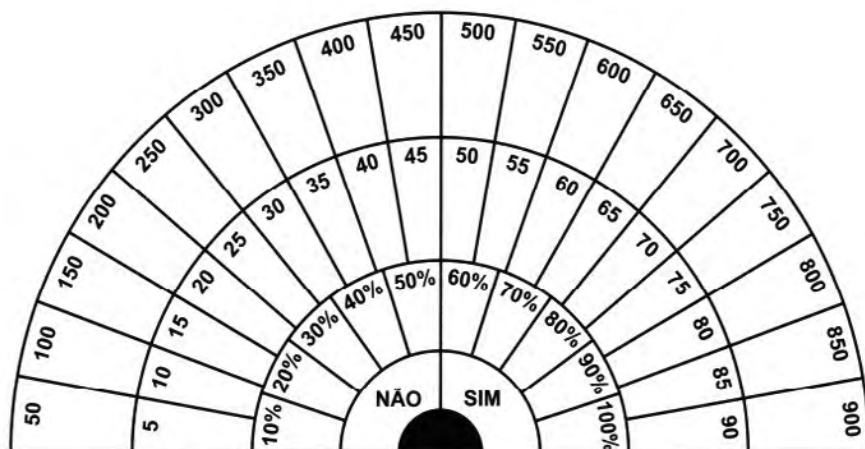

Ionizing radiation

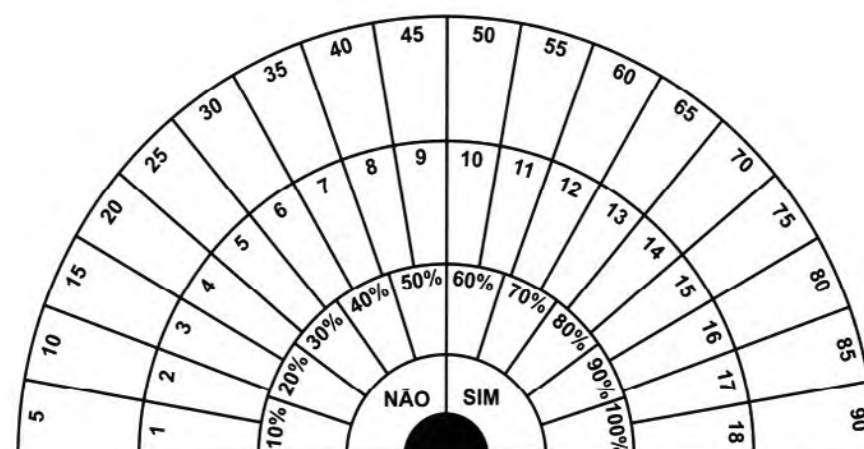

These graphs indicate the presence of radon gas (R in m / h) and polonium type (in Bq/m³) due to the disintegration atom, for example, uranium, radium, contained in crystalline rocks. These rocks to suffer intense disintegration due to inclement weather (rain, sun, dryness, etc.). Transformed into sandy and clay soils, emitting radioactivity. In bedrock radioactivity emitted is very small. Reminder: Not all rocks are emitting radioactivity, it is necessary to measure them.

RADIAÇÃO IONIZANTE

BECQUEREL M³
RADIAÇÃO α β

MICRO RÖTGEN/HORA
RADIAÇÃO GAMA γ

Provenance paranormal of harmful waves

Question: What is the origin of these paranormal waves harmful?

Answer:

Deceased: "wandering souls", "miasma", "shadows".

Memory walls: Find the source of impregnations: former occupant, crime, suicide, etc.. Waves

form: researching the origins.

Magic:

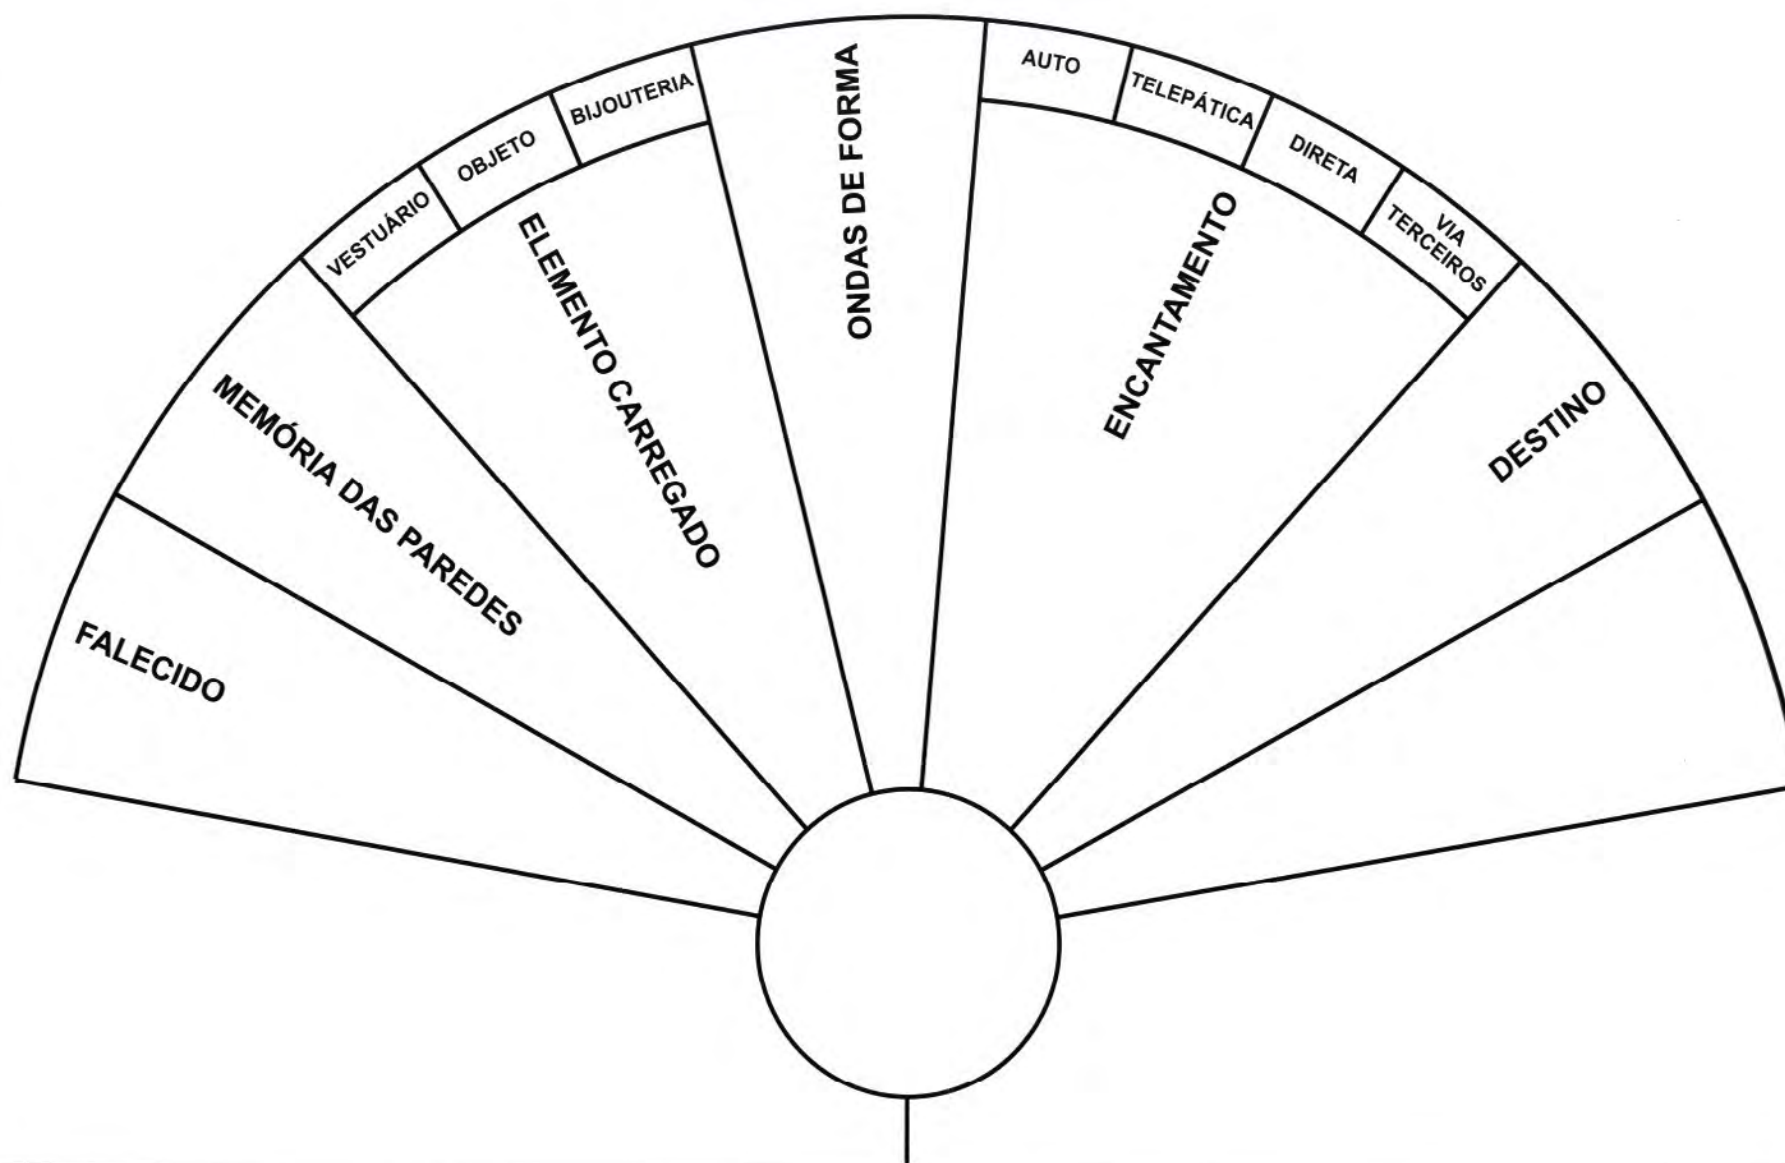

Auto spell the witness believes to be under the effect of magic. Direct: magic

performed directly on a dwelling or on its inhabitant. By others: magic performed

by a third party commissioned by someone else. Telepathy: negative thinking.

Free area: other paranormal sources

PROVENIÊNCIA PARANORMAL DAS ONDAS NOCIVAS

Methods for harmonization

Question: What means of harmonization should I use?

Some means of protection should be checked regularly, at least every 45 days. Some protective equipment, lose protective action against harmful waves by saturation or after a change of the moon.

When offered cases of magic, controlling the states present through dowsing pendulums to kabbalistic.

Make lifting loop Hartmann, to know the points of intersection.

Answer:

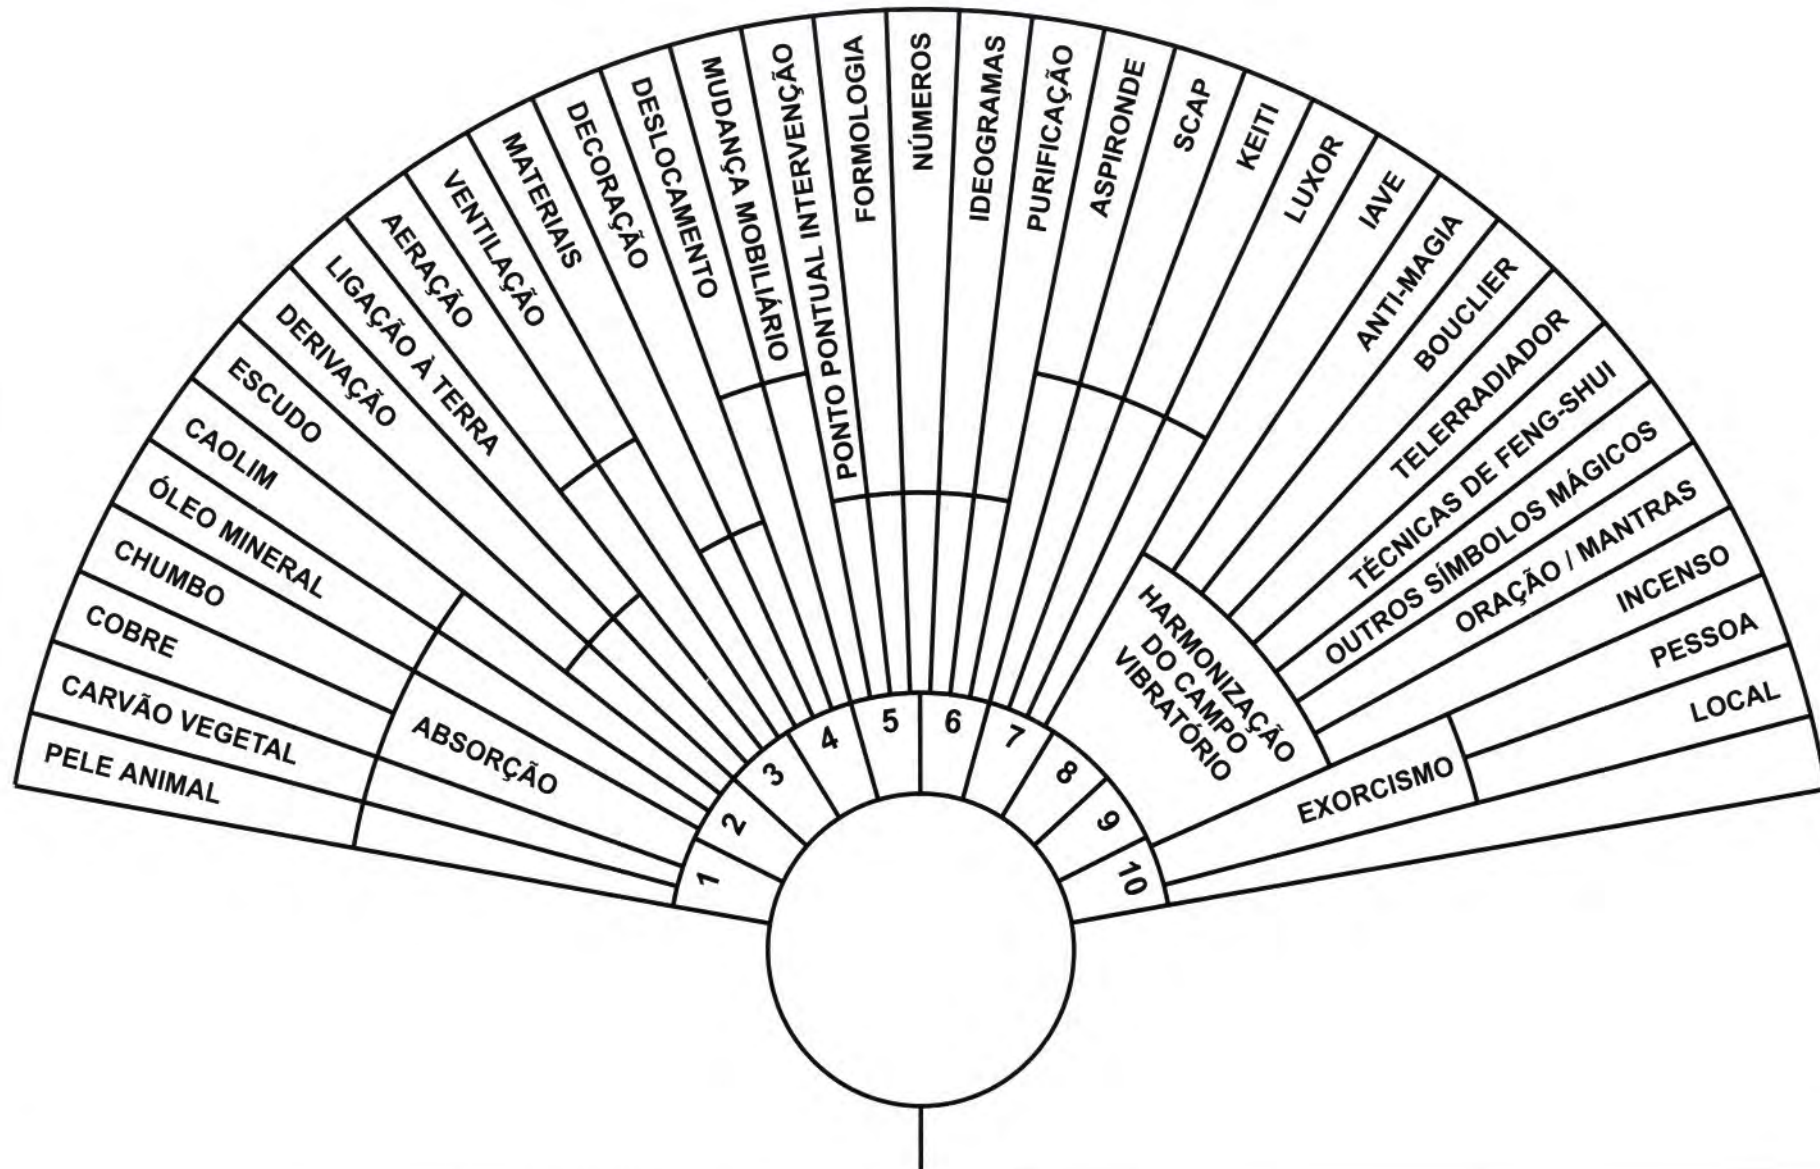

Absorption lead, charcoal, etc..

Derivation: waistline copper, iron solenoid pointers. Shield:
pointer with grounded metal screen.

Alignment of vibratory field: Point punctual intervention

Formologia: use of volumes or drawings

Meter potential difference spontaneous

Meter espontando potential difference in millivolts / meter. Its function is to measure electromagnetic anomalies issued by geological discontinuities, indicative of the presence of fractures, faults, contacts between different rock types. Faults indicated may suggest the presence of water contained in these discontinuities.

MEDIDA DE POTENCIAL EXPONTÂNEO

UNIDADE DE MEDIDA: MILIVOLT (MV)

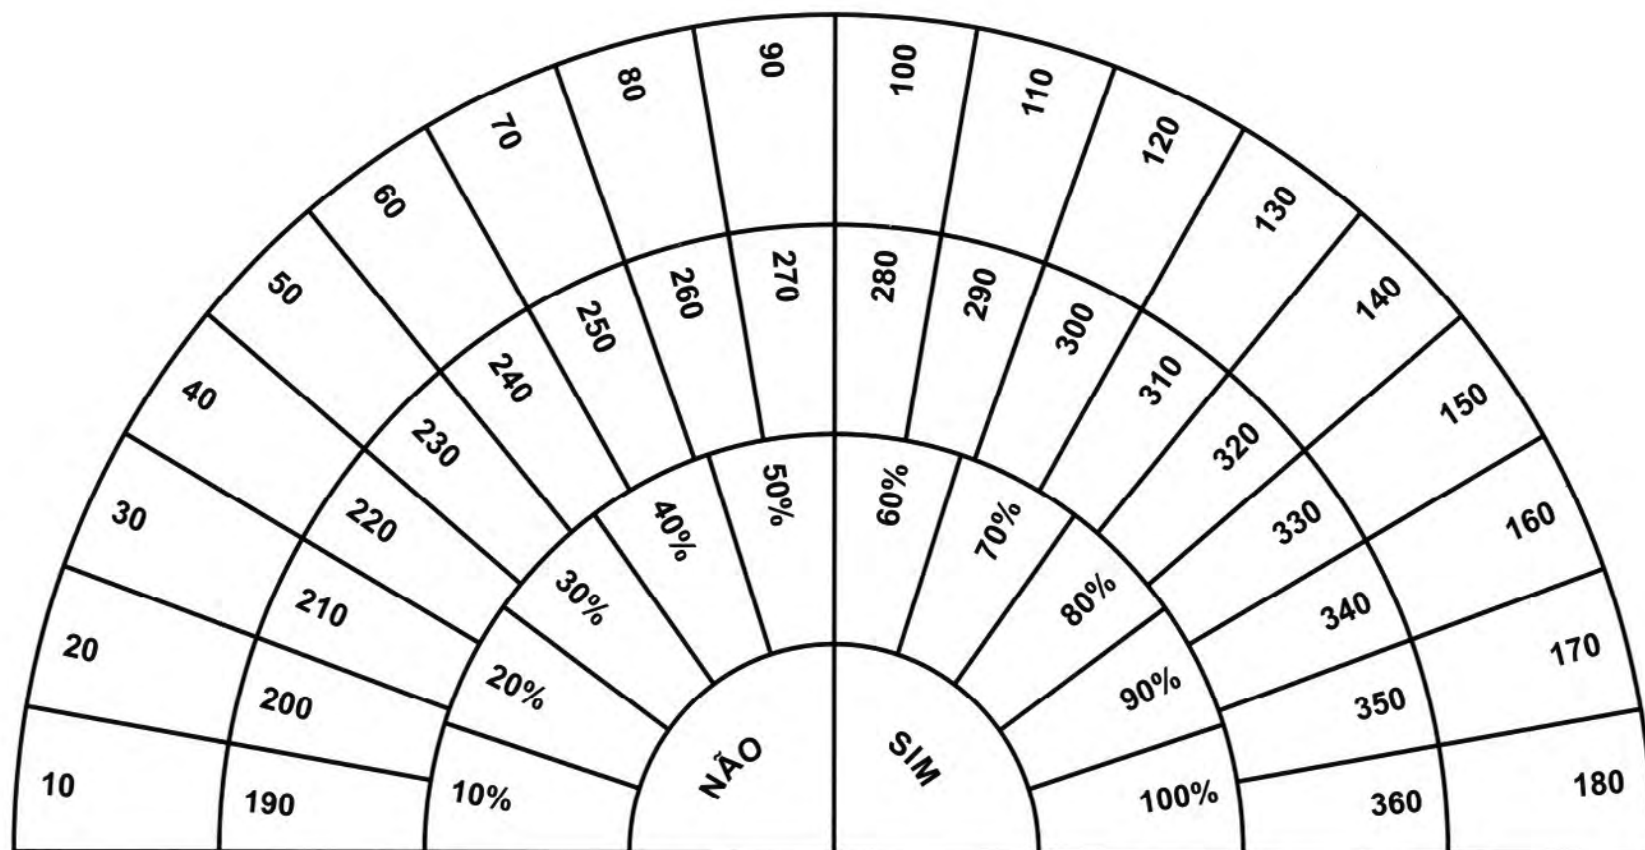

Meter electromagnetic waves

Meter electromagnetic waves low frequency. Have long wavelengths (108 105 Angstroms), which are measured in hertz (Hz). Range between 3 Hz and 300 are indicative of electromagnetic anomalies associated with the presence of groundwater. The frequency in Herzts is inversely proportional to wavelength in Angström.

ONDAS ELETROMAGNÉTICAS

HERTZ (UNIDADE DE FREQUÊNCIA= 1 MUDANÇA POR SEGUNDO)

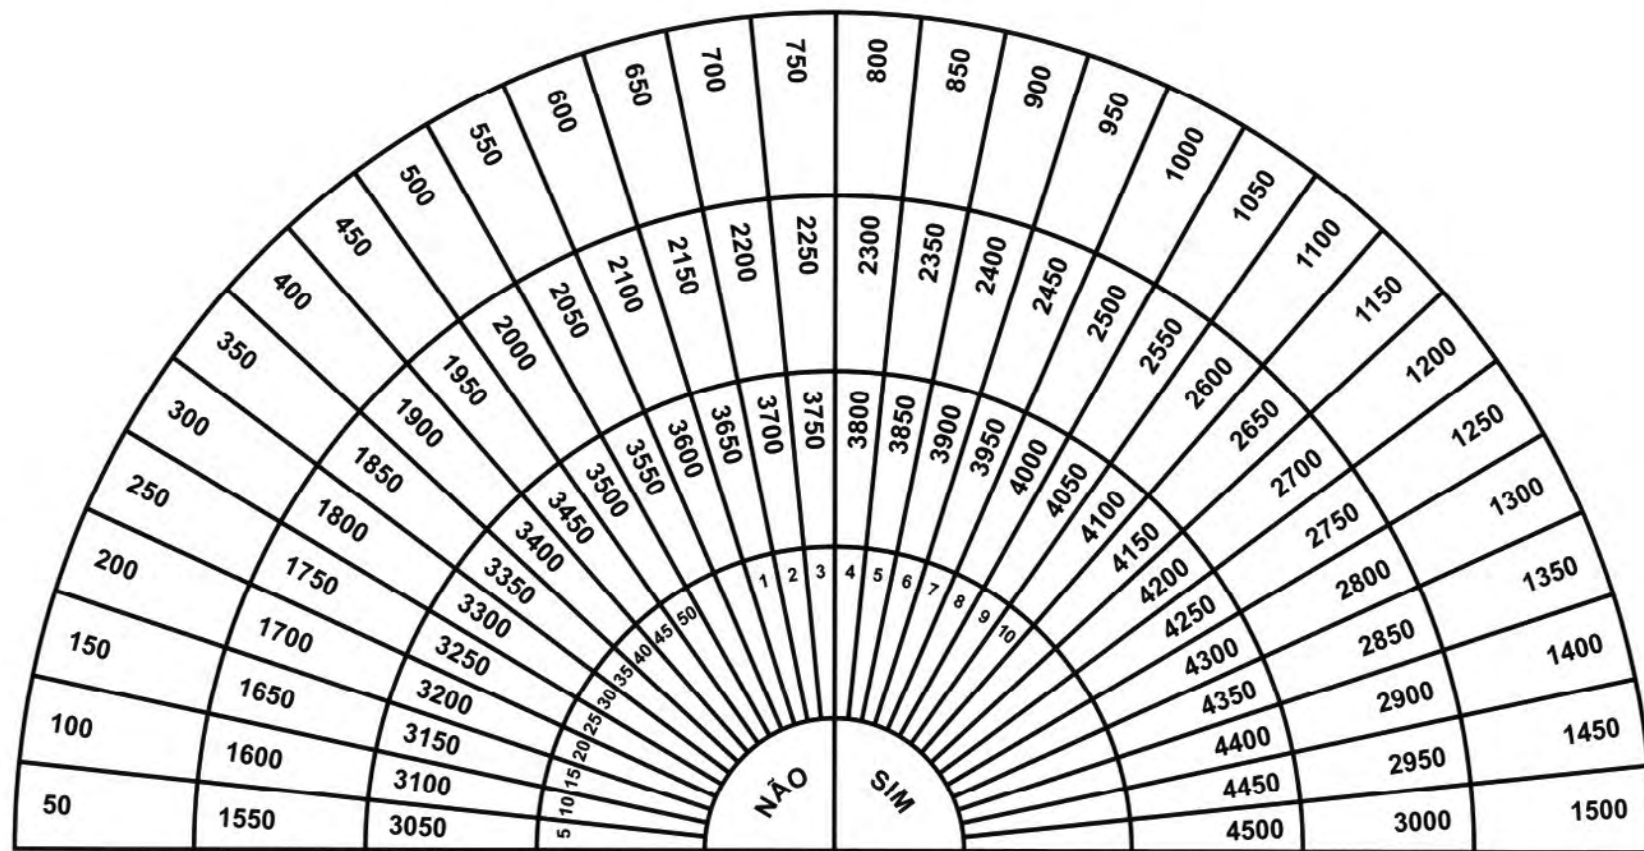

Meter natural electric field induced

Meter natural electric field induced. The unit is in kilovolt ampere ($KVA = KW$). The presence of water in underground movement, which form a dipole, generates an electric field induced natural.

CAMPO ELÉTRICO

KVA (KILOVOLT/AMPERE= KILOWATT

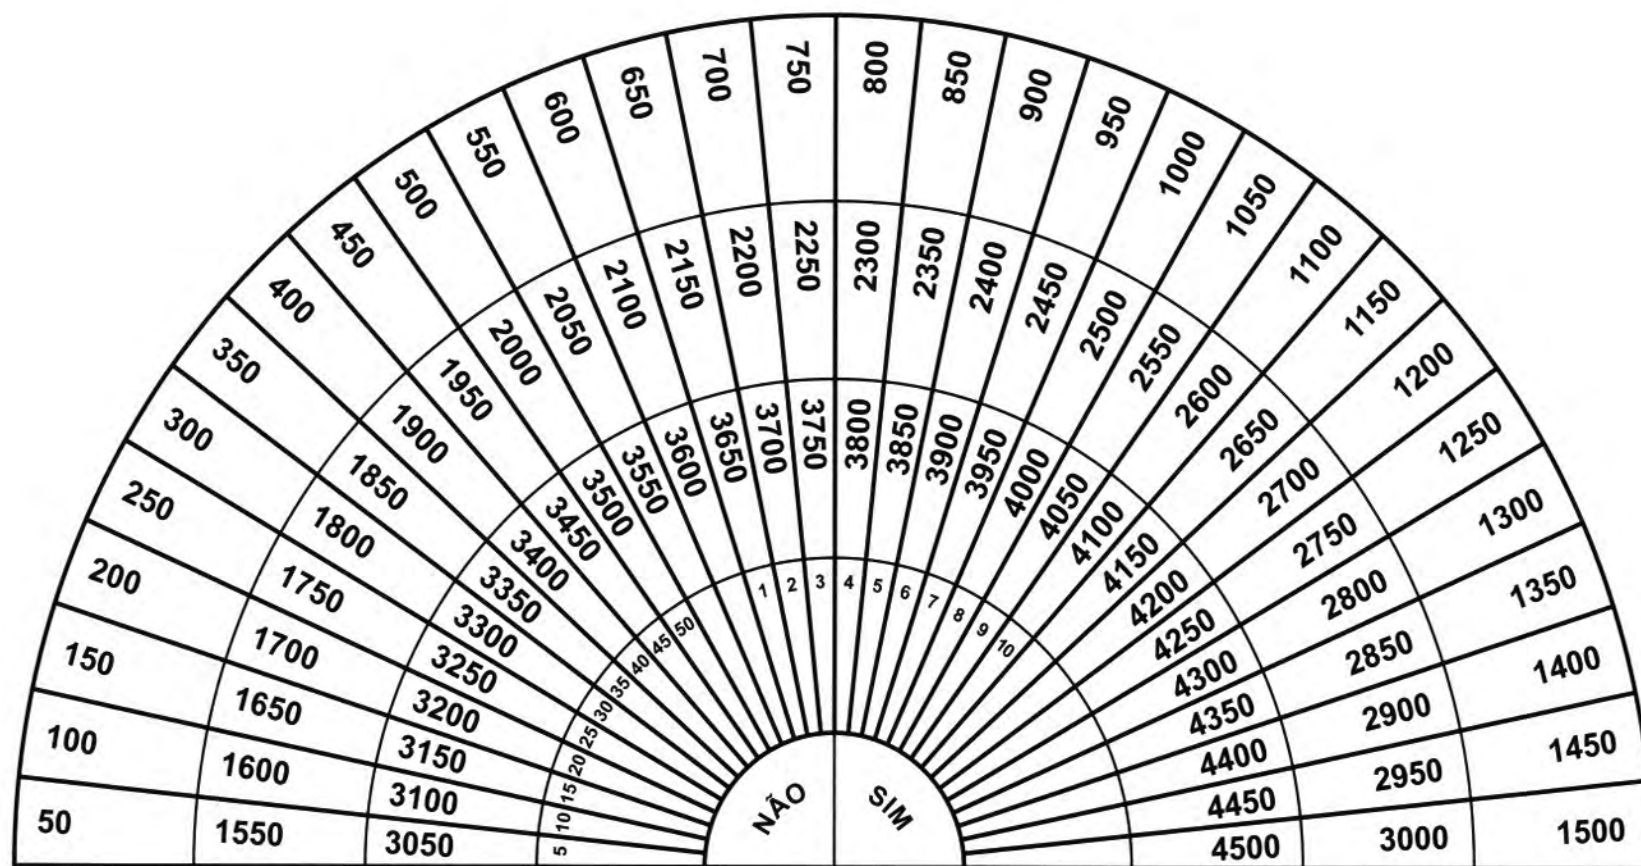

Meter magnetic induced

natural field

Meter natural magnetic field induced. The unit is in nanoteslas (nT). This field is generated in the presence of underground water in motion as a result of the generation of an electric field induced. The two fields occur simultaneously (they are perpendicular to each other).

CAMPO MAGNÉTICO

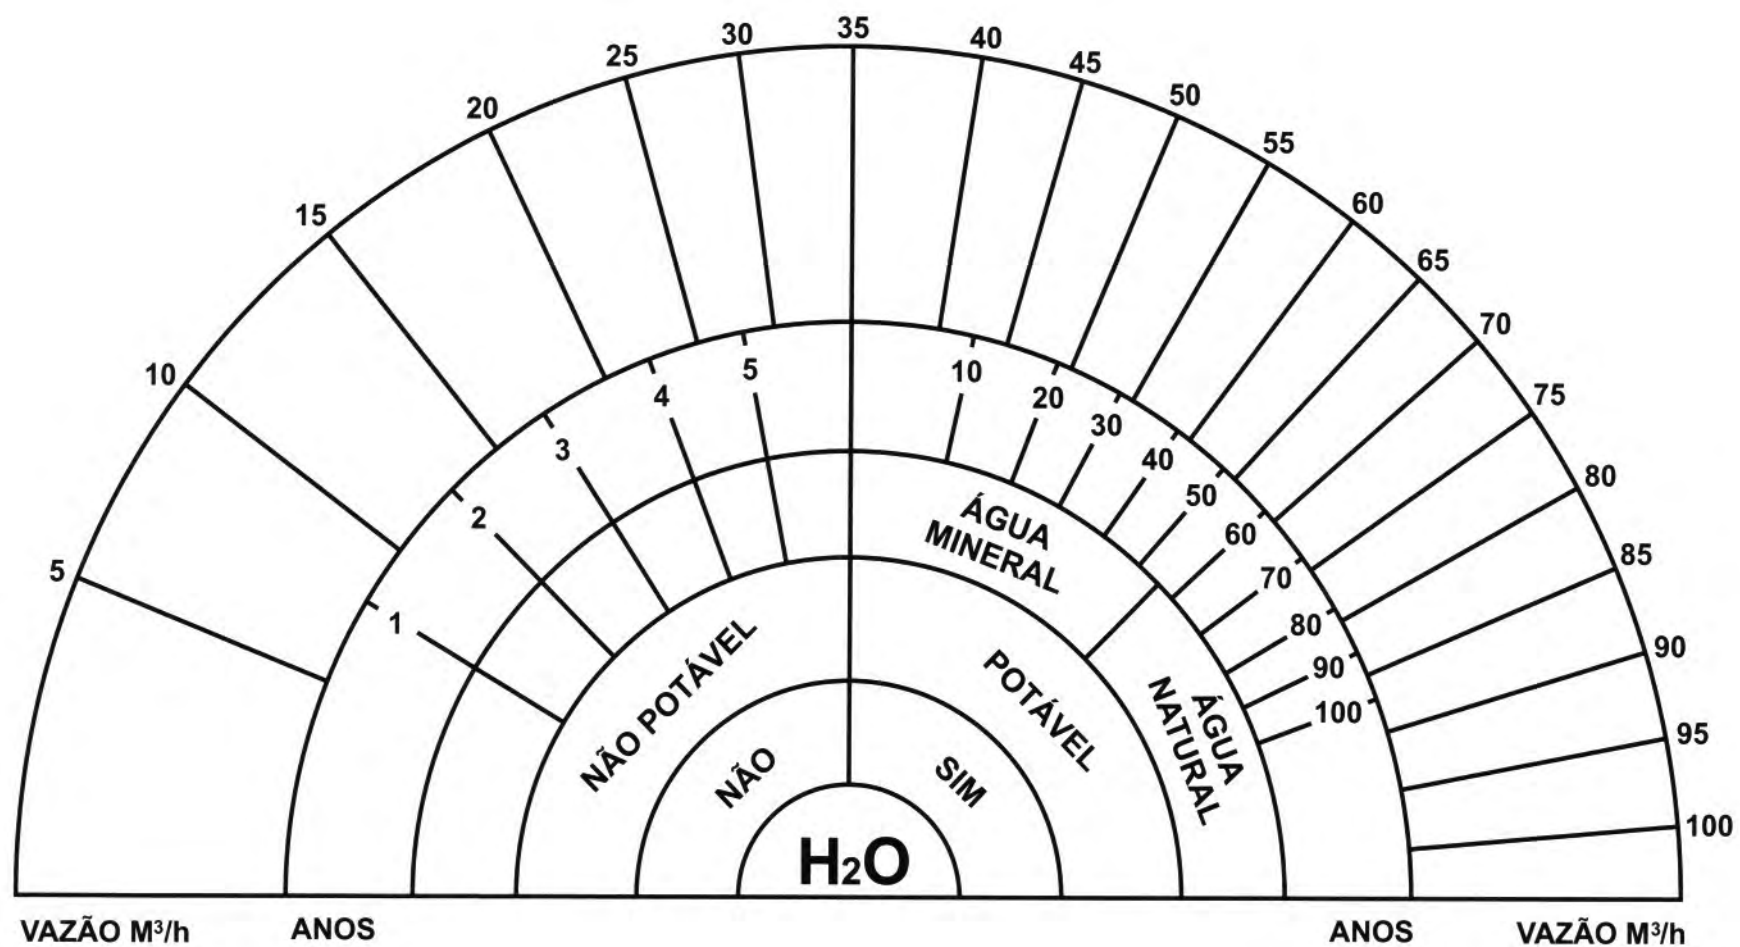

NANOTESLA (nT)

Meter amount of water

Measuring the amount of water. After identifying the fracture store water through the previous figures and geological analysis, uses this graph suggests that the amount of water probable at the site. The flow rate of the pump depends on the type and diameter of the ducts water. This requires analysis of the researcher, the process of affinity with water research and good practice.

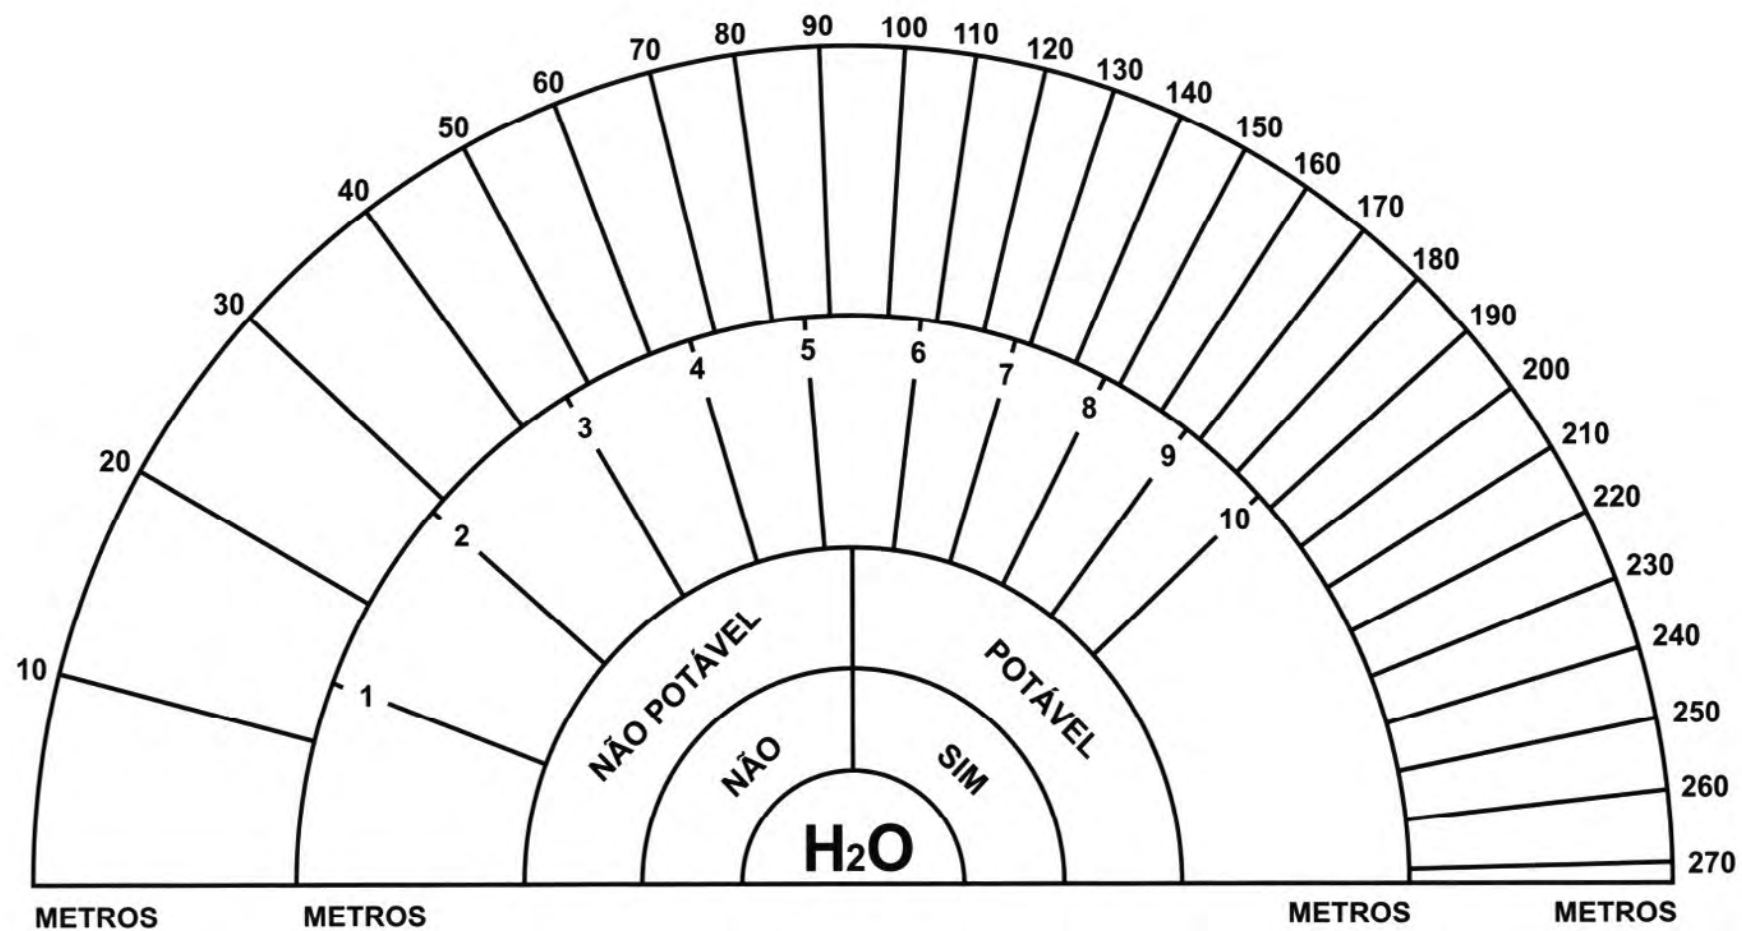

VAZÃO DA ÁGUA EM METROS CÚBICOS/HORA

Depth gauge

Depth gauge groundwater in open fractures in crystalline rocks, igneous and / or metamorphic. The measurement indicates the depth from the surface of water stored in the fracture.

PROFUNDIDADE DA ÁGUA EM METROS

Meter conditions of ionization

Chart for determining the percentage Yin / Yang

Meter conditions of ionization (For places and living things) Jacques La Maya.
Values (+): positive or detrimental. Values (-): negative or good. This graph has function to identify the presence of harmful positive ions from one place. In the presence of underground water in motion, geological faults and fractures, electric and magnetic fields, radioactivity, microwave, air conditioning, fans indoors, indoors for a long time and a multitude of anomalies that can identify harmful, both natural and the home automation. Positive ions attempt to balance acting on the cells of people in an attempt to incorporate an electron, for example, in its force field, thus affecting cells, unbalancing them.

Chart for determining the percentage Yin / Yang Jacques La Maya.
0: Neutrality Yin / Yang balance acceptable: -10 to +10. This graph has the function check if a place has excess energy. Yin energy above -10 indicates that the seat is "Stealing" power of living things (animals, plants and humans). Unhealthy Places and the same cited above. While excessive Yang energy indicates locations with stifling energy, for example, climbing on Mount Everest, the nearly 9,000 m high. The energy of a place can not be excessive (Yang) or scanty (Yin). Ea place with very good energy Yang to + 25: microclimate mountain or a beach, for example. In areas with groundwater graph indicates the maximum Yin.

The image features four concentric circles centered on the page. The circles are drawn with thin black lines and are nested within each other, creating a target-like appearance. The innermost circle is the smallest, and each subsequent circle increases in diameter by a consistent amount.

António Rodrigues, publicitário, escritor e editor, pesquisador de radiestesia e radiônica, vem ministrando cursos de radiestesia desde 1988. Na década de 90, pela empresa Mindtron, desenvolveu e produziu equipamentos radiônicos, compatíveis com as principais linhas existentes no exterior.

Instrumentos obrigatórios para a prática da radiestesia, os gráficos tornaram-se presentes no arsenal de qualquer praticante. Seduzindo pela multiplicidade de usos, permitindo análises mais precisas, aumentando o poder vibracional de substâncias, de palavras, permitindo seu envio a distância, quiçá interferir nas energias presentes, modificando os ambientes.

Pela primeira vez agrupados em famílias, sua origem definida, suas características esmiuçadas, os gráficos radiestésicos são aqui apresentados como instrumentos técnicos, de uma arte hoje universalmente reconhecida como ciência: a Radiestesia.

Estamos certos que, a partir de hoje, junto com o pêndulo, este livro passará a ser seu segundo instrumento radiestésico.
