

The colors of the spectrum, according to Chaumery and Belizal vibrations

April 10, 2011

Everything in the universe is energy, everything emits a vibration.

The vibrations of the colors of the spectrum according to Chaumery and Belizal are 2 x 12 colors:

- 12 colors in magnetic phase
- and 12 colors in electric phase.

Research has shown that 12 colours in magnetic phase are probiotics, favourable to life and health, and the 12 colors in electric phase are antibiotics, harmful, unhealthy.

Green-

Black

Infra-red

Red

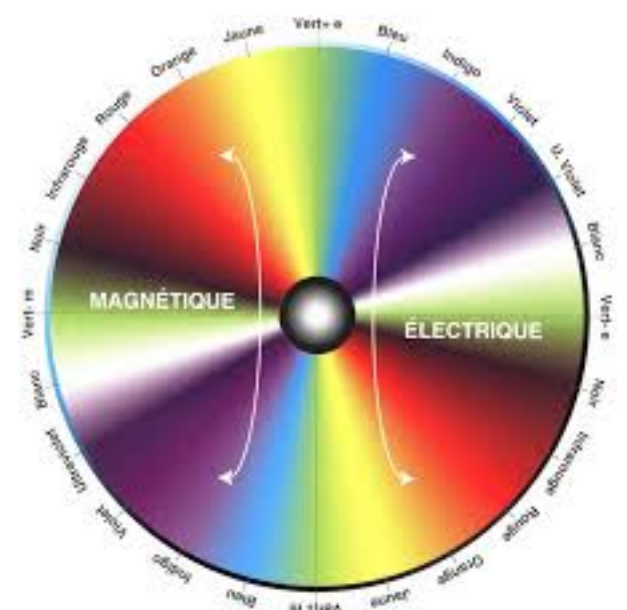

Orange

Yellow

Green +.

Blue

Indigo

Violet

Ultraviolet

White

To ensure that something (food, drink, location, clothing, art object, device, etc.) is perfectly probiotic, we check the pendulum that spectrum is smooth and magnetic phase: that is, all the color vibrations are represented in the magnetic phase.

Waves of diseases		Healing waves	
Green-	Negative	Green-	Positive
Black	Negative	Black	Positive
Infra-red	Negative	Infra-red	Positive
Red	Negative	Red	Positive
Orange	Negative	Orange	Positive
Yellow	Negative	Yellow	Positive
Green +.	Negative	Green +.	Positive
Blue	Negative	Blue	Positive
Indigo	Negative	Indigo	Positive
Violet	Negative	Violet	Positive

Ultraviolet	Negative	Ultraviolet	Positive
White	Negative	White	Positive

The pendulum, the basic question is:

"What color visible or invisible in phase electric or magnetic of such object, such person, such place?" dowsing on the dial.

You can also ask each color visible or invisible in the order given above. Placed his left hand close to what is to be tested, it lists the colors (anti-green, black, Infra-red to white) and watch which way turn the pendulum:

- negative on the left, counterclockwise,
- or positive, right, clockwise.
