GLOSSARY OF ABBREVIATIONS USED WITH
MAGNETO GEOMETRIC APPLICATION PRINCIPLES
AND PROTOCOL

M G A	Magneto geometric applications
C N S	Central nervous system
S N S	Sympathetic nervous system
P S M S	Para-sympathetic nervous system
G I TRACT	Gastro-intestinal tract
N D P F	No detectable Prior Factor
SOLAR P	Solar plexus chakra
ALTA M	Alta Major chakra
WITNESS	Sample of patient's hair, blood spot, urine sample
T C	Therapeutic Command

NEW COURSE MATERIAL FOR SUBTLE BODY HEALING

LECTURE II

INTRODUCTION

To revise and practice the protocol involved in a subtle body analysis and the treatment procedures required.

1. Revision of the Analysis Chart Lecture I.

As students advance in subtle body analysis and the factors involved it becomes less important to complete fully the mean and max. point readings in the structure areas, i.e., (physical body). Subtle body imbalances control the physical, and patients either display these directly to the practitioner at the consultation or by completing the case history.

Following are the procedures required.

- a. Dowsing the degrees of deviation in the mental/ astral physical etheric bodies and the nadis.
- b. Establishing the factors involved with the above deviations.
- c. Establishing any influence from the patients soul ray that is causing the measured deviation in the lower mental area.
- d. Dowsing the degrees of deviation in the chakra centres and the factors involved along with the soul influence, if any, that reflects integrity of endocrine glands controlled.
- e. Dowsing the degrees of other factors that can influence the subtle body.
- f. The effects of the miasm as a factor on the subtle body.

2. TREATMENT PROCEDURES AS PER LECTURE I.

- a. Treatment is essential at time of analysis.
- b. The use of colour, gems, homoeopathic simulations or therapeutic commands in the triplet instrument.
- c. The use of group therapy instrument using the therapeutic command cards as a daily projection.

GROUP TREATMENT INSTRUMENT - DESCRIPTION AND OPERATING INSTRUCTIONS

1. The instrument consists of a Control Unit and a modified 35mm Slide Projector.
- 2.(a) The Control Unit comprises a Simulator, an Interrupter and a Time Switch.
 - (b) The top panel is in two parts:-
 - (i) the detachable cover for the Time Switch. This should not be removed unless it is necessary to alter the Time Switch setting,
 - and (ii) the Control Panel.
 - (c) The Control Panel incorporates:-
 - (i) a slot to hold the remedy card
 - (ii) a potency control
 - (iii) a push button marked "TIMED" which shows an orange centre when in the "ON" position
 - (iv) a push button marked "CONSTANT" which shows a green centre when in the "ON" position
 - (v) a push button marked "PUSH TO TEST" and a green light
 - (vi) a three-pin socket marked "PROJECT SKT" for connecting the Control Unit to the Slide Projector.
 - (d) The front panel of the Control Unit incorporates:-
 - (i) a red lamp which indicates when the unit is connected to the main supply
 - (ii) a single output socket
 - (iii) an adjustment screw which sets the frequency of interruption. (This is set before despatch).
 - (e) The right hand end of the Control Unit incorporates:-
 - (i) a fuse holder containing a 2 amp fuse
 - (ii) the lead for connection to the main supply.
 - (f) Main connections are: BROWN = LIVE BLUE=NEUTRAL
YELLOW/GREEN=EARTH
The connection to the mains should be permanent once the instrument has been set up.
- 3.(a) The Slide Projector is a GAF 757 supplied without lens or lamp.
 - (b) Its controls are as follows:-
 - (i) switch on back, having three positions
 - (ii) timer control on panel on right side (viewed from the back)
 - (iii) other controls (details in Projector instruction book) should be ignored.
 - (c) The Projector accepts GAF rototray or flat magazines with capacities of 100 and 36 slides respectively. For use as an automatically controlled projector the former must be used.
4. Connections:-
 - (a) Mains lead to mains.
 - (b) "PROJECTOR SKT" (2(a)(vi)) to mains input socket and projector.
 - (c) Single socket (2(d)(ii)), by means of lead and wooden lens substitute provided, to lens socket of the Slide Projector. This should be pushed in as far as it will go.
5. Operation:-
 - (a) For normal use the "TIMED" switch (2(c)(iii)) is left "ON"(orange signal showing),

CONTINUED ON PAGE 2.

PAGE 2

5. Operation:- continued/.....
 in which position the Time Switch will activate the instrument for approximately 17 minutes at the beginning of every fourth hour.
- (b) Whilst the Time Switch is on, pressure on the "PUSH TO TEST" button (2(c)(v)) will cause the adjacent green light to flash, indicating correct operation of the Control Unit.
 - (c) The purpose of the "TIMED" switch is to enable the Slide Projector to be turned off (as for inserting an additional slide etc.,) without interfering with the sequence of the Time Switch.
 - (d) The "CONSTANT" switch (2(c)(iv)) when in the "ON" position (green signal showing) overrides the Time Switch, thus allowing treatments to be given during periods when the Time Switch is "OFF".
 - (e) The Group Projection Card should be placed in the slot in the Control Unit (2(c)(i)).
 - (f) The potency control (2(c)(ii)) should be set at 10MM.
 - (g) The three position switch on the Projector (3(b)(i)) should be set in the central position.
 - (h) Preferably using a stop watch, the Timer Control on the Projector should be adjusted to give a change of slide every 10 seconds, resulting in each slide being fed through the Projector in the 17 minutes during which it operates. (Approximately 10 seconds setting will be found by turning the timer knob as far clockwise as it will turn, and then turning it anti-clockwise about 45° so that the rectangular part of the knob is aligned between the second "F" of "OFF" and the "M" of "MIN").

NOTE: If a slightly longer or shorter duration per slide is needed to achieve this, it will not detract from the effectiveness of the instrument.

6. Witnesses:-

- 1.(a) These should be prepared by encapsulating each patient's hair sample between a 25mm diameter tacky label and a piece of white card cut to fit the film space in the slide holder.
 - (b) It is important that no hair should extend beyond the circumference of the tacky label, and that the latter adheres firmly to the card.
 - (c) The patient's name and address should be written on the tacky label.
2. The slides should be inserted in the magazine in such a way that, when in the projection position, the tacky label is facing the wooden lens substitute inside the Projector.

7. Treatment:-

- 1. Once the magazine is loaded and the "TIMED" switch on the Control Unit is "ON", the instrument will give each patient an approximately 10-second treatment every four hours. There is no need to vary this.
- 2. The nature of the treatment is not readily defined in words, but its history is this:-
 - (i) In 1970, a remedy card was designed with the intention to treat as effectively as possible, as many factors of disorder as possible, whilst being harmless to those not currently indicated to require it.
 - (ii) Since then the pattern of the card has been modified, many hundreds of times, to incorporate remedial requirements of patients who "slipped through the original net".

THERAPEUTIC COMMAND CARDS

This set of ten cards is designed for use in the Group Treatment Projector. It was found that the previous Group Treatment Card had what can be described as a moving peak of effectiveness. As more and more therapeutic factors were built into it over the years, it seems that the further the card process grew from its original factors so those aspects became less effective. This of course does not invalidate the effectiveness of the card, but the new set of Therapeutic Command Cards provide a series of specific directives to the patient which are universal in their application, thereby every patient can receive them to their benefit.

Any sequence of Therapeutic Command Cards can be used to suit the practitioner's own needs on a daily basis. A basic sequence would be as follows: T-C Cards 3 - 4 - 2 - 9 - 10 - 8. Each T.C. Card being used immediately after the next to provide each patient with a comprehensive treatment.

T-C 1

To harmonise and restore complete structural and functional integrity to the spinal column and its ligamentous components.

T-C 2

To harmonise and restore complete structural and functional integrity to the seven major spinal chakras and the endocrine glands they govern.

T-C 3

To render all syphilitic, tubercular and cancerous taints (miasms) in the physical, etheric, astral and mental bodies neutral and to eject them from the living organism.

T-C 4

To render all pathogenic viruses and bacteria including their toxins neutral and eject them from the living organism.

T-C 5

To render all unspecified food additives and preservatives neutral and eject them from the living organism.

T-C 6

To render all unspecified noxious chemical and gaseous toxins neutral and eject them from the living organism.

T-C 7

To calm and harmonise the mental, emotional and etheric bodies and induce undisturbed, refreshing, restoring sleep in complete safety.

T-C 8

To remove all congestion from the spleen chakra and the spleen and harmonise the reception, assimilation and distribution of prana by the etheric body.

T-C 9

To remove all congestion, over-stimulation and unco-ordination from the mental, astral, etheric and physical bodies.

T-C 10

To harmonise and restore complete structural and functional integrity to dense and loose connective tissue, connective tissue fibres and to the ground substance of connective tissue.

GROUP TREATMENT INSTRUMENT

When using the control unit with the slide projector and the therapeutic command cards, the procedure is as follows:

Use the control unit button "constant" this causes the instrument to be operational all the time. Use a separate timer for 17 minutes and at the end of each period replace the card in the slot with the next sequence command card. Re set your timer for 17 minutes and depress the constant button.

Repeat this procedure until all the cards have been in the instrument.

One treatment from each card, in sequence, is sufficient per day.

During the night, week-ends or vacation periods, use the timed button only with the T-C card 9 in the slot.

Alternatively use Malcolm Rae's initial group treatment card for out of hours practice time.

One further therapeutic command card of significance is the card called - Alignment of Chakras with Soul. (The full interpretation of the card is: (Restore all major chakras to the awakened state as directed by the patients own soul influence).

This command card should be used as an initial treatment on all new patients before the analysis is done.

This will cause the patient to display to the practitioner only the relevant degrees of deviation and thus bring to the forefront of the practitioners mind the basic causative factors.

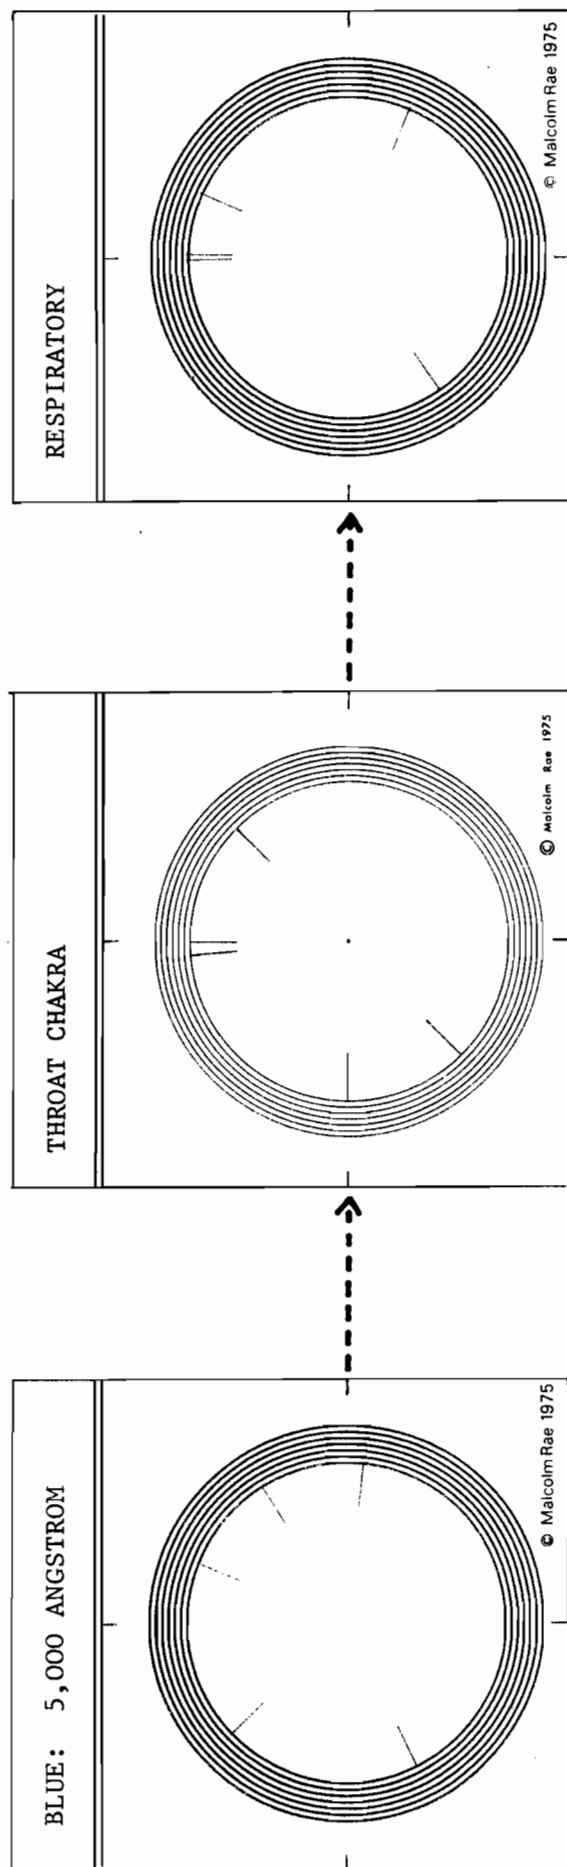

Fig. 2

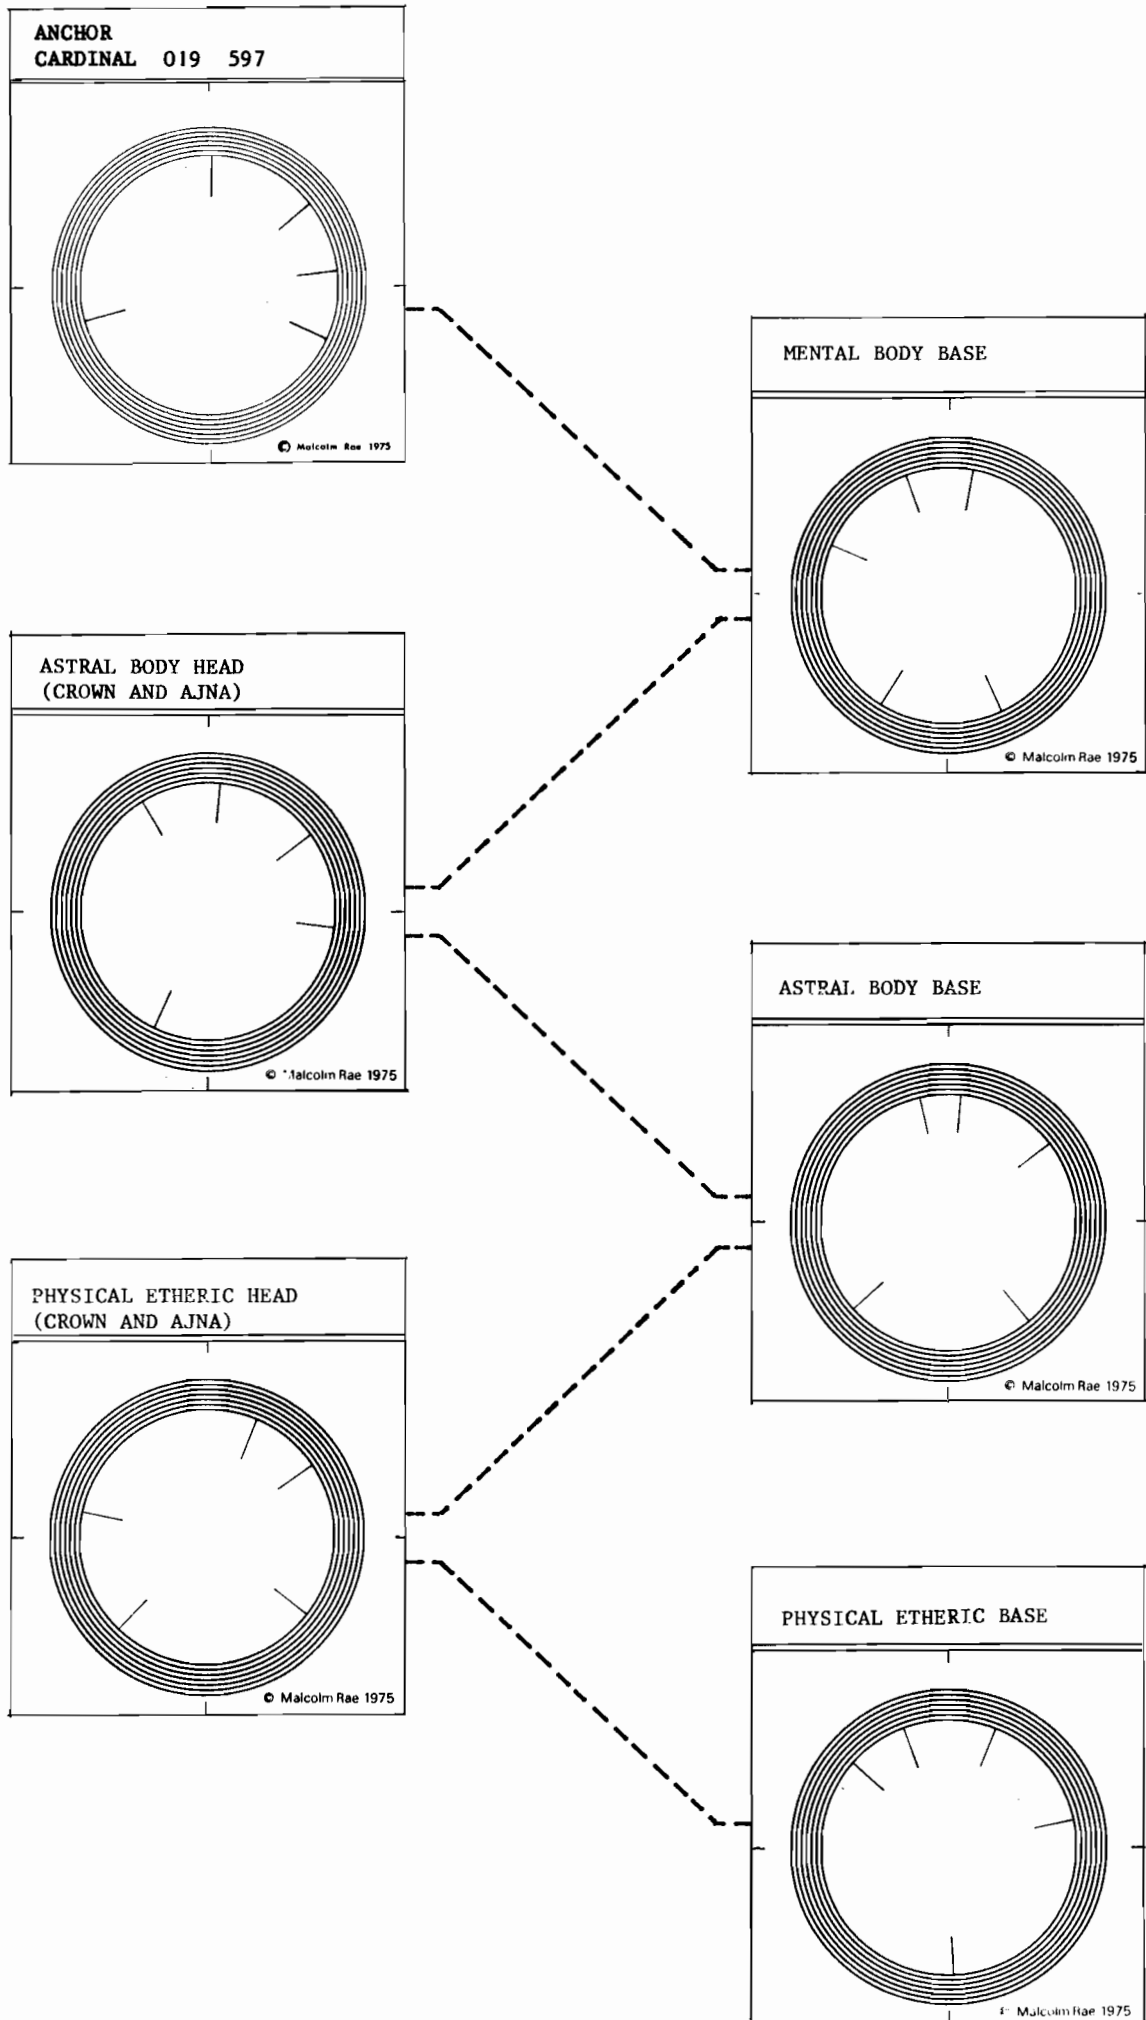

Fig.3

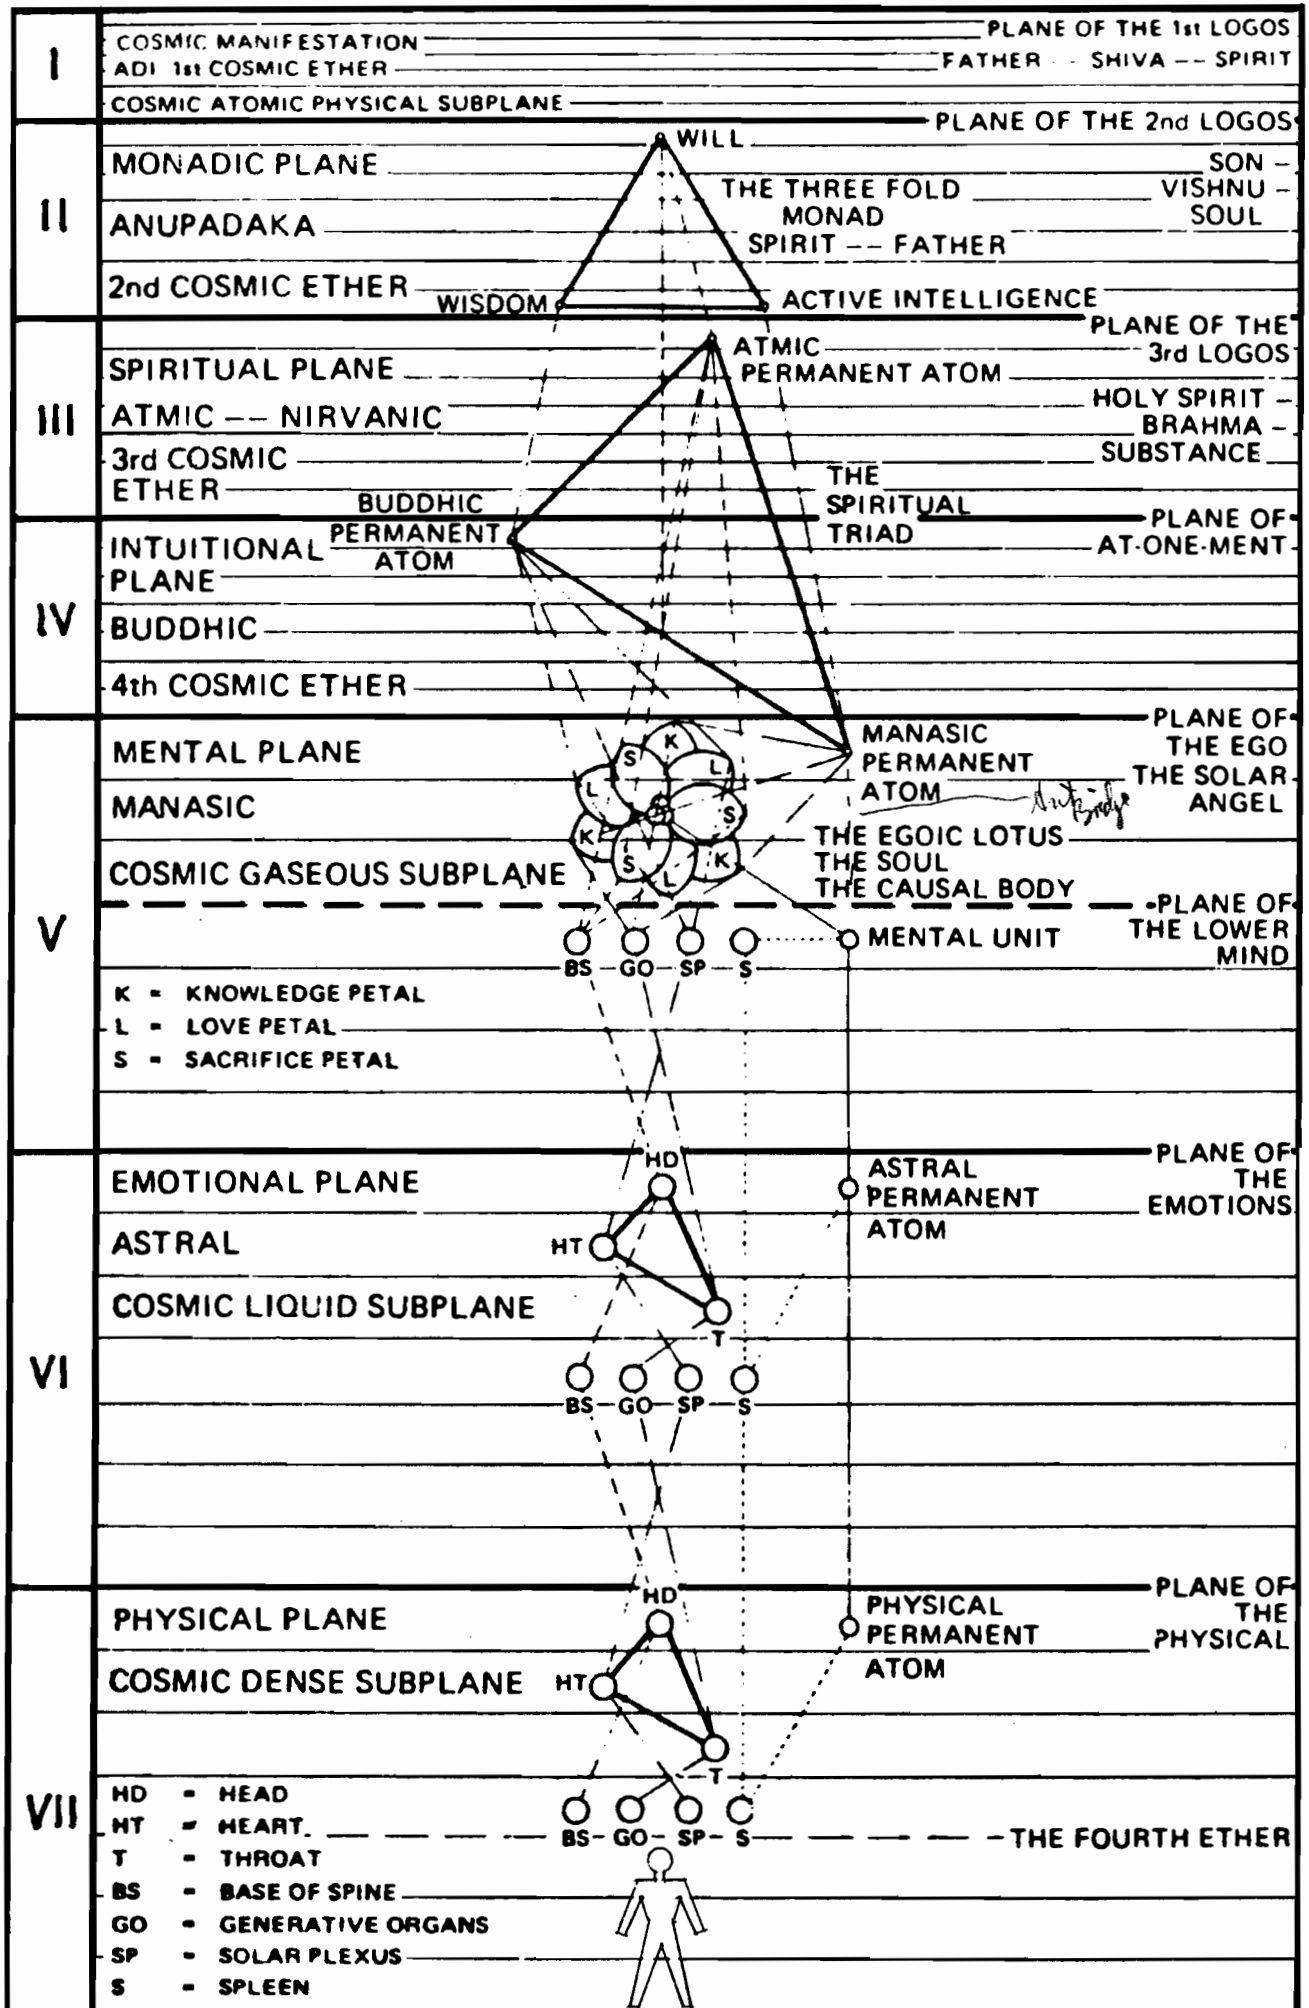

Fig. 4

3. THE MIASM

- a. The most common of the miasms found when dowsing the subtle body are T.B., syphilitic, sycotic, cancer and psora.
- b. Miasms can be inherited from forefathers, acquired during this lifetime from the etheric body of this earth, and miasms can be in the form of predispositions from previous incarnations that have to work through the soul and chakra energy centres.
- c. It is interesting to note that miasms can be present in the patient, and can be working through the etheric body, but if the mental, astral and etheric body are in harmony then these miasms have no detrimental effects in the physical body, they simply dissipate into the etheric body of the earth.
- d. Miasms that are causing disturbance in the subtle body can be treated from the base chakra in the mental body, onwards through all the other linked energy centres, through to the dense physical body.
- e. For clearing blockages in energy centres the following sequences are suggested in treatments.

COMMAND CARD	MIASM TYPE	———	LOCATION
(COLOUR)	(T.B. MIASM)	———	(BASE CHAKRA MENTAL)

This sequence may be added to by coupling in further instruments as follows:

COMMAND CARD	———	MIASM	———	LOCATION	———	CHAKRA 1	———
LOCATION	CHAKRA 2	———	LOCATION	CHAKRA 3	———		
LOCATION	ENDOCRINE GLAND	———	LOCATION	ORGAN OR CELL.			

By a sequence of card insertions as above example, energies can be allowed to flow from one centre to another and clear blockages that cause disturbance in gland and cellular functions.

4.
 - a. Location cards are available for subtle body chakras as per the revised diagram fields and form of man. Treatments may be initiated at any of the centres down to the physical counterpart controlled.

These cards are known as the K.M. Subtle Body Cards.
 - b. Treatment times last from 10 seconds to 2.2 minutes on average, but 15 minute periods at the high potencies are not to be repeated as to shorter intervals.
 - c. Potencies on the instrument are best selected by dowsing over the well or the instrument and should be done for each card inserted. (Note potencies will differ).

5. As students advance a further influence affecting the subtle body and its centres is the identification of the rays that the soul is functioning on, and the areas of the etheric influenced. This is not to be confused with the concept of soul ray influence, as in Lecture I, this is different in its definition. We will call soul ray influence the energies causing health disharmonies via the etheric body and chakras centres.

We will call the further studies of the soul rays -

THE SEVEN RAYS OF THE DIVINE TRIPLICITY

- a. The use of the seven rays analysis will be of immense value to practitioners dealing with patients displaying symptoms related to their path in life, their work, environment and those needing re-direction of personal relationships.
- b. The ray is a particular force of energy, and the emphasis is to be placed upon the qualities of that force or energy and not upon the form aspects which that ray creates.
- c. The following information is from two writers on the subject of rays. Firstly, A.E. Bailey in her book Esoteric Psychology I and Dr. David Tansley has written many books on subtle body healing.
- d. Every human being is found to be functioning on one or more of the seven rays.

The Seven Rays are as follows:

The Rays of Aspect.

1st Ray	The Ray of power, will and purpose.
2nd Ray	The Ray of love and wisdom.
3rd Ray	The Ray of active creative intelligence

5d. The Rays of Attribute

cont.

4th Ray	The Ray of harmony through conflict
5th Ray	The Ray of concrete science or knowledge
6th Ray	The Ray of idealism or devotion
7th Ray	The Ray of order or ceremonial magic

e. Every human is essentially an expression of five ray forces.

The Ray of the soul

The Ray of the personality

The Ray governing the mental body

The Ray governing the astral or emotional body

The Ray of the physical/Etheric body

Every form in nature and every human being, is found upon one or other of the seven rays. A ray confers, through its energy, physical conditions, and determines the quality of the emotional nature, it colours the mental body, and it controls the distribution of energy, for the rays are different kinds of vibration, and govern a particular chakra in the body through which distribution is made. Each ray predisposes a man to certain strengths and weaknesses, and constitutes his principle of limitation, as well as endowing him with capacity. It governs the method of his relations to other human types and is responsible for his reactions in form to other life forms. It gives him his colouring and quality, his general tone on the three planes of the personality, and it moulds his physical appearance. Certain attitudes of mind are easy for one ray type and not another.

1st Ray	——	Red	——	Crown Chakra
2nd Ray	——	Blue	——	Heart Chakra
3rd Ray	——	Yellow	——	Throat Chakra
4th Ray	——	Orange	——	Brow Chakra
5th Ray	——	Green	——	Sacral Chakra
6th Ray	——	Violet	——	Solar Plexus Chakra
7th Ray	——	Indigo	——	Base Chakra

5 cont:

- f. Information obtained regarding the rays and the bodies they govern should be utilised by the practitioner when viewing overall the bodies and chakra centres.

Care should be taken in imparting the knowledge of ray aspect and attributed to patients.

Ray 2 - 4 - 6 work well together, as do 1 - 3 - 5 - 7.

THE RAYS

The seven rays are the first differentiation of the divine triplicity.

The seven spirits before the throne of God.

The seven fountain spirits. Boehme.

The first Ray of Will or Power

Special Virtues:

Strength, courage, steadfastness, truthfulness arising from absolute fearlessness, power of ruling, capacity to grasp great questions in a large minded way, and of handling men and measures.

Vices of Ray:

Pride, ambition, wilfulness, hardness, arrogance, desire to control others, obstinacy, anger.

Virtues to be acquired:

Tenderness, humility, sympathy, tolerance, patience.

Glamours:

Love of power and authority, pride, selfish ambition, impatience and irritation, self centredness, separativeness, aloofness.

Luther, Carlyle, Walt Whitman, Kitchener 1 + 7, Napoleon 1 + 4.
Likes crashing choruses. Takes the Kingdom of Heaven
"by violence".

The Second Ray of Love-Wisdom

Special Virtues:

Calm, strength, patience and endurance, love of truth, faithfulness, intuition, clear intelligence, and a serene temper.

Vices:

Over absorption in study, coldness, indifference to others, contempt of mental limitations in others.

Virtues to be acquired:

Love, compassion, unselfishness, energy.

Glamours:

Fear, negativity, a sense of inferiority and inadequacy, depression, constant anxiety, self pity, excessive self-effacement, inertia and ineffectiveness.

Second Ray is the ray of the world teachers, the student on this ray is never satisfied with his highest attainments, his mind is always fixed on the unknown, the heights to be scaled.

Normally has tact and foresight, makes an excellent ambassador, teacher, head of a college, the artist would produce work that is instructive.

Method of Healing: To thoroughly know temperament of patient and nature of disease so as to use his will power to best advantage.

Approach to Path: By close and earnest study making them more than mere intellectual knowledge.

The Third Ray - Active Intelligence - Higher Mind

Special Virtues:

Wide views on all abstract questions, sincerity of purpose, clear intellect, capacity for concentration on philosophic studies, patience, caution, absence of tendency to worry himself or others over trifles.

Vices:

Intellectual pride, coldness, isolation, inaccuracy in details, absent mindedness, obstinacy, selfishness, over much criticism of others.

Virtues to be acquired:

Sympathy, tolerance, devotion, accuracy, energy and common sense.

Good at higher mathematics. Seeing too many details may paralyse action.

Healing Methods: Use of drugs made of herbs or minerals belonging to the same ray of the patient under treatment.

Approach to path: Deep thinking and study on philosophic and metaphysical lines.

Glamours:

Glamour of always being busy. Materialism, preoccupation with detail.

Efficiency and self importance through being the one who knows.

Scheming and manipulation of others. Deviousness.

Self interest.

The Fourth Ray - Harmony through Conflict.

Special Virtues:

Strong affections, sympathy, physical courage, generosity, devotion, quickness of intellect and perception.

Vices:

Self centredness, worrying, inaccuracy, lack of moral courage, strong passions, indolence, extravagance.

Virtues to be acquired:

Serenity, confidence, self control, purity, unselfishness, accuracy, mental and moral balance.

Glamours:

Diffusion of interest and energy. Impracticality and glamour of imagination. Changeableness, vagueness and lack of objectivity. Constant inner and outer conflict, causing argument and acrimony. Dissatisfaction because of sensitive response to beauty and that which is higher and better.

The Ray of struggle Rajas (activity) Tamas (inertia) balanced so man is torn in combat which leads to the "Birth of Horous" of the Christ born from the throes of constant suffering and pain.

Varies from brilliant conversations to gloomy silences,
loves colour.

Approach to healing: Massage and magnetism used with
knowledge.

Approach to path: Self control thus gaining equilibrium
thus gaining balance amongst the warring forces of his
nature. Hatha yoga is said to be very dangerous for this
ray type.

The Fifth Ray - Lower Concrete Mind.

Special Virtues:

Strictly accurate statements, justice without mercy,
perseverance, common sense, uprightness, independence,
keen intellect.

Vices:

Harsh criticism, narrowness, arrogance, unforgiving temper,
lack of sympathy and reverence, prejudice.

Virtues to be acquired:

Reverence, devotion, sympathy, love and wide mindedness.

Glamours:

Constant analysis and splitting of hairs. Criticism.
Over emphasis of form. Cold mental assessment and disparagement
of feeling, intellectual pride, reason 'proof' and
intellectuality are sacrosanct.

The Ray of science and research, orderly punctual. The
Ray of the great chemist, the first rate engineer, the
surgeon.

Approach to Healing: Surgery and electricity.

Approach to path: Scientific research pushed to its
ultimate conclusion and the acceptance of the inferences
which follow.

The Sixth Ray of Devotion

Special Virtues:

Devotion, single mindedness, love tenderness, intuition, loyalty, reverence.

Vices:

Selfish and jealous love, over leaning on others, partiality, self deception, sectarianism, superstition, prejudice, over rapid conclusions, fiery anger.

Virtues to be acquired:

Strength, self sacrifice, purity, truth. tolerance, serenity, balance and common sense.

Glamours:

Fanaticism, possessiveness and over devotion, narrow mindedness, love the the past and existing forms. Reluctance to change. Rigidity. Too much intensity of feeling.

Man on this ray is full of religious instincts and impulses and intense personal feeling. Everything is either perfect or intolerable, he must always have a personal God, the best type is a saint, the worst a bigot, fanatic or martyr. Religious wars and crusades all originated on the sixth ray energy. He is a poet of the emotions (Tennyson). Devoted to beauty and colour.

Approach to Healing: By faith and prayer.

Approach to path: Prayer and meditation aimed at union with God.

The Seventh Ray of Ceremonial Magic or Order.

Special Virtues:

Strength, perseverance, courage, courtesy, extreme care in details, self reliance.

Vices:

Formalism, bigotry, pride, narrowness, superficial judgements, self opinion over indulged.

Virtues to be acquired:

Realisation of unity, wide mindedness, tolerance, humility, gentleness and love.

Glamours:

Rigid adherence to law and order. Over emphasis of organisation and for love of the secret and the mysterious. Psychism. The glamour of ceremonial and ritual. Superstitious, deep interest in omens.

This is the ray of the Court Chamberlain and High Priest, the born organiser, the perfect nurse for the sick. The perfect sculptor, loves processions, ceremonials, military march pasts, naval reviews, genealogical trees.

Approach to healing: Extreme exactness in carrying out orthodox treatment.

Approach to the path: Observance of the rules of practice and of ritual can easily evoke and control the elemental forces.

6. The subtle anatomy analysis sheet II, according to M.G.A. and the rays influence on chakra centres.

Now what is analysis and healing at a distance
(How and why does it work).

7. Hemispheres and dimensions of left and right brain function that enable the practitioner to use symbols and procedures to satisfy the left brain function, which, in turn, allows the right brain function to hold the patient in mind and establish the answers to posed questions. This is the dimension or realm where analysis and treatment takes place. The cards and symbols act to accentuate and direct the visualisation of the healing instruction.

The practitioner does the healing, the instruments are his aid to directing that instruction to his patient. This is why instruments are necessary at the time of analysis.

Hemispheres and Dimensions

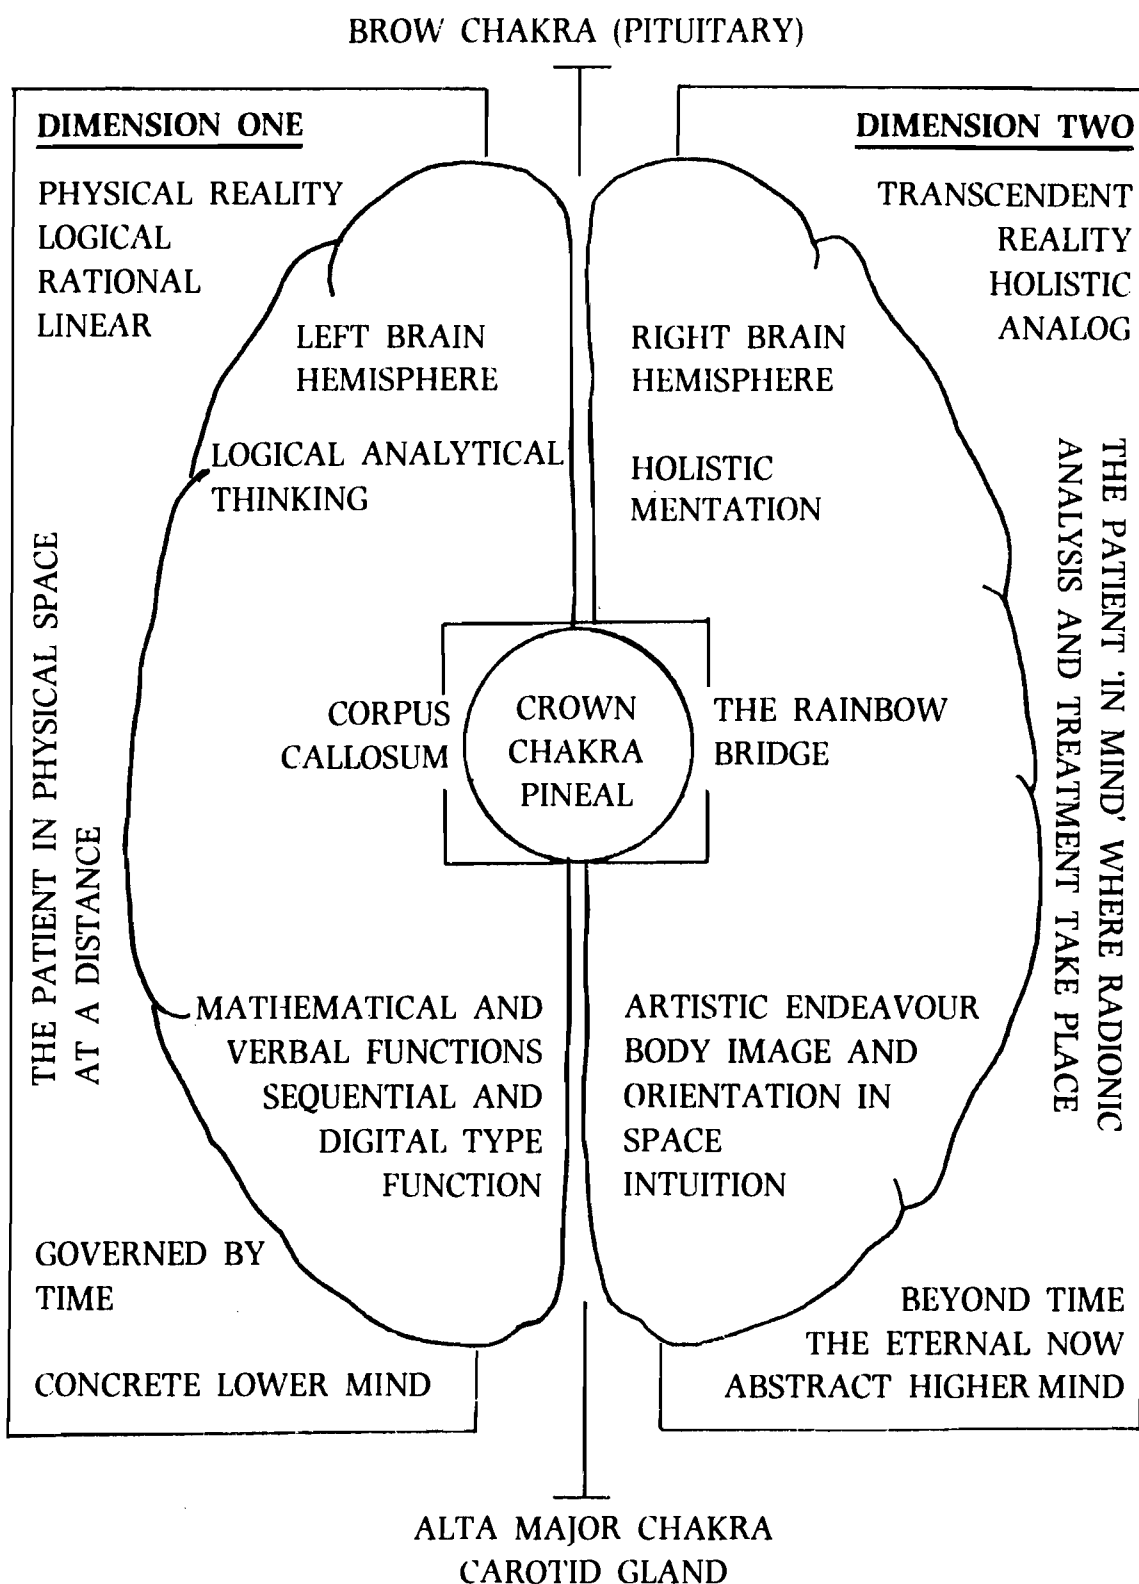

Fig. 6

Diagnosis 'at a distance'

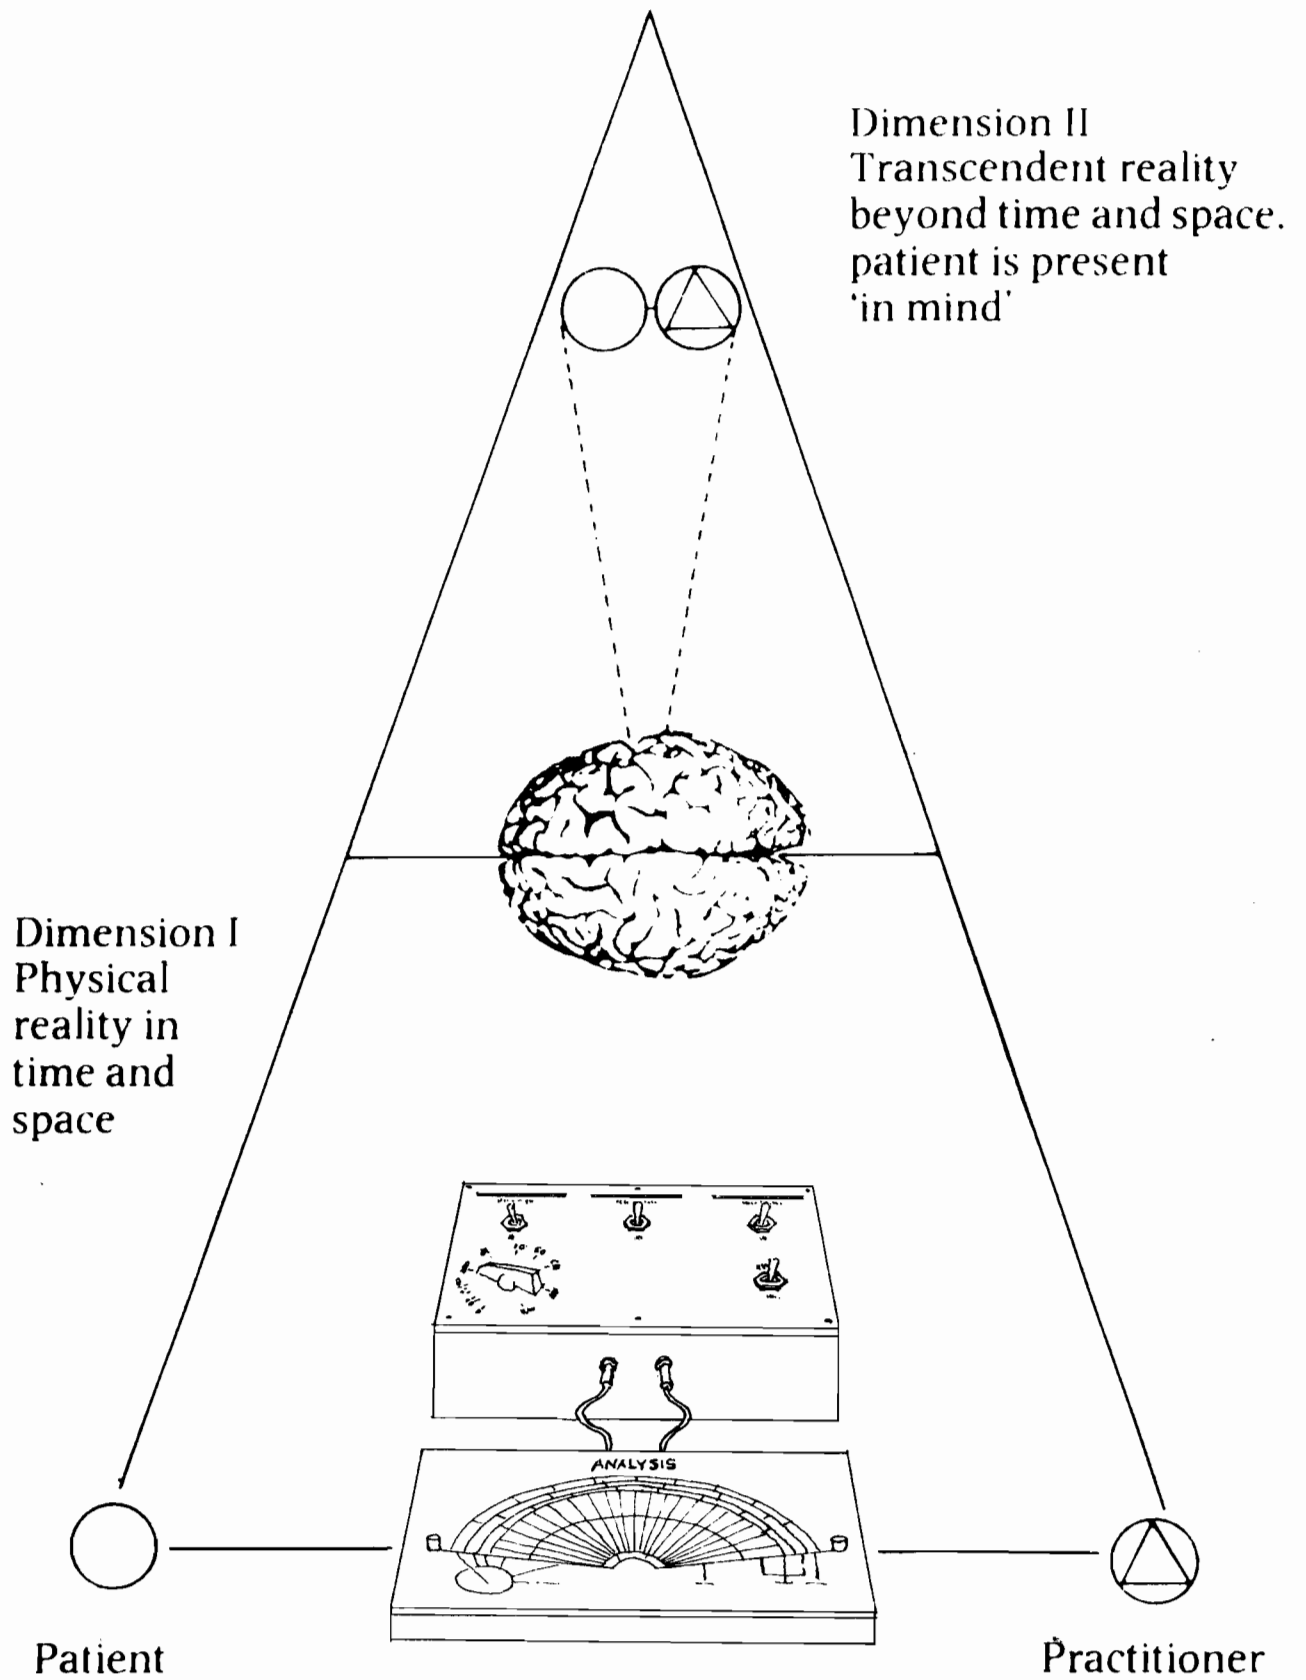

Fig.7

8. At this point it is necessary to discuss the whole concept of radionic analysis and treatment, the full understanding of what we, as practitioners, are undertaking in treating patients and what we are actually analysing and treating.

The following points taken from Dr. David Tansley gives us the basis for discussion.

- a. That the patients witness whether hair sample, blood spot or photograph, does not emit any form of radiation that is any value in analysis and treatment.
- b. There is no link between the patients witness and the patient in physical or parapsychical terms.
- c. Rates used on dial sets have no value in physical terms in that they do not influence the patient. At a distance (broadcast). Note different manufactures of dial sets have different rate numbers for the same organ system.
- d. The analyser and treatment instruments do not have any value in physical terms, but do have the necessary qualities for right hand brain function because of left brain objectification. It is in the area of right brain function that analysis and treatment is carried out.
- e. The unestimable value in rates or the geometric card patterns lies in the fact that they are subliminal images or symbols that contain the power along with the magnetic aspect to stimulate the healing processes in right brain function. The cards or rates are catalytic.
- f. Treatment is carried out via the right brain function where time, space and distance do not exist. Thought transference is instantaneous.
- g. Disease is a choice made by the patient, and response to treatment is equally a master of choice.
- h. Imagination, visualisation and positive beliefs, based on a true knowledge of subtle body healing, will give greatly improved results.

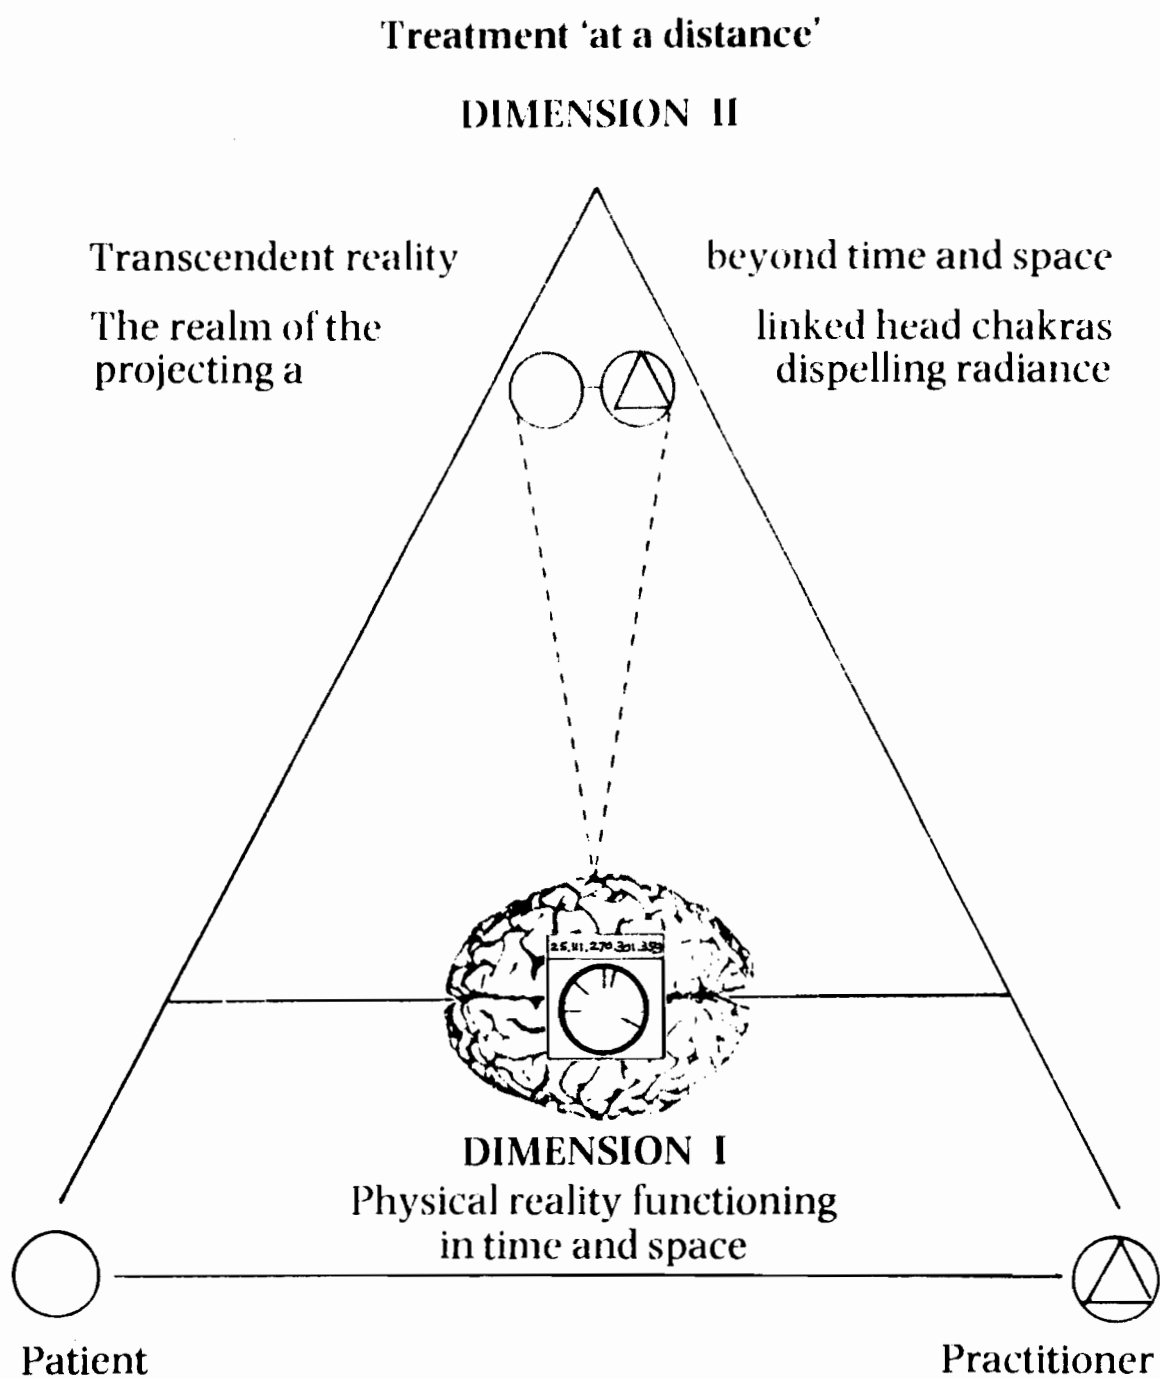

Fig. 8

9. TREATMENT AT A DISTANCE.

Using instruments with the magneto geometric card with its coded instructions provides an interface between the two dimensions.

It is a keying in image which activates the healing process in a way similar to autogenic imagery, except that it is instantaneous in the dimension of the mind, actualisation of the healing process is determined by the practitioner and patient in one transaction. The radionic instrumentation is an adjunct to this inner process of the healing impulse.

10. The Peggotty Board is used extensively by therapists knowledgeable in skeletal conditions and the spinal column. The peggotty board is used for all symptoms related to the spine, hips, joints, the locomotor system in general, all muscular and ligamentous conditions.

No dowsing or analytical procedures are involved with the peggotty, it is purely a treatment instrument.

Once the condition or modality has been established, a rate is decided upon by consulting the rate book or list supplied with the instrument.

Pegs are placed in the squares in the following sequence.

1. Work from right to left top row first.
The unmarked squares are as follows -
Remember right to left 0. 10. 20. 30. 40. 50.
Then cross the double lines start again
50. 60. 70. 80. 90. 100. (note 50 appears twice).
2. Work from right to left second row from top.
The unmarked squares are 0. 1. 2. 3. 4. 5.
cross the double lines 5. 6. 7. 8. 9. 10.
(note 5 appears twice).
(This procedure continues down the board).
3. Always when 50 or 5 occurs in a rate, put the
peg left of centre on the board.

The patients hair sample is placed on the saddle or cradle at the end of the board on centre.

The cradle balances on the fine pointed pin.

COLOUR

General Notes for Lecture II. As additional information.

The use of colour in subtle body healing.

1. Firstly establish what rays the patient is functioning on.
2. Establish what chakra centres are involved and the ray colour involved with that chakra.
3. Establish what colours in combination will open up the chakra centres to the awakened state and yet help to stimulate or sedate the endocrine function involved.

4. Blues, Greens and Yellos are cooling, calming and cleansing. Also they are anti-inflammatory.

Reds, Oranges and Dark colours are stimulating and invigorating to the chakras, also remember that high potencies of homoeopathic remedies emit colour vibrations which act on the subtle body.

SIMULATOR CARDS KEITH MASON

- (A) RESTORE MAJOR CHAKRAS TO THE AWAKENED STATE AS
DIRECTED BY OWN SOUL INFLUENCE. SIMULATOR CARD
READS:-
ALIGNMENT OF CHAKRAS WITH SOUL.
- (B) MENTAL BODY BASE.
- (C) MENTAL BODY GENERATIVE ORGANS.
- (D) MENTAL BODY SOLAR PLEXUS.
- (E) MENTAL BODY SPLEEN.
- (F) MENTAL BODY PLANE OF LOWER MIND.
- (G) MENTAL/ASTRAL/ETHERIC AND PHYSICAL BODIES.
- (H) MENTAL UNIT.
- (I) ALL MIASMS TO BE ELIMINATED IN PHYSICAL ETHERIC BASE.
- (J) ALL MIASMS TO BE ELIMINATED IN MENTAL BODY BASE.
- (K) ALL MIASMS TO BE ELIMINATED IN ASTRAL BODY BASE.
- (L) ASTRAL BODY HEAD (CROWN AND AJNA).
- (M) ASTRAL BODY HEART.
- (N) ASTRAL BODY THROAT.
- (O) ASTRAL BODY BASE.
- (P) ASTRAL BODY GENERATIVE ORGANS.
- (Q) ASTRAL BODY SOLAR PLEXUS.
- (R) ASTRAL BODY SPLEEN.
- (S) ASTRAL BODY PERMANENT ATOM.
- (T) PHYSICAL ETHERIC GENERATIVE ORGANS.
- (U) PHYSICAL ETHERIC SPLEEN.
- (V) PHYSICAL ETHERIC SOLAR PLEXUS.
- (W) PHYSICAL ETHERIC PERMANENT ATOM.
- (X) PHYSICAL ETHERIC HEAD (CROWN AND AJNA).
- (Y) PHYSICAL ETHERIC HEART.
- (Z) PHYSICAL ETHERIC THROAT.
- (ZZ) PHYSICAL ETHERIC BASE.
