

Experimental Triple Decagon Valoriser

Write the witness of the substance (like a homeopathic or herb etc) on a piece of paper in black ink, place it in the centre of the diagram, let the pendulum swing over it until it stops. The Witness is then "Live". You then take the live witness and then place it on top of the target witness in the centre of the next chart on page 2 of this pdf, and let the pendulum swing over it again, and it is 'sent'. The diagram represents two pyramids end on end, and therefore there is light in the centre where the dot is. The ellipse around it represents the Field.
